When the tables do not give the equivalent of any desired quantity directly and completely, the equivalent can usually be obtained, without the necessity of making a multiplication of these reduction factors, by using quantities from several tables, making a shift of decimal points, f sary, and merely adding the results.

The supplementary metric units are fo combining the words "meter," "gram," anc with the six numerical prefixes, as in the f table:

Prefixes		Meaning		Units
milli-	= one-thousandth	$\frac{1}{1000}$	.001	
centi-	= one-hundredth	$\frac{1}{100}$	.01	"meter" for length
deci-	= one-tenth	$\frac{1}{10}$	.1	
Unit	= one		**1**	"gram" for weight or mass
deka-	= ten	$\frac{10}{1}$	10	
hecto-	= one hundred	$\frac{100}{1}$	100	"liter" for capacity
kilo-	= one thousand	$\frac{1000}{1}$	1000	

BASIS OF MEASUREMENT IN PRECEDING TABLES

All lengths, areas, and cubic measures in the tables are derived from the international meter, the basic relation between units of the customary and the metric systems being: 1 meter=39.37 inches.

All capacities are based on the equivalent 1 liter equals 1.000 028 cubic decimeters. The decimeter is equal to 3.937 inches in accordance with the legal equivalent of the meter given above.

The gallon referred to in the tables is the United States gallon of 231 cubic inches. The bushel is the United States bushel of 2 150.42 cubic inches. These units must not be confused with the British units of the same name which differ from those used in the United States.

The British gallon (277.42 cubic inches) is approximately 20 percent larger, and the British bushel (2 219.36 cubic inches) is 3 percent larger than the corresponding units used in this country.

All weights are derived from the Inter Kilogram, as authorized in the Mendenha of April 5, 1893. The relation used is 1 avo pound=453.592 427 7 grams.

A liter (liter) is a unit of capacity equa volume occupied by the mass of 1 kilogram water at its maximum density (at a tem of 4° C, practically) and under the stan mospheric pressure (of 760 mm). It is equiv volume to 1.000 028 cubic decimeters, acco the latest data; the value previously accep 1.000 027 cubic decimeters.

A bushel (bu) is a unit of capacity equa volume of 2 150.42 cubic inches. This is called stricken or struck bushel. A heape for apples of 2 747.715 cubic inches was est by the U. S. Court of Customs Appeals 15, 1912, in United States v. Weber (no. heaped bushel, equivalent to 1¼ stricken is also recognized.

he figures in the above tables (except the 15-19 line in each table) are taken from the "Medico-arial Mortality Investigation" published in 1912.

similar investigation was made in 1929 jointly by the Actuarial Society of America and the ciation of Life Insurance Medical Directors and reported in the "Medical Impairment Study" 9).

he data from this study agreed so closely with those of the previous one that changes in the table e recommended for only those ages below 20.

ccordingly, the figures in both tables (except those in the 15-19 line in each table) represent the lts of the 1912 and 1929 inquiries. The figures for the 15-19 line come from the 1929 study.

The metric carat of 200 milligrams is now very generally in use. The word also is used the proportion of alloy in a metal. Thus, pure gold is 24 carats fine.

U. S. and British Weights and Measures Compared

Source: National Bureau of Standards

ish Imperial bushel = 1.03205 U. S. (Win-r) bushel.
. bushel = 0.96895 British Imperial bushel.
ish quart = 1.03205 U. S. dry quarts.
. dry quart = 0.96895 British quart.
ish quart (or gallon) = 1.20094 U. S. liquid (or gallons).
. liquid quart (or gallon) = 0.83268 British (or gallon).

British gallon, under the act of 1878, is d as the volume of 10 standard pounds of ed water weighed in air against brass weights, air and water at 62 degrees Fahrenheit with arometer at 30 inches and contains 277.42 inches.

U. S. gallon is defined as containing 231 inches.

re are 39.370113 British inches or 39.37 U. S. s in one meter. This difference between the British and the U. S. inch can therefore be neglected in most cases.

The foot came from the length of the king's foot; the old cubit was the length of a forearm; the grain came from the weight of a single grain of wheat "well dried from the middle of the ear"; and the inch originated as the thickness of a man's thumb. Traditionally the acre was the area of ground that a plowman with one ox could turn over in a day.

Often, neighboring countries assigned slightly different lengths to the same unit, such as the foot —which might equal any length from 11.3 to 14 inches. The Greeks recognized three different feet, which were used for three different purposes. In pre-Elizabethan England, the gallon depended upon the usage, that for wine being considerably smaller than the standard for ale.

The height of horses is measured in hands and their weight in stones; paper by the ream, which may be 480 or 500 sheets.

Household Measures

e teaspoon=1⅓ fluid drams; one tablespoon=spoons (level-full measure in each case).
e teaspoon is the household or culinary tea- and not the medical teaspoon.
e quart U. S. dry measure contains 67.20 cubic s.
e quart U. S. liquid measure contains 57.75 inches. One pound of butter displaces approxi-y 31¼ cubic inches as the average butter n is 2½ x 2½ x 5 inches.
e following tables of equivalents are taken the Fannie Merritt Farmer's "The Boston ng School Cook Book."
ew grains=less than ⅛ teaspoon; 16 table-s=1 cup.
ree teaspoons=1 tablespoon; ½ pint=1 cup.
e fluid oz.=2 tablespoons; 1 qt. jar=4 cups.
o pints=1 quart; 4 gills=1 pint.
ht quarts=1 peck.
ir pecks=1 bushel; 4 quarts=1 gallon.

Taken from Aunt Sammy's Radio Recipes. Revised: Three teaspoons=1 tablespoon; 4 tablespoons =¼ cup; 16 tablespoons=1 cup; ½ cup=1 gill; 2 cups=1 pint; 4 cups=1 quart.

The approximate weights of certain common commodities per cup (½ liquid pint) are:

Granulated sugar, butter, lard, and rice—½ pound.
Flour—¼ pound.
Cornmeal—5 ounces.
Stemmed raisins—6 ounces.

A 1-qt. measure holds 1 lb. of wheat flour, soft butter or broken loaf sugar; 1 lb. 2 oz. of corn meal or brown sugar; 1 lb. 1 oz. of powdered white sugar.

There are as a rule 10 eggs to a pound.

Milk at 68° Fahrenheit, weighs 8.60 lbs. a gallon provided it contains 3 per cent of butter fat; cream 8.37 lbs. a gallon, if it has in it 28 per cent of butter fat. When cream contains 40 per cent of fat it weighs 8.28 lbs. a gallon.

Bushel, Basket, Barrel, Cord

shel—Dry measure in the United States is on the old English Winchester bushel. Both ral and State laws fix the bushel as a unit of 42 cubic inches.

e United States Court of Customs Appeals ed (1912), that a "bushel" under the tariff neans a heaped bushel, and that a heaped el should contain 2747.715 cubic inches. Under decision a heaped bushel is 27.8 per cent larger a struck bushel.

sket—The Federal Standard Container Act of fixes standards for baskets and other contain-or small fruits, berries, and vegetables of the following capacities: ½ pint, 1 pint, 1 quart or multiples of the quart, standard dry measure; and standards for Climax baskets for grapes and other fruits and vegetables of the following capacities: 2, 4, and 12 quart, standard dry measure. This act is interstate in application.

Barrel—The U. S. standard barrel for fruits and vegetables (except cranberries) has a capacity of 7,056 cu. in; the U. S. standard barrel for cranberries has a capacity of 5,826 cu. in.

Cord—A cord of wood contains 128 cubic feet. The standard size of a piled cord of wood is 8 feet long, by 4 feet wide, by 4 feet high.

A board foot is 1 ft. x 1 ft. x 1 in.

Electrical Units

Source: National Bureau of Standards

e watt is the unit expressing electrical power rsepower (hp) represents power in mechanics, equal to the product of the volts (pressure)• amperes (rate of flow). Thus, 2 volts times peres would give in a direct current circuit 4 . Electrical energy is sold at so much per hour or more generally at a given amount ilowatt hour—which means 1,000 watt hours. may represent 1 watt for 1,000 hours or 1,000 for 1 hour. 746 watts are equal to one horse-power or inversely 1 kilowatt (kw) is equal to about 1⅓ horsepower.

The horsepower represents the power required to lift a weight of 33,000 pounds 1 foot in 1 minute or 550 pounds 1 foot in 1 second.

The ohm is the unit of electrical resistance and represents the physical property of a conductor which offers a resistance to the flow of electricity, permitting just 1 ampere to flow at 1 volt of pressure.

Ancient Greek and Roman Weights and Measures

WEIGHTS

an libra (pound) = 10 oz. 18 pwt. 13 5-7 gr., Troy.
mina (pound) = 11 oz. 7 pwt. 16 2-7 gr., Troy.
talent (60 minae) = 56 lbs. 11 oz. 0 pwt. 17 1-7 , Troy.

DRY MEASURE

an modus = 1 peck 2-9 pint.
choenix = 70 cu. in. = nearly 1½ pints.
dimnus = 3360 cu. in. = about 1½ bushels.

LIQUID MEASURE

cyathus = 2.9 cu. in. = nearly ½ gill.
Cotyle = 6 cyathus = 17.5 cu. in. = a little over ½ pint. Chous = 12 cotyles = 210 cu. in. = .909 gall.

LONG MEASURE

Roman foot = 11 3-5 inches.
Cubit = 17.4 inches.
Pace = 4 ft. 10 inches.
Furlong = 604 ft. 10 inches.
Mile = 4,835 feet.

Grecian cubit = 18.25 inches.
Furlong = 504 ft. 4 1-5 inches.
Mile = 4,030 feet.

Density (Actual Weight) of Chemical Elements

Smithsonian Institution Physical Tables, grams per cubic centimeter. To reduce to pounds per cubic foot, multiply by 62.4

s in parentheses indicate numbers are doubtful; < indicates value is too high; > value is too alue is greater than number given; — smaller than number given.

Multiplication and Division Table

A number in the top line (19) multiplied by a number in the last column on the left (18) produces the number where the top line and the side line meet (342), and so on throughout the table. A number in the table (342) divided by the number at the top of that column (19) re number (18) at the extreme left; also, the table (342) divided by the number extreme left gives the number (19) at the column, and so on throughout the

Areas of Circles

To find the circumference of a circle multiply the diameter by 3.14159265 (commonly expressed as 3.1416). To find the area of a circle multiply the square of the diameter by .785398 (usually expressed as .7854). To find the cubic contents of a cylinder or pipe, multiply the area by the height or depth. Thus, a pipe 1 foot in diar foot in length contains .7854 cubic fe how many gallons are contained in cylinder, divide the cubic contents by 2 the number of cubic inches in a U gallon.

CIRCLE AREAS IN EIGHTHS OF A UNIT

Diameter	Circumference	Area	Diameter	Circumference	Area	Diameter	Circumference	Area	Diameter	Circ fere

A square is equal in area to a circle when the side of the square equals 0.88623 multiplied by the diameter of the circle; or when the diameter of the circle equals 1.12838 multiplied by the side of

Any straight line extending from t a circle to the circumference is called

Factors and Prime Numbers

tors are such numbers as multiplied together will produce a required number.
rime Number is one that cannot be resolved into two or more factors; or, it is a number exactly
ple only by itself and unity.
Composite Number is one that can be resolved into factors.

To reduce Fahrenheit to Centigrade, subtract 32 degrees and multiply by 5/9; to reduce Ce to Fahrenheit, multiply by 9/5 and add 32 degrees; to reduce Reaumur to Centigrade, multiply

Wedding Anniversaries

Source: Jewelry Industry Council

The Jewelry Industry Council, in cooperation with the American National Retail Jewelers tion, the National Association of Credit Jewelers and the National Wholesale Jewelers Asso issued a new and revised wedding anniversary list, effective Jan. 1, 1948. By agreement w American National Retail Jewelers Association the new list replaced the one authorized Association in 1937. The lists follow:

1948	1937
1st—Clocks	Paper
2nd—China	Cotton
3rd—Crystal, glass	Leather
4th—Electrical appliances	Books
5th—Silverware	Wood, clocks
6th—Wood	Iron
7th—Desk, pen and pencil sets	Copper, bronze or brass
8th—Linens, laces	Electrical appliances
9th—Leather	Pottery
10th—Diamond jewelry	Tin, aluminum
11th—Fashion jewelry, accessories	Steel
12th—Pearls or colored gems	Silk or linen
13th—Textiles, furs	Lace
14th—Gold jewelry	Ivory
15th—Watches	Crysta
16th—Silver hollowware	
17th—Furniture	
18th—Porcelain	
19th—Bronze	
20th—Platinum	China
25th—Sterling silver jubilee	Silver
30th—Diamond	Pearl
35th—Jade	Coral,
40th—Ruby	Ruby
45th—Sapphire	Sapph
50th—Golden jubilee	Gold
55th—Emerald	Emera
60th—Diamond jubilee	Diamo

TRADITIONAL LIST RECOMMENDED BY SOCIAL AUTHORITIES

1st—Paper. 2nd—Cotton. 3rd—Leather. 4th—Fruit and Flowers, Silk. 5th—Wooden. 6th—Su Candy, Iron. 7th—Woolen or Copper. 8th—Bronze or Pottery. 9th—Willow or Pottery. 10th— Aluminum. 11th—Steel. 12th—Silk or Linen. 13th—Lace. 14th—Ivory. 15th—Crystal. 20th— 25th—Silver. 30th—Pearl. 35th—Coral. 40th—Ruby. 45th—Sapphire. 50th—Golden. 55th—E 60th and 75th—Diamond.

Flower of the Month

January—Carnation or Snowdrop. February—Violet or Primrose. March—Jonquil or Daffodil. Sweet Pea or Daisy. May—Lily of the Valley or Hawthorn. June—Rose or Honeysuckle. July—L or Water Lily. August—Poppy or Gladiolus. September—Aster or Morning Glory. October—Ca or Cosmos. November—Chrysanthemum. December—Narcissus or Holly.

Baby Colors—Blue for boys. Pink for girls.

National Geographic Society

(Prepared by Gilbert Grosvenor, LL.D., Litt.D., President)

National Geographic Society was founded in
for the increase and diffusion of geographic
dge." It has played such an important role
oration and the advancement of science, and
effectively interpreted and illustrated geog-
for the layman, that its membership exceeds
00, its researches and expeditions range to
ds of the earth, and its dissemination of
phic and other scientific knowledge extends
countries of the world.

May 19, 1949, The Society celebrated the
Jubilee of Gilbert Grosvenor, who has
The Society's activities and served as editor
National Geographic Magazine for fifty
In recognition of his work, the Board of
es established the Grosvenor Medal for
ributions to Geography." Dr. Grosvenor
ie first recipient of the medal.

peditions, Explorations and Observations

Society pioneered in the study of Alaska. It
ted Peary in his expedition that culminated
attainment of the North Pole. It sent an
tion to Greenland, with the United States
cooperating, through which Rear Admiral
acquired the far northern flying experience
arried him to both of the earth's Poles.
a series of expeditions led by Dr. Neil M.
the pre-Columbian city of Pueblo Bonito
aco Canyon, N. M., was unearthed and
ed. Other expeditions based on the work
eblo Bonito, led Dr. Andrew E. Douglass to
late a tree-ring calendar which extends the
logy of the southwestern United States back
nt centuries before Columbus.

editions of the Society led by Dr. Joseph F.
explored gorges of the Yangtze River, rivaling
of the Grand Canyon and sent back to Amer-
rich collection of rare, ancient ceremonial
which are now in the Library of Congress.

Society has encouraged public interest in
al Parks and conservation. At a cost of
00 it purchased and presented to the Govern-
2,239 acres of the finest giant sequoia and red
llow pine within the Sequoia National Park.
934, the Society in cooperation with the New
Zoological Society made a series of deep sea
ations off Nonsuch Island, Bermuda, under
adership of Dr. William Beebe. A world
depth of 3,028 feet was attained.

934 the Society and the United States Army
rps jointly sent up from the Black Hills of
Dakota the Explorer, with a gas capacity of
00 cubic feet, the largest free balloon ever
ucted, which reached an altitude of 60,613
On Nov. 11, 1935, the late Lt. Col. A. W.
s and Major O. A. Anderson (now
Gen.), piloted Explorer II, with a capacity
cubic feet greater, to a record height of
feet.

hey W. Stirling, leader of the National Geo-
c Society-Smithsonian Institution Archaeo-
Expedition to Veracruz, Mexico, in
iscovered the oldest dated work of man in
nericas, a Mayan stela bearing a date equiva-
o Nov. 4, 291 B. C. (Spinden correlation).
overies made by annual expeditions to
and Panama since 1939 have included an
t civilization which Dr. Stirling named "La
Culture." The practicality of helicopters in
ological field work was proved in 1949, when
ribbean Air Command, U. S. Air Force, made
achines available. Pottery uncovered in
a suggested an entirely new culture may
been unearthed.

er the direction of Dr. Lyman J. Briggs
ational Geographic Society, the Army Air
; and the Bartol Research Foundation co-
ed in the summer of 1946 in researches on
riation of cosmic ray intensity at various
es over a range of latitude extending from
grees North Latitude to 20 degrees South
de.

oint expedition of the National Geographic
y and the U. S. Army Air Forces observed
tal solar eclipse of May 20, 1947 from a base
near Bocaiuva, Brazil. The expedition ob-
a large number of photographs of the
and the corona including special photo-
c studies of star fields near the limb of the
sun for use in calculations to test the Einstein "Shift" Theory.

The Society in conjunction with the U. S. Army, Navy, Air Force, Bureau of Standards, Coast and Geodetic Survey, and State Department set up seven stations along a 5,320-mile arc from Burma through Siam, China, Korea, Japan and the Aleutian Islands to make observations of the solar eclipse on May 8-9, 1948, in an effort to determine the shape and size of the earth with greater accuracy than has hitherto been possible.

Dr. Arthur A. Allen, leader of an expedition in which The Society, Cornell University, and the Arctic Institute of North America cooperated, in the summer of 1948 located and photographed the nesting place of the bristle-thighed curlew, the only North American bird whose breeding ground had never previously been found. During the same year The Society joined with the Smithsonian Institution and the Australian Government in sending scientists into Arnhem Land, Australia, to study the aborigines in their native environment.

A specimen of Nepal's spinny babbler, the first obtained for science in 106 years, was among the prizes secured by the 1948-49 expedition led by Dr. Dillon Ripley for The Society in cooperation with the Smithsonian Institution and Yale University.

Expeditions in 1949

Expeditions in 1949 included one to Venezuela under Dr. Paul A. Zahl to obtain color photographs of the scarlet ibis. Dr. Arthur A. Allen continued recording native birds in color and sound, visiting Georgia, Florida, North Dakota, and New York.

The National Geographic Society-Palomar Observatory Sky Survey was initiated in July 1949. This four-year project is expected to result in the world's first definitive Sky Atlas. Using the Schmidt telescopic camera and a technique similar to that followed by aerial photo mappers in World War II, astronomers can photograph regions 300 million light years from the earth.

In its work of diffusing geographic knowledge, the Society relies principally on its publication, the National Geographic Magazine, which is sent to every member. For the benefit of specialists, The Society has published monographs giving the technical results of expeditions. These supplement the popular narratives in The Magazine.

The Society maintains a Cartographic Division which compiles maps of all continents and oceans and other major regions. These maps are drawn, published and distributed by the Society to its entire membership. During the recent war a number of maps were prepared in close cooperation with American military authorities to incorporate features especially useful to the Army, Navy and Air Forces. The New Map of Europe and the Near East shows the changes in sovereignty authorized by the five World War II treaties signed by April 1, 1949. Of the 8,000 names on the map, 1,000 represent either new spellings or entirely new designations.

Exhibits in Washington

The Headquarters of the National Geographic Society in Washington contains galleries for the exhibition of enlarged photographs taken by its specialists in all parts of the world. The Society maintains a geographic library of 20,000 volumes, including some 300 scrapbooks on the polar regions compiled by the late Maj. A. W. Greely; the publications of the Hakluyt Society; and an extensive collection on national flags.

The Society has awarded the Hubbard Gold Medal for outstanding achievements in the field of geography to Peary, Amundsen, Gilbert, Shackleton, Stefansson, Bartlett, Byrd, Lindbergh, Andrews, Anne Morrow Lindbergh, Stevens, Anderson, Ellsworth and Gen. Arnold. It also awarded special gold medals to Peary, Amundsen, Goethals, Floyd Bennett, Eckener; Byrd, Amelia Earhart and Thomas C. Poulter.

The officers of the Society are: President and Editor, Gilbert Grosvenor; Vice President and Associate Editor, John Oliver La Gorce; Secretary, Thomas W. McKnew; Treasurer, Robert V. Fleming; Committee on Research, Chairman, Lyman J. Briggs; Vice-Chairman, Alexander Wetmore.

Roman and Arabic Numerals

Source: Historical Records

I	1	VI	6	XI	11	XVI	16
II	2	VII	7	XII	12	XVII	17
III	3	VIII	8	XIII	13	XVIII	18
IV	4	IX	9	XIV	14	XIX	19
V	5	X	10	XV	15	XX	20

XXX	30	LXXX	80	CCCC	400	CM	900
XL	40	XC	90	D	500	M	1000
L	50	C	100	DC	600	MCM	1900
LX	60	CC	200	DCC	700	MM	2000
LXX	70	CCC	300	DCCC	800		

—A dash line over a numeral, multiplies the value by 1,000: thus, $\overline{X}$=10,000; $\overline{L}$=50,000; $\overline{C}$=
; $\overline{D}$=500,000; $\overline{M}$=1,000,000; $\overline{CLIX}$=159,000; $\overline{DLIX}$=559,000.

r general rules in Roman numerals are as
: (1), repeating a letter repeats its value—
; CCC=300; (2), a letter placed after one
ater value adds thereto—VI=6; DC=600;
(3), a letter placed before one of greater value subtracts therefrom—IV=4.

Arabic numerals are those now commonly in use —0, 1, 2, 3, 4, 5, 6, 7, 8, 9, etc.

What Was Said in 1949

"Television is wonderful stuff, now that people can see in person what they only used to dislike by ear."—Arthur Godfrey.

"It is better to marry than to earn."—Harford Powell's advice to young women in "Good Jobs for Good Girls."

"There are more children over 40 in America than anywhere else in the world."—Leonard Wayman, British author, in "Moonshine America."

"The twin blights of a democracy are politicians who scoff at ideals and idealists who sneer at politics."—Paul A. Potter.

"We spent money through pipelines for war, and through eye-droppers for welfare and security."—Louis Wirth.

Author vs. Machine

"Every line I write is in longhand. I have never found a typewriter through which the subconscious seemed able to penetrate, but it seems to flow right through a fountain pen. Besides no typewriter can spell, but I find that my pen spells very well indeed."—W. Somerset Maugham, interview.

Traitors?

"I have no comment to make on the statements by traitors"—President Truman's reply, when asked about declaration of officers of the Communist party that they would oppose "the predatory war aims of American imperialism." Mar. 3.

Functions of a Critic

"Critics are required to be interesting about the uninteresting, to bring literary competence to bear on the literary incompetent, to be readable about the unreadable. The greatest asset a critic possesses is a hard core of plain common sense."—John Crosby, Herald-Tribune, Apr. 13, 1949.

Thirteen Men in the Kremlin

"It is certain that Europe would have been communized and London under bombardment some time ago but for the deterrent of the atomic bomb in the hands of the United States.

"We may well ask why have they (the Russian leaders) deliberately acted so as to unite the free world against them? It is because they fear the friendship of the West more than its hostility. Thirteen men in the Kremlin, holding down hundreds of millions of people and aiming a[t] of the world, feel that at all costs they [must] up the barriers. Self-preservation, not [only] but for themselves, lies at the root a[nd] explanation of their sinister and malignan[t]—Winston Churchill at Massachusetts In[stitute] Technology, March 31, 1949.

The Facts of Life

"I should prefer that my own daughters [learn] facts of life and the literature of the wo[rld] library, than behind a neighbor's barn, [to] face the adversary there directly."—Cu[rtis] judge of the Court of Quarter Sessions, [Philadel]phia, in denying contention of the Comm[onwealth] that certain dealers sold obscene books, [Mar.] 1949.

Aim of a University

"A university aims to advance knowled[ge] improve society, and it aims to do so b[y] center of independent thought . . . In this [age] service-station conception, the vocational conception, the social-ladder conception [and] gladiatorial conception of universities are [ri]lous and irrelevant."—Robert M. Hutchi[ns] cellor of the University of Chicago.

When News Wasn't News

"When all of the New York papers put [on the] front pages a record of the weather, it is i[n] news. I was brought up in an era when [we were] not supposed to notice temperatures. If it [was] you were hot—and that was that. If it [was] and you were cold, that was that, and [our] plaints were allowed on such minor disc[omforts]—Mrs. Eleanor Roosevelt, New York Wo[rld-Tele]gram.

Mary Garden on Singers

"Each great city should have an ope[ra] that plays all the year 'round. America[ns] should train in Europe; they lack fun[ds] training. Singers should choose what [to do] life. They should either choose a great [career] marriage, but not both."—Mary Garde[n] interview, Sept. 13, 1949.

Dictators and Human Nature

"Hitlers stupendous error was to unde[r]estimate the forces of human nature. Dictators are [blind] this error because they are cut off fro[m] and the human world. It happens that n[o] the earth is more full of human nature [than the] Balkans."—Anne O'Hare McCormick, N[ew York] Times, Sept. 19, 1949, in commenting [on] Soviet fight on Tito.

Who Said That? Historic Statements

". . . that government of the people, by the people, for the people shall not perish from the earth."—Abraham Lincoln, Gettysburg address, Nov. 19, 1863. Originally expressed by Theodore Parker, Boston, whose tract against slavery Lincoln read.

"Liberty and union, now and forever, one and inseparable."—Daniel Webster, Jan. 26, 1830.

"You shall not press down upon the brow of labor this crown of thorns; you shall not crucify mankind upon a cross of gold."—William Jennings Bryan, Chicago, July 10, 1896.

"I would rather be right than be president."—Henry Clay. He was defeated for president three times.

"The world must be made safe for democracy."—Woodrow Wilson, asking declaration of war against Germany, April 2, 1917.

"If a man can write a better book, preach a better sermon, or make a better mouse-trap than his neighbor, though he builds his house in the woods, the world will make a beaten path to his [door]—Ralph Waldo Emerson in lecture at Oakl[and], May 18, 1871.

"They hired the money, didn't they?"—Coolidge, in discussing war debts owed [U.S.] 1925.

"What this country really needs is a g[ood] cigar."—Thomas R. Marshall, vice presid[ent].

"Speak softly and carry a big stick; y[ou will go] far."—Theodore Roosevelt, Sept. 2, [1902] American foreign policy.

Entangling Alliances

"It is our true policy to steer clear of p[ermanent] alliance with any portion of the foreig[n world] Taking care always to keep ourselves, b[y] establishments, on a respectable defensiv[e posture] we may safely trust to temporary allianc[es for] traordinary emergencies."—George Wa[shington] Farewell Address, Sept. 17, 1796.

"Peace, commerce and honest friendshi[p with] nations—entangling alliances with none,"[—Thomas] as Jefferson, Mar. 4, 1801.

HOOVER COMMISSION REPORT

anization of Executive Branch Proposed to End Duplication in Jobs and Expenditures

ommission on Organization of the Execu- anch of the Government was established 1947, by an Act of Congress, passed unani- The commission was composed of 12 mem- Democrats and 6 Republicans, and Herbert only living ex-President, was chosen chair- d Dean Acheson, who later became Secre- State, vice chairman. An appropriation of 50 was voted for expenses, and Chairman recruited 300 political economists and ex- a various fields of government activity who, ed into 24 "task forces," at once began ive studies of the Executive Branch.

one and a half years, the commission, on 1949, issued the first of a series of exten- alyses of the departments and agencies in cutive Branch, together with recommenda- r their reorganization along more modern, and economical lines. The 18th and final was sent to Congress April 1. A summary reports and recommendations follows:

ANAGEMENT OF EXECUTIVE BRANCH

multitudinous departments and agencies, ing 65 and composed of 1,816 component with 2,092,180 employees, have created di- esponsibility, waste and duplication, render- impossible for the President to supervise ffectively. **Recommendations**—The number rtments and agencies should be reduced to 3. Capable junior administrators should be and, as an incentive, the pay of career raised. The President should have a new ecretary, a personnel adviser, an economic to replace the existent three-man Council nomic Advisers, and sufficient funds for ad- commissions, consultants and personal s.

. BUDGETING AND ACCOUNTING

present budgeting and accounting systems iformity and, as a result, appropriations for ne services appear in many different places. **mendations**—Adoption of a "performance " based upon the functions, activities and s of the departments and agencies, to give picture of both accomplishment and cost facilitate Congressional examination of ng requirements. The appropriations should er a single title instead of being scattered a variety of titles. A new accounting service be set up in the Treasury Department with puntant General who, under the Comptroller l, would decentralize auditing.

I. OFFICE OF GENERAL SERVICES

estimated value of supplies kept by Federal ments and agencies is $27,000,000,000. Each ne Government buys $6,000,000,000 worth of nal supplies and spends $1,000,000,000 for rting its property. Government records in led 18,000,000 square feet of floor space, the ent of six Pentagon buildings and having a value of $20,000,000 a year. **Recommenda-** Creation of an Office of General Services to the purchase of Federal supplies and to take he management of Government records. on of the Federal Bureau of Supplies in the ry and transfer of 50 percent of all public to record centers, cutting storage costs 90 .

IV. PERSONNEL MANAGEMENT

ralization of personnel supervision in the ervice Commission has resulted in too much e, leading to a turn-over of about 500,000 of vernment's 2,000,000 employees annually and the machinery for recruiting and examin- v workers. The pay rates in many classifica- especially the higher ones, are inadequate. **mendations**—The C. S. C. activities should ricted to setting and enforcing standards, ng procedures and handling appeals. Each ment or agency should have authority to , examine, hire and discharge its own work-

V. FOREIGN AFFAIRS

use conduct of various phases of U. S. policy is assigned to the State Department other major departments and agencies, there h inefficiency, confusion and duplication. The officials in charge of shaping foreign policy are often overworked and uninformed. Another drawback is the semi-independent status of the Foreign Service whose attachés are career men. **Recommendations**—The State Department should be completely reorganized and given authority over the activities of the other governmental units engaged in foreign affairs. Congress should avoid creating new foreign affairs bodies with such exceptions as the Economic Cooperation Administration. The State Department and the Foreign Service should be amalgamated, with their employees available for service either abroad or at home and at the same salary levels. The department should have adequate funds to employ experts as representatives at international conferences or on organizations, making it unnecessary for the Secretary of State and his chief assistants to leave Washington to meet each individual situation. The Secretary's personal staff should be enlarged, and the department should be relieved, in general, of the responsibility of operating specific programs at home and abroad, excepting the Voice of America, the Educational Exchange and similar programs.

VI. NATIONAL SECURITY ORGANIZATION

The Unification Act of 1947, setting up the National Military Establishment, falls short of essential needs. Instead of cooperation and balance among the Army, the Navy and the Air Force, there are interservice rivalries, and teamwork is lacking among such subordinate units as the Research and Development Board, the Joint Chiefs of Staff and the Central Intelligence agencies. Also, the authority of both the President and the Secretary of Defense is curtailed by the 1947 law. **Recommendations**—The Secretary of Defense should be given full authority over the three armed services, whose heads, to clarify their positions, should be designated as Under Secretaries. He should overhaul the N. M. E.'s budget system by adopting "performance budgets" and introducing uniform budgeting and accounting practices. The Central Intelligence agency should be streamlined, and plans for civilian and industrial mobilization and for defending the country against unconventional warfare should be completed without delay. The Secretary's personal staff should be increased and he should be given authority to appoint a chairman of the Joint Chiefs of Staff.

VII. TREASURY DEPARTMENT

The department's vast growth during the 1929-1949 period have made its organization and methods obsolete. Revenues have risen from $4,000,000,000 annually to $40,000,000,000 and the national debt has soared from $17,000,000,000 to $252,000,000,000. **Recommendations**—The department should be thoroughly reorganized to work more economically and efficiently. The Bureau of Federal Supplies should be incorporated in the new Office of General Services, the Coast Guard in the Department of Commerce and the Bureau of Narcotics in the Department of Justice. On the other hand, the Reconstruction Finance Corp., the Export-Import Bank and the Federal Deposit Insurance Corp. should be transferred to the Treasury. All officials below the rank of Assistant Secretary should be appointed from career lists, without Senate confirmation.

VIII. POST OFFICE

Except for a few wartime years, the Post Office has been operating at a deficit for 20 years. In 1948 the deficit was $310,000,000, or 22 percent of the total cost of $1,723,795,000, although its profitable services—first class mails, certain categories of foreign mails and the Postal Savings System—showed a surplus of $190,000,000. The administrative structure is out of date. **Recommendations**—The Post Office should be taken out of politics. The tradition of appointing as Postmaster General the chairman of the national party in office should be abolished and the practice of giving top jobs to political appointees—in 1948 there were 22,000 such jobholders among the department's 470,000 employees—should be scrapped and a career service substituted with promotions open to all. The Postmaster General should be relieved of operating details which should be assigned to a Director of Posts. Congress should continue to set rates for

first to fourth class mails, but the Postmaster General should be authorized to set rates for registered, special delivery and insured mails, money orders and other services to make them self-supporting. Mail subsidies to airlines and shipping companies should be paid to the department by open appropriation and not charged to the department and mail users in the former hidden manner.

IX. AGRICULTURE

Because of the Agriculture Department's expansion from 22,000 employees and $25,800,000 in expenditures to 82,000 employees and $834,000,000 within 20 years, some 20 offices have been developed to supervise agricultural activities, causing diffusion of authority, overlapping, duplication and conflicting policies. The establishment of several different farm credit agencies contravenes sound banking principles and costly individual supervision over some loans is required. **Recommendations**—A thorough overhaul of the department should effect savings of $80,000,000 annually. The functional activities should be channeled through eight major divisions, and the department given full authority over all land agencies, such as soil conservation, range, forest and allied services. All regulatory functions relating to food products, now scattered among five departments, should be transferred to the Department of Agriculture and those relating to other products should be placed under a reorganized Drug Bureau administered by the Public Health Agency.

X. INTERIOR

A major conflict between the Department of the Interior and the Army Engineer Corps has resulted in duplication, division of authority and waste of natural resources, particularly in the development of the nation's water basins. **Recommendations**—The department should be vested with full responsibility for development of water and mineral resources, and take over from the Army Engineers the flood control and river-and-harbor programs. Those of the 200 Army Engineers in charge of this work who can be spared from military service should be assigned to the department. The department also should take charge of the public building construction and community services programs from the Federal Works Agency and various other major construction projects from other agencies. The Bureau of Indian Affairs should be transferred to a new department; the Bureau of Land Management (except minerals) to the Department of Agriculture, and the Division of Commercial Fisheries to the Commerce Department.

XI. COMMERCE

Supervision of transportation activities is spread among many separate agencies with the result that there is no coordination of policies. The amounts of subsidies to mail carriers are obscure under the existing system of appropriations and accounting. Research and planning of transportation for national defense are inadequately centralized. **Recommendations**—The operational and promotional activities of the Interstate Commerce and Maritime Commissions and the Civil Aeronautics Board should be placed under the Department of Commerce, but they should retain their regulatory functions. The department should absorb the National Advisory Committee for Aeronautics, Public Roads Administration, Office of Defense Administration and, possibly, some maritime functions of the Customs Bureau. The Secretary of Commerce should have the duty of making over-all route programs for land, water and air transportation.

XII. LABOR

The Department of Labor has been denuded of many of its functions, including the U. S. Employment Service, Immigration and Naturalization Service, Children's Bureau (except labor functions) and its conciliation activities. As a result, it is overmanned at the top level, having a Secretary, an Under Secretary and three Assistant Secretaries, although it has only 3,400 employees and a $16,000,000 annual budget. **Recommendations**—The department should be given additional essential work so that it will regain a significance comparable to other executive departments. It should take over the Selective Service System so that it can observe the effect of the draft on the nation's labor forces, insuring, at the same time, that Selective Service remains in civilian hands instead of being transferred to the Secretary of Defense. The department should take over, from the Federal Security Agency, the Bureau of Employ... pensation, Employees Compensation Appe... Bureau of Employment Security and some of the Division of Industrial Hygiene; Maritime Commission, determination of wages for seamen, and, from various de... and agencies having authority to let con... enforcement of labor standards.

XIII. MEDICAL ACTIVITIES

In the 1947-48 fiscal year, 40 Federa... including the Veterans Administration Armed Services, spent $1,250,000,000 ... some kind of medical care for 24,000,000 ... one-sixth of the population. Althoug... ment hospitals with a capacity of 25... have 100,000 vacant beds, the Veteran... istration alone has contracted for, or is... 38,000 additional beds at a cost ranging ... 000 to $51,000 per bed, compared with ... of $16,500 per bed in voluntary hospitals. **mendations**—A United Medical Adm... should be established to take over th... ment's large-scale activities in the fields ... care, medical research and public health, preventive medicine. The administrat... new agency should be assisted by the ... General of the Army and Navy, the A... and the Veterans Administrator or his ... tive. Congress should define the benefi... titled to medical care from the Govern...

XIV. VETERANS AFFAIRS

The Veterans Administration was unp... handle the 14,900,000 veterans added t... by World War II. Serious organizatio... are due to conflicts of authority between ... ton officials and line officers, a divers... visional units and an excessive numbe... officers, causing divided responsibility, ... and a high personnel turnover. **Recomm... —Establishment of a separate Veteran... surance Corp. to handle 7,000,000 outsta... cies with a face value of $40,000,000,00... Veterans Benefit Service to administer ... retirement benefits, disability compens... guardianships. Also consolidation of ... rehabilitation, education and readjustm... ance programs, as well as the loan gu... service in a Readjustment Service.

XV. REGULATORY COMMISSIO

The nine regulatory commissions— ... Commerce, Federal Power, Federal Tr... Maritime, Securities and Exchange, a... Communications Commissions, Civil A... Board, Federal Reserve Board and Nati... Relations Board—are handicapped by too... tape, insufficient delegation of authori... chairmen to their staffs, and neglect of p... and planning functions as a result of ... concentration on case-by-case activities. **mendations**—All administrative res... should be vested in each commission ... assisted by an executive director. The ... all commissioners and board members ... of staff members should be raised. Th... sions should have a bipartisan membe...

XVI. SOCIAL SECURITY AND EDU...

A Cabinet-rank department should be ... deal with problems of social security a... tion. In 1948, the Federal Old Age and ... Insurance Fund ("social security") col... 688,000,000 in payroll taxes and paid out ... 000. Federal grants-in-aid to States f... assistance, dependents, the blind, educ... other welfare purposes totaled $800,000... new Department of Social Security and ... should be headed by a Secretary, an Un... tary and three Assistant Secretaries. It s... over most of the functions of the existi... Security Agency, including the Bureau ... and Survivors Insurance, Bureau of ... sistance, Children's Bureau, Bureau of ... Bureau of Vocational Rehabilitation a... institutions. The department should a... educational programs and expenditures ... $2,500,000,000 annually, and assist the ... in making recommendations to Congres... recting deficiencies and coordinating Fe... activities. Of the total spent, $2,000,00... veterans' education, including institu... farm training, vocational and physical ... tion, and education for non-military sub... in the military establishment; $166,0... activities related to elementary and ...

education, and $257,000,000 for activities to higher education. The department also ake over the Bureau of Indian Affairs from erior Department, to raise the standard of mong 400,000 Indians and gradually inte- em in the mass of the population as full, ing citizens.

VII. OVERSEAS ADMINISTRATION

o conflicting responsibilities between the epartment on one hand and the Army and gencies on the other, the Government's s activities, costing $5,650,000,000 a year, en characterized by confusion, inconsisten- d uncertainty of policy and program. **Rec- dations**—A new Administration of Overseas should be established under the direct con- the President, with the State Department g on policy and the National Military Estab- t on logistics. The new agency's activities embrace occupied areas, the Economic Co- on Administration, foreign property liquida- tion, territories, island possessions and dependent areas.

XVIII. FEDERAL-STATE RELATIONS

The grants-in-aid system, under which funds derived from Federal taxes are made available to States and their political subdivisions for specified public projects, has provided needed standards for public services throughout the country—services that many States were unable to supply. But this policy has resulted in expansion of the national tax base to an extent that it limits the revenue-raising potentialities of States and localities and restricts their initiative in undertaking public service programs of their own. **Recommendations**—The Federal, State and local tax systems should be overhauled to protect State and local governmental revenues and correct duplication and even triplication of income taxes. The grants-in-aid program should be clarified and systematized, and all grants given to States directly should be budgeted and administered on the Federal and State levels.

Herbert Hoover's Warning Against Excessive Taxation

ug. 10, 1949, Herbert Hoover, 30th President United States, reached his 75th birthday rsary, which was made the occasion of a tribute at Stanford University, Palo Alto, Thousands of messages of congratulation listinguished men were led by one from nt Harry S. Truman, who had appointed oover to the head of the Commission on nization of the Government. Mr. Hoover ed an audience of 10,000 in the Laurence Memorial Amphitheatre of Stanford Uni- from which he was graduated in 1895. Hoover warned his countrymen that al- there has been no great socialization of y in the United States, "through govern- spending and taxes our nation is blissfully down a back road (to collectivization) at ed. In the end these solutions of national is by spending are always the same—power, ower, more centralization in the hands of te. And along this road of spending the ment either takes over, which is socialism, ates institutional and economic life, which sm . . . We're on the last mile to collectivism n Government collection and spending of the of the people."'

zing cost of Government, Mr. Hoover said years ago "all varieties of government, g federal debt service, cost the average less than $200 annually. Today, also omit- bt service, it costs an average family about If various projects for spending are en- ne cost, Mr. Hoover declared, would rise to year in taxes for the average family. Also 20 years ago persons directly or indirectly in the pay of the Government equalled one in 40 of the population; today one out of every seven is a recipient of Government monies. "If all those of age are married, they comprise about one-half of the voting strength of the last presidential election."

Mr. Hoover estimated that to pay the cost of all governments—federal, state and local—the "average working citizen" with about 235 working days in the year, would have to give 81 days a year for taxes or about one week in every month. He stressed the loss in savings, for "it is out of savings that the people must provide their individual and family security. From savings they must buy their homes and their farms and their insurance."

While it is customary to blame administrations or legislatures for excessive taxes and spending, Mr. Hoover declared blame should be placed on "the multitude of pressure groups among our own citizens," including groups that can affect the elections of senators and representatives; also on state and municipal governments that demand money from the federal government. He warned that instead of thinking of ourselves we should provide for the next generation, for "as spend-thrifts we are on our way to rob posterity of its inheritance. We dare not see the birthright of posterity or individual independence, or initiative or freedom of choice bartered away for a mess of collectivism."

The Library of Congress, Washington, D. C., observed Mr. Hoover's birthday with an exhibit of his letters and state papers.

Progress in Better Race Relations

Source: The Survey

e Institute on Race Relations, held by Fisk ity, Nashville, Tenn., and the American ary Society, at Fisk June 24 to July 9, 1949, S. Johnson, president of the university, revolutionary changes in race relations" in ears. These included: race issues have be- matter of universal concern; civil rights debated on a national political level; race s are recognized by the United Nations as d in the issue of human rights; Supreme ecisions have outlawed white primaries, re- strictions in housing, racial discrimination in labor unions; state courts are recognizing the right to equal salaries for teachers; "insulting epithets and labels" have been banned by public opinion; greater opportunities have arisen in government employment, such as the offer of the position of assistant secretary of state to Dr. Ralph J. Bunche, an "offer unprecedented in American history"; the relaxation of tensions by the creation of the state of Israel and end of the Jewish-Arab deadlock, and peaceful adjustment of the Japanese-American minority.

HOW TO OBTAIN U. S. GOVERNMENT PUBLICATIONS

Octavian defeated his rivals Brutus and Cassius at Philippi. Called Augustus, was first Roman Emperor. Died 14 **A. D.**

4

Birth of Jesus Christ in Bethlehem.

1 B. C. and 1 A. D.

The year **1 B. C.** *is the first year before the beginning of the Christian era. The year* **1 A. D.** *is the first year of the Christian Era.* **Jan. 1, 1 B. C.** *is just one year before* **Jan. 1, 1 A. D.** *The elapsed number of years between a date B. C. and the same date A. D. is one less than the sum of the years. The Abbott Dionysius Exiguus decided the year of Jesus' birth should be the first year of the Christian era. He took the Roman year* 754 *as the date of birth. Historians proved him wrong by at least four years, for King Herod, who commanded the Massacre of the Innocents, died in the Roman year* 750. *Since Jesus escaped the massacre he was*

living before Herod died. The calendar was not changed, but the birth of Jesus is now placed at 4 B. C., *and by some historians at* 6 B. C.

A. D.

THE CHRISTIAN ERA

29

Crucifixion of Jesus in reign of Roman emperor, Tiberius; Pontius Pilate pro-consul in Judea. The Roman Catholic church, by designating 1933 as a holy year, adhered to tradition that crucifixion took place Friday, April 3, 33 A. D.

Sacco-Vanzetti Case

Nicola Sacco, 29, fish peddler and philosophical anarchist, and Bartolomeo Vanzetti, 32, shoe factory employe and radical agitator, were arrested for the murder on **April 15** of Fred Parmenter, paymaster, and Alex Berardelli, helper, who were carrying two boxes of payroll money in South Braintree, Mass. Vanzetti, accused also of holdup in Bridgewater, was convicted in Plymouth before Judge Webster Thayer, given 12 to 15 years. Sacco-Vanzetti Defense Committee raised $50,000 for defense. Trial of Sacco and Vanzetti began before Judge Thayer in Dedham, **May 31, 1921.** The accused presented alibis, but their testimony was confusing because they tried to cover up radical activities; testimony for the Commonwealth was weak and inconclusive. Both accused had guns, but ballistics experts could not relate them to killers' bullets. Found guilty, they appealed. Supreme Judicial Court, Boston, reviewing law and not evidence, affirmed convictions, **May 12, 1926.** C. Medeiros, convicted of murder, testified he had taken part in Braintree attack, that Sacco and Vanzetti were not present. New appeal rejected by Judge Thayer **Oct. 23, 1926** in 25,000 word argument, which Felix Frankfurter, then of Harvard Law faculty, denounced for inaccuracies. Judge Thayer sentenced the men to die week of **July 10, 1927.**
Writers and others, including Robert Benchley, Edna St. Vincent Millay, Heywood Broun, appealed to Gov. Alvan T. Fuller, who appointed A. Lawrence Lowell, president of Harvard, S. W. Stratton, president, Mass. Institute of Technology, and Robert Grant, former judge, to review case; they reported the trial fair. Gov. Fuller endorsed convictions. An appeal based on the judge's prejudice failed. A reprieve was granted to **Aug. 22** when the two men were executed at Charleston, while sympathizers throughout the country condemned the verdict. In 1931 the Wickersham Commission on court procedure condemned Judge Thayer for having denied six motions for a new trial and then refused to have the question of his prejudice submitted to another judge. In 1932 Judge Thayer's home in Worcester was wrecked by a bomb.
International Court of Justice adopted by League of Nations, **Aug. 2.**
The Nineteenth Amendment, giving suffrage to women, was proclaimed in effect, **Aug. 26.**

CHRONOLOGY

Dec. 1, 1948, to Dec. 1, 1949

Classified by months under:
WASHINGTON—FOREIGN—UNITED NATIONS—POLITICS—BUSINESS, FINANCE AND GENERAL EVENTS

1948—December

WASHINGTON

ec. 1—Mme. Chiang Kai-shek arrived by plane ek financial and military aid against the Chi- Communists. She went to Secretary of State hall's home in Leesburg, Va., before calling on ident Truman.

ec. 3—The House Un-American Affairs Com- ee reported its agents had found microfilm s of "documents of tremendous importance," h had been removed from State Department and given "Russian Communist agents." The ofilms were found in a hollowed-out pumpkin he farm at Westminster, Md., of Whittaker nbers, New York magazine editor, who previ- had accused Alger Hiss, former State De- ment official, of passing the documents to him. document was dated later than 1938.—The ed services announced support of President nan's unified military budget of $15,000,000,- for the 1949-50 fiscal year, and agreed not to nt their cases separately.—The Treaty of Rio aneiro (1947), which unites the 21 American blics in defense against outside aggression, be- e effective when the 14th nation, Costa Rica, ied it.

ec. 4—Robert E. Stripling, chief investigator he House Un-American Activities Committee, rted new evidence revealed the identity of the on who passed to Whittaker Chambers State rtment secrets for transmission to a Soviet t. Members of the committee were recalled to hington. The committee issued a pamphlet al- g the existence in the United States of a ret army" of American Communists "now be- drilled to overthrow our Government," directed 00 Moscow-trained officers.

Grand Jury Investigates Spying

ec. 6—Sworn testimony by Whittaker Cham- made public by the House Un-American Ac- ies Committee, charged that the restricted e Department documents had been passed to by Alger Hiss, for transmission to Col. Boris ov, chief Soviet agent in the United States.— nbers and Hiss appeared before the Federal nd Jury in New York City, which resumed its rate investigation of the Communist spy ring. later denied he gave any secret documents to nbers.—In a report to Congress, President Tru- described the Greek army's campaign against guerrillas as "a military stalemate," despite ery of $170,000,000 American arms and sup- .—The United States Supreme Court, 5 to 4, ted the petition of two of the seven Japanese leaders for a review of their trial and convic- s by an International Military Tribunal.

ec. 7—John E. Peurifoy, Assistant Secretary of e for Administration, testified before the se Un-American Activities Committee that dur- 1937-38 the State Department's secret diplo- c codes were open to foreign governments due spying in Washington.—Secretary of State rge C. Marshall underwent an operation for oval of a diseased kidney in Walter Reed Hospi-

ec. 8—Greeting Dr. Carlos Prio Socarras, a's new President, at Washington Airport, ident Truman declared that no two countries he Western Hemisphere were bound together e closely.

ec. 9—On the ground that the answers might riminate and degrade" him, Henry Julian leigh, a former State Department economist, sed to tell the House Un-American Affairs mittee whether he had given secret Govern- t documents to a go-between for delivery to et Russia, or was acquainted with Whittaker mbers. President Truman renewed his charge, the committee's investigation was a "red her- " used by the Republicans for political pur- s. Attorney General Tom Clark asserted the mittee's "ill-advised and premature" disclos- hurt the Government's chances of successful ecution of the suspected spies.—Before the Far ern Commission, the United States announced adonment of its policy of deconcentration of nese industry because of progress made in this ction by Gen. Douglas MacArthur.

ec. 10—The United States, Canada and the five Brussels Treaty nations resumed their negotiations for a North Atlantic security pact. The talks began in July, 1948, in conformity with a Senate resolution authorizing United States participation in regional security arrangements under the United Nations.—Mme. Chiang Kai-shek submitted to President Truman the Nationalist Chinese Government's plea for long-range financial and military support.—The Un-American Activities Committee reported that the Chambers microfilms had been hidden for 10 years in the closet of Chambers' nephew, Nathan L. Levine, a Brooklyn attorney, who testified Chambers, a former Communist, had "a morbid fear of being liquidated by the Communists." Chambers resigned as a senior editor of Time magazine.

Dec. 11—Twelve reports from United States diplomats to the State Department on international developments in 1938 which were marked "strictly confidential," were made public by the House Un-American Activities Committee. They were given the committee by Whittaker Chambers. The committee said handwriting experts thought one of the documents copied from department files was in the writing of Alger Hiss.—The Rumanian Government asked the State Department to recall two officials in the American Legation in Bucharest, charging them with having plotted the overthrow of the Communist regime. The department termed the charges "ridiculous," and asked for the recall of two members of the Rumanian Legation staff in Washington.

Dec. 13—Through his budget director, James E. Webb, President Truman urged increases in Cabinet salaries from $15,000 to $25,000 a year and corresponding rises for other executive officials, before the Senate Post Office and Civil Service subcommittee. Webb personally suggested increases in the salaries of the President, Vice President and Speaker of the House.

Dec. 14—Acting Chairman Mundt of the House Un-American Activities Committee said Soviet agents, during 1937-38, obtained from trusted Government employees at the Army's proving grounds at Aberdeen, Md., "formulae, descriptions and leading information involving our hitting and defensive power," including the formulae of the Norden bomb sight.

Alger Hiss Indicted

Dec. 15—Alger Hiss was indicted by the Federal Grand Jury in New York on two counts of perjury.—Acting Secretary of State Lovett reported that the Soviet Union had agreed to return three American icebreakers and 28 frigates lent during the war.—Secretary of Defense Forrestal announced military sea transport would be consolidated under the Department of the Navy and that recruiting for the Army, Navy and Air Force would be unified.

Dec. 16—The national security organization was called "huge, sprawling and wasteful" by the security committee of the Hoover Commission on the Reorganization of the Executive Department, which urged tightening of the Unification Act and strengthening of the central authority in the National Military Establishment.—Additional secret documents pilfered from State Department files in 1937-38 showed that Nazi Germany sought an understanding with the United States, but was rebuffed because of distrust of the Hitler regime, the House Un-American Activities Committee reported.—Alger Hiss pleaded not guilty of perjury in United States District Court, New York, and was released in $5,000 bail.

Dec. 18—In a statement to the House Foreign Affairs Committee, the State Department reported that, since V-J Day, the United States provided the Chinese Nationalist Government with $2,884,065,000 in aid, of which more than $2,000,000,000 was in military supplies.

Dec. 20—Laurence Duggan, former high State Department official, whose name had been mentioned in secret hearings of the House Un-American Affairs Committee, plunged to his death from his 16th floor office in West 5th St., New York. Former Under Secretary of State Sumner Welles and Rep. Mundt, acting chairman of the House committee, suggested foul play.—The Atomic Energy Commission gave complete "security clearance" to Dr. Frank Porter Graham, president of the University of North Carolina and president of the Oak Ridge Institute of Nuclear Energy, after investigating his former membership in Commu-

nist front organizations.—The U. S. Supreme Court declined to consider appeals from condemned Japanese war lords because of the international character of the tribunal which sentenced them.

Dec. 21—A $70,000,000 reconstruction and replacement program for China was suspended by the Economic Cooperation Administration. Administrator Paul G. Hoffman said relief activities would be continued.—A booklet issued by the House Un-American Affairs Committee listed 562 Communist and Communist front organizations and 190 publications.—In a statement deploring the use of force to overthrow popularly elected governments in the Western hemisphere, the State Department declared that if the wave of military coups continued "it cannot fail to become a sufficiently serious issue to engage the attention of the American republics as a whole."

Dec. 22—Rep. Nixon (R.-Calif.), a member of the House Un-American Activities Committee, reported he had been assured by Whittaker Chambers that Laurence Duggan, former State Department official who "fell or jumped" to his death, had never given him any secret documents and that this cleared Duggan of suspicion of espionage. An autopsy revealed no evidence of foul play in Duggan's death.—The Economic Cooperation Administration suspended further aid to Indonesia.

Dec. 23—After testifying for three hours before the House Un-American Activities Committee, former Assistant Secretary of State Francis B. Sayre said he had identified three of the secret documents in the Hiss-Chambers case as from confidential files to which only four persons had access—himself, Alger Hiss, and Miss Eunice Lincoln and Miss Anna Belle Newcomb, secretaries in Sayre's office in 1937-38.

Dec. 26—After a three months' inquiry, the Senate Executive Investigating Committee declared the commutation of the life sentence of "bestial" Frau Ilse Koch, widow of the commandant of the Buchenwald concentration camp to four years' imprisonment was unjustified and that she should be tried again by a U. S. Army court if charges could be found that did not involve double jeopardy. Also, if she could not be tried by a U. S. tribunal, she should be turned over to the German courts.—Former Under Secretary of State Sumner Welles suffered a heart attack while walking after midnight near his home at Oxon Hill, Md., and lay for several hours in a field in a semi-conscious condition. His toes and fingers were frozen but amputation was not necessary.

Dec. 27—Without mentioning names, President Truman, in Kansas City, Mo., asserted there were Russian leaders "who are exceedingly anxious to have an understanding with us." The President denounced the prevailing Soviet foreign policy which, he said, blocked the peaceful aims of the Yalta and Potsdam agreements.

Dec. 29—In his first annual report, Secretary of Defense Forrestal urged that his office be given greater authority over the three armed services and that a chairman or director be appointed for the Joint Chiefs of Staff. He recommended that wider "discretion" be granted the President and the Government in providing military assistance and missions to friendly nations, saying it was not enough to devise an impregnable defense, but that every effort should be made to prevent war anywhere in the world.—President Truman directed that all departments and agencies concerned "coordinate all related aspects of foreign economic and military programs." The task of coordinating overseas military assistance programs was assigned to the State Department.

Dec. 30—For three years, from 1935 to 1938, Whittaker Chambers microfilmed secret documents and passed them to Soviet agents, the House Un-American Activities Committee reported.—President Truman, back at the White House, denied that Vice President-elect Barkley, who spent Christmas with the airlift in Berlin, had been sent to Europe to prepare for new talks with Moscow.

Dec. 31—The Republican-controlled 80th Congress passed into history after President Truman had sent word he had no more matters to present.

FOREIGN

Dec. 1—At a conference of Palestine Arab leaders in Jericho, King Abdullah of Transjordan was proclaimed "King of All Palestine." Serious rioting broke out in Damascus, Syria, in protest against the Arab League's policy in Palestine, particularly its cessation of active fighting. The cabinet of Premier Jamil Mardam Bey resigned.—Provisional President José Figueres announced in San José that Costa Rica had disbanded her army, saying his country was not a military nation.

Dec. 2—The Soviet Military Government in Berlin pledged its "full support" to the Communist-controlled new city government for the city's Eastern sector which split the former German cap
two.—After setting fire to the airfield and b
up ammunition dumps, the 250,000 Chinese N
alist troops abandoned Suchow in Northern
su Province, to Communist forces.

Dec. 4—Cairo's Chief of Police, Selim Zaki
was killed by a hand grenade hurled from th
of the Medical College where 5,000 student
tested against the trial in the Sudan o
Egyptian leaders and the refusal of the Bri
permit Egyptian lawyers to defend them.
arrested 400 and occupied the school. Twel
lice officers and 80 students were injured. A
el Awal University students fired on the polic
university was closed.

Berlin Voters Defy Soviets

Dec. 5—Disregarding Communist propa
which sought to frighten them from the po
370,000 of the 1,586,000 registered voters,
percent, participated in municipal elections
three Western sectors of Soviet-blockaded
The Social Democrats polled 65.5 percent
total vote, the Christian Democrats, 19.4 p
and the Liberal Democrats, 16.1 percent. Th
tions were boycotted by the Communists w
1946, received 12.2 percent of the vote. Wi
exception of a few Communist-provoked inc
the elections were quiet. The elections were
new City Assembly of 98 members.

Dec. 8—Premier Mahmoud Fahmy Nokrash
sha of Egypt proclaimed a state of eme
throughout the country and ordered dissolut
the Moslem Brotherhood (1,000,000 member
cause of a six months' campaign of bombin
sassinations and riots.

Dec. 9—A tribunal in Budapest sentence
Simon Papp, Hungarian citizen, former
manager of the Hungarian-American Oil
subsidiary of the Standard Oil Co. of New
to death after convicting him of attempt
overthrow state authority by sabotage. The
pany's American officials were expelled Se
after having been detained for a week.

Dec. 10—Winston Churchill, in the Ho
Commons, called on the Labor Governm
abandon its "sulky boycott" of Israel and
the new state conditional recognition; t
speedily the dismantling of non-warlike ind
in Germany, and support admission of Spain
United Nations.—In Seoul, Korea, represen
of the United States and the South Korean
ernments signed an agreement providing
least $300,000,000 in ECA aid to South Ko
three years.

Dec. 11—In a message to all other Arab
tries except Transjordan, King Farouk of
asked that the Jericho resolution calling
merger of Israel and Transjordan with King
lah as ruler be revoked because it did not re
the decision of all the Palestinian people.—C
and Newfoundland signed an agreement at
by which Newfoundland became a province
Dominion.

Dec. 12—Costa Rica reported invasion by
rebels from Nicaragua, opponents of Prov
President José Figueres, and protested to
ragua and to the Council of the Organiza
American States in Washington, charging vi
of the Rio de Janeiro Hemispheric Mutual
Treaty of 1947. Nicaragua denied the charg

Hoffman Promises China Aid

Dec. 13—The newly elected municipal g
ment for Western Berlin proposed a merger
three sectors occupied by the United States,
and France into a single administrative uni
more equitable distribution of consumer g
Paul G. Hoffman, Economic Cooperation Ad
trator, announced in Shanghai that aid to
would continue even if the existing Gove
fell, but said this would be conditional on pr
tion of the essential freedoms and establis
of a coalition government. Nanking heard
of "peace" with the advancing Chinese
munists.—Three of President Juan D. Peron
fidants were among 14 persons arrested in
Aires on charges of having defrauded the
tin's Government of 11,000,000 pesos ($2,3

Dec. 14—Following a three-week inquiry
judicial tribunal into allegations of fraud
British Board of Trade, John W. Belcher,
mentary Secretary of the board, resigned.
admitted having accepted gifts from busines
but denied they were intended to influen
actions as a Minister.—Palestinian Arabs
notice they would carry out the Jericho deci
merge Palestine with Transjordan and ma
dullah ruler.—A military revolt in San Sa
the capital, resulted in the resignation of Pr
Castaneda Castro of El Salvador, and the
lishment of a revolutionary junta under Col
ual de Jesus Cordoba.

Dec. 15—In answer to a United States

st the seizure of the Hungarian-American o., and coercive methods used in obtaining confessions from two Americans, the Com-st-controlled regime in Budapest told the Department to "mind its own business" and the "notorious third degree" of the United s.—Princess Elizabeth's infant son was christ-Charles Philip Arthur George in Buckingham e, London.

. 16—Two towers of Radio Berlin, controlled e Soviet Military Government but situated in rench zone, were blown up by the French, lescribed them as obstacles in the path of the l airlift. The Soviet authorities called the n "arbitrary and illegal."—The Netherlands rnment rejected a proposal of arbitration by ndonesian Republic, insisting on full accept-of Dutch sovereignty in the period before ation of a United States of Indonesia.

. 18—Completing their encirclement of Peip-Chinese Communist forces captured the city's airfield. They also closed in on Tientsin.—vestigating committee of the Organization of ican States arrived in San José, Costa Rica, dy charges by Costa Rica that Nicaragua was ase of a rebel invasion.

Dutch Advance in Indonesia

. 19—Dutch parachute and airborne troops Jogjakarta, Java, capital of the Republic of nesia, meeting with little resistance. The re-tion of warfare was termed a "police action" st terrorists. The Dutch arrested the repub-eaders, including President Achmed Soekarno, ier Mohammed Hatta and Foreign Minister Agus Salim. They reported wide advances e interior of Java and the landing of rein-ments on Sumatra.

. 20—Dutch troops and marines continued occupation of Java and Sumatra without op-on. Indonesia appealed to the United States lt the Dutch invasion, and asked India and Asian nations for material and moral support. ew Chinese Nationalist Cabinet was formed in ing by Premier Sun Fo who announced his rnment would "fight on until we can obtain onorable peace."—The 16 European countries cipating in the Marshall Recovery Plan esti-d their needs for the 1949-50 fiscal year at a of $4,636,800,000, or $238,200,000 less than the 5,000,000 provided for 1948-49, the first year.

. 21—Chinese Communist forces captured the tsin airfield and advanced into the city's sub-

. 22—Dutch forces took most of the remaining nesian cities, including Surakarta on Java, the olic's second largest city, and Bukittinggi, tain capital of Sumatra.—The French High t of Justice in Paris acquitted Marcel Peyrou-Minister of the Interior in the Vichy Govern-, of a charge of treason in recognition of his o the Allies, including the arrest of Pierre l.

Japanese War Lords Hanged

. 23—Former Premier Hideki Tojo and six Japanese war leaders were hanged in Sugamo n, Tokyo. The sentences pronounced Nov. 12 e International Tribunal were carried out by S. Eighth Army. The condemned men went eir deaths with defiant shouts of "Banzai!" ed with Tojo were Gen. Kenji Doihara, Gen. e Matsui, Lt. Gen. Akira Muto, Gen. Seishiro ki, ex-Premier Koki Hirota and Gen. Heitaro ira.

. 24—After a day of fighting in which Israe-anes bombed Egyptian positions, peace re-ed to the Negeb desert. Six civilians were d by bombs in Gaza, the sector's principal city. pe Pius XII, in a Christmas Eve message, d on all Christian nations to unite and resist ession "by force of arms" if necessary.—All of n's remaining Class A war criminals were ed released by Gen. Douglas MacArthur. The risoners, former Cabinet Ministers and high ing army officers, had been charged with wag-aggressive war and violating the rules of war, ges of which former Premier Tojo and his co-ndants had been cleared.

. 25—All of Israel was blacked out following air raids on Northern Palestine. At Nazareth Christian Church of the Annunciation was ed out during the annual Christmas midnight .—Despite a United Nations cease fire order, h troops continued mopping up operations in , gaining control of the entire island.—Gen-ssimo Chiang Kai-shek and 44 other Nation-leaders were called war criminals by the ese Communist radio, which said they "should ve the just penalty."

. 26—Chinese Nationalist forces under Gen. Tso-yi evacuated Kalgan, capital of Chahar ince. Gen. Fu left behind a group of officers rn over industrial properties and mines intact to the advancing Communist armies.—Israeli planes dropped bombs near the winter palace of King Abdullah at Shune, Transjordan, and on Egyptian positions in the Negeb, while unidentified planes bombed an area close to Tel Aviv, capital of Israel.

Dec. 27—Joseph Cardinal Mindszenty, Roman Catholic Primate of Hungary, was arrested by the Communist-dominated Government in Budapest on suspicion of plotting against the Government, spying, and black market money dealings. His arrest followed an official warning that the "liquidation of the clerical reaction" was imminent. (*See Feb. 8, p. 325*)

Marshal Tito told the Yugoslav Parliament that he would divert the country's large resources of ferrous and non-ferrous metals to the Western capitalist countries if the Cominform bloc continued their "hostile" economic pressure.

Dec. 28—Mahmoud Fahmy Nokrashy Pasha, Egyptian Premier, was assassinated in Cairo by a medical student who belonged to the outlawed Moslem Brotherhood. The assassin, Abdel Meguid Ahmed Hassan, said he killed Nokrashy Pasha because the latter had caused Egypt to lose the Sudan, surrendered Palestine to the Jews and dissolved the Moslem Brotherhood. King Farouk, expressing deep shock over the "foul crime," called on Ibrahim Abdul Hadi Pasha to form a new cabinet.—The United States joined with five Western European nations in an agreement to establish an international authority to supervise the industries of the Ruhr. The European countries were Britain, France, Belgium, the Netherlands and Luxemburg. Soviet Russia, left out, demanded a voice in control of the Ruhr.

Dec. 29—The Hungarian Government charged that Joseph Cardinal Mindszenty was a "sponsor of Hungarian Fascism" and had been negotiating with former Archduke Otto of Hapsburg for restoration of the monarchy.

Dec. 30—The Vatican announced that it had excommunicated all those responsible for the arrest of Cardinal Mindszenty, Roman Catholic Primate of Hungary.

Chiang Kai-shek offers Peace

Dec. 31—In a New Year's message to the Chinese people, Generalissimo Chiang Kai-shek declared his Government ready to open peace negotiations with the Communists if they gave proof of their desire to end hostilities and guaranteed to preserve the Constitution, the democratic form of government and national integrity. "Whether I stay or go, it makes no difference," he added. The Communist radio promised that the Red forces would win even greater victories in 1949 than in 1948 and that all reactionary elements would be rooted out and a coalition government organized.—The Dutch announced in Batavia that all hostilities in Indonesia had ceased except for guerrilla fighting.—The Israeli Government reported in Tel Aviv its forces had captured the border town of El Auja in the Negeb desert from the Egyptians.

UNITED NATIONS

Dec. 1—The three Western Powers—the United States, Britain and France—informed Dr. Juan Atilio Bramuglia of Argentina, President of the United Nations Security Council, that they accepted "in principle" his proposal for a study of the Berlin currency question by a commission representing six member nations not directly involved in the dispute, but emphasized they would not be bound to submit to all Soviet measures because of Russia's continued obstructionist tactics.—A convention outlawing genocide—destruction in whole or in part of a national, ethnical or religious group—was adopted by the General Assembly's Legal Committee after two years' work by various U. N. bodies.

Dec. 3—Over the opposition of Soviet Russia and her satellites, the General Assembly voted, 40 to 6, to continue the all-year round Little Assembly for another year.

Dec. 5—In a joint note to the commission of six "neutral" nations named by the Security Council to study the Berlin crisis, the United States, Britain and France insisted that as a prerequisite to any settlement the Soviet Union must disavow the Communist municipal administration in its sector and permit elections on a city-wide basis.

Dec. 8—The Netherlands delegation withdrew from the conference of the U. N. Economic Commission for Asia and the Far East in Lapstone, Australia, after the Indonesian Republic and Indonesia had been separately admitted as associate members.

Declaration of Human Rights

Dec. 10—The General Assembly adopted a 31-article Declaration of Human Rights guaranteeing

essential freedoms to the populations of the signatory nations. The vote was 48 to 0, with the Soviet bloc, Saudi Arabia and the Union of South Africa abstaining. The Assembly accorded an ovation to Mrs. Eleanor Roosevelt, chairman of the commission which drafted the declaration.

Dec. 12—The General Assembly ended its Paris meeting after recognizing the Seoul regime as the only legal Government of the Republic of Korea. The vote was 48 to 6, with the Soviet bloc in opposition. The Assembly also voted, 35 to 15, with 8 abstentions, for a conciliation commission to settle the Palestine problem. The United States, France and Turkey were named to the commission.

Dec. 14—Dr. Herbert Evatt of Australia, president of the General Assembly, blamed Greece's refusal "to treat existing boundaries between Albania and Greece as definitive" for the failure of the U. N. conciliation committee there.

Dec. 15—The Soviet Union cast its 29th veto in the Security Council to block admission of Ceylon to the United Nations. The dominion's application had been approved, 9 to 2, with the U. S. S. R. and the Ukraine voting in opposition.

Dec. 17—Israel's application for membership was rejected in the Security Council when only five nations, including the United States and Soviet Russia, supported it. Five nations—Britain, Canada, France, China and Belgium—abstained, while Syria voted in opposition.

Dec. 20—The U. N. Committee of Good Offices in Indonesia told the Security Council that the Dutch surprise attack on Java and Sumatra violated the truce agreement between the Netherlands and the Republic of Indonesia. The committee called for speedy action by the Council.

Dec. 22—A resolution sponsored by the United States, Colombia and Syria called on the Security Council to order an immediate cease-fire in Indonesia and restoration of the positions held by the Dutch and the Indonesians under the truce of Jan. 17, 1948.

Dec. 23—In an attack on Netherlands policy in Indonesia, Col. William R. Hodgson of Australia told the Security Council it was worse than Hitler's treatment of the Netherlands and suggested that the nation be expelled from the U. N.

Dec. 24—By a vote of 7 to 0, with France, the Soviet Union, the Ukraine and Belgium abstaining, the Security Council adopted a resolution calling for an immediate cease-fire in Indonesia and the release by the Dutch of President Soekarno and other officials of the Indonesian Republic.

Dutch Defy Security Council

Dec. 29—The Netherlands rejected the Security Council's directive for an immediate cease fire in Indonesia, but promised to end hostilities in two days. In reply to the Council's demand for the release of President Soekarno and other Indonesian officials, the Dutch said they would be freed following the termination of fighting.

POLITICS

Dec. 6—The United States Supreme Court denied two petitions to order Alabama's 11 Presidential electors to cast their ballots for President Truman, as the only duly nominated candidate of the Democratic party, instead of for Gov. J. Strom Thurmond, States Rights candidate.

Dec. 13—A conference of Southern Governors in Savannah, Ga., adopted a resolution expressing "continued opposition" to President Truman's civil rights program, and calling on members of Congress from the South to oppose such legislation.

Dec. 16—President Truman and Gov. Thomas E. Dewey of New York, traded charges that each was trying to make political capital out of the St. Lawrence River hydro-electric project.

Dec. 19—Referring to the 1948 Presidential election in an informal talk to the Arkansas State Society in the Senate Office Building, President Truman called it "the late unpleasantness," adding that it was "not so unpleasant for me, however, because I came out all right."

Dec. 24—In a message to The Democratic Digest, a party publication, President Truman said he felt "it was the American people who won the election," adding, "I merely reminded them of the issues at stake."

BUSINESS AND FINANCE

Dec. 1—After hearing Paul G. Hoffman, Economic Cooperation Administrator, declare that the Marshall Plan would prevent World War III if the free nations remained united, delegates to the National Assn. of Manufacturers' annual Congress of American Industry, meeting in New York City, adopted a resolution calling for continued international cooperation through the Europe[an] covery Program and the United Nations. Mosher, N. A. M. finance committee cha[ir]declared election returns showed that the wanted the Government to stay in busine[ss] predicted it would stay for a long time.—F first time since the Nov. 4 election, shares New York Stock Exchange showed general rising from 1.50 to 3 points.

Dec. 2—N.A.M. urged that if Congress e new economic controls, their scope should ited to national defense and they should be to periodical review to determine whethe tinuation was essential.

Dec. 3—Secretary of Commerce Charles assured N.A.M. that business had no reason apprehension over the President's economi gram, but said further military expenditures make more economic controls and higher necessary.—The Kaiser-Frazer Corp. boug Willow Run plant in Ypsilanti, near Detroit, the Government built during the war at a $100,000,000 for the construction of bo from the War Assets Administration for $[1] 000.

Dec. 9—The Department of Justice filed complaint against the Chicago Mortgage [A]Assn. and 35 of its member banks on cha conspiring to suppress competition in the m loan business in the Chicago area.

Be ducer of the rocket plane X-1—first plan faster than sound—predicted that in the ture planes twice or three times as fast X-1 would be built. The X-1 attained sp ceeding 700 miles, the speed of sound at s

Dec. 18—Gov. Dewey reported in Alba[ny] as of Dec. 15, New York State had paid $ 176 in bonuses to 1,422,464 veterans of Wo II.

Dec. 19—The New York metropolitan ported a 19.6-inch fall of snow and five d

Dec. 22—Quentin Roosevelt, wartime fl grandson of President Theodore Roosev among 35 passengers and crew killed when nese National Airlines C-54 crashed on B and, near Hong Kong. Another victim w Hsueh-pei, Chinese U. N. delegate.

Flyers Marooned on Greenland

c. 23—The Navy ordered the aircraft carrier
n out of Norfolk, Va., to Greenland to attempt
escue of 11 Air Force flyers marooned on a
-foot icecap. Seven of the flyers made a crash
ng on the icecap Dec. 9 when their C-47 cargo
was wrecked and the other four were ma-
d in rescue attempts.—Ten Air Force men
killed 10 miles from the Eielson air base in
a when their B-50 bomber crashed and
ed.

c. 25—Myron C. Taylor, President Truman's
nal representative to the Vatican, made a
tmas gift of $1,500,000 to Cornell University,
lma mater.

c. 26—Accidents took the lives of 396 persons
the Christmas weekend, the Associated Press
ted.

c. 28—Twelve Air Force members marooned
7,700-foot Greenland icecap were rescued by
o-engine transport plane equipped with skis
jet-assisted take-off units. The C-47 trans-
was piloted by Lt. Col. Emil G. Beaudry of
hester, N. H., who made the rescue after
earlier attempts had failed. The third at-
t was made Christmas Day in a glider whose
joined the other 11 airmen.

1949—January

WASHINGTON

n. 1—President Truman granted full recogni-
to the Republic of Korea, seconding similar
n taken by the United Nations General As-
ly Dec. 12, 1948.

n. 3—At the opening session of the 81st Con-
, Administration forces in the House won pass-
275 to 142, of a bill curbing the power of the
s Committee to block legislation. Under the
the chairman of the committee which orig-
y approves a measure can ask the House to
on bringing it to floor debate if the Rules
mittee fails to act after 21 calendar days.
ty-one Southern and border-state Democrats
d with 111 Republicans against the bill.—De-
"liberal" opposition, the old guard leadership
ed by Sen. Robert A. Taft of Ohio retained
rol of the Republican Policy Committee in the
te by 28 to 14.—The United States, in a note
ered in Moscow, charged that the Soviet Un-
was still holding 400,000 German prisoners of
in violation of an agreement by the Council
oreign Ministers in April, 1947.

n. 5—In his annual State of the Union mes-
to a joint session of the Democratic-controlled
Congress, President Truman recommended an
-point program to control inflation, the main
being authority for the government to build
ts in such industries as steel if private indus-
"fails to meet our needs." He called for
der social security measures; outlined a seven-
plan for the construction of 1,000,000 low-
public housing units; again urged universal
ary training; advocated repeal of the Taft-
ley Labor Act, and also renewed his plea for
ncrease of the minimum wage from 40 cents
our to 75 cents.—Gov. Thomas E. Dewey asked
higher taxes as he proposed a record $900,000,-
budget to the New York State Legislature in
ny at its opening session.

Secretary of State Marshall Resigns

n. 7—President Truman announced that he
accepted the resignation, because of ill health,
en. George C. Marshall as Secretary of State
appointed former Under-Secretary Dean G.
eson to his post. He also accepted the resigna-
of Under-Secretary of State Robert A. Lovett
named James E. Webb, Director of the Budget,
ucceed him.—In a message on the country's
omic condition, the President said that 1949
perity could be insured if 1,000,000 new jobs
provided for the nation's youth, higher pro-
ion achieved, and purchasing power increased.
lenied at a press conference that he planned to
the Government into the steel industry, but
that if the necessary expansion were not forth-
ing the Government might have to build plants
e "integrated" with private industry.

n. 8—Early action by Congress was urged by
ident Truman to restore the Reciprocal Trade
ements Act to the full force of the original
sure through elimination of "hampering re-
tions" enacted by the Republican-controlled
Congress, and to extend the Act to June 12,
.—A plea to bring the Air Force to 70 groups
952 and develop its striking power for full-
e war instantly was made by W. Stuart Syming-
Secretary of the Air Force.

Highest Peacetime Budget

n. 10—President Truman presented to Congress a budget of $41,858,000,000 for the 1949-50 fiscal year, highest in peacetime history. He pointed out that on the basis of estimated revenues totaling $40,985,000,000, expenditures would exceed receipts by $873,000,000. To meet this deficit and additional military aid to Western Europe later, he asked for $6,000,000,000 in additional taxes, including a $2,000,000,000 increase in payroll taxes on incomes in the higher brackets. Included in the proposed budget were $15,900,000,000 for national defense, a new peacetime high, and $6,700,000,000 for foreign assistance.—The U. S. Supreme Court rejected petitions by 12 top Communists to intervene in their scheduled trial in New York City on indictments charging conspiracy to overthrow the Government. The defendants contended that the trial Judge Harold R. Medina, was prejudiced and that the panel from which a "blue ribbon" jury would be drawn was made up of "the rich, propertied and well-to-do."

Jan. 11—The Air Force announced that in line with President Truman's budget recommendations it would shift $300,000,000 earmarked for the construction of jet fighters, light bombers and "flying wings" to the purchase of B-36's and B-50's, the big, long-range strategic bombers.

Jan. 13—Dean G. Acheson, nominated by President Truman to succeed Gen. George C. Marshall as Secretary of State, told the Senate Foreign Relations Committee that he was no appeaser and would follow toward Russia and other foreign countries the policy laid down by President Truman. He promised to keep subversive elements out of the State Department.—President Truman explained that he proposed higher income taxes on earnings from $6,000 to $25,000 or $30,000 a year.—The Senate approved a bill increasing President Truman's salary from $75,000 to $100,000 a year, also granting him a $50,000 tax-free expense allowance.

Jan. 14—Removal of the ban on wire-tapping and elimination of the statute of limitations in espionage cases were asked of Congress by Attorney General Tom Clark. Referring to the Chambers-Hiss case, Clark also asked that persons found in possession of secret state documents be prosecuted and that officials who permitted such documents to pass to suspected spies be fined or sent to jail.—The State Department declared the Soviet Union's oppressive and obstructionist tactics in Europe and the United Nations had necessitated formation of the North Atlantic Security Pact. The department advised nations still outside the pact to join up if they expected military aid.

Jan. 16—Chairman David E. Lilienthal, in a speech in Rochester, N. Y., cautioned the American people against placing implicit trust in the atomic bomb for protection, warning that it might be fatal if the United States relaxed its "eternal vigilance."

Jan. 17—In his first special message, President Truman asked the 81st Congress for broad powers to reorganize agencies within the Executive Branch of Government permanently, instead of temporarily, as under the Reorganization Acts of 1939 and 1945. He proposed that plans submitted by him should remain before Congress for 60 calendar days of continuous session before becoming effective unless they were rejected by a concurrent resolution adopted by a majority vote in each house.—The House voted to remove Reps. John E. Rankin of Louisiana and F. Edward Hebert of Mississippi, both active in the States Rights Democratic party campaign in 1948, from the Un-American Activities Committee.—Both houses completed action on a bill raising the salaries of President Truman, Vice President-elect Barkley and Speaker Sam Rayburn.—Martin James Monti, former lieut., A.A.F., was sentenced to 25 years in prison after he pleaded guilty to treason in Federal Court, Brooklyn, N. Y. In 1944 Monti stole a P-38 from the U. S. air base near Naples, Italy, and surrendered himself and the plane to the Nazis. He broadcast propaganda to the U. S. forces in Europe and joined the Nazi SS (elite guard).—In New York City, 400 police were on duty at the Federal Courthouse as the trial of 11 Communist leaders on charges of conspiracy to overthrow the Government opened. The case of the 12th leader, William Z. Foster, national chairman of the Communist party, was severed because he was ill.

Jan. 18—By a vote of 83 to 6, the Senate confirmed President Truman's appointment of Dean G. Acheson as Secretary of State. Sen. Wherry of Nebraska, one of six Republicans voting against confirmation, declared it was "common knowledge" that the new Secretary "has been an appeaser of Russia."

Credit to Israel Authorized

Jan. 19—At a dinner given in his honor by members of the Electoral College, President Truman announced his opposition to any change in the electoral college system, which had been attacked because there was a possibility that the 1948 choice of a President would be thrown into the House.—

The Export-Import Bank authorized an immediate credit of $35,000,000 for the State of Israel and earmarked $65,000,000 to be available until Dec. 31, 1949.—President Truman signed the bill raising his own and other salaries.

President Truman Inaugurated

Jan. 20—Before a crowd estimated at 130,000, President Harry S. Truman, who served in the White House for three years, nine months and three weeks after the death of President Franklin D. Roosevelt April 12, 1945, was sworn in at the Capitol for a full four-year term. In addition to hundreds of thousands who packed all approaches to the Capitol, the ceremony and inaugural parade were witnessed for the first time by 10,000,000 persons over television. The inaugural speech was heard by an estimated 100,000,000 American radio listeners and by millions in all parts of the world to whom it was beamed in "Voice of America" broadcasts. In his speech, heard clearly in Moscow, the President promised full support of democracy's battle against the forces and "false philosophy" of communism. He pledged his administration's "unfaltering support" of the United Nations; continued aid in bringing about world economic recovery; American military and other assistance to "freedom-loving nations against the dangers of aggression," and American scientific and industrial help in developing the world's needy areas. He asked private capital and business to cooperate in achieving the fourth objective, suggesting government guarantees of investments. A few minutes before the President was sworn in by Chief Justice Fred M. Vinson of the U. S. Supreme Court, Sen. Alben W. Barkley of Kentucky took the oath of office as Vice President, the oath being administered by Associate Justice Stanley F. Reed.

Jan. 21—Dean G. Acheson was sworn in as Secretary of State by Chief Justice Vinson of the U. S. Supreme Court in a ceremony in the office of President Truman in the White House, attended by the President, members of the Cabinet and the Supreme Court, and Democratic and Republican Congressional leaders.—Put in the witness box in Federal District Court, New York City, three members of the special Federal Grand Jury which indicted 12 top Communist leaders for conspiracy against the Government denied they had been actuated by bias. The jurors said officials had never asked about their race, religion, income or political affiliation.

"Axis Sally" Trial Opens

N. rity Council to order complete independence Indonesia by the end of 1949 and the withdraw- within two months of Dutch forces to the lines held before their "police action" began Dec. 1948.

Chiang Kai-shek Retires

Jan. 21—Generalissimo Chiang Kai-shek announced, in Nanking, his retirement as President of China to facilitate peace negotiations. He was succeeded by Vice President Li Tsung-jen, a former General who won renown for his campaigns against the Chinese warlords. Chiang, who had been China's "strong man" for 22 years, flew from Nanking to his ancestral home in Fenghwa, Chekiang Province, 230 miles southeast of Nanking.—United States constabulary exchanged 200 shots with Czech border guards on the Czech-German frontier as they sought to stop a contraband-laden truck. The truck escaped across the frontier and Czech authorities refused to release it.—Greek guerrillas captured Karpenision, 125 miles southwest of Athens after a three-day attack. The government reported that the entire garrison of 550 men was missing.

Jan. 22—The 40-day siege of Peiping was ended when Gen. Fu Tso-yi, Nationalist commander for North China, reached an armistice with the Communists, under which Gen. Fu's army of 125,000 was allowed to march out of the city. Acting President Li Tsung-jen in Nanking appointed five delegates to open peace negotiations with the Communists to cover all of China.—Lt. Col. Selden R. Edner of San Jose, Calif., a U. S. air observer, and his Greek pilot were killed when their unarmed plane was shot down by Greek guerrillas near the battlefield of Karpenision. The guerrillas asserted the plane had taken part in a strafing-bombing mission.

Jan. 23—Premier Shigeru Yoshida's Democratic Liberal party won an overwhelming victory in Japan's general election for the Diet, Lower House of Parliament. The party polled 43.8 percent of the total vote of 30,509,179 and captured 264 Diet seats, compared with 132 in the 1947 general election. The Democrats polled 15.8 percent of the vote and won 68 seats, a loss of 54. The Socialists dropped from first place to third, receiving 13.5 percent of the vote and retaining only 49 of the 143 seats they previously held. The Communists polled 9.6 percent and captured 35 seats, a gain of 31.—At the conclusion of a four-day conference of 19 Asian and African nations in New Delhi, India, on the Indonesian issue, Prime Minister Nehru of India told the delegates that the meeting had marked the opening of a new role for Asia, based upon the close cooperation of the participating nations.

France Recognizes Israel

Jan. 24—France granted de facto recognition to Israel after having received assurances that French public and private interests in Palestine would be protected. Action on Israel's territorial claims and the status of Jerusalem was deferred by the French Foreign Office pending decisions on these issues by the United Nations.—The first 1,500 of 11,000 Jews released by the British from Cyprus detention camps after they had tried to run the anti-immigration blockade in 1947 embarked on the steamship Galilah for Haifa, Israel.—Pukow, a railroad terminal on the Yangtze, across from Nanking, was abandoned by Nationalist forces as Chinese Communist armies advanced to a point only 10 miles away.

Jan. 25—The new State of Israel held its first general election, with 427,027 voters, including 30,000 Arabs, casting ballots. The Mapai, or Socialist Labor party, headed by Prime Minister David Ben-Gurion, polled the heaviest vote, 35.8 percent of the total, and won 44 seats in the 120-member Assembly. The Mapam, a Leftist labor party, was second with 14.7 percent of the vote and 18 seats. The United Religious ticket, a coalition of four orthodox parties, ran third with 12.3 percent of the vote and 17 seats, while the Right Wing Heruth, or Freedom Movement, sponsored by Irgun Zvai Leumi, militant underground organization, was fourth with 11.5 percent of the vote and 14 seats. The Communists received 3.51 percent of the vote and won four seats. The balance of the vote went to 15 Jewish and Arab splinter groups. One of those elected to the Assembly was Friedman Yellin, former head of the terrorist Stern gang, who was in Acre Prison awaiting trial.—A Moscow communiqué announced the formation of a Council of Mutual Economic Aid to offset the effects of the Marshall European Recovery Plan on the Soviet bloc's economy. The Council was organized by the Soviet Union, with five of its satellites—Bulgaria, Czechoslovakia, Hungary, Poland and Rumania—as member nations. Yugoslavia, at odds with the Cominform, Communist international, was not invited to join.—The Tribunal of Inquiry, which investigated charges of corruption in the British Board of Trade, reported it had found only petty graft and impropriety. The report censured John W. Belcher, the board's Parliamentary Secretary, and George Gibson, a director of the Bank of England and chairman of the Northwestern Electricity Board, for allowing their actions to be influenced by gifts. Both Belcher and Gibson resigned their posts.

Bevin's Palestine Policy Upheld

Jan. 26—Despite severe criticisms by Winston Churchill and other opposition leaders, Foreign Secretary Bevin's Palestine policy was upheld in the House of Commons, 283 to 193. More than 50 members of Bevin's own Labor party abstained from voting.—As acting President Li Tsung-jen of China renewed his appeal to the Communists to send delegates for the immediate opening of peace negotiations, the Communist radio called on Li to prove his "sincerity" by surrendering Generalissimo Chiang Kai-shek, former Premier T. V. Soong and other Nationalist leaders named as "war criminals."—A German denazification court in Nuremberg released Franz von Papen, Hitler's Vice Chancellor, who had been found guilty as a major offender by an international tribunal.—The German court held von Papen was only a Class 2 offender and that the four years he had served of an eight-year prison sentence imposed by the first court was sufficient punishment. The German court also ordered restoration of his properties, but fined him 30,000 Deutsche marks (about $9,000).

Jan. 27—The Greek guerrillas, over their radio, proposed to the Athens Government peace negotiations on condition that all foreign military and other aid ceased, that a new coalition government be formed and that general elections be held within two months after the signing of an armistice.

Jan. 28—The Consultative Council of the Brussels Treaty Permanent Commission, after a two-day meeting in London, announced creation of a Council of Europe composed of Britain, France, Belgium, the Netherlands and Luxemburg. The five nations agreed to integrate the Council into the United Nations as a regional arrangement, and to join the proposed North Atlantic defense pact.—In Moscow, the Ministry of Foreign Affairs denounced the projected North Atlantic pact as a "plot" by the "ruling circles" of the United States and Britain to "wreck and undermine" the United Nations so that they could embark upon "an openly aggressive course" to achieve "Anglo-American world domination."

Jan. 29—Great Britain announced she had accorded de facto recognition to the State of Israel. The other Brussels Treaty nations, Belgium, the Netherlands and Luxemburg (France had taken a similar step Jan. 24), also granted recognition, as did Australia and New Zealand. In Tel Aviv, the Jewish Agency for Palestine launched a $225,000,000 housing program for 1949 to provide homes for 180,000 refugees.

Stalin Would Meet Truman

Jan. 30—In answer to questions submitted by an American correspondent, Kingsbury Smith of the International News Service, Premier Stalin declared he had "no objections" to meeting with President Truman "at a mutually acceptable place" to discuss a joint declaration that neither the United States nor the Soviet Union had any intention of "resorting to war against one another." Stalin said his Government was prepared to cooperate with the U. S. Government in carrying out measures "designed to implement this pact of peace and leading to general disarmament." Soviet Russia, he added, was ready, under these conditions, to lift the Berlin blockade if the Western Powers lifted transport and trade restrictions at the same time.—Talks among the Foreign Ministers of Norway, Sweden and Denmark on establishing a Scandinavian mutual defense alliance collapsed in Oslo after the Soviet Union had warned Norway her joining in the North Atlantic defense pact would be regarded as an unfriendly act and Sweden announced her determination to adhere to her policy of neutrality.—After having been in office for less than six months, President Juan Natalicio Gonzalez of Paraguay was ousted in a bloodless coup d'état in Asuncion, the capital, by leaders of his own cabinet. The National Assembly named Gen. Raimondo Rolon, former Minister of Defense, as Provisional President.

Jan. 31—In his first post-election speech, Prime Minister Ben-Gurion declared in Tel Aviv that Israel would cooperate with the United States and the Soviet Union, was ready to enter into an alliance with the Arab nations, and would support the United Nations.—Gen. Hsueh Yueh, Governor of Kwantung Province, announced in Canton that, regardless of peace negotiations, the four southern provinces—Kwantung, Kwangsi, Hunan and Fukien—would wage a last-ditch fight against the Communists.—Rangoon, capital of Burma, was menaced by rebellious Karen tribesmen seeking autonomy. The rebels captured several railway centers and cut the rail line line to Mandalay.

UNITED NATIONS

Jan. 1—Under terms of a tentative agreement reached through mediation of a U. N. commission, India and Pakistan ordered a cease-fire in State of Kashmir, scene of an undeclared war 14 months. Kashmir was divided into two zones each having its own interim government.

Jan. 4—A committee of experts representing member nations of the Security Council not directly involved in the Berlin dispute recommended that two separate banking and credit systems be set up there and a new bank be established under four-power control for the issue of the Soviet zone for the entire city.

Jan. 6—Israel and Egypt informed the United Nations that they would cease fire on all fronts within 24 hours and would enter into direct negotiations to establish an armistice throughout Palestine.—The United States recalled H. Cochran, American delegate to the Security Council's Committee of Good Offices in Indonesia, to show its disapproval of the Netherlands attack against the Indonesian Republic.

Jan. 7—At its first session at Lake Success since the Paris meeting, the Security Council was told by T. K. Critchley of Australia, chairman of the Good Offices Committee in Indonesia, that the committee had been unable to stop the fighting because of Dutch obstruction. He proposed that the committee be dissolved.

Bunche Goes to Rhodes

Jan. 9—Dr. Ralph J. Bunche, Acting U. N. Mediator for Palestine, directed U. N. observers in the Holy Land to make a full investigation of the Arab-Israeli air clash in which five R. A. F. planes were shot down. Leaving Lake Success, N. Y., for the island of Rhodes to preside over Israeli-Egyptian armistice negotiations, Dr. Bunche said that the Negeb truce applied to the British as well as the Egyptians and the Israelis.

Jan. 11—The Israeli representative, Aubrey Eban, filed charges with the Security Council that Britain's "imposing display of military and political activity" in the Near East was directed against his country and its continuance was likely to endanger the maintenance of international peace and security." In a message to the Council the British Foreign Office accused Israel of "aggression" and called on the United Nations to exercise its authority firmly, contending the world had been "losing control over events."—Dr. Herbert C. Jessup, U. S. delegate, accused the Netherlands of violating the U. N. Charter by ignoring Security Council's cease-fire in Indonesia, and called for early withdrawal of Dutch troops from Indonesian Republican territory.

Jan. 13—Under U. N. auspices, Israel and Egypt opened direct armistice negotiations on the island of Rhodes. It was the first time representatives of an Arab state met with those of Israel on a face-to-face basis. Dr. Ralph J. Bunche, U. N. Mediator, said the main objective was to carry out Security Council resolutions calling on both sides to withdraw to positions they held Oct. 14, 1948.

Jan. 24—The Security Council's Committee of Good Offices in Indonesia reported from Batavia, Java, that guerrilla activities had flared up on a wide scale and that the Dutch lacked sufficient troops to protect the civilian population.

Israel and Egypt Extend Cease-Fire

Jan. 25—Israeli and Egyptian armistice negotiators on the island of Rhodes signed a formal agreement to extend the cease-fire in Palestine until talks, held under U. N. sponsorship, produced either positive or negative results.

Jan. 28—By a vote of 8 to 0, with the Soviet Union, the Ukraine and France abstaining, the Security Council, at Lake Success, N. Y., adopted a resolution calling on the Netherlands Government to transfer sovereignty over Indonesia to the United States of Indonesia in gradual stages by July 1, stop all fighting, release imprisoned Indonesian leaders and reestablish Jogjakarta, Java, as the administrative center of the Indonesian Republic. The resolution, sponsored jointly by the United States, Cuba, Norway and China, was assailed by the Netherlands delegate as "imposing a new Nations guardianship" over his country.

POLITICS

Jan. 6—Philip H. Willkie, son of the late Wendell L. Willkie, Republican candidate for President in 1940, was sworn in as a member of the Indiana House of Representatives in Indianapolis, and proposed that Republican organizations throughout the country should hold a series of "grass-roots" meetings to revitalize the party.

Jan. 18—In a talk to 2,500 members of the Truman-Barkley Clubs, President Truman urged the clubs to start working at once for the election of the Democratic-controlled Congress in 1950. "We don't want to elect another 80th Congress," he added.

.. 22—Republican National Chairman Hugh D. Jr. appointed a new G. O. P. Executive Com- e from which Rep. Clarence Brown of Ohio, r committee chairman and Sen. Taft's former aign manager, and two other veterans, Sin- Weeks of Massachusetts and Ralph H. Cake, regon, were dropped.

n. 23—In Omaha, Neb., for the first post-elec- meeting of the Republican National Commit- Chairman Hugh D. Scott Jr. rejected a demand n. Taft of Ohio that he should resign either tional party chairman or from the House.— declared Gov. Dewey "should not, could not will not be a candidate for President in 1952."

n. 27—With the support of Dewey followers the blican National Committee defeated, 54 to 50, ve to unseat Rep. Hugh D. Scott Jr. as Na- l Chairman. The opposing faction, which in- d Sen. Taft of Ohio and former Gov. Harold assen of Minnesota, accused Scott of having icated" his powers to Herbert Brownell, Gov. ey's personal campaign manager, in the 1948 aign.

BUSINESS AND FINANCE

n. 3—The Bank of America National Trust and ngs Assn. of California reported that its re- es, as of Dec. 31, 1948, were $6,072,913,000. It the first time that a bank reached $6,000,000,- n a non-war year.

n. 7—In reply to President Truman's criticism eel production, Walter S. Tower, president of American Iron and Steel Institute, reported production in 1948 had reached 96,120,930 net of raw steel, the largest volume in any war or e year and 1,800,000 tons more than in 1947.— es on the New York Stock Exchange rose 1 to nts, or on an average of 2.17 points, in the st rally in eight months.

n. 25—The United States Steel Corp. an- ced a plan for a three-to-one split of its com- stock, raising the number of shares from 8,- 52 to 26,109,000 in line with a new policy of lining "greater distribution of stock as a result ne lower margin price."

n. 26—United States Steel Corp. common es climbed 4⅝ and closed at 77½ on the New k Stock Exchange, and other steel stock rose from fractions to three points. But losses outnumbered gains with a drop of 0.58 point for the day.

Jan. 27—For the third successive month, the retail price index dropped in December, 1948, the Bureau of Labor Statistics reported in Washington. Retail and chain stores announced drastic price cuts in men's and women's apparel, shoes, radios and other appliances. Eggs dropped 11 percent, meats 3.2 percent and fresh fruit and vegetables an average of 2 percent. Even the five-cent cigar made its first appearance since the war.—Gov. Dewey and other high officials of New York and New Jersey broke ground in mid-Manhattan, New York City, for a $20,000,000 union bus terminal to be constructed and operated by the Port of New York Authority.

Jan. 30—Pittsburgh reported a new high record for the production of steel ingots during the week ended Jan. 29. The national steel output reached 101 percent of rated capacity, or 1 percent higher than the previous week. Annual production at this rate, experts said, would be 97,000,000 tons, or 5,- 000,000 tons more than earlier estimates.

GENERAL

Jan. 2—The New Year's weekend took a death toll of 257 throughout the nation, 183 fatalities resulting from traffic accidents, the Associated Press reported.—Large sections of New England, New York and New Jersey were inundated by floods caused by snow-swollen rivers. Damage was estimated at $2,500,000 and several hundred families were made homeless.—Luis Munoz Marin, formerly a writer in Greenwich Village in New York City, was inaugurated in San Juan as Puerto Rico's first elected Governor.

Jan. 3—The Cunard luxury liner Queen Mary ran aground in Cherbourg Harbor, France, while en route from Southampton to New York. She was refloated after 12 hours.

Jan. 4—Blizzards and tornadoes swept the Southwestern and Rocky Mountain states, paralyzing road and air traffic and causing 59 deaths. A record freezing spell, with temperatures down to 14 degrees, hit Southern California and destroyed one-fifth of the $100,000,000 annual citrus fruit crop.— A chartered DC-3 transport plane crashed at the take-off at Boeing Field, Seattle, Wash., killing 11 Yale University students on their way back to school and three crew members. Fourteen other students escaped serious injury. The crash was blamed on ice conditions.

Hawaiian Volcano Erupts

Jan. 7—The 13,680-foot volcano of Mauna Loa, on the island of Hawaii, erupted for the first time in seven years. The flow of lava stopped at the 8,000-foot level following heavy rains and fog. A sharp earthquake rocked the vicinity of Hawaii National Park Volcano House, 22 miles away, but no damage was reported.—John F. Noxon, formerly a lawyer in Pittsfield, Mass., was released from State Prison in Norfolk, Mass., where he had been serving a life sentence for the mercy killing of his mentally deficient son in 1943. He was freed by the Parole Board after his sentence had been commuted by Gov. Robert F. Bradford, the outgoing Governor. He was sentenced to death after a jury had found him guilty of murder on July 7, 1944, but was saved by former Gov. Maurice J. Tobin in 1946.

Jan. 9—A gift "in excess of $8,000,000" was donated by the Samuel H. Kress Foundation for the development of the new New York University-Bellevue Medical Center.

Jan. 11—The 34,183-ton Cunard liner Caronia, largest passenger ship built after the war, arrived in New York on her maiden voyage.—A heavy snowfall covered large sections of Southern California, including Los Angeles, San Diego, Palm Springs and Pasadena, for the first time in the history of the local weather bureaus.

Jan. 17—A U. S. Air Force B-29 bomber, en route from Lincolnshire, England, to the United States, crashed in Argyllshire, Scotland. All 20 crewmen and passengers, Air Force men going home on leave, were killed.—A British four-engine Tudar plane, en route from London to Santiago, Chile, disappeared over the Caribbean between Bermuda and Jamaica. A search by 72 planes and by U. S. and Cuban naval vessels proved futile. The airliner carried a crew of seven and 13 passengers.

Icebreaker Collides With Tanker

Jan. 19—Eleven members of the crew of the Coast Guard icebreaker Eastwind were killed and 20 others injured when the ship collided with the 10,000-ton oil tanker Gulfstream in a heavy fog off the south coast of New Jersey. Two freighters, the Suzanne of the A. H. Bull Steamship Co., and the Junior of the United Fruit Co., took 100 men off the Coast Guard vessel, but Capt. John A. Glynn and 47 of his men remained on board to

fight a fire which swept the superstructure and threatened to reach the ammunition magazines. After the fire had been brought under control, the icebreaker was towed to Brooklyn by the Coast Guard cutter Sassafras. The tanker's bow was stove in, but it reached Staten Island under its own power.

Jan. 24—The Air Force, using 17 C-82 "Flying Boxcars," began "Operation Haylift" to feed 2,000,000 cattle and sheep snowbound on the Western ranges. The big planes, each carrying five tons of hay, dropped their cargoes over Nevada, while Utah National Guard planes flew hay and fodder concentrates to stranded livestock in that area. President Truman made $100,000 available for relief, half of the sum for thousands of Indians on Western reservations, the other half for feed.

Jan. 26—Another grant, this time for $200,000, was allocated by President Truman for relief of the snowbound cattle and sheep country in Nevada, Utah, Nebraska, South Dakota and Wyoming. The Air Force extended its haylift to Utah, Colorado, South Dakota and Nebraska, dropping 95 tons of feed. Snow-removal equipment was rushed to the blizzard-stricken areas by the Army and the Navy, while the Red Cross opened food and fuel distributing centers in 59 counties.—P. James Pellecchia Jr., former chief justice of the Newark (N.J.) Police Court, was sentenced to 10 to 15 years in state's prison by Judge E. Conlon in County Court, Newark, on his plea of guilty to charges of embezzling $663,850 from the Columbus Trust Co., controlled by his family. He lost most of the money on racing bets.—Gov. Dewey dedicated the New York State Freedom Train in Albany on the eve of its departure for a year's tour of the state with 89 documents pertaining to New York's history.

Jan. 27—Continuing blizzards hampered the Air Force's "Operation Haylift" in carrying fodder to starving snowbound cattle and sheep in the Western ranges. Congress appropriated $500,000 for relief of the storm-stricken areas and the Red Cross allocated $250,000.

Freedom of the Press Abridged

Jan. 28—After a three-day trial in Criminal Court, Baltimore, Judge John B. Gray Jr. found three local broadcasting companies and the news editor of one guilty of violating court restrictions on the publication of crime news by reporting a murder case before the suspected slayer was tried. Judge Gray agreed with the defense that the court rule, adopted nine years before, was an "abridgment of freedom of the press," but held such abridgment justified on the ground that it safeguarded the fair administration of justice. The three companies and the news editor, James P. Connolly, were fined. *(See June 10).*

An extensive hunt by United States, British and French planes and naval vessels for an Air Force B-29, missing with 15 men on board on a flight from Dakar, French West Africa, to England, proved futile.

Jan. 30—The 52,000-ton North German Lloyd liner Bremen, one-time holder of the trans-Atlantic speed record, was scrapped in Nordenham, Germany. The big ship was bombed and irreparably damaged in the war.

1949—February

WASHINGTON

Feb. 1—Urging support of proposals for streamlining the Federal Government structure made by his administration and by former President Hoover, President Truman told the National Planning Assn. that these proposals were "planned economy" for the welfare of the people and not "controlled economy", which he called totalitarian.

Feb. 2—In the first official comment on Premier Stalin's offer to meet President Truman in some city behind the Iron Curtain, Secretary of State Acheson declared the President would not go again "half-way around the world" to confer with Stalin nor discuss any issues affecting other nations or the United States without representation of those other countries.

Feb. 3—President Truman declared that, although he would welcome Stalin to the White House, the United States would not enter into any negotiations with the Soviet Union, bilaterally or jointly with other powers, outside the U. N.—President Truman asserted that he had inherent powers, both as chief executive and commander in chief, to halt strikes affecting the nation's health and security and that a specific injunction clause was not needed in the proposed Labor Relations Act.—For the first time, enlisted men sat beside officers on general courts martial, in the United States and Germany.

Feb. 4—A long-time employee of the U. S. Embassy in Berlin before World War II, Herbert John Burgman, a native of Minnesota, was flown from Germany to face treason charges for allegedly broadcasting for Hitler during the war.

Feb. 5—A joint report by the Economic Cooperation Administration and the Department of Commerce cleared Britain, Belgium and the Netherlands of a published charge that they had shipped back to the United States aluminum and other goods received under the Marshall Plan.

Feb. 7—A bill giving the President broad new permanent powers to initiate administrative reorganizations to promote efficiency and economy in the Federal Government was passed by the House of Representatives, 372 to 9.—The administration introduced bills to authorize expenditures of $5,430,000,000 for ERP during 15 months, April 1, 1949, to June 30, 1950.

Feb. 9—The House, acting on a request by President Truman, restored the Reciprocal Trade Agreements Act of 1934 to its original terms, eliminating restrictions enacted by the 80th Congress, and extended it to June 12, 1951. The vote was 318 to 69, with 63 Republicans and six Democrats opposed.—The trial of Cardinal Mindszenty in Communist court in Hungary was denounced by Secretary of State Acheson as "wanton perversion" and a "conscienceless attack upon religion and personal freedom."—The House passed a resolution calling for action on the Mindszenty case by the U. N. or by other "appropriate" means.

Feb. 10—A report by Gen. MacArthur's intelligence staff, made public by the Army, described a Soviet spy ring which, under the leadership of a German Communist posing as a Nazi, operated in China and Japan before and during the war. The leader, Dr. Richard Sorge, was able to warn Moscow of the impending German invasion in 1941. He was hanged by the Japanese in 1944.—An Army report named Agnes Smedley, American writer, and Guenther Stein, German-born journalist, as members of the spy ring. Both Miss Smedley and Stein denied the charges. Miss Smedley, threatening suit for libel if the Army would waive immunity, appealed to President Truman to clear her name. The Army Public Information Division declared (Feb. 18) there was no evidence of spying against Miss Smedley and that publication of the report in Tokyo was a "mistake."—A government loyalty review board cleared William W. Remington, suspended Department of Commerce official, of Communist charges made against him by Elizabeth Bentley, admitted former Communist, in July, 1948, Remington was suspended.

Feb. 11—Gen. Dwight D. Eisenhower, on leave from his duties as president of Columbia University, was named by President Truman as head of the Joint Chiefs of Staff and principal consultant to Secretary of Defense Forrestal. The general's chief mission was to seek to reconcile differences among the armed services on strategic and other military questions.—In retaliation for a demand by Hungary for the recall of two United States Legation attachés in Budapest, the State Department asked the early departure of John G. Hohman, first secretary of the Hungarian Legation in Washington.—A non-committal answer was given to Foreign Minister Lange of Norway by Secretary of State Acheson on the extent of military aid this country could count on if it joined the North Atlantic defense pact.

Hungary Asks Recall of U. S. Envoy

Feb. 12—The Communist Government of Hungary demanded the recall of United States Minister Selden Chapin in Budapest, and charged President Truman with "brutal attempts" to interfere in the country's internal affairs. The demand followed charges at the trial of Cardinal Mindszenty that Selden had conspired against the Communist regime.

Feb. 13—In its annual report to Congress the Veterans Administration said there were 18,8[illegible] living veterans in the United States June 30[illegible] and that its disbursements during the fiscal year 1947-48 were $6,896,264,628 or about $1,000,0[illegible] less than the previous year.

Feb. 14—Sen. Connally (D.-Tex.) and Sen. Vandenberg (R.-Mich.), leading members of the Senate Foreign Relations Committee assured the Senate that the proposed North Atlantic defense pact carried no automatic obligation for the United States to go to war if a member nation were attacked and that the legal right of Congress to determine—morally, legally and constitutionally—what course to take would remain unimpaired.—On his return from a three-week inspection trip to Japan, Secretary of the Army Royall declared a report ascribed to him that the United States would withdraw from that country in the event of war with Russia.—The U. S. Supreme Court refused the appeal of former Maj. Gen. Bennett E. Meyers for a review of his conviction on charges of perjury and subornation of perjury before a Senate committee.

President Urges New Taxes

15—Despite criticism in Democratic ranks ent Truman introduced in Congress his point anti-inflation program, including con- er wages, prices and production, and a $4,- 0,000 increase in general taxes.—After ob- a demonstration of the Air Forces latest bombers at Camp Springs, Md., the Presi- expressed uneasiness over where the cost of aining adequate air power would end.

16—Secretary of State Acheson declared he goal of the proposed North Atlantic de- pact was to provide "unmistakable proof of int determination of the free countries to armed attack from any quarter."

17—The President asked Congress to ap- ate $5,400,000 for reconstruction of the White to remedy its "truly appalling weaknesses."

18—Opposition to repeal of the Taft-Hartley Act was voiced before the Senate Labor and re Committee by representatives of the Na- Assn. of Manufacturers and the U. S. ber of Commerce, who urged that controls aintained on compulsory unionism and in- -wide bargaining.

20—Republican support of a strong North ic security pact, as advocated by the Demo- administration, was announced by Sen. f Ohio. Taft said he favored an agreement to the Western Hemisphere defense pact.

21—The Truman administration intro- bills in Congress which proposed to add 20,- 0 workers to the 30,000,000 already eligible ld age retirement and survivors' benefits, ng Social Security taxes and benefits.

23—Democratic Senators refused to shelve sure to curb filibusters pending action on a sed reciprocal trade program bill.—Treasury ary Snyder declared that in spite of soft in the nation's economy, including unem- ent in some localities, "the trend is toward nued prosperity."—Henry A. Wallace told the Foreign Affairs Committee that the Mar- European Recovery Program had failed in jective, but had served to intensify the "cold against the Soviet Union.

President Hits "Special Interests"

24—In talks at two Jefferson-Jackson Day rs, President Truman declared he would another nation-wide speaking tour, if neces- to fight the "special interests" opposed to gislative program in behalf of "all the peo- on which he was elected.

25—Dr. James G. McDonald, former head e Foreign Policy Assn., was named by Presi- Truman as the first U. S. Ambassador to . Israel appointed Eliahu Elath, a native of Ukraine, as her first envoy to the United s.—Anna Louise Strong, American-born r, deported by Soviet Russia for alleged spy ties, was summoned before the Federal Grand in New York City following her arrival at uardia airport. She was asked about sub- e activities in the United States.—Arriving ew York City after his recall had been re- ed by the Communist-dominated Hungarian rnment, Selden Chapin, U. S. Minister in pest, expressed the view that the Hungarian e was "sorely beset" as a result of popular ion to the trial and subsequent life sentence ted on Cardinal Mindszenty.

28—By President Truman's direction, the e opened a debate on strengthening the clos- anti-filibuster) rules. The President had the rt of the Republicans, but met with deter- i resistance from the Southern Democratic —The U. S. Supreme Court ruled the Navy d jurisdiction in courtmartialing Chief Sig- an Harold E. Hirshberg, and set aside a ver- imposed August, 1947, sentencing him to dis- rable discharge, 10 months' imprisonment and tion in rank for allegedly maltreating two Americans in a Japanese prison camp.

FOREIGN

1—In reply to a Soviet note asking for ication of Norway's stand on the proposed n Atlantic defense alliance, the Oslo Foreign informed the Kremlin that, while inter- in a regional security pact under the terms ne U. N. charter, it would sign no treaty ing military bases to foreign nations unless ay was attacked or threatened.—The Tel Government terminated military control over nodern section of Jerusalem and incorporated New City in the State of Israel under civilian nistration. The Old City remained in Arab s.

Stalin Proposes Truman Meeting

Feb. 2—Answering another inquiry by Kingsbury Smith, American news agency representative, Stalin said he had hoped to visit President Truman in Washington, but his doctors strongly objected to his making "any long journey, especially by air or sea." He proposed Moscow, Leningrad or some other place in the U. S. S. R. as a meeting place or, if President Truman objected, some city in Poland or Czechoslovakia.—Istvan Barankovics, leader of the Democratic People's party, last opposition group in Hungary, fled from his country after ordering dissolution of his party. The Communists had demanded that the strongly Catholic party should remain in existence until after the trial of Cardinal Mindszenty.

Cardinal Mindszenty Trial Opens

Feb. 3—The trial of Joseph Cardinal Mindszenty, Roman Catholic Primate of Hungary, on charges of treason, espionage and black market dealings—the first Cardinal to face civil charges in modern times—opened in Budapest before a five-judge Communist People's Court. He admitted that he was "guilty in principle and in detail of most of the accusations made," but denied he had taken part in a plot to overthrow the Hungarian Government. He also acknowledged he had written a letter, produced as evidence, to the United States Legation 10 days previously, asking that a car and an airplane be held in readiness for his escape and suggesting that the plane pilot be paid $4,000.—John W. Belcher, who resigned as Parliamentary Secretary of the British Board of Trade while under fire for having accepted gifts from businessmen, gave up his seat in Parliament.

Feb. 4—Cardinal Mindszenty retracted at his treason trial in Budapest a letter he had written before his arrest in which he repudiated in advance any statement he might make while in custody. He said the letter was "outdated" and that his confession of guilty "in principle" to part of the government's charges expressed his true point of view.—The Communist "Free Greece" radio announced Gen. Markos Vafiades had been relieved of his responsibilities as political chief of the Greek guerrillas because illness had prevented him from carrying out "important tasks assigned to him."—The U. S. and British Military Governments in Germany tightened the counter-blockade against the Soviet zone by closing their sectors to trucks going to or coming from the Russian side.—The Shah of Iran, Mohammed Riza Pahlevi, was slightly wounded in Tehran when a newspaper reporter, Fakhr Ralee, fired five shots at him after a student demonstration against granting a concession to the Anglo-Iranian Oil Co.

Death Asked for Mindszenty

Feb. 5—The death sentence by hanging was demanded by the State Prosecutor in the trial of Cardinal Mindszenty and six co-defendants on charges of treason in Budapest. The Cardinal said all his actions had been motivated by goodwill for the Hungarian people and he prayed for peace for the Catholic Church and for Hungary.—The security police of Poland's Communist-dominated government reported in Warsaw they had crushed a plot by members of the former anti-Nazi Home Army to assassinate government leaders. The alleged plot was said to have been financed with funds from abroad.

Feb. 6—Roman Catholics throughout the world offered prayers for Cardinal Mindszenty. In New York City, Francis Cardinal Spellman denounced the Budapest proceedings as a "mock trial" and warned that if the American people and the Government "fail to learn a lesson from Cardinal Mindszenty's martyrdom, we shall fail ourselves and ourselves face Communist conquest and annihilation."—The Soviet Union proposed a nonaggression pact to Norway after warning the Scandinavian country it would regard her joining the projected North Atlantic defense alliance as a move to circumvent the United Nations in tacit abetment of "the aggressive policy of certain great powers." Norway's Foreign Minister, Halvard M. Lange, flew from Oslo to Washington to confer with Secretary of State Acheson on the terms of the proposed defense union.

Feb. 7—The Vatican newspaper l'Osservatore Romano stated that Cardinal Mindszenty was "morally and civilly innocent." British Foreign Secretary Bevin denounced his trial as "utterly repugnant to our conception of human rights and liberties." In New York City, Mayor O'Dwyer called on Secretary of State Acheson to help prevent the "lynching" of Cardinal Mindszenty.

Life Term Imposed on Cardinal

Feb. 8—The Communist People's Court in Budapest found Cardinal Mindszenty guilty of treason, conspiracy to overthrow the government and foreign currency speculation, and condemned

him to life imprisonment. In answer to the presiding judge's question, he announced he would seek a review from the Appeals Court which had the power either to reduce the sentence or decree the death penalty. Six codefendants were convicted and sentenced as follows: Rev. Bela Ispanyi, life imprisonment; Prince Paul Esterhazy, royalist, 15 years; Prof. Justin Baranyai, royalist, 15 years; Laszlo Toth, editor, 10 years; Rev. Andras Zakar, six years, and Rev. Miklos Nagy, three years.—The news of the Cardinal's sentence stirred Pope Pius XII to tears. In the House of Representatives in Washington, Rep. Andrew L. Somers (D.-N. Y.) introduced a resolution urging President Truman to sever diplomatic relations with the Hungarian government. Nine Hungarian officials in the United States, including Acting Consul General Bela Balassa in New York City, resigned and asked asylum as political refugees.—A veteran revolutionary, John Ioannides, became commander of the Greek guerrillas, replacing Markos Vafiades.

Feb. 10—In an election in Northern Ireland (Ulster), the Unionists, Loyalists and Protestants, all opposed to a union with Eire, polled 234,202 votes and won 37 seats in the Northern Ireland House of Commons to 101,445 votes and 11 Commons seats for the Nationalists.—Fifteen members of the High Council of Unified Evangelical Churches in Bulgaria were indicted by the Communist-controlled government on charges of espionage and political intrigues for the United States and Britain.—The Provisional Government of Israel granted amnesty to more than 200 imprisoned terrorists, except those under life or death sentence. Among those freed was Nathan Friedman-Yellin, leader of the Stern Gang.—Two of the principals in the plot to assassinate Mohandas K. Gandhi, Hindu spiritual leader, Jan. 30, 1948, were sentenced to be hanged and five others to life imprisonment by a court in New Delhi, India.

Feb. 11—An anti-Communist coalition in the Japanese Parliament reelected Shigeru Yoshida as premier by votes of 350 out of 451 in the House of Representatives and 167 out of 218 in the House of Councillors.

Feb. 12—The Sacred Consistorial Congregation in Rome, headed by Pope Pius XII, excommunicated and declared "infamous" all persons taking part in the prosecution and sentencing of Cardinal Mindszenty in Budapest. In an apostolic exhortation, the Pope condemned the Soviet Union and her satellites, without referring to them by name, as "enemies of the name of God" and as being guilty of "a heinous crime."—Sheikh Hassan el banna, head of the outlawed Moslem Brotherhood, extremist Egyptian nationalist organization, was assassinated in Cairo.

Israeli Assembly Meets

Feb. 14—The first session of the Israeli Constituent Assembly was opened by Dr. Chaim Weizmann, the provisional president, in Jerusalem with an address in which he declared that, because "the institution of kingship was hateful" to them, the people of Israel had chosen the free republican form of government.—In an allocution to a secret consistory of the Sacred College of Cardinals in Rome, Pope Pius condemned the conviction of Cardinal Mindszenty as "captiously and deceitfully contrived."—Anna Louise Strong, American-born writer on Russia, was arrested by Soviet security police in Moscow for deportation as a spy.

Feb. 15—The Vatican confirmed a statement by Joseph Revai, chief spokesman of the Communist-controlled Hungarian government, that Cardinal Mindszenty would not have been brought to trial if he had been removed from office. "The Vatican never descends to such compromises," an official statement said.

Feb. 16—Gen. Lucius D. Clay, U. S. Military Governor, ordered a Soviet repatriation mission to leave the United States zone in Germany, saying it had had sufficient time to accomplish its task of seeking to induce displaced persons to return to Russia. Clay's order was protested by Marshal Sokolovsky, the Soviet commander.

Dr. Weizmann Elected

Feb. 17—By a vote of 83 to 15, Dr. Chaim Weizmann was elected president of the State of Israel by the Constituent Assembly in Jerusalem. The only other candidate was Prof. Joseph Klausner. Dr. Weizmann had been serving as provisional president since May, 1948.—The Soviet authorities refused to permit members of the U. S. Embassy staff in Moscow to see Anna Louise Strong, arrested as a spy.—After a secret trial before a U. S. military court in Munich, a Sudetan German, Frontisek Klecka, received 20 years at hard labor for endangering the security of American occupation forces in Germany.

Feb. 18—The millionth short ton of foo fuel supplies was flown to the Western zo Soviet-blockaded Berlin by the Anglo-Am airlift.

Feb. 19—Ritchie G. Davis, North China sentative of the Economic Cooperation Ad tration, protested in Peiping against the " and confiscation" of more than 100 tons o by Communist authorities there.—In th agreement reached under the Rio Mutual D Treaty, Costa Rica and Nicaragua settled month dispute arising from mutual charge each had given aid to revolutionaries.

Feb. 20—Before a crowd of 200,000 in St. Square in Rome, Pope Pius declared the se ing of Cardinal Mindszenty had "stirred banks of the Tiber a cry of indignation of the Eternal City." He said there could understanding between the Catholic Churc atheistic Communism.—An agreement was r in Jerusalem between Israel and Transjord the exchange of 615 Israelis captured by th Legion for 4,815 Arab prisoners.

17—In the Security Council, the Soviet offered to agree to the appointment of Col. n Flueckiger of Switzerland as governor ste, but the proposal was rejected by Bri- e United States and France, although his tion had first been presented by Britain. Western Powers said Russian acquiescence oo late, and they favored return of the Italy.

Israeli-Egyptian Armistice

23—An armistice plan drawn by Dr. Ralph che, was accepted by both Israel and Egypt. its terms, Israel was permitted to retain s in the Negeb gained in two offensives ct. 14, 1948, but agreed to withdraw her forces. Egypt gave up Faluja. Dr. announced that Iraq and Saudi Arabia reed to any terms accepted by the Arab bordering on Palestine.

24—By a vote of 15 to 3, with the Soviet and two of her satellites in opposition, the ic and Social Council established a new ber subcommittee on Freedom of Infor- and the Press, to watch over freedom of ess and radio throughout the world.

POLITICS

1—The New York City Board of Elections ed 28 election inspectors—14 Democrats Republicans—from four Manhattan As- districts on charges of having permitted filed or unregistered persons to vote in the ections.

Feb. 4—The repeated defeats of the Republican party were due, in part, to "male dominance of the party", Sen. Margaret Chase Smith of Maine told her fellow Republican women members of Congress. She urged more intensive activity among women voters.

Feb. 7—Members of the Democratic minority in the New York State Legislature in Albany denounced Gov. Dewey's proposal to increase personal income tax rates by 66 2/3 percent as a program to "soak the poor and middle income groups and reward the rich."

Dewey Warns Republicans

Feb. 8—At a Republican Lincoln Day dinner in Washington, Gov. Dewey of New York, twice the party's presidential nominee, asserted that the party was "split wide open," and warned that if a group of reactionaries succeeded in their attempt to return to the philosophy of the 1920s "you can bury the Republican party as the deadest pigeon in the country."

Feb. 9—Answering Gov. Dewey's Lincoln Day speech, Rep. Shafer (R.-Mich.) told the House that the twice-beaten presidential candidate was "washed up" and "punch drunk." He invited Dewey to "move over to the opposition" if he were unwilling to accept the counsel of the party's leaders.

Feb. 10—A "high center road" between conservatism and liberalism for the Republican party was called for by Sen. Vandenberg at a Lincoln dinner in Detroit. He announced he would retire when his current term expired in 1952.—Despite criticisms that the measure was intended to "purge as many Negro voters as possible," the Georgia Senate adopted, 29 to 17, a bill subjecting new registrants to intelligence and education tests.

Feb. 12—In defense of his proposed $936,000,000 budget for New York State for 1949-50, Gov. Dewey, in an address in New York City, said that higher taxes were needed to meet the mounting costs caused by the "50-cent Democratic dollar."

Feb. 15—In the first Congressional election since Nov. 2, 1948, Louis B. Heller, Democrat, running with Liberal party support, won over Francis E. Dorn, Republican, in Brooklyn, N. Y., by a vote of 22,935 to 16,179, succeeding the late Rep. John J. Delaney, Democrat.

Woman Heads New York G. O. P.

Feb. 18—Miss Jane H. Todd of Tarrytown, N. Y., became acting chairman of the New York Republican State Committee following the resignation of Glen R. Bedenkapp, the first woman to hold that post.

Feb. 23—Gov. Alfred E. Driscoll, Republican, of New Jersey, announced in Trenton that he would seek reelection. Under the state's new constitution, a governor may serve two terms. The old constitution prohibited a governor from succeeding himself.

Feb. 27—In a radio broadcast from Albany answering critics within his own party, Gov. Dewey declared that he could not "in good conscience" cut his budget of $936,200,000 for 1949-50. If the Republican-controlled Legislature was willing to cut services or transfer part of their cost to muncipalities, the budget could be cut.

Feb. 28—Republican legislators from Erie County, replying to Gov. Dewey, said New York State's proposed budget could be cut by $102,000,000 through elimination of "blank check" items.

BUSINESS AND FINANCE

Feb. 1—Secretary of the Treasury Snyder said in an address in Atlantic City, N. J., that the Truman administration regarded the economic situation as "basically sound", but was on the alert against the dangers of a boom and bust era.—Manufacturers' sales in 1948 totaled $210,000,000,000, an increase of 12 percent over 1947, but the increase was due chiefly to higher prices and not to any big increase in volume, the Department of Commerce reported.

Feb. 2—Founding of the Wool Bureau, Inc., to broaden the market for wool in the U. S. and Canada was affected by representatives of Australia, New Zealand, South Africa and the U. S. in San Antonio, Tex.—A hearing opened before the Federal Reserve Board in Washington on charges that Transamerica Corp. of San Francisco, by acquiring stock in over 600 banks in five western states, had established a credit monopoly in violation of anti-trust laws. Counsel for Transamerica contended no evidence had been adduced showing the company controlled any of the banks in which it owned stocks.

Grain Prices Slump

Feb. 8—The heaviest drops in grain prices in a year were reported by Chicago, Kansas City (Mo.) and Minneapolis. Wheat was off the daily limit of 10 cents a bushel; corn, 8 cents, oats, 6 cents and rye and soy beans, 10 cents. Lard was down $1 to $1.45 a cwt.—The International Monetary Fund in Washington announced it had approved the sale of 100,000 ounces of South African gold of 22 carats fine at $38.20 an ounce. The world price of 24-carat, or purse, gold in New York City was $35 an ounce.

Feb. 9—Personal income in the United States in 1948 reached $224,000,000,000, an increase of $18,000,000,000 over 1947, the Department of Commerce reported.—In spite of a general drop in prices, inflation remained a major threat to the nation's economy, spokesmen for the President's Council of Economic Advisers told a joint Congressional committee.

Government Revenues Rise

Feb. 15—Despite the cut in personal income taxes, the Government collected almost $3,000,000,000 more in revenues in 1948 than in 1947, total collections amounting to $42,302,864,000 compared with $39,420,446,000 the year before.

Feb. 18—The Bureau of Labor Statistics in Washington reported that unemployment between mid-December, 1948, and mid-January rose to 3,000,000. While admitting it was "more than seasonal," Commissioner Ewan Clague said there would be no ground for apprehension until unemployment reached between 4,000,000 and 5,000,000 and stayed there for a prolonged period.

Feb. 22—Total production in the United States in 1948 was $255,000,000,000, a 10 percent increase over 1947, the Department of Commerce reported.

Feb. 24—The Internal Revenue Bureau reported to Congress that tax refunds in 1948 totaled $2,297,542,000. The largest corporate refund, $35,123,401, was made to the Curtiss-Wright Corp., and the largest refunds on personal income taxes to Darryl F. Zanuck and his wife, $174,973 each.

Feb. 25—The General Motors Corp. reduced prices on all its passenger automobiles by $10 to $40 and on trucks by $100 to $150. Simultaneously the corporation announced a 2-cent-an-hour cut in the wages of its 273,000 production workers and $10 a month for its 68,000 salaried employees in accordance with a cost of living clause in its contract with the United Automobile Workers, C. I. O.—The Department of Justice announced that the Paramount Pictures Corp. had signed a consent decree to divorce its production and distribution from its theaters to comply with anti-trust laws.

GENERAL

Feb. 1—A United Press survey showed that 79 persons lost their lives in the snow and ice storms in the Western states during January. Army bulldozers, plowing through towering snow drifts, evacuated 1,000 persons in Nebraska.

Feb. 2—The French freighter Magellan, bearing the French Gratitude Train of 49 gift-laden "40 and 8" box cars for the 48 states and the District of Columbia, received a noisy welcome when it reached New York Harbor from Le Havre. The Gratitude Train was sent as a token of the French people's appreciation of the Friendship Train, sent overseas in 1948.

Feb. 3—The Navy's latest transport plane, a 92-ton Lockheed Constitution costing $30,000,000. made a non-stop flight from Moffet Field, Calif., to Washington National Airport in 9 hours 31 minutes. The twin-decked transport, which took off with the aid of jet rockets, carried 72 passengers and 18 crewmen, but had facilities for twice as many.

Feb. 5—The General Council of the Congregational Christian Churches, meeting in Cleveland, voted, 757 to 172, in support of a proposed merger with the Evangelical and Reformed Church.—A five-alarm fire wrecked Webster Hall, a landmark in the Greenwich Village section of New York City.

West Had Worst Winter

Feb. 6—Another snowstorm driven by winds of gale force struck the Western states as the Weather Bureau in Washington reported that the 1948-49 winter in the West was the worst and most widespread on record.

Feb. 8—A new transcontinental flight record was set by a small six-jet Boeing B-47 bomber which, piloted by Maj. Russell E. Schleeh and Maj. Joseph W. Howell of the Air Material Command, flew from Moses Lake, Wash., to Andrews Field, Md., a distance of 2,289 miles, in 46 minutes.

Feb. 13—Rioting, which caused 21 deaths, followed a realistic radio broadcast in Quito, capital of Ecuador, of a "Martian invasion" story that by Orson Welles which provoked a panic in the United States in 1938.

Feb. 14—The body of Ernie Pyle, famous Howard war correspondent who was killed by a Japanese sniper's bullet on Ie Island in the Pacific April 18, 1945, was taken to Pearl Harbor for burial in the new National Cemetery of the Pacific.

Feb. 21—Several hundred persons in the capital line were killed in Praia, capital of the Cape Verde Island, a Portuguese colony off the coast of Africa, when a huge wall collapsed and buried them.

Rocket Soars Up 250 Miles

Feb. 25—A 15-ton rocket, made of a German V-2 with a smaller American-built rocket in the nose, soared 250 miles above the earth at a speed of 5,000 miles an hour at the Army's proving grounds at White Sands, N. M.—A Navy seaplane boat, the transport Caroline Mars, set a new world's record for passenger-loads for a flight when it flew from San Diego to Alameda, a distance of 500 miles, with 222 on board.

Feb. 27—Nine students died in a fire which destroyed a 125-year-old dormitory of Kenyon College, Gambier, Ohio.

Feb. 28—Sixty-one Polish seamen and two Italians deserted from the Gdynia American liner Sobieski while she was docked in New York.

1949—March

WASHINGTON

March 1—Southern Democratic senators began an all-day filibuster against an amendment to the closure rules which would curb filibusters.—The Commission on Organization of the Executive Branch, headed by former President Hoover, ended its work after 19 months during which it drafted 18 reports for streamlining administrative offices and effecting savings of $4,000,000,000 annually.—Mildred E. (Axis Sally) Gillars, American-born broadcaster for the Nazis during the war, ended a five-day recital of her life story at her treason trial.

March 2—Echoing Communist leaders in Moscow, William Z. Foster, national chairman of the American Communist party, and Eugene Dennis, general secretary, announced that American Communists would oppose the United States in war against the Soviet Union and "cooperate with democratic forces to defeat the predatory aims of American imperialism."—President Truman, asked for comment, said: "I have no statement to make on the statements by traitors."—In large scale maneuvers in the Caribbean area under simulated atomic warfare conditions, Marine troops and Marines "captured" the small island of Vieques in amphibious operations. Admiral H. P. Blandy, commanding the Atlantic fleet, said a single atomic bomb could have halted the amphibious invasion, but that airborne forces would have landed despite the bomb.

March 3—James Forrestal resigned as Secretary of Defense and President Truman appointed Louis A. Johnson, former Assistant Secretary of War and reserve officer, as his successor.—The State Department announced establishment of offices of German and Austrian Affairs under Ambassador Robert D. Murphy, political adviser to Gen. Lucius D. Clay.

March 4—By a strict party vote of 8 to 5, the Senate Labor and Public Welfare Committee reported out the Administration's new labor bill without any changes. The action was criticized by Sen. Taft (R.-Ohio) as the "most high-handed procedure" in his Senate career.—Senators Thomas of Utah and Sen. Pepper of Florida, Democrats, declared it necessary to fulfill Democratic campaign pledges to repeal the Taft-Hartley law and reenact the Wagner Act.—A grand jury spent seven weeks hearing defense charges that the trial jury panel, Federal Judge Medina presiding at the trial of 11 Communists, did conspire to void the indictments and quash the jury panel. He ruled no evidence had been offered to show racial discrimination in the selection of the panel and ordered selection of a jury.

March 5—Miss Judith Coplon, an analyst employed in the internal security section of the Department of Justice in Washington, and Valentin A. Gubitchev, a Russian engineer on the United Nations staff, were arrested by F. B. I. men in New York City on charges of having conspired to obtain secret information relating to the na-

Typed excerpts from restricted Government nts were found in the woman's handbag.

h 7—The Senate Foreign Relations Com- gave its unanimous approval to the Eco- Cooperation Administration's request for a 00,000 authorization to finance ERP for ths, April 1, 1949, to July 1, 1950.—The approved, 348 to 4, a bill to strengthen the s intelligence network.—President Tru- order, issued two years before, that all gov- t personnel be subjected to loyalty tests acked in the courts for the first time when t Office employees filed suit charging the ere unconstitutional.

h 8—President Truman said in an address lins College, Winter Park, that "through on alone can we combat the tenets of nism."

Senators Seek to Halt Filibuster

h 9—Thirty-three Senators—17 Democrats Republicans—signed a petition to invoke against the continuing filibuster by South- mocrats against a motion to bring up an nent to the rules which would curb future ers.—The House, by unanimous vote, ap- measures to establish a $161,000,000 net- f land-based radar and warning and con- stallations to protect the country against r Pearl Harbor sneak attack and for build- at a cost of $200,000,000, a proving ground niles in range, for testing guided missiles.

h 10—Vice President Barkley, presiding of- f the Senate, held that the filibuster by rn Democrats against a motion to bring up pate the anti-filibuster amendment to the was subject to closure.—A Federal Court fter 17 hours, found Mildred E. (Axis Sally) , guilty of treason.—In New York City, a l grand jury indicted Judith Coplon and n A. Gubitchev on charges of espionage.

Anti-Truman Coalition in Senate

h 11—A coalition of 23 Republicans and thern Democrats voted down a ruling by resident Barkley to make the closure, or le, applicable to the Southerners' filibuster making permanent a change in the rules b future filibusters. Twenty-five Demo- nd 16 Republicans voted to uphold the Vice nt.—Valentin A. Gubitchev refused to on an espionage indictment in New York, g diplomatic immunity. Judith Coplon, d with Gubitchev, pleaded not guilty and eleased in $2,500 bail.—In his annual re- Kenneth C. Royall, Secretary of the Army, ced the Soviet blockade of Berlin as "a day threat to the peace of the world."

h 12—Secretary of Defense Forrestal de- many exaggerated reports were current on gical warfare"—the use of germs to cause and death among human beings and live- and to destroy crops—and that there was actual basis for extravagant claims of the ce of a biological super-weapon."—In an- eport to Congress, the Hoover Commission nended reorganization of the Interstate erce Commission, the Federal Trade Com- n and other regulatory agencies to elimi- red tape, useless delay and expense."

h 14—After two days of talks in quest of promise had failed, Truman Administration surrendered to Southern Democrats in the and shelved the proposed amendment to ture filibusters.—Charles G. Ross, President n's press secretary, ordered the confisca- f photographs of the President and Chief Fred Vinson on the beach at Key West, on the ground they violated Presidential y and privacy. The pictures were taken by House press photographers from a low-fly- avy blimp. Edited versions were released 17.

h 15—The Senate Armed Services Commit- jected President Truman's nomination of Sen. Mon C. Wallgren of Washington as an of the National Security Resources by 7 to 6 with Sen. Byrd (D.-Va.) siding ix Republicans in opposing confirmation.

oviet "Cultural" Delegates Get Visas

h 16—While announcing that visitors' vi- ould be granted to Dmitri Shostakovich, composer, and 22 other delegates from be- he Iron Curtain to attend the Cultural and ific Conference for World Peace in New City, the State Department said it was the meeting would be used to spread Com- propaganda.—The State Department, in al statement, charged that Bulgaria, Hun- nd Rumania, with the aid of the Soviet had "flagrantly violated" their peace obligations. A similar statement was made British House of Commons.—The cruiser ukee, was formally returned by the Soviet Navy at Lewes, Del., in a ceremony in which the Russians avoided giving a salute to the Ameri- can flag. The warship was in a state of ad- vanced neglect, infested with rats.

March 17—The Republican-Southern Democrat coalition adopted their own closure, or gag rule by 63 to 23, with 34 Republicans voting with the Southerners, and 15 Administration Democrats and eight Republicans in opposition. Under the new rule closure could be invoked by a two-thirds vote of all sitting members except in case of a filibuster against a change in the new rule.—Secretary of Defense Forrestal ordered consolida- tion of the information services of three armed services to prevent future leaks of military in- formation as a result of inter-service rivalry.

North Atlantic Defense Pact

March 18—Under the terms of the proposed North Atlantic defense pact, made public in Washington and in Europe, the United States, Canada and 10 Western European nations agreed that "an armed attack against one or more of them in Europe and North America shall be con- sidered an attack against them all." Secretary of State Acheson explained that the Administra- tion would ask Congress to supply some of the European signatories with arms to resist aggres- sion.—After nine and a half weeks of delays, se- lection of the jury to try 11 Communist leaders on charges of conspiracy to overthrow the Govern- ment was completed in Federal District Court, New York City. There were 11 women among the 12 regular jurors and four alternates, with Mrs. Thelma Dial, a Negro housewife, foreman.

Implied Warning to Soviet Union

March 19—In an implied warning to the Soviet Union, the State Department declared that the intention of the North Atlantic defense pact was to "remove the danger of miscalculation by any potential aggressor that he could succeed in over- coming them (the signatory powers) one by one." President Truman said the pact "will strength- en and support the United Nations." The Soviet press in Moscow denounced the treaty as "a weapon of the aggressive policy of the ruling circles in the United States."—The Navy dis- closed that a Lockheed Neptune P2V-3C, a long range bomber capable of handling atomic bombs, had made a 2,000-mile flight after being launched from the carrier Coral Sea. It was the heaviest plane ever launched from a carrier, weighing 37 tons with a 10,000-pound bomb load and fuel. —Oak Ridge, Tenn., birthplace of the atomic bomb, was opened to the public and 75,000 per- sons heard Vice President Barkley, Chairman David E. Lilienthal of the Atomic Energy Com- mission and other speakers declare that while it still was necessary to "continue secrecy and guards and fences" around the atomic plants it had been decided it was undemocratic to shut off the new city's 36,000 inhabitants from the rest of the country.

President Assails Real Estate Lobby

March 21—In a talk before the U. S. Confer- ence of Mayors, President Truman charged that the real estate lobby "has become the real enemy of the American home," fighting low-rent hous- ing and slum clearance and seeking to destroy rent control. Bernard M. Baruch urged the mayors to support the President who, he said, occupied "the most difficult position of any President, even including George Washington and Abraham Lincoln."—Judith Coplon pleaded not guilty in District of Columbia Federal Court to a second indictment charging her with hav- ing taken secret security documents for the benefit of a foreign government. She was re- leased in $10,000 bail.—In his opening statement to the Federal jury trying 11 Communist leaders on charges of conspiring to overthrow the Gov- ernment, U. S. Attorney John F. X. McGohey accused the defendants of having trained forces to start a revolution in case of war or depression. Defense counsel denied this.

March 22—The Senate confirmed, 50 to 11, President Truman's appointment of Dr. James Boyd, former dean of the Colorado School of Mines, as director of the U. S. Bureau of Mines. The appointment had led John L. Lewis to call a two-week work stoppage on the ground Dr. Boyd was unqualified for the post.—Contrary to President Truman's recommendation of a 48- group Air Force, the House approved, 395 to 3, a bill authorizing a 70-group program.

March 23—Secretary of State Acheson formally denied Soviet charges that U. S. military ad- visers in Iran intended to transform that coun- try "into a military base to be used against the Soviet Union."—Winston Churchill reached New York on the Queen Elizabeth, his first visit since January, 1946, and declared he was a "whole- hearted supporter of the Atlantic Pact." He left to be President Truman's guest at Blair

House.—Fourteen delegates from behind the Iron Curtain to the Cultural and Scientific Conference for World Peace arrived by plane in New York City. The Russian delegation of seven included Dmitri Shostakovich, Soviet composer, and there were four Czechs and three Poles.—Prof. Louis F. Budenz of Fordham University, former Communist, testified at the trial of 11 American Communist leaders that several of the defendants had taken an oath of loyalty to Premier Stalin in Moscow.

Veterans' Pension Bill Shelved

March 24—By a single vote, 208 to 207, the House shelved a bill sponsored by Rep. Rankin (D.-Miss.), chairman of the Veterans Affairs Committee, to pay veterans of both World Wars pensions ranging from $20 to $90 a month, which, the Veterans Administration estimated, eventually would reach $7,000,000,000 a year.—The State Department reported that its action in issuing visas to "notable Communist propagandists" to attend the Cultural and Scientific Conference for World Peace demonstrated "the difference between the policies of the two governments, for the Soviet Union has never permitted within its borders an international meeting representing a wide range of political views."

March 25—A new pension bill, covering only veterans of World War I with low incomes and fixing monthly payments at $72 beginning at the age of 65, was introduced in the House by Rep. Rankin (D.-Miss.).—The Soviet delegation was cheered at the opening session of the Cultural and Scientific Conference for World Peace in New York City, but there were hisses when Norman Cousins, American magazine editor, defended United States democracy and called on the foreign delegates to tell their people that it was "a lie to say that any single group controls the United States—not excluding Wall St. or the American Communist party." The sessions were picketed by members of the Catholic War Veterans, including disabled men in wheelchairs, and other anti-Communist groups.—Lt. Gen. W. Bedell Smith resigned as U. S. Ambassador to Moscow to return to active Army service. President Truman, accepting the resignation regretfully, praised Gen. Smith's loyal services during his three years in Russia.—Mildred E. (Axis Sally) Gillars, was sentenced to prison for from 10 to 30 years and fined $10,000.

March 26—Dr. Harlow Shapley of Harvard University, chairman of the Cultural and Scientific Conference for World Peace, attacked American foreign policy, warned against war hysteria and pleaded for improvement of relations between the United States and the Soviet Union. At a rival meeting of the Americans for Intellectual Freedom presided over by Prof. Sidney Hook of New York University, the conference was denounced as "Communist-inspired" and the Soviet Union was accused of having imposed an "intellectual strait-jacket" on thinkers, artists and writers.—Secretary of Defense Forrestal reported that during the first 18 months of unification of the three armed services savings totaling $56,517,421 had been effected.

March 27—At the concluding session of the Cultural and Scientific Conference for World Peace in New York City, Alexander A. Fadeyev, Soviet novelist, asserted that the "Soviet Union stands for peace and friendship among peoples, because we are first and foremost a state of plain people." He pleaded for cooperation between the United States and Russia in promoting peace.—In his annual report to President Truman, Secretary of the Interior Krug advocated a sweeping program of resource development, especially in synthetic fuels and water power, as essential to national security.

U. S. Can Stop Aggression, Says Johnson

March 28—Taking the oath of office as the new Secretary of Defense, John A. Johnson declared the U. S. Government would make every effort to avert a third World War, "but if there is aggression we are calmly confident that we can stop it." His predecessor, James Forrestal, was decorated with the Distinguished Service Medal by President Truman.

March 29—Both chambers of Congress approved a compromise bill extending Federal rent control for 15 months, from April 1, 1949, to June 30, 1950, but providing that any state was authorized to discontinue rent control after passing appropriate legislation and similar action could be taken by municipalities, with approval of the Governor. The vote was 78 to 11 in the Senate and 263 to 143 in the House. A motion by Sen. Bricker (R.-Ohio) to recommit the bill on the ground that a provision calling for a "fair net operating income" for landlords was too vague was defeated, 53 to 32.—A move by Sen. Taft (R.-Ohio) and Sen. Russell (D.-Ga.) to cut the Administration's $5,580,000,000 Euro covery Program by 10 percent gained after Sen. George (D.-Ga.), chairman Senate Finance Committee, had warn "sizable depression" if President Trum posal of $4,000,000,000 in new taxes wer —Secretary of Defense Johnson named seph T. McNarney, head of the Air Mate mand, to eliminate unnecessary and d agencies in the National Military Estab —The State Department and the Depar Justice vetoed a proposed speaking tou nation by foreign delegates to the Cult Scientific Conference for World Peace, rected them to leave the country within sonable time."

March 30—President Truman signed extending Federal rent control for 15 mo claring that "in its final form it rep crushing defeat for the real estate Pickets bearing signs accusing him of an ism greeted British Foreign Minister Ern on his arrival on the liner Queen Mar the North Atlantic defense pact.

March 31—President Truman, criticiz George's opposition to a $4,000,000,000 crease asserted that a budget deficit far more dangerous to the nation's econ higher taxes. He rejected a proposal Vinson (D.-Ga.), chairman of the Hou loes Committee, for a $1,599,600,000 in the pending $15,000,000,000 defense bu a speech at the Mid-Century Convocatio Massachusetts Institute of Technology in Winston Churchill warned that, while h believe war was inevitable, he regarde Communism as "something quite as wi in some ways more formidable than Hit that "the 13 men in the Kremlin," a world rule, had isolated Russia and her "because they fear the friendship of more than its hostility."

FOREIGN

March 1—Five of 14 defendants on Budapest on charges of having engaged money deals in a conspiracy with Josep nal Mindszenty withdrew pre-trial co declaring they had made them under i timidation.—Six more of the Protestan ters on trial in Sofia on charges of tre pionage and illegal currency transacti fessed their guilt, while a seventh denie guilty of treason and espionage, but illegal currency transactions.—In W Polish priest, the Rev. Kazimir Fer sentenced to 15 years in prison after b victed of having heard the confessions encouragement to members of an an ment underground band.—Two Poles Germans were convicted of espionage of Poland by a U. S. military comm Munich, and sentenced to prison for years.—The 5,270-ton cruiser Chungk tionalist China's only heavy warship, to the Communists and entered the Co held port of Chefoo in Shantung Provi

17—King Abdullah of Transjordan set administrations in the Arab areas of e, including the "old city" in Jerusalem, and Ramallah. Israel denounced the ac- "virtual annexation."

Poland Asks Recall of U. S. Aide

March 18—Poland demanded the recall of Chester H. Opal, press aide in the U. S. Embassy in Warsaw, because a U. S. Information Service bulletin, which he had edited, described Poland as a "Soviet satellite."—Britain granted a subsidy of £3,500,000 ($14,000,000) or £1,000,000 more than the previous year, to Transjordan toward maintenance of the Arab Legion.

March 19—The People's Council of the Soviet Zone in Berlin adopted a constitution for all Germany and ordered the election of an all-German people's conference as the first step toward setting up a Communist-dominated state.

March 20—The three Western Allies outlawed the Russian-sponsored East Mark in the Western sectors of Berlin and decreed that the Deutsche Mark, sponsored by them, was the only legal tender there.—Following incursions by Israeli troops into its territory, Transjordan formally requested military assistance from Britain under the terms of a mutual defense treaty.—The Bizonal authorities in Germany selected a board of 12 trustees, composed of former industrialists and trade unionists, to direct the operations of the big steel companies in the Ruhr district until they were nationalized or returned to private ownership.—Nationalist B-24 bombers dropped 1,000-pound bombs on the runaway cruiser Chungking as she lay at anchor off the Communist-held port of Hulutao, South Manchuria.

March 21—The Leningrad Pravda, mouthpiece of the local Soviet, accused Finland of violating her peace treaty with Russia and warned her against joining the North Atlantic defense pact.—Following four hours of rioting between Communists and followers of Sir Oswald Mosley in London's East End, in which 10 policemen were injured and 35 Communists arrested, the Home Office banned all political rallies in London for three months.—Israel denied charges that her troops had crossed the frontier into Transjordan.

March 22—Gen. Lucius D. Clay, U. S. Military Governor in Germany, stated that Ilse Koch, widow of one of the commandants of the Buchenwald concentration camp, would not be tried again on charges in connection with the camp, but that the American as well as German authorities were trying to determine whether she could be tried for other war crimes committed after she left the camp in 1943. Clay's commutation of her original life sentence to four years' imprisonment provoked widespread criticism in the United States.

Soviet Army Chief Removed

March 24—In another unexplained top-level shift in the Soviet Cabinet, Marshal Nikolai A. Bulganin was removed as Minister of the Soviet Armed Forces, which he had taken over from Premier Stalin two years before, and Marshal Alexander M. Vasilevsky was appointed in his place.—Lt. Col. Peter J. Kopcsak and Lt. Col. John P. Merrill, assistant U. S. military attachés in Budapest, were expelled by the Hungarian Communist Government after they had defied the political police.

March 25—Peiping was chosen as the capital of Communist China as Mao Tze-tung, leader of the anti-Nanking forces took up headquarters there.

March 26—A commission composed of representatives of the United States, Britain, France and the Benelux nations approved 31 "minor rectifications" of Germany's western boundary involving 135 square kilometers (52 square miles) and a population of about 135,000. The nations pledged themselves to safeguard the inhabitants who would assume the nationality of the country to which they were attached, retain German citizenship or move to Germany, being allowed to take with them their movable property and to retain title in, or sell, their real property.—The Chinese Communist Central Committee in Peiping appointed a commission of five leading Communists to open peace negotiations with Nanking.

March 27—In elections for cantonal councils French parties supporting Premier Queuille's coalition government won 1,181 seats, gaining a clear-cut victory, while the Communists, although polling 23 percent of the popular vote, obtained only 37 seats, a loss of 147. The de Gaullists captured 389 seats, a gain of 223.—The official German-language Soviet newspaper in Berlin, in an article signed by a Russian Army officer, served notice that the Soviet Union would invade Western Europe in the event of war.—A series of Communist-incited strikes and demonstrations against the government were staged in Syria to protest against armistice negotiations with Israel.

Czechs Sentence U. S. Soldiers

March 29—Two U. S. soldiers, who crossed the border into Czechoslovakia and were seized there Dec. 9, 1948, were found guilty of espionage after

a secret trial in Prague. Private George R. Jones of Owensboro, Ky., was sentenced to 10 years at hard labor and Private Clarence R. Hill of Jackson, Miss., to 12 years. Both had been AWOL from the 6th Armored Cavalry. A formal protest against the disregard of recognized legal procedure was filed with the foreign office by U. S. Ambassador Joseph E. Jacobs.—Marshal Vassily D. Sokolovsky, who was responsible for the blockade of Berlin, was promoted to First Deputy Minister of the Soviet Armed Forces. He was succeeded by Gen. Vassily I. Chuikov.

March 30—After arresting President Shukri al-Kuwatly and the members of the cabinet, the Syrian Army seized control of the country. The bloodless uprising, described as nationalist, was directed by Brigadier Husni Zayim, Commander-in-Chief of the Syrian Army, who had charged the Government with "despotism." Zayim consulted with Faris el-Khouri, former premier and Syria's delegate to the U. N., on formation of a new Cabinet.—Marshal Tito's government accused Bulgaria of "instigating repeated brutal attacks" on Yugoslav frontier guards, and suspended an agreement with the neighboring country under which militiamen of either nation were permitted to escort trains across the frontier.—Fifteen princely states lying between India and Pakistan and known collectively as Rajasthan, were merged into a single administrative unit under the sponsorship of India. The states, including Jaipur, Jodhpur and Bikaner, had maintained their independence for 1,000 years against Mogul conquerors and the British.

UNITED NATIONS

March 1—The U. N. Commission for Indonesia, in a cable from Batavia, reported that the situation there was deteriorating and blamed non-compliance by the Netherlands with the Security Council's resolution of Jan. 28.

March 3—Answering critics who had called President Truman's "bold new program" of global aid to underdeveloped countries too vague, Leroy D. Stinebower, U. S. delegate, told the Economic and Social Council that it was up to the U. N. to draft a blueprint, either with or without the aid of recommendations from Washington.

March 4—Israel's application for admission to the U. N. was approved by the Security Council at Lake Success, N. Y., by a vote of 9 to 1, with Egypt in opposition and Britain abstaining. It was up to the General Assembly to ratify the Council's action.

Slave Labor Inquiry Voted

March 7—The Economic and Social Council voted, 14 to 3, to investigate United States charges that between 8,000,000 and 14,000,000 persons were being held in slave labor camps in the Soviet Union and other Eastern European countries. The Soviet Union, Byelorussia and Poland opposed the resolution.

March 10—U. S. Delegate Leroy D. Stinebower walked out of a meeting of the Economic and Social Council when Dr. Juliusz Katz-Suchy of Poland charged that the Korean Republic was a puppet regime set up by the United States and maintained by American bayonets.

March 11—Israel and Transjordan signed an enduring cease-fire on the Island of Rhodes where armistice negotiations continued under the direction of Dr. Ralph J. Bunche, Acting U. N. Mediator.

March 15—Before the Atomic Energy Commission, Soviet Delegate Jacob A. Malik charged the United States with having produced the Baruch plan to block the prohibition of atomic weapons and the establishment of international control, especially over its atomic plants.

March 16—A committee of experts from so-called neutral countries informed the Security Council it had failed to work out a solution of the dispute between the Western Powers and Soviet Russia over German currency, cause of the Soviet blockade of Berlin.—In Washington the House, 160 to 18, approved a bill to authorize a $16,000,000 contribution to the U. N. for relief of Jewish and Arab refugees in Palestine.

March 17—Bolivia requested Secretary General Trygve Lie to place the prosecution of Joseph Cardinal Mindszenty of Hungary, on the agenda of the next meeting of the General Assembly under a provision of the U. N. Charter pledging members to respect fundamental human rights.

Israel Protests on British Troops

March 23—Israel protested to the Security Council against the arrival of more troops in the Aqaba area of Transjordan, declaring the action violated a Security Council resolution adopted in May, 1948, and demanded that the troops be withdrawn.—An armistice agreement, negotiated through U. N. Mediator Bunche, was signed between Is Lebanon. It called for withdrawal of Isra from nine Lebanese border villages and change of prisoners of war.

March 31—Soviet Deputy Georgi N. Za a meeting of the International Refugee O tion in London called the agency an in for supplying "cheap slave labor" to West tries which had blocked the repatriation citizens from the Western zones of Austri Deputy Samuel Reber retorted that displa sons and refugees in Austria did not wa turn to Russia and the Communist-d countries and that the United States ha tention of forcing them to do so.

POLITICS

March 6—Rep. Hugh D. Scott Jr., R national chairman, declared in Washing the Democratic record in Congress on pledges "presents conclusive evidence American people bought another gold b November."

March 9—Gov. Dewey rejected propos legislative investigation of Mayor William er's New York City administration, deci evidence warranting one had been prese that "any other basis for one would be a one which I would not make."—Clendenin leader of a Fusion movement to oppose t tion of Mayor O'Dwyer, challenged him whether Frank Costello, ex-convict, was boss of New York City." Mayor O'Dw mented: "Another crackpot."

O'Dwyer Charges Wiretapping Plo

March 11—Mayor William O'Dwyer of N City declared a plot to tap his wires and other high city officials had been uncov that a former city detective, Kenneth R confessed he had been hired by a lawyer on the telephone lines. Ryan, who had s in wiretapping while in the police service, en into custody.—Frank Costello, New Y gambler and political manipulator, was by the California Commission on Organiz as the "reputed head" of a $2,000,000,00 wide slot machine racket which spent $4 a year for "bribery and corruption of pu cials" and had attempted to remove G Warren of California from office.

March 12—Clendenin J. Ryan, head of Government Committee opposed to the ree Mayor William O'Dwyer, denied he was in the plot to tap O'Dwyer's wires and other New York City officials. He admitte dined with John G. Broady, a lawyer, wh neth Ryan called the man who had hire do wiretapping.

March 13—Thomas J. Curran, New Yo tary of State and Republican chairman York County, called for the resignation Robert F. Wagner, Democrat, whose illness, he said, deprived the state of its resentation in the Senate.

March 14—Clendenin J. Ryan signed a immunity before appearing before a grand vestigating the alleged wiretapping plot. Ryan was indicted on charges of escap lawful custody and wiretapping. Frank denied he was "the real boss of New Yo declaring: "I couldn't square a traffic myself."

March 15—A rebellion of some up-Stat licans in the Senate in Albany against Gov tax program was ended by a compromis the income tax proposed by the Govern percent and eliminating a proposed 1 cen increase in the gasoline tax.

Boom for F. D. R. Jr.

March 18—A boom for Franklin D. Roo to run for Congress in the 20th Congressi trict in Manhattan to fill the vacancy the death of Rep. Sol Bloom gained m with former Gov. Herbert H. Lehman an ers of the C. I. O. Political Action Comm dorsing him. (*See May 17*)

March 19—Ten Democratic members of from New York City conferred with Mayor on wiretapping. They were interested in bill to legalize wiretapping to strengthen security and combat treason and espio "frowned upon" wiretapping which vio privacy of the home and of individuals.

March 22—Mayor O'Dwyer recommende State Legislature pass a law which would session of wiretapping equipment in the s gory as burglars' tools. He also testified grand jury investigating the tapping of

rements for stock transactions from 75
ent, explaining it had taken the action
nti-inflationary" step in view of the con-
of the general credit situation.—Simul-
with a shakeup among its top execu-
Kaiser-Frazer Corp. announced reduc-
rom $196 to $300 in the prices of its auto-
a move to stimulate sales.

28—As a result of the lowering of margin
nts from 75 percent to 50 percent, stocks
w York Stock Exchange rose 1 to 4 points
eaviest trading since early January, 1,-
hares changing hands.

GENERAL

2—An Air Force B-50 bomber, the Lucky
de the first non-stop flight around the
history. The flight started and ended at
Air Force Base, Fort Worth, Tex., and
ring the global circuit of 23,452 miles the
was refueled by B-29 tank planes in
Air Force bases in the Azores, Dhahran
Arabia, the Philippines and Hawaii. The
ly averaged 239 miles an hour and made
l-the-world trip in 94 hours 1 minute.
carried a crew of 14 under Capt. James
of Melrose, Minn.

March 4—The Navy flying boat Caroline Mars set a new world record for aircraft of any type when it carried 269 persons—six crew members and 263 passengers—from San Diego to San Francisco. The previous record number of passengers was 232, carried by the Navy dirigible Akron in 1933, while the Caroline Mars, on Feb. 25, made a 500-mile flight with 222 on board.

March 8—Capt. William P. Odom, round-the-world flier, set a new record for light planes when he flew non-stop from Honolulu to Teterboro, N. J., 5,300 miles, in 36 hours.

Robbers Hold Up Train

March 9—Four young gunmen held up the Ambassador Limited of the Baltimore & Ohio enroute from Washington to Detroit, at Martinsburg, W. Va., and robbed the crew and 100 passengers of $1,500. Two of the bandits were captured later in Washington.

March 12—A B-36 superbomber, which spanned the country twice, and for more than half of the distance carried a 10,000-pound bomb load, set a new non-stop distance record for heavy bombers of 9,600 miles in 43 hours 37 minutes. The flight started and ended at the Carswell Air Base, Fort Worth, Tex. The bombs were dropped into the Gulf of Mexico.

March 26—Tornadoes and windstorms killed 28 persons, made hundreds of families homeless and caused extensive property damage in Arkansas, Oklahoma, Texas(Louisiana, Mississippi and Tennessee.

March 30—Richard H. Crowe, assistant manager of a National City Bank branch in lower Manhattan, disappeared from New York City after looting the bank's vault's of $884,000, of which $195,000 was in cash and the remainder in negotiable and non-negotiable securities.

1949—April

WASHINGTON

April 2—The Foreign Ministers of 10 European countries and the Secretaries of State of the United States and Canada, in Washington for the signing of the North Atlantic pact, approved the final text of the treaty and denied Soviet charges that it was directed against Russia, declaring it was of "completely defensive nature" and in "conformity with both the spirit and letter of the Charter of the United Nations."—Mentioning the persecution of church and opposition political leaders, the United States, jointly with Britain, sent notes to Bulgaria, Hungary and Rumania charging continued violations of guarantees by treaty to respect human rights and fundamental freedoms, and demanding future conformance.

North Atlantic Pact Signed

April 4—Twelve nations signed the North Atlantic pact in the State Department auditorium, with President Truman present. The signatories, represented by Foreign Ministers or Secretaries of State, were: Belgium, Canada, Denmark, France, Great Britain, Iceland, Italy, Luxemburg, the Netherlands, Norway, Portugal and the United States. The President described the agreement as "a neighborly act." Said he: "We are like a group of householders, living in the same locality, who decide to express their community of interests by entering into a formal association for their mutual self-protection." The Foreign Ministers stressed the defensive character of the pact.—Dedicating the new 17,000-ton super-cruiser Roanoke at Philadelphia, Secretary of Defense Johnson said she would be a symbol of "peace through strength" in the "tense years that lie ahead."

April 6—President Truman declared he would not hesitate to use the atomic bomb again if it were necessary for the welfare of the United States and the democracies of the world. He explained that, in 1945, he had decided to use the bomb in the attacks on Hiroshima and Nagasaki to save the lives of 200,000 Americans and 300,000 or 400,000 Japanese, which would have been lost in an assault on Japan.—As the nation observed Army Day on the 32nd anniversary of United States entry into World War I, Secretary of Defense Johnson abolished it in favor of a "unified" Armed Forces Day in joint tribute to the Army, Navy, Air Force and Marine Corps.—Herbert A. Philbrick, a Boston advertising man, testified at the trial of 11 Communist leaders in New York City that he had been a member of the Young Communist League and, later, the Communist party for nine years and at the same time had served as a volunteer undercover agent for the F.B.I. He said he had attended a Communist school for teachers at which overthrow of the government by bands of armed workers was taught.

Accord on Western Germany

April 8—The United States, Britain and France, in a joint communiqué, announced that full agreement had been reached for merger of the three Western occupation zones and early establishment of a German republican government for the combined territory. Under the agreement, the military governments would give way to a German civilian administration, but occupation troops would remain for security reasons. The accord was reached following a series of talks in Washington between Secretary of State Acheson, British Foreign Secretary Bevin and French Foreign Minister Schuman. On Schuman's insistence, each nation was given the power to veto future decisions affecting security.

April 9—The "iron network of treaties" which lock the Soviet Union and its satellites together are "far stronger than the engagements undertaken by the parties to the North Atlantic pact," Lt. Gen. J. Bedell Smith, former U. S. Ambassador in Moscow, declared in an address in New York City. He pointed out that Eastern European treaties failed to tie in with the United Nations Charter.—The House Appropriations Committee reported out a bill authorizing $15,909,116,800 for the National Military Establishment for the 1950 fiscal year, or $631,252,100 more than requested by President Truman. The proposed increase was earmarked for the Air Force.

April 10—In testimony before the House Appropriations Committee March 7, released for publication, Secretary of the Army Royall opposed reduction of United States occupation forces in Germany and disclosed that several Western European nations had urged an increase in American land armies in the occupied areas to help hold back aggression.

April 11—In releasing another report by his commission on reorganization, former President Hoover charged "a staggering waste" of military expenditures and recommended changes of budgeting and accounting methods in the National Military Establishment to effect savings estimated at $1,500,000,000 annually.

Truman Asks Treaty Ratification

April 12—In a message to the Senate asking ratification of the North Atlantic pact, President Truman declared events had demonstrated that the United States could not achieve peace independently because "the world has grown too small" and the Atlantic and Pacific oceans "no longer protect us from the reach of brutality and aggression." Secretary of State Acheson reported to the President that under the terms of the pact the United States would not be "automatically" at war if one of the other North Atlantic signatories were attacked. Only Congress, he emphasized, could declare war.—The United States and Canada established a Joint Industrial Mobilization Committee to plan for an emergency.—On the fourth anniversary of taking office, President Truman occupied his old seat in the Senate and told his former colleagues that since he had moved into the White House he had done his "level best" to carry the "tremendous burden" thrust upon him, in the interest of all the people.

April 13—Rep. Vito Marcantonio, American Labor party member from New York City, cast the only opposing vote when the House passed a record peacetime defense bill of $15,909,116,800 for 1949-50. The vote was 271 to 1.—The State Department announced that the United States, Britain and France had agreed not to dismantle 159 industrial plants in western Germany.

European Recovery Bill Passed

April 14—A compromise bill authorizing expenditure of $5,430,000,000, or $150,000,000 less than asked by President Truman, for European recovery for a 15-month period ending June 30, 1950, was passed by voice votes in both the Senate and the House.—President Truman's fiscal policies were assailed as "spendthrift" by Sens. Wherry of Nebraska and Bridges of New Hampshire, Republicans, after the Senate had passed a deficiency appropriation bill of $595,890,000 for veterans' aid. They declared that if all of the President's "socialistic" recommendations were approved by Congress, $5,000,000,000 in new taxes would be needed or the Treasury Department would have to return to deficit spending.—A new national health program calling for Federal aid to states instead of compulsory health insurance, as favored by the Administration, was introduced in the Senate by three Republicans, Sens. Taft of Ohio, Smith of New Jersey and Donnell of Missouri. The measure proposed $1,955,000,000 in Federal grants over a five-year period to be matched on a 50-50 basis by states, localities and hospitals to improve facilities and provide medical care for needy persons.

April 15—After Secretary of State Acheson had expressed opposition to a proposal by Sen. McCarran (D.-Nev.) to grant a $1,500,000,000 the Chinese Nationalist Government for and economic purposes, Sen. Bridges (R called for a Congressional investigation of Department's position on China.

April 18—At the opening of a hearin a Senate Armed Services subcommittee trial of 73 Nazi storm troopers convicted o tering 80 American prisoners of war near Belgium, during the Battle of the Bulg cember, 1944, Secretary of the Army Ro he welcomed the inquiry and recommend the cases of six defendants still under de ence. Originally 43 Germans were sent death, but on review the number was re 12, and of these six received commutatio imprisonment, while the death senten reaffirmed in the other six cases.—The U preme Court ruled, 5 to 4, that one-sided divorces, such as those handed down Nev., could be challenged as illegal if noti action was not served on the divorced within the divorce state or if the par not represented.

April 19—President Truman signed the thorizing $5,430,000,000 for the European Program for 15 months.—Former Secretary Cordell Hull returned to his home in Wa after two and a half years in Bethesda, Na pital following a stroke in September, tending physicians reported he had m excellent recovery."—Secretary of Defen son abolished 21 more boards and comm the National Military Establishment, call "useless."

April 20—A directive to the armed servic racial segregation at once in accordanc proclamation by President Truman July was issued by Secretary of Defense Joh prohibited future restriction of Negro per segregated units or special duty. He ordere individuals, regardless of color, race, re national origin, should have equal opport appointment and advancement.

Military Funds for Europe Asked

April 21—A $1,130,000,000 arms progra plement the North Atlantic pact by giving and financial aid to the 10 European si was introduced in Congress by the Tru ministration.—A long-range low-rent hou slum clearance program, calling for bi Federal loans and grants, was passed in ate, 57 to 13. An amendment offered by Sen (R.-Ohio), making it a criminal offense f tors of Federal-aided housing projects t inate against prospective tenants because creed or color, was defeated, 49 to 31.— Truman announced he had accepted the tion of Kennth C. Royall as Secretary of t

April 22—President Truman submitted gress a program for compulsory health ins a nation-wide basis "to make available medical services to go around, and to everybody has a chance to obtain these Under his proposal, the annual health mated unofficially at $6,000,000,000 to $7,00 would be paid by a 3 percent payroll evenly between employer and employee.

April 23—By order of Secretary of Defe son, construction of the 65,000-ton supe carrier United States was abandoned. Th keel had been laid five days previously, a News, Va., despite opposition by the A which favored land-based, long-range This decision led John L. Sullivan, Sec the Navy, to resign in protest **April 26.**

April 24—Medical progress in the Unit would be set back by 50 years if President program of compulsory health insurance acted, the American Medical Assn., spo rival, voluntary nation-wide health plan The association denounced the Truman p leading to regimentation of both doctors tients.

Confer on Berlin Blockade

April 26—A State Department commur firmed Moscow reports that, following a secret talks between Philip C. Jessup and Malik, U. S. and Soviet delegates, respe the United Nations Security Council, in City, the way appeared to be cleared f Russia's 10-month land blockade of the occupation zones of Berlin. Ending of the was made contingent on the calling o meeting of the Big Four Foreign Minist cil to discuss Germany's future.—In a Speaker Rayburn of the House, Presiden proposed a $157,800,000 cut in the $5,4 authorization for the European Recovery cause of dropping prices.—After a four-m vestigation, a special Federal grand ju York City handed up a presentment criti isting espionage laws as "inadequate and

nd recommending that spy cases be prose-
secretly without regard of statutes of limi-
.

l 27—Lifting of the Soviet blockade of Berlin
not obviate the necessity of implementing
orth Atlantic pact with a $1,130,000,000 re-
ent program for the 10 European nations
gned the treaty. Secretary of State Acheson
e Senate Foreign Relations Committee in a
r ratification of the pact and passage of the
rogram.—At a conference in New York City,
viet Union's representatives to the United
s, Deputy Foreign Minister Gromyko and
A. Malik, assured Dr. Philip C. Jessup,
representative, that the Berlin blockade
be raised as soon as the Western powers
their counter-blockade and agreed to a
or a Council of Foreign Ministers meeting
ermany.—President Truman's compulsory
insurance plan was put aside until 1950
Senate subcommittee to speed up hearings
er bills proposing increased Federal aid for
hospital construction and local public
work.

l 28—Senate Republicans, with the aid of 8
rats, pushed through a motion to recommit
Appropriations Committee a bill authoriz-
$2,400,000,000 budget for the Federal Labor
ment and Security Agency, with instructions
ut a 5 percent overall cut. The motion passed,
7, the opposition votes being cast by Admin-
on Democrats.

FOREIGN

l 1—In a memorandum to the United States,
Britain, France, Belgium, the Netherlands,
burg and Canada, the Soviet Union charged
e North Atlantic pact had a "clearly aggres-
haracter and was directed against the Soviet
that the treaty was counter to the United
s Charter, and that it violated the Anglo-
and Franco-Soviet treaties and the Yalta
otsdam agreements.

l 2—Premier Marshal Tito of Yugoslavia, in
ress in Belgrade, accused both the Western
s and the Cominform of "slandering" his
by spreading rumors of internal disorders
ecret negotiations with United States and
representatives. He called the rumors non-
—Gen. Husni Zayim, head of the new military
ment in Syria, dissolved Parliament. He an-
ed he favored construction of a proposed
an $200,000,000 oil pipeline across Syria as
efit to the country's economy.—Big electric
r signs in London and other English cities,
ed for almost 10 years, went on again for
st time, causing outbursts of joy.

European Recovery Making Progress

l 3—Progress toward full economic recovery
de by 19 nations and territories participating
e Marshall European Recovery Program,
Prime Minister Attlee stated in a telegram
first anniversary of the plan, in which he
ibute to the "generosity and farsightedness
people and Government of the United
"—Government forces in Burma recaptured
lay from rebellious Karen tribesmen who
ided by Communists.

l 4—Bulgaria's Communist Government ar-
Traicho Kostov, Vice Premier and chairman
Committee for Economic and Financial
ns, in Sofia on charges of having pursued an
dly policy toward Soviet Russia and com-
"gross anti-party errors."

l 6—Sir Stafford Cripps, British Chancellor
Exchequer, introduced a 1949-50 budget
for £3,311,000,000 ($13,244,000,000), an in-
of £335,000,000 ($1,340,000,000) over the
ng year. Of the total, £759,860,000 ($3,039,-
) was to be spent for defense. He told the
of Commons that no major tax cuts could
cted while the international situation re-
tense.

9—While assailing "warmongers" in cap-
countries, Marshal Tito announced that be-
of the attitude of the Cominform nations
avia was compelled to trade with the
n nations and that it would be a "crime
our Socialist country" not to do so.—Mao
g, leader of the Chinese Communists, tele-
d Acting President Li Tsung-jen at Nanking

dered unconditionally. Communist forces at-
Nationalists on a 650-mile front north of
ngtze.

10—The Western occupation powers—the
States, Britain and France—delivered to
rman Parliamentary Council at Bonn a new
tion Statute in which they promised to the
n people self-government to the widest de-
gree possible and also legislative, executive and judicial powers subject to approval of the occupation authorities.

New British Labor Party Plan

April 12—As a preliminary to the 1950 general elections, the British Labor party, in office since 1945, made public a second five-year plan for progressive socialization of the country. It proposed nationalization of vital sections of the chemical and cement industries, water supply, mineral deposits, cold storage, sugar manufacturing and refining, and industrial insurance companies and societies.—With only two of the four defendants present, the trial of the alleged slayers of George Polk, radio correspondent, in May, 1948, opened in Salonika, Greece. A witness testified the murder had been planned in the headquarters of Markos Vafiades, leader of the guerrillas, with the intention of disrupting relations between the Greek government and the United States. On April 21 the jury found Gregory Stachtopoulos guilty and acquitted his mother. He received a life sentence. Two men accused of shooting Polk, Adam Mouzenides and Evangelos Vasvanas, were tried in absentia and sentenced to death.

April 14—The Nuremberg war crimes trials, which began Nov. 20, 1945, were brought to a close by a U. S. tribunal which convicted and sentenced to prison 19 of 21 former high officials directly or indirectly connected with the Nazi Foreign Office. They were convicted of charges ranging from waging aggressive war, mistreatment of war prisoners, atrocities against Jews to membership in Nazi criminal organizations. Among those sentenced was Baron Ernst von Weizsaecker, former Secretary of State and Ambassador to the Vatican, 7 years imprisonment; SS (Elite Guard) Lt. Gen. Gottlob Berger, 25 years; Otto Dietrich, Hitler's press chief, 7 years, and Reichsbank Director Emil Puhl, 5 years. Two defendants were acquitted. Judge Leon W. Powers wrote a dissenting opinion, holding all but six should have been acquitted.—Bulgaria announced that Premier Georgi Dimitrov, head of the Bulgarian Communist party and close friend of Premier Stalin, had been granted a leave of absence and had gone to the Soviet Union for medical treatment. Foreign Minister Vassil Kolarov was named Acting Premier.

April 15—Pope Pius XII, in an encyclical letter, urged internationalization of Jerusalem and other holy places in Palestine, and indirectly appealed to the leaders of Catholic nations in the United Nations to seek from Israel guarantees of the religious rights of Catholic institutions and shrines.

Berlin Airlift Sets Record

April 16—The Anglo-American airlift into Berlin set a new record, flying in 12,940 short tons of supplies on 1,398 flights during a 24-hour period. The previous record was 8,246 tons.—After having kept her in prison for a week on suspicion of espionage in behalf of the U. S. Embassy in Prague, Czech police released Miss Vlasta Adele Vraz, Chicago-born chief of the American Relief for Czechoslovakia, in "recognition of her past services to Czechoslovakia and in the interests of United States-Czechoslovak relations."—The Communist-controlled Rumanian Government dismissed two non-Communist Vice Premiers, Traian Savulescu, Minister of Agriculture, and Stefan Voitec, Minister of Cultural Affairs, and named Foreign Minister Ana Pauker and Finance Minister Vasilij Luca, Communist party leaders, Vice Premiers.

April 17—The Chinese Communists in Peiping, gave emissaries from the Nanking Government three days in which to accept unconditional surrender terms, which included establishment of 10 bridgeheads on the South bank of the Yangtze river. Nanking rejected the terms **April 19.**

April 18—On the 33rd anniversary of the 1916 Easter rebellion, the 26 Southern counties of Eire cut their last ties with Great Britain and became the independent Republic of Ireland, free after 780 years of British rule. Independence Day was ushered in at midnight with fanfares of trumpets and 21-gun salvos in Dublin and other cities, and jubilant millions celebrated the new era with religious services and processions and military parades. Prime Minister John A. Costello expressed hope that the six counties of Northern Ireland would soon be united with the Republic.

April 19—In the worst labor disturbance in Argentina after the rise of President Peron, four persons were killed and 31 injured when General Confederation of Labor unions demonstrated against proposed increases in commodity prices in the provincial capital of Salta.

British Warships in Yangtze Shelled

April 20—Communist batteries on the North bank of the Yangtze shelled two British warships, the destroyer Consort and the sloop Amethyst, at points 60 miles downstream from Nanking, Na-

tionalist capital. Both ships returned the fire. The Amethyst was beached after 17 of her crew were killed, while the Consort, going to the sloop's assistance, lost 10 men in a running battle with the shore batteries before returning to Shanghai on orders of the British Admiralty. Both vessels had been evacuating refugees from North China. Reinforced Chinese Communist armies attacked the Nationalists on a 400-mile front on the North bank of the Yangtze. A small Red vanguard landed on the South bank at Wuhu, 50 miles upstream from Nanking.—At the opening of the left-wing World Congress of the Partisans of World Peace in Paris, Paul Robeson, head of the United States delegation, declared American Negroes would never fight the Soviet Union.

April 21—Throwing 1,000,000 troops into an offensive along a 600-mile front, Chinese Communists crossed the Yangtze at six points and cut the railway line between Nanking and Shanghai. The United States and other foreign embassies advised their nationals to leave Nanking which was evacuated by Nationalist Government officials. Former President Chiang Kai-shek conferred with Nationalist leaders in Hangchow. Two more British warships, the 10,000-ton cruiser London and the 1,500-ton sloop Black Swan, were damaged by Communist shell-fire along the Yangtze, but wiped out several shore batteries. Fifteen British seamen were killed.

Nationalists Abandon Nanking

April 22—The Chinese Communists used American-built anti-tank guns in putting the British cruiser London out of action, it was reported from Shanghai. The Nationalists evacuated Nanking, but a "fight to the end" was pledged by Acting President Li Tsung-jen and his predecessor, Generalissimo Chiang Kai-shek.

April 23—Following a night of looting by the native population, Chinese Communist troops occupied Nanking, without resistance, and then closed in on Shanghai.—Military and police forces of the Netherlands, Belgium and Luxemburg occupied small border regions in Germany awarded them by a six-nation commission, including the United States, March 26.

April 25—A draft constitution for a Western German republic was signed in Frankfort-on-the-Main by German political leaders and representatives of the United States, Britain and France.—In a message read at an Associated Press luncheon in New York City, Gen. Lucius D. Clay, U. S. Military Governor in Germany, declared that inclusion of Germany in a Western European alliance was essential to thwart Communist expansion.—Advancing Chinese forces got within 40 miles of Shanghai. Some Communist soldiers forced their way into the U. S. Embassy in captured Nanking and aroused Ambassador J. Leighton Stuart. They left without causing trouble.

April 26—In a two-pronged drive on Shanghai Chinese Communist troops occupied Soochow, communications center 50 miles to the west, and reported wiping out two Nationalist armies.

Chiang Kai-shek Returns

April 27—Generalissimo Chiang Kai-shek flew to Shanghai and appealed to the South China population to resist Communist columns advancing across the Yangtze. Pledging that "as long as I live I will take part in our nation-wide struggle against enslavement," he predicted resistance to the Communists for another three years would result in victory.

April 28—Mrs. Aurora Quezon, widow of Manuel Quezon, first President of the Republic of the Philippines; her eldest daughter, also named Aurora, and 10 other members of their party were killed in an ambush in North Central Luzon, the main Philippines island, while driving to a memorial service for President Quezon. Police blamed the slayings on the Hukbalahpas, a rebellious peasant tribe known as the "Huks."

April 29—Soviet military authorities in Berlin tried to halt the shipment of airlift supplies by barge between two British-occupied sectors. British military police intervened and the Russians later blamed the incident on a misunderstanding.

April 30—In a communiqué broadcast to foreign capitals, the Chinese Communists called on the Western Powers, including the United States, to pull out all military and naval forces in China.

UNITED NATIONS

April 26—A new world endurance flight record of 1,008 hours 1 minute 50 seconds was established by William Barris and Richard Riedel who set down their single-engine cabin monoplane at Fullerton, Calif., after six weeks aloft. The fliers, employees of an airplane service station, bettered the previous record, made in 1939, by 362 hours. While in the air, their plane was refueled several times daily.

April 30—A sharp decline in the number of marchers participating in New York City's leftist May Day parade, held a day ahead of time, was reported by police who estimated the number at 8,100, whereas 117,000 took part in counter Loyalty Day demonstrations in the city.

1949—May

WASHINGTON

May 2—Tighe E. Woods, Federal Housing Expediter, announced that owners of units containing one to four homes could raise their rents to bring their net operating income up to 30 percent of their gross income, and that owners of larger units were entitled to 25 percent of their gross income. Under the law, extending rent control for 15 months, Congress provided that landlords should get a "fair net operating income," but gave Woods authority to determine what this should be.

May 3—President Truman released Gen. Lucius D. Clay from his duties as U. S. Military Governor in Germany (appointed March 29, 1945). The President said the country should take pride in the way Gen. Clay had acquitted himself of "one of the toughest tasks and accomplishments in American history."

May 4—A day after it had been tentatively adopted by the House, 217 to 209, in a major setback for the Truman administration, a bill sponsored by Rep. John S. Wood (D.-Ga.) as a substitute for the Taft-Hartley Labor act was killed by the same body, 212 to 209. The issue of repealing the Taft-Hartley law was sent back to the House Labor Committee.—John Foster Dulles told the Senate Foreign Relations Committee that failure to ratify the North Atlantic pact might result in war.

May 5—President Truman declared he viewed defeat of the Wood labor bill in the House as a victory for his administration.—At the New York trial of 11 American Communist party leaders Thomas A. Younglove, F. B. I. undercover agent, testified that in October, 1946, Stalin sent a warning that war might come at any time and that U. S. Reds should be ready to go underground.

May 6—Speedy ratification of the North Atlantic pact was urged before the Senate Foreign Relations Committee by James W. Gerard, former Justice Owen J. Roberts of the U. S. Supreme Court, and Charles P. Taft.

May 7—Welcoming two U. S. Senators and 67 Representatives from 38 states visiting New York, Mayor O'Dwyer appealed for increased Federal aid for slum clearance and housing.

May 9—Following a conference with Secretary of State Acheson, Sen. Tom Connally (D.-Tex.), chairman of the Senate Foreign Relations Committee, and Sen. Arthur Vandenberg of Michigan, ranking Republican committee member, declined an invitation to attend, in an advisory capacity, the scheduled Council of Foreign Ministers' conference on Germany in Paris, preferring to remain in Washington to push ratification of the North Atlantic pact.—President Truman asked Congress for early legislation empowering him to reorganize the Executive Branch as recommended by the Hoover Commission.

May 10—In a debate on the State Department's policy toward Spain and the abstension of the United States in the U. N. from voting on a resumption of full diplomatic relations, Sen. Connally told the Senate that he approved of neither Spain's nor Soviet Russia's forms of government. Yet, he pointed out, full diplomatic relations were being maintained with Moscow.—Sen. Vandenberg declared at a meeting of the Senate Foreign Relations Committee that the North Atlantic pact should not be regarded as a guarantee by the United States that European participating nations would be safe from invasion.

No Ambassador to Spain

May 11—Full diplomatic recognition of Franco Spain depends on restoration of basic civil rights there, Secretary of State Acheson told a news conference. He pointed out that the Franco Government "was established with the active support of Hitler and Mussolini," and added that the United States would continue to adhere to the United Nations resolution of 1946, which called for the withdrawal of ambassadors from Spain.

May 12—Disclosure that an Austrian-born, self-admitted Communist, Hans Freistadt, had been granted a scholarship for advanced study in nuclear physics by the Atomic Energy Commission was made in the House by Rep. W. Sterling Cole (R.-N. Y.). Chairman Lilienthal of the A. E. C. said the scholarship program was administered by the National Research Council without influence from the commission. In Chapel Hill, N. C., Freistadt, 23, a part-time physics teacher at the University of North Carolina, admitted his Communist affiliation, but said he was loyal to the United States, having served in the Army for five years and became a naturalized citizen in 1944.—Maj. Gen. Frank R. McCoy, chairman of the 11-nation Far Eastern Commission, announced the termination of the reparations program imposed on Japan, to relieve American taxpayers and to speed Ja economic recovery.

May 14—Calling for adoption of the progra military aid to the North Atlantic pact nation also Turkey, Greece and "certain" other cou the State Department described their defense feeble as to "invite military aggression." The cost was put at $1,450,000,000 for the 194 fiscal year.—A cut of $2,100,000,000 in the F Budget was urged by the Research and Policy mittee of the Committee for Economic De ment to avoid a tax increase.

May 16—In a 5-to-4 decision, the U. S. Su Court ruled that free speech should not be even if it stirred up anger and unrest amor listeners. The court reversed the conviction Chicago court of the Rev. Arthur W. Termi a Catholic priest from Birmingham, Ala., disorderly conduct charge after he had add a meeting in February, 1946, under the sp ship of Gerald L. K. Smith.

Welcome for Gen. Clay

May 17—Back after four years' service as Military Governor of Germany, Gen. Luci Clay received a hero's welcome, with Presiden Man and both chambers of Congress accla him. The President conferred on him a secon Leaf cluster to his Distinguished Service M while the Senate and the House listened atter when he urged inclusion of Germany in the ern pact of nations to prevent what he call otherwise "inevitable" alliance of the former with Soviet Russia.—The White House annc the President had acceded to a request by M Wallgren, former Governor of Washington, th name be withdrawn from nomination to the manship of the National Security Resources The Senate Armed Services Committee the nomination March 15.

May 18—The unsettled political situation in while presenting a serious threat to world made inadvisable immediate consideration Pacific security treaty similar to the North At pact, Secretary of State Acheson declared.— dent Truman designated John J. McCloy, h the World Bank, as the first U. S. civilian commissioner for Germany.—President Euricc par Dutra of Brazil was welcomed by Pre Truman and Cabinet members when he a in Washington by plane for a 10-day state President Dutra's 64th birthday was commem on his arrival by a public celebration i Municipal Center.—After conferring with me of the Atomic Energy Commission, Sen. McM (D.-Conn.), chairman of the Joint Atomic E Committee of Congress, reported that an of uranium oxide, containing enriched U-235 disappeared from the Argonne National Labo near Chicago in February, 1949, but had no stolen. Six-sevenths of the missing substanc recovered, the Senator said.

S. as a fugitive from justice. Eisler flew Czech plane from London, where he had been in extradition proceedings, to Prague, telling nen that "Clark is America's biggest fool."

FOREIGN

y 1—A May Day display of Soviet armed gth before Premier Stalin in Moscow included rst appearance of a new type of jet plane lly described as "the fastest plane in the ." The Premier's son, Maj. Gen. Vassily , was in command of the air show.

y 4—The Chinese Nationalists in Shanghai ted loss of the port of Hangchow, 100 miles e southwest to Communist armies.—The first ersary of the birth of Israel as a state was rated by joyous crowds in Tel Aviv, the l. President Truman sent congratulations to Chaim Weizmann, president of Israel, who ded two anniversary celebrations in New York —In a farewell interview in Grafenwoehr, any, Gen. Clay expressed doubt that the pro- agreement with the Soviet Union would be anent. In Berlin news that the Soviet blockade be lifted was greeted by German officials relief, but they pointed out that the future s of Berlin remained unsettled.

y 7—British Foreign Secretary Bevin, speak- pilots of the Anglo-American airlift at Gatow d, Berlin, declared that, with the promised of the Soviet land blockade there was a er chance for peace now" than since the end e War. He praised the U. S. and Royal Air fliers for a job well done, but added, "We ot out of the woods yet. We must keep up the work until peace is assured."—Chinese police anghai executed, by shooting, 27 men at busy street intersections. The men had been accused of being Communist agents.

May 8—After eight months' deliberations, the German Parliamentary Council, meeting in Bonn, by 53 to 12, adopted a draft constitution for a "Federal Republic of Germany," embracing the 11 laender (states) within the United States, British and French occupation zones. The constitution was subject to approval by the three Western occupation powers and ratification by the Landtage (state legislatures) included in the proposed federation.—Chinese Communist forces captured Kashing, railway town 65 miles southwest of Shanghai.

Berlin Blockade Lifted

May 9—A formal order for the lifting of the land blockade of Berlin's Western occupation sectors was issued by Gen. Vassily Ivanovich Chuikov, Soviet Military Governor in Germany. The order stipulated that 16 trains daily would be permitted to enter the city's Western zones and that the autobahn (express highway) would be reopened.

May 10—The three Western Powers gave orders for the lifting of the counter-blockade in Berlin to coincide with the raising of the Soviet land blockade.—The Parliamentary Council for Western Germany chose Bonn as capital of the proposed German Republic, by 33 votes against 29 for Frankfort.—Princess Margaret, younger daughter of King George VI had a 20-minute private audience with Pope Pius XII at the Vatican. The visit provoked protests from Protestant churchmen in England who called it a "direct evasion of the Bill of Rights, Britain's basic act of Constitution." Buckingham Palace officials described the meeting as "purely a courtesy visit."

May 12—The 328-day land blockade of the Western sections of Berlin was ended at daybreak when trains and automobiles began arriving in the Soviet occupation zone from the West. The Russians were affable and restricted formalities to a minimum. The Berlin population was jubilant and celebrated as if their city had been liberated. The Western Powers announced, however, that airlift operations would be continued until a sizable stockpile of food and fuel had been accumulated.—By a vote of 333 to 6, the House of Commons ratified the North Atlantic pact after both Foreign Secretary Bevin and former Prime Minister Churchill had called it a deterrent to potential Soviet aggression. The opposition votes were cast by two Communists, two Laborites and two left-wing independents.—The U. S., British and French Military Governors, at Frankfort, approved the draft constitution for a Western German Republic.

Eisler Extradition Case

May 14—At the request of the U. S. State Department, Gerhart Eisler, German-born Communist, was seized by Scotland Yard officers at Southampton, England, aboard the Polish liner Batory on which he had stowed away from New York City. He jumped $23,500 bail posted after being sentenced to one-to-three years in prison on charges of concealing his Communist party membership and giving false testimony before the House Un-American Activities Committee. Eisler put up a fight and had to be carried off the liner. The U. S. Embassy in London filed a formal request for his extradition to New York City.

May 15—In a resurgence of opposition to the Franco regime, the consulates of Bolivia, Brazil and Peru in Barcelona were bombed. The South American countries were among those that had advocated, in the United Nations General Assembly, resumption of full diplomatic relations with Spain.

May 16—The Polish Ambassador in London, Jerzy Michalowski, protested to Foreign Secretary Bevin against the forcible removal of Gerhart Eisler from the liner Batory as a "violation of the rights of the Polish flag." Eisler was held without bail in London pending a hearing.—A Communist court in Czechoslovakia, after a secret trial, sentenced Gen. Karel Kutlvasr, leader of the 1945 uprising against the Nazis in Prague, to life imprisonment on charges of having plotted to overthrow the government. Three of his 13 codefendants were sentenced to death, 9 to prison terms and one, a private, was acquitted.

May 17—In a two-day election in the Soviet-occupied zone of Germany, 33.9 percent of the vote was cast against the Communist slate of delegates to the proposed left-wing People's Congress. The vote was 7,943,982 for the Communist candidates and 4,090,280 against them.

May 18—Truck traffic from Western Germany to Berlin was interrupted again by Soviet authorities who halted 200 vehicles, many of them carrying perishable food, near British-occupied Helmstedt, demanding that the drivers produce permits issued by the Soviet zone German Economic Commission.

May 19—The Russians permitted the 200 trucks

from Western Germany to enter Berlin, but, after five hours, again halted traffic on the autobahn.—Tass, the official Soviet news agency, announced Russia was willing to participate in talks with the U. S. and Britain on ending the civil war in Greece. The proposal was rejected by both governments, which supported the United Nations.

May 21—About 500 persons were injured in violent rioting in Berlin where 16,000 employees of the transportation system struck in a demand for payment in West marks. Guns, knives, clubs and steel bars were used as the strikers, members of the non-Communist Trade Union Federation, fought Soviet zone police and strikebreakers recruited from the Communist Free German Trade Federation. The strikers had been paid in East marks, worth only one-third to one-fourth of Western currency.—Upon the arrival of Secretary of State Acheson by plane in Paris, a conference was held at the French Foreign Ministry, in which British Foreign Secretary Bevin and French Foreign Minister Schuman agreed on a policy on Germany. Soviet Foreign Minister Vishinsky reached Paris by plane from Moscow soon after Acheson's arrival, announcing he was "glad to be here."

May 22—Violence spread in the strike of 16,000 anti-Communist railway workers in Berlin, with casualties estimated at 1,000, including one dead. —Czechoslovakia released two U. S. soldiers arrested in December, 1948, and sentenced to long prison terms as "spies" after they had strayed across the border from their station in Germany. The men, who had been AWOL, told their superior officers they had been severely beaten by Czech police.

Foreign Ministers Meet

May 23—The Big Four Foreign Ministers Council, at its opening meeting in Paris, accepted an agenda proposed by the Western Powers and agreed to discuss the Austrian question after Germany. Vishinsky urged that a date be set for a meeting of the Big Four with China on peace terms for Japan.—The new Federal Republic of Germany was officially proclaimed by the Parliamentary Council in Bonn where 63 out of 65 delegates signed the new constitution. Two Communists refused to sign.—Police in the Communist-controlled zone of Berlin fired on striking transportation workers and killed two persons.

May 24—The United States, Britain and France rejected, at the Big Four conference in Paris, a Soviet proposal for a return to the Four-Power rule over Germany. This rule, provided for in the Potsdam agreement of 1945, had "failed disastrously." Secretary of State Acheson told the conference.

May 25—Chinese Communist troops occupied all but a few isolated sections of Shanghai as the Nationalist forces retreated northeast toward Woosung. Both the U. S. and Soviet Consulates, on opposite sides of Soochow Creek, were struck by stray bullets.—In Paris Secretary of State Acheson rejected as unrealistic the Soviet Union's claim for $10,000,000,000 in reparations as a condition for German unity.—Railway traffic between the Western and Soviet zones in Berlin was halted when Communist rail workers deserted switch boxes in the Western sectors.

May 26—In a papal bull, Pope Pius XII proclaimed 1950 as a holy year and urged Roman Catholics from all over the world to make pilgrimages to Rome.

May 27—The United States' request for the extradition of Gerhart Eisler was denied by Sir Laurence Dunne, chief metropolitan magistrate in London, who ruled that Eisler's false declaration in seeking an exit visa was not extraditable.

May 28—The three Western Powers proposed at the Foreign Ministers' conference in Paris that Germany should be united on the basis of the Bonn Constitution and that four-power control should be restored, with a majority vote prevailing.—The Chinese Communists completed the occupation of Shanghai, and reported capture of 40,000 Nationalist troops. Soviet Russia announced the closing of its consulate there, explaining it had not yet officially recognized the new regime.

May 30—The Western Powers' proposal for a united Germany under the Bonn Constitution was rejected by Soviet Foreign Minister Vishinsky who contended it was aimed at dismembering the former Reich in violation of the Potsdam pact. He also insisted on the retention of veto on future policies for Germany.—A constitution for the "German Democratic Republic" in Soviet-occupied Eastern Germany was adopted in Berlin by the Communist-dominated People's Congress in opposition to the Bonn charter. The Congress elected Gerhart Eisler a member of the People's Council, highest policy-making body in the eastern zone.

May 31.—The three Western Powers in Paris refused to hear a delegation from Germany's Soviet-ruled Eastern zone, as requested by insky.—Two American officials were among 150 miners and troops killed in three d rioting in a strike of tin miners in Bolivia test against the deportation of the heads o union. The government called the wall revolutionary strike, and mobilized all able men between 19 and 50.

UNITED NATIONS

May 4—A Four-Power agreement on endi Berlin blockade and calling a meeting of of Foreign Ministers on Germany's futu reached in New York City at a conference a by Dr. Philip C. Jessup, U. S. representative U. N.; Jacob A. Malik of the Soviet Uni Alexander Cadogan of Britain, and Jean C of France. The date for lifting the Sovie blockade of the former Reich capital was May 12, to be followed by the council mee Paris 11 days later.—At a dinner of the Federation of U. N. Assns., Dr. Herbert V. 27—After a year's investigation, a special jury in Philadelphia returned presentments g "conspiracy" and "outright thievery" office of the Receiver of the Taxes. The in- vas brought about by the suicide, in May, f William F. Foss, head of the Amusement vision, who left a note telling how shortages funds had been divided.

BUSINESS AND FINANCE

2—Stockholders of the U. S. Steel Corp. g in Hoboken, N. J., approved a proposal to ie common stock three-for-one, raising the of authorized common shares from 15,000,- 45,000,000 and the number of outstanding from 8,703,252 to 26,109,756. The split was t in the corporation's 48-year history.

3—Contracts were signed in Washington construction of a 48,000-ton passenger liner, ever built in the United States, to cost ,000, of which the Government will pay cent and the United States Lines, which erate it, 40 percent. The liner will accom- 2,000 passengers in air-conditioned quar- nd, if converted into a transport, 14,000 The vessel is being built by the Newport hipbuilding Co. for completion in 1952.

8—At a meeting of 500 representatives of il-producing companies and Government at Louisiana, Mo., Secretary of the In- Krug recommended that private industry take over the task of developing synthetic oduction on a large-scale commercial basis.

13—Bank irregularities reported to the . in 1948, involving $3,000,000, were caused mbling, drink and women," according to Pennington, an inspector of the bureau. dressed the National Assn' of Mutual Sav- nks in Washington.

17—The New York City Council approved, a budget of $1,197,434,294 for the 1949-50 ear. The budget, setting a new record. that for 1948-49 by $36,895,437.

Billions Paid in Subsidies

22—Subsidy payments to farmers and business- nessmen in the 14 years ended June 30, 1948, totaled $14,525,217,000, the Bureau of the Budget in Washington reported.

May 24—In testimony before a Senate Commerce subcommittee, Capt. Eddie V. Rickenbacker, president of Eastern Air Lines, stated that commercial airlines were "suffering from too much coddling" and that instead of the $48,000,000 in air subsidies granted in 1948 $26,000,000 would have sufficed.

May 25—The Argentine Government cut imports from the U. S. to 25 percent of the 1947-48 quota because of a shortage of dollar exchange.

GENERAL

May 1—Tornadoes raging through Oklahoma, Kansas, Texas and Louisiana caused 10 deaths and property damage mounting into millions.

May 4—Quadruplets—two boys and two girls—were born to Mrs. Charles Collins, wife of a Wall St. brokerage firm clerk, in Lebanon Hospital, New York City. The father, joyous over the event but worried over the housing problem, was quickly reassured when county officials and neighbors in the Bronx promised a brand new home.

May 13—The Holland Tunnel, linking New York City with New Jersey, was partially wrecked when a 16-ton truck loaded, in contravention of regulations, with volatile carbon disulphide exploded. Sixty-three persons were injured and 23 trucks were damaged. The eastbound tube of the tunnel was closed for 56 hours.

May 19—After an absence of 14 years, vaudeville returned to the Palace Theater in New York City.

May 27—Rita Hayworth, motion picture actress, was married to Aly Khan, son of the Aga Khan, by the Communist mayor of the small village of Vallauris in Southern France. A Moslem religious ceremony was performed later.

May 30—In the first lynching of the year, a young Negro, Clif Hill, was taken from a cell in the home of the sheriff of Irwinton, Ga., and beaten and shot to death. He had been arrested following a disturbance in a Negro roadhouse.

May 31—The Associated Press reported that 413 persons were killed during the 3-day Memorial Day weekend. Among the 253 killed in traffic accidents was W. A. Julian, Treasurer of the United States.

1949—June

WASHINGTON

June 1—A personnel turnover of 87 percent within two years was cited by Sen. Hickenlooper (R.-Ia.) as proof of "incredible mismanagement" by the Atomic Energy Commission and its chairman, David E. Lilienthal, at a hearing of the Joint Congressional Committee on Atomic Energy. Lilienthal declared the personnel turnover had been no larger than in other Federal agencies.

June 2—The bottle that contained the uranium-235, which disappeared from the Argonne atomic laboratory in Chicago four months previously, was found in a dump for radioactive waste near the plant, Sen. McMahon (D.-Conn.), chairman of the Joint Congressional Committee on Atomic Energy, disclosed. He blamed the disappearance on carelessness and negligence.—Whittaker Chambers admitted at the trial of Alger Hiss that he had committed perjury when, while still a Communist, he had taken an oath to defend the U. S. Constitution in accepting a Government job in 1937. He swore Hiss had passed 47 State Department documents on munitions to him in 1937-38 for transmission to a Soviet espionage agent.

June 3—In a letter to Chairman Vinson (D.-Ga.), Secretary of the Air Force Symington categorically denied that his department's choice of the B-36 bomber as its principal weapon had been influenced by personal reasons and politics. He also denied a report that he planned to resign to join Floyd Odlum, head of the Atlas Corp., which controlled the Consolidated Vultee Aircraft Corp., manufacturers of the B-36.—Three of the 11 defendants in the Communist trial in New York City were sent to jail by Federal Judge Medina for contempt of court. John Gates, editor of The Daily Worker, was sentenced to 30 days for refusing to answer questions. Henry Winston, organizational secretary, and Gus Hall, Ohio chairman, were remanded for the duration of the trial for noisy demonstrations.

June 6—Three witnesses testified before the House Un-American Affairs Committee that in 1945 Secretary of State James F. Byrnes had prevented the F.B.I. from arresting a Soviet spy who subsequently escaped from the country. The former Secretary denied this.

June 7—An F.B.I. report, introduced at the espionage trial of Judith Coplon, disclosed that Soviet Russia received a shipment of atomic research devices from the United States in 1947 but that two subsequent shipments were held up. The report said the equipment was bought by the Soviet purchasing agency, Amtorg, which seemed to have "exact knowledge" of the activities of the Atomic Energy Commission.

Hollywood Personages Named

June 8—The names of leading Hollywood actors, authors and educators were listed by the F.B.I. in a secret report, compiled in 1947, as members of the Communist party or fellow-travelers. The report was introduced at the espionage trial of Judith Coplon.—In Sacramento, Calif., the State Senate Committee on Un-American Activities issued a 709-page report which also listed many motion picture personages, writers, musicians and others as having "followed or appeased some of the Communist party line program over a long period." The report proposed legislation to control and prevent subversive activity.—Before the Joint Congressional Atomic Energy Committee, Sen. Hickenlooper charged that the authorization in 1947 of the export of 1 millicurie (1,000th of a gram) of radioactive isotopes to Norway had been a violation of the 1946 Atomic Energy Law. His charge was quickly challenged by Sen. McMahon (D.-Conn.), chairman of the committee, and Chairman Lilienthal of the Atomic Energy Commission who declared that the isotopes were shipped to Norway for research purposes and, as they were non-fissionable, were of no value in atomic bombs.

June 9—President Truman told a news conference that he still believed the atomic energy program was in good hands under David E. Lilienthal.—Three other "sources" of Government documents transmitted to a pre-war Soviet spy ring were named by Whittaker Chambers at the Alger Hiss trial—the late Harry Dexter White, a former Assistant Secretary of the Treasury; Franklin Victor Reno, a mathematics expert at the Army Proving Ground, Aberdeen, Md., and William Ward Pigman, former chemist in the National Bureau of Standards.—The State Department protested to Britain against a five-year trade agreement London had reached with Argentina, declaring such a long-range, bilateral pact showed discrimination because it excluded certain American commodities from the Argentine market.—The Senate confirmed President Truman's appointment of Mrs. Georgia Neese Clark of Richland, Kan., as the new Treasurer of the United States.

June 13—Speaking in defense of the Atomic Energy Commission and its head, David E. Lilienthal, Dr. J. Robert Oppenheimer, wartime director of the Los Alamos, N. M., atomic project, told the Joint Congressional Atomic Energy Committee the commission had developed better weapons and increased production substantially.—The Senate ratified the international wheat agreement designed to stabilize prices for four years.—Mrs. Whittaker Chambers, testifying at the Alger Hiss perjury trial, defended her husband as "a decent citizen and a great man."

Truman Denounces Post-War Hysteria

June 16—President Truman predicted that what he called a wave of hysteria which was sweeping the country as a result of the spy and loyalty inquiries would subside. Such situations usually developed after wars and crises, as far back as 1798 when a similar wave of hysteria produced the alien and sedition laws, he said. He promised that anyone in the Executive Department who contributed to the hysteria would be cleaned out.—Judith Coplon testified at her espionage trial that she had never stolen secret U. S. documents for transmission to Moscow and denied she had ever been a Communist. She said she had fallen in love with Valentin A. Gubitchev, Russian engineer formerly employed by the United Nations, but had been disillusioned when she found out he already was married.—At the Alger Hiss perjury trial, Henry Julian Wadleigh, former State Department economist, admitted he had given confidential documents to Whittaker Chambers to be passed on to a Russian spy ring. He said he had never been a member of the Communist party, but had been a "sympathizer."—Both chambers of Congress, by voice votes, passed the bill giving President Truman broad authority to reorganize the Executive Branch on the basis of the Hoover Commission report.

June 17—In a letter to Speaker Sam Rayburn of the House, President Truman charged that the "real estate lobby," in opposing this lo housing and slum clearance program, was of "misrepresentation" and "distortion" tending that the all-over cost of the program be $20,000,000,000 and not $10,000,000,000, as estimated. In reply, the National Assn. of R tate Boards called the Administration's p a "socialistic scheme for socialized housing.

June 18—Members of the House Un-Ar Activities Committee declared they had n consulted by Rep. Wood (D.-Ga.), committee man, when he sent letters to 70 colleges boards of education in all states, asking f books in order to look for Communist propa The committee reassured indignant educato it had no intention of interfering with ac freedom or of censoring the textbooks.— Secretary of State James F. Byrnes declare address at Washington and Lee University, L ton, Va., that the social-economic program cated by the Truman Administration would a "welfare state" in which the American would be "economic slaves."

President Signs Reorganization Bill

June 20—President Truman signed the Re zation bill and immediately sent to Congres proposals to streamline the Executive Branch Government. Principal among his recommen was conversion of the Federal Security Agen a new Department of Welfare to be heade Secretary with Cabinet rank.—Testimony the Joint Congressional Committee on Atomi gy disclosed that the cost of a junior high sc the Atomic Energy Commission's project a ford, Wash., had risen from the original es of $1,786,000 to $3,966,000. Sen. Hickenloop cused the commission of "a completely inex expenditure of Government money."—In Ne City, Federal Judge Medina remanded a fou defendant in the Communist trial to prison duration of the court proceedings when he lenged the Judge for ruling out a defense e The defendant was Gilbert Green, Illinoi chairman of the Communist party.

June 21—After receiving a final report Big Four Foreign Ministers conference from tary of State Acheson on the latter's retur Paris, President Truman announced that g progress had been made toward conclusio peace treaty with Austria, which he hoped w signed before the end of 1949. The same, clared, could not be said of German unifi The Russians, he said, sought a return to Po which they themselves had "rendered unw by their misuse of the unlimited veto."

June 22—During debate on the Administr Housing Bill in the House, Rep. Sabath (I 83 years old, advocate of the measure, an Cox (D.-Ga.), 69, an outspoken opponen changed blows on the floor of the chamber Representatives quickly separated them, an they shook hands. The incident occurred Sabath, chairman of the Rules Committee, to permit Cox to interrupt him during a dis of the rules to govern the debate.—Associa tices Felix Frankfurter and Stanley F. Reed U. S. Supreme Court testified to the "exc and "good" reputation of Alger Hiss at the perjury trial.—Mrs. Brunhilde Eisler, wife hart Eisler, Communist leader, who jumpe 500 bail and fled to Europe May 6 while two prison sentences, was deported on s bound for London.

June 23—Upon his return from the Pari Power conference, Secretary of State Aches newsmen that Soviet Russia had shifted fr offensive to the defensive "in the struggle soul of Europe." He declared that the pos the West had "grown greatly in str due chiefly to the efforts of the American and it was therefore vital for Congress t the Atlantic pact and go forward with the assistance program.—Alger Hiss testified perjury trial that he had never been a Com or fellow traveler. He denied he had given taker Chambers or any other unauthorized copies of restricted documents.

June 24—In a message urging reorganiz the Post Office Department along businesslik President Truman recommended that the P ter General be given authority to appoi masters and run the department autono The President also said postal rates sh raised to meet increased operation costs. dent Truman asked Congress for a $45,000,0

ovide technical aid to the world's under-
oped areas under his Point 4 program.—After
rosecution had concluded its cross-examina-
Judith Coplon shouted at her trial on es-
ge charges that the case was a "frame-up and
y it smells to high heaven."—Attorney Gen-
Tom Clark ordered the F. B. I. to make a
nvestigation of an outbreak of hooded night
violence in Alabama.

Rent Control Modified

e 26—Under new rules issued by Housing Ex-
r Tighe W. Woods, landlords who remodeled
decorated their properties and installed new
ment were permitted to ask for rent in-
s. Said Woods: "The freeze principle of rent
ol is now a thing of the past."

e 27—In a 5 to 4 decision, the U. S. Supreme
reversed the perjury conviction of Harold R.
toffel, former president of the United Auto-
e Workers, C. I. O., local in Milwaukee, who
lenied that he was a Communist or ever had
unist affiliations.

e 28—An administration-sponsored move to
from the proposed new Labor bill a plan
d by Sen. Taft (R.-Ohio) to give the Presi-
both injunction and seizure powers in strikes
ing the nation's health and safety was de-
d in the Senate by a Republican-Southern
crat coalition, 46 to 44. The Taft proposal
dopted, 50 to 40.—In an address at the Indus-
College of the Armed Forces, Bernard M.
h declared that the Administration's lack of
n for total mobilization after four years of
war was a "needless invitation to total disas-

House Approves Housing Bill

e 29—After defeating, 209 to 204, an amend-
to drop a provision for the construction of
0 low rental units within six years, the House
ved President Truman's National Housing
228 to 185. For the measure: 193 Democrats,
epublicans, 1 American Laborite; against: 54
crats, 131 Republicans. The bill, except for
r details, was the same as that approved by
enate April 21.—The Atomic Energy Commis-
disclosed that, on "derogatory" information
ned by the F. B. I., 37 persons who had re-
d emergency clearance for access to atomic
s had been discharged. The commission said
nage or suspicion of espionage were not in-
d as dismissal causes.

e 30—Over the Administration's opposition,
enate adopted, 51 to 42, a modified version of
aft-Hartley Labor act. For passage: 17 Demo-
34 Republicans; against: 35 Democrats, 7 Re-
cans. Administration supporters declared they
"glad" of defeat because they could take the
to the American people in the 1950 Con-
ional elections. President Truman announced
ould continue to work hard for repeal of the
Hartley law.—The President declared Ber-
M. Baruch was badly informed when he had
the Administration lacked a comprehensive
ization plan. President Truman denied the
nal Security Resources Board had submitted
a plan a year before and that he had rejected
eached by radio phone, Baruch, en route to
nd, said an examination of White House files
show the Chief Executive "that it was he,
who was misinformed."—After deliberating
7 hours, a jury of 8 men and 4 women in
ct of Columbia Federal Court found Judith
n, former Justice Department analyst, guilty
pionage on two counts.—At the Alger Hiss
John Foster Dulles, chairman of the board of
ees of the Carnegie Endowment for Interna-
l Peace testified he had asked Hiss in August,
to resign from his $20,000-a-year post as
lent of the endowment to relieve it of em-
ssment. Hiss had testified that no such
st was made at the time.

FOREIGN

e 1—Secretary of State Acheson declared at
ig Four meeting in Paris that all four occu-
powers were in Berlin as a matter of right
hat the United States intended to stay there.
roposed that four-power control of the city be
led and some functions transferred to the
an authorities, with the veto power in the
ol commission, or Kommandatura, limited but
abolished.—Following secret discussions in
on and Paris, Britain agreed to the formation
independent government in the former Italian
y of Cyrenaica, North Africa, and recognized Emir Sayed Idriss El Senussi, ruler of 250,000 Senussi Arab tribesmen, as chief of the state.

June 3—Marshal Yen Hsi-shan, known as "last of the war lords," became Premier of the Chinese Nationalist Government in Canton, succeeding Gen. Ho Ying-chin, whose peace talks with the Communists ended in failure.

June 6—Lawrence Wilkinson, U. S. Military Government spokesman in Berlin, told the Russian representatives that no trade agreement between West and East Germany would be signed until normal railway traffic was restored.—Israel was charged in Vatican City by Father Alberto Gori, officially called "Custodian of the Holy Land," of pursuing an anti-Roman Catholic policy. He asserted that Franciscan priests in Galilee and Judea had been isolated for more than a year. The Israeli Government in Tel Aviv denied there had been any unwarranted restrictions.

Big Four Deadlock on Berlin

June 7—The Council of Foreign Ministers in Paris acknowledged the deadlock over the Berlin issue, making public conflicting United States and Soviet proposals. The Western Powers, said Secretary of State Acheson, offered German authorities a broad measure of self-rule, while the Russians sought to control everything "except death."

June 11—Archbishop Josef Beran of Czechoslovakia ordered the Roman Catholic clergy to boycott organizations and publications sponsored by the Communist government and professing to be Catholic.

June 12—In the first free elections since 1922, the population of Trieste voted 2 to 1 in favor of returning to Italy. Pro-Italian candidates polled a total of 106,973 votes and captured 40 of the 60 city council seats. Candidates favoring a union with Yugoslavia or maintenance of the free territory's independent status received 61,136 votes.

June 13—An attempt by a crowd of 800 Germans, who had erected a barricade, to prevent the dismantling of the chemical plant of the Essen Coal Co. in the Ruhr district was frustrated when a company of Belgian troops, preceded by Bren gun carriers and armored cars, moved in at the request of the British occupation authorities. The mob retreated and a dismantling crew began work at once.—Replying to a Soviet protest against a ban on public demonstrations by pro-Communist Japanese workers, Gen. MacArthur accused Russia of being "an inciter of disorder and violence in an otherwise orderly Japanese society."

Berlin Rail Workers Continue Strike

June 14—Striking railroad workers in Western Berlin rejected, 12,626 to 2,085, a compromise proposal for settlement of the walkout. The plan had been put forward by Brig. Gen. Frank L. Howley, U. S. Commandant, and called for payment of 75 percent of the workers' wages in West marks and immediate resumption of limited freight train service. The leaders of the non-Communist strikers said they had no confidence in Soviet adherence to the settlement and feared reprisals.

June 15—Israeli Foreign Minister Moshe Sharett, just back from an official visit to the United States, told the Knesset (Parliament) in Tel Aviv that his government would not yield to pressure by the U. S. or other nations to make territorial concessions to the Arabs, admit a substantial number of Arab refugees and consent to the internationalization of Jerusalem.

June 16—Czech police in Prague placed the palace of Archbishop Josef Beran under guard after he had refused to permit officials of the Communist government to control incoming and outgoing correspondence, telephone calls and other matters handled by his consistory. The consistory was searched by police who confiscated a duplicating machine and a number of forms prepared for distribution, and arrested Chancellor Doerner and another priest.—In a letter to American authorities in Peiping, U. S. Consul General Angus I. Ward in Mukden, Manchuria, who had not been heard from since the Chinese Communists seized his radio transmitter Nov. 18, 1948, reported he and his staff were safe.

June 17—The port of Shanghai, closed after the city was captured by the Chinese Communists, was reopened to international sea traffic, American and Dutch vessels being the first to enter.

June 18—Archbishop Josef Beran of Czechoslovakia left his palace in Prague without any attempt by police guards posted there to stop him.

In a sermon to 3,000 Roman Catholics at Strahov Monastery near the capital, he disavowed in advance any confession that might be attributed to him by the Communist-controlled radio and press. "Whatever happens," he said, "don't believe that I have surrendered."—The Hungarian Court of Justice in Budapest convicted seven Zionist leaders of having helped to smuggle Jews out of the country to enable them to go to Israel. The Zionists were sentenced to prison terms ranging from six months to three years.

June 19—In a pastoral letter read from many pulpits in Czechoslovakia despite a police ban, Archbishop Beran accused the Communist government of suppressing the Catholic press and curbing the freedom and rights of the church. When the Archbishop attempted to deliver a Corpus Christi Day sermon in St. Vitus cathedral in Prague, he was shouted down by some 200 Communists, workers' militia and police.

Four Power Meeting Ends; Little Progress

June 20—A joint communiqué on Germany and Austria was issued by the Big Four Foreign Ministers Council as they concluded their four-week conference in Paris. The statement said the Council had been unable to agree on the unification of Berlin and Germany, but that the Russian blockade of Berlin and the Western counter-blockade would not be reimposed and that the military commanders would consult on improving interzonal trade, traffic and communications. On Austria, it was agreed that the 1938 boundaries should be restored, that Russia would relinquish her claims to German assets except oil and Danube shipping, but would receive $150,000,000 in reparations, and that a draft peace treaty should be completed by the Foreign Ministers' deputies within 10 weeks. After the final session had been adjourned, Soviet Foreign Minister Vishinsky requested a special session, at which he explained he had received instructions from Moscow asking that the communiqué be held up to permit insertion of a clause giving the Russians the right to export the profits from oil and other properties in Austria which they operated. Vishinsky denied he was repudiating the agreement and accepted a suggestion by Secretary of State Acheson to settle this point through diplomatic channels.—President Klement Gottwald and other high officials and Communist party leaders in Czechoslovakia were excommunicated by Pope Pius XII for sponsoring the "fraudulent" Catholic Action which, the Vatican charged, sought to induce Catholics to disobey their bishops.

June 21—An official communiqué issued at Ciudad Trujillo, Dominican Republic, asserted that a two-day rebellion against President Rafael Trujillo's government had been crushed by the army and the leaders of the uprising, who had arrived at Luperon on the northern coast in two flying boats, had all been killed. Later it was announced that three American fliers were among those slain. —The British liner Anchises was bombed and strafed in the Whangpoo river off Woosung during a Chinese Nationalist air raid on the Communist-held port. Seven crew members were wounded and the vessel was badly damaged.

June 22—Excommunicated leaders of the Communist-sponsored Catholic Action society in Czechoslovakia charged that Roman Catholic bishops under Archbishop Beran were "misusing the church for a political struggle against the state" and warned them against hindering efforts for an agreement on cooperation between church and state. —A new German rightist political movement, called the Assn. of Independent Germans, was founded at Bad Godesburg by 30 delegates representing former military leaders, Germans expelled from Eastern territories and returned prisoners of war. The new group proclaimed as its aims a United Germany within its old borders, opposition to the parties licensed by the occupation authorities and abolition of the denazification courts.

Vatican Accuses Rumania

June 23—The Vatican asserted that the Rumanian government had tortured two bishops of the outlawed Uniate church, a branch of the Roman Catholic church, in trying to coerce them to join the pro-Russian orthodox church. One of the bishops disappeared. This report was denied later by the Rumanian government.—Vice Premier Matyas Rakosi, of Hungary, told a meeting in Prague that 200,000 persons—about 18 percent of the total membership—had been expelled from the Hungarian Communist party as "spies and provocateurs." Among those expelled, and subsequently arrested, were Laszlo Rajk, former foreign minister Communist leader Tibor Szonyi.

June 24—Themistocles Sophoulis, 88, Prem Greece and leader in the civil war against munist guerrillas, died of a heart attack in A

June 25—An ultimatum was sent to Germa way workers in Western Berlin, on strike fo weeks, by the military commandants of the U States, Britain and France to return to the within 72 hours or forfeit the unemployment they had been receiving. The Western auth promised that the men would receive the pay in West marks, one of their demands there would be no reprisals against them Soviet-controlled railway management. The ers of the non-Communist strikers accepte proposed settlement and ordered the men to

Czech Prelates Defy Government

June 26—In a pastoral letter read in Roman Catholic churches throughout Czec vakia in defiance of threats made by the munist government, Archbishop Beran an other Czech bishops declared they were lo their country, but could not "remain quiet the rights of the Holy Church are violate political power is misused against it." The called on Roman Catholics to remain faith the church even if it meant the martyrdom saints.—The Social Christian party won 105 in the Chamber of Deputies in parliamentary tions in Belgium, but fell two short of an ab majority which would have enabled it to referendum on the return of King Albert exile. The Socialists captured 66 seats, a los the Liberals, 29, a gain of 12, and the Commu 12, a loss of 11.—Kim Koo, 73, a leading Ri politician, was assassinated by an Army offic Ahn Do Hi, in his home in Seoul, South K Ahn was a member of Kim's Independence and had been a frequent visitor in the le home. The South Korean Army ascribed the ing to "personal and political" motives.

June 27—Prime Minister Louis St. Lau Liberal party won a sweeping victory in Ca capturing 193 of the 262 seats in the Hou Commons, a gain of 68. The Progressive Con tive party, which had 66 seats in the pr Parliament, lost 24, while the left-wing Co wealth Cooperation Federation lost 20 of seats.—The Czechoslovak Government outlaw reading of pastoral letters and the disseminat circulars and other printed matter unless ap by the government. Priests were warned they be held "personally responsible" for violatio the edict. The Ministry of Education declar valid the excommunication by the Vatican of ers of the government-sponsored Catholic group and of high officials of the Communis ernment.—A five-year trade pact involving change of goods totaling $5,000,000,000 was in Buenos Aires between Britain and Arg despite objections by the United States becau bilateral agreement was in violation of the lateral principle of the European Recovery Pro

Berlin Rail Workers Return

June 28—Ending their 39-day strike again Soviet-controlled management, 15,000 Germa way workers from Berlin's Western zones re to their jobs, but found that resumption of portation would be delayed by Soviet insiste checking equipment and trackage.—The Government in New Delhi issued an order re the properties and fortunes of the native p to one-fourth of their actual holdings and li each former independent ruler to one pala a summer residence. The properties and for valued at hundreds of millions of dollars, re to the new people's governments of the p territories.—Following the arrival in Japan 000 repatriated Japanese prisoners-of-war fr Soviet Union, the first in 1949, their spok asserted that all had been converted to Comm and would work for Sovietization of Japan.

June 29—The three Western Powers releas text of the charter giving the Allied High mission supreme authority over the newly tuted Federal Republic of Germany. The ch signed by the United States, Britain and Fra Paris June 20, vested economic control United States under a system of "weighte ing" as the major contributor to Germany nomic recovery.—After a two-year inquiry, a Commission established by Parliament un Labor party resolution reported that there danger of a monopoly of the British press an

was no need for any form of state control.— than 200 civilians were killed and 400 ded when Chinese Nationalist B-24 bombers d Shanghai and the Chapei district.

ıe 30—The last Dutch troops were withdrawn Jogjakarta, Java, capital of the Indonesian blic, and the city was occupied by a Republi- oken force. The Dutch, who had seized the al in a "police action" in December, 1948, left cordance with an agreement stipulating re- tion of the Republican government and re- of political prisoners as preliminaries to a t-table conference at The Hague on Indo- 's future status.

UNITED NATIONS

ıe 2—Secretary General Lie proposed to the omic and Social Council a two-year budget ng $85,942,383 for technical and economic as- ıce to carry out President Truman's plan for opment of the world's backward areas.

ıe 14—Secretary General Lie told the Rotary national convention in New York City that war of importance will ever be started while General Assembly is in session," because, he red, "an aggressor just could not get away it."—Brig. Gen. William E. Riley, U. S. ıe Corps, U. N Chief of Staff in Palestine, re- d that both Israeli and Arab forces had evac- the neutral area around Government House erusalem in accordance with the armistice.

ıe 17—Reversing an earlier stand, the Com- on on Human Rights approved a request by tary General Lie to take under consideration laints by individuals and organizations as as sovereign nations of alleged violations of ın rights. The vote was 10 to 4, with 3 ab- ions.

Human Rights Covenant Drafted

ıe 20—After spending six weeks drafting a tive covenant on human rights and freedom, J. N. Commission on Human Rights ended its on at Lake Success, N. Y. Among the 20 arti- n the draft covenant were provisions outlawing ary arrest, torture, slavery, and forced labor, others guaranteeing fair trial for accused per- freedom of religion, and rights of assembly ssociation.

ıe 25—In a report cabled from Athens, the al Committee on the Balkans accused Bul- of having permitted Greek guerrillas to con- t fortifications within her borders, from which fired on Greek Army troops moving inside t territory.

ıe 30—The International Labor Organization, neva, Switzerland, approved, 90 to 14, a world ment guaranteeing the rights of workers to ize and bargain collectively. The pact was ct to ratification by each of the I. L. O.'s 61 ber nations.

POLITICS

ıe 1—Edward J. Flynn, democratic leader of Bronx and National Committeeman, joined a ment to draft Mayor O'Dwyer of New York for a second term, expressing his conviction nayor would win reelection.—Gov. Chester es of Connecticut, a Democrat, suspended T. Dunn Jr., a member of the Republican Central Committee, from his post as chair- of the state's Liquor Control Commission receiving a report from State Police Commis- r Edward J. Hickey accusing Dunn of neglect ty.

e 5—Former President Hoover rebuked the olican National Committee for using his "ob- e and non-partisan" talks on Government re- ization for political purposes in rebroadcasts nich unauthorized additions were made by olican members of Congress.

e 13—At a conference of Democratic leaders 16 Midwest states, in Des Moines, Ia., a ution was adopted to make Secretary of es F. Brannan's farm program, insuring high to the farmers and low prices to the con- rs, a major issue in the 1950 elections.

e 14—Franklin D. Roosevelt Jr. was sworn in nember of the House of Representatives from 0th Congressional District, New York. After g on President Truman, Roosevelt declared is loyal to the Democratic party although he defeated Tammany, the regular Democratic organization in New York.

June 21—President Truman appointed Mrs. Perle Mesta of Washington and Newport, R. I., as U. S. Minister to Luxemburg. She had been active in his election campaign in 1948.

Ex-Gov. Earle Switches Parties

June 22—George H. Earle who in 1934 was the first Democratic Governor to be elected in Pennsylvania in 44 years and who held several diplomatic posts abroad during the Roosevelt Administration, enrolled as a Republican in Philadelphia because, he said, he did "not care to belong to a party of which President Truman is the leader."

June 25—A resolution calling on the Republican National Committee to oust Ben P. Whitehurst as director of its speakers' bureau and replace him by a "more capable administrator" climaxed a three-day convention of the National Young Republican Federation in Salt Lake City, which was marked by open hostility toward the national committee and Rep. Scott, the national chairman. The convention elected John Tope of Detroit as chairman of the federation, succeeding Ralph Becker of Port Chester, N. Y.

June 28—Robert F. Wagner, Democratic U. S. Senator from New York, resigned his seat. He was serving his fourth six-year term, but ill health had prevented him from attending the Senate for two years.—Thomas E. Coleman of Wisconsin resigned as vice chairman of the Republican Strategy Committee.

BUSINESS AND FINANCE

June 4—The New York Stock Exchange lowered initial margin requirements by member firms on new transactions from a minimum of $1,000 to a minimum of $500.

June 6—In heavy trading, in which 1,380,000 shares changed hands, stocks on the New York Stock Exchange tumbled from 1 to 5 points, reaching a new low since May 21, 1947.

June 7—In the five-week period ended May 14, unemployment in the country rose by 273,000, reaching a new post-war peak of 3,289,000, the Bureau of Census reported.—Election of Richard Weil Jr. as president of Macy's New York, the world's largest department store, was announced by Jack I. Straus, president of R. H. Macy & Co., Inc. Weil joined the store in 1928.

Tucker and Associates Indicted

June 10—Indictments charging mail fraud and violation of the Securities Act of 1934 were returned by the Federal Grand Jury in Chicago against Preston T. Tucker, president, and seven of his associates and former associates in the Tucker Corp., a $25,000,000 post-war automobile venture. Among those indicted was Floyd D. Cerf, head of an investment firm which handled the sale of the corporation's 4,000,000-share offering and which allegedly was paid $2,500,000. All pleaded not guilty when arraigned in Federal Court. The National Assn. of Security Dealers discontinued quoting prices on the stock, which had been offered at $5 a share and had dropped to 50 cents.

June 13—In a 5 to 4 decision, the U. S. Supreme Court held that reciprocal contracts between the Standard Oil Co. of California and independent gasoline dealers under which the company was obliged to sell gasoline to the dealers, who in return were obligated to buy all their fuel from Standard, violated the fair competition provisions of the Clayton Act.—Prices on the New York Stock Exchange dropped by 1 to 4 points, touching a new five-year low. The turnover was 1,340,000 shares.

June 16—Martin W. Clement retired as president of the Pennsylvania Railroad, a post he had held for 14 years, and became the road's first chairman of the board of directors. He was succeeded by Walter S. Franklin, executive vice president.

South's Economic Development Urged

June 19—The National Planning Assn., in a report transmitted to President Truman's Council of Economic Advisers, recommended a capital investment of $4,000,000,000 to $5,000,000,000 to overcome the economic lag of the South through the development of industries, fewer and larger farms and greater diversification of crops.

June 28—Gen. Brehon B. Somervell, wartime commander of the Army Service Forces and president of the Koppers Co., Inc., Pittsburgh, was elected a director of the Carborundum Co. of Niagara Falls, N. Y.

June 29—An announcement by the Federal Reserve Board that its open market operations in Government securities would be aimed at making credit available to meet the needs of commerce, business and agriculture sent up prices of long-term Government bond issues on the New York Stock Exchange to the highest levels in 18 months.

U. S. Sues du Pont Combine

June 30—U. S. Attorney General Tom C. Clark filed a civil suit in Federal District Court, Chicago, for dissolution of the du Pont industrial combine, whose total assets of $1,585,000,000 included a $560,000,000 investment in General Motors and a controlling interest in the United States Rubber Co., which also were named in the complaint. The Government charged the defendants violated the Sherman and Clayton Anti-Trust laws by conspiring to freeze out independent competition by buying certain products from each other and by other devices. Among the 100 individuals named in the complaint were the heads of the du Pont family, Pierre S., Lammot and Irénée du Pont, all of Wilmington, Del.

GENERAL

June 6—For the first time in 69 years the sale of intoxicating liquors became legal in Kansas again as a result of a referendum in November, 1948, on repealing the constitutional prohibition amendment.

June 7—A twin-engine C-46 charter plane, bound from San Juan, P. R., to the United States with 75 Puerto Ricans and six crew members on board, crashed into the Atlantic soon after the takeoff and sank within a few minutes. Fifty-three of the passengers, including many women and children, were trapped in the plane. One of the crew members, Capt. Alfred O. Cockrill of Pittsfield, Mass., also lost his life when he gave his lifejacket to Stewardess Judith Hale of Binghamton, N. Y., who was among the 27 persons rescued.

June 9—The Maryland Court of Appeals by a 6 to 1 decision reversed the convictions of three radio stations and a commentator fined under a Baltimore court rule forbidding the dissemination of crime news between the time of a defendant's arrest and his trial. The court said the rule, which prohibited the quoting of police and other officials on a pending criminal case, appeared to be "in the nature of a censorship."

Girl Shoots Waitkus, Baseball Star

June 15—Eddie Waitkus, 28, star first baseman for the Philadelphia Phillies of the National League, was seriously wounded in a Chicago North Shore hotel by Ruth Ann Steinhagen, a 19-year-old typist, who told police "I had to shoot someone." She lured him to her room and then shot him in the chest with a collapsible rifle. She said she had first seen him two years before when he was playing with the Chicago Cubs and felt "a great admiration" for him although they had not met in person. Psychiatrists said she had a split personality, intelligence and gentleness on the good side and an impulse to go to extremes on the bad side. She was later committed to the Kankakee State Hospital for the criminal insane. Waitkus recovered.

June 17—Following a series of raids by hooded men who flogged several civilians, including a former Navy man, the Alabama Senate, acting on a demand by Gov. James E. Folsom, passed, 23 to 3, a bill forbidding the wearing of masks.

June 18—Flash floods in the Potomac-Shenandoah Valley in Virginia and West Virginia caused 13 deaths; 10 persons were reported missing. Petersburg, W. Va., was inundated and 300 families had their homes damaged or destroyed. Damage also was caused to 12 industrial plants and 285 other buildings.

Hooded Terror Flares in Alabama

June 20—Clarke Stallworth, a reporter for the Birmingham Post, a Scripps-Howard newspaper, who was investigating reports of new floggings by hooded raiders after passage by the Alabama State Legislature of a law forbidding the public wearing of masks, was lured into a general store in the small town of Sumiton, near Birmingham, and slugged by two men. He broke away, but later returned with police who arrested the men on charges of assault and battery.

June 22—The Metropolitan Opera House in New York City was damaged by a $10,000 fire.

June 23—A Royal Netherlands Air Line (KLM) four-engine Constellation, en route from Batavia to Amsterdam, caught fire over Bari in South Italy and, falling apart, sank in the Adria 32 persons on board were killed.

Atlantic Pact Debate Opens

July 5—Opening the debate on ratificat the North Atlantic Pact, Sen. Connally (D. chairman, Senate Foreign Relations Com declared the treaty was "not directed Soviet Russia nor its satellites," but was only at aggression and war. The main ob he said, was to unite the otherwise i strengths of the signatory nations "to wa annihilation through disunity." The Sena in a temporary chamber which it had used the Civil War and where the Monroe Doctri debated 126 years before. The move to t chamber was necessitated by repairs to the tol. The House met in its new Office Bu

July 6—The North Atlantic Pact was de by Sen. Vandenberg of Michigan, chief Repu spokesman on foreign affairs, as "the g discouragement to war" yet devised which doom any aggressor and would block "emb greedy Communism abroad and at home."— the Atomic Energy Commission took off January 1946, the United States was "vi unarmed atomically," whereas, two and years later, it was "well ahead" of other n in the production of atomic bombs and re and was on "the threshold of a very gre velopment," Dr. Robert F. Bacher, Californ stitute of Technology scientist, who was the original members of the A. E. C., to Joint Congressional Committee on Atomic E —In San Francisco, the trial of America Mrs. Iva Toguri D'Aquino on treason char under way. The Government accused her of casting, in the role of "Tokyo Rose," propa to American troops in the Pacific with int impair their morale.

Alger Hiss Jury Disagrees

July 8—The jury in the perjury trial of Hiss, in Federal Court, New York City, (May 31) was discharged after it failed to on a verdict in 28½ hours' deliberations. final charge, Federal Judge Samuel H. Ka told the jurors that if they believed the as of Whittaker Chambers, the Government's witness, that Hiss had passed secret docume him for transmission to a Soviet spy ring, they considered Chambers' testimony corrobo they would have to convict Hiss. If, howeve believed Hiss' denials of the charge, they have to acquit him. Almost from the sta jury stood 8-to-4 for conviction, but the m held out for acquittal.—Congress completed

compromise for President Truman's long-
housing bill. The measure provided for con-
lion of 810,000 low rent units within six
a $1,500,000,000 slum clearance program and
5,000,000 farm housing program.

r 10—In a report to the joint Congressional
ittee on Atomic Energy, Dr. Ernest W.
, an independent investigator hired by the
ittee, stated that all of the enriched uranium
which disappeared from the Argonne National
atory in Chicago in February, had, in his
n, been accounted for and that it was "un-
any was stolen."—Rep. Harold H. Velde (R.-
member of the House Un-American Activities
ittee and a former judge, charged that
al Judge Samuel F. Kaufman had shown
bordering on misconduct" in favor of the
dant in the Alger Hiss perjury trial, and
for a Congressional investigation.

Truman Drops Higher Tax Demands

y 11—President Truman, in his mid-year eco-
report to Congress, dropped his earlier de-
s for $4,000,000,000 in additional taxes,
-by wage and price controls and other anti-
ionary measures. Admitting a decline in the
nal economy, he called for a return to deficit
ing and other "positive" governmental and
e action to fight, by increasing employment
oduction, the "moderate downward trend."
ked for increased estate and gift taxes, but
sed repeal of the 3 percent transportation tax
ods and liberalization of tax provisions cov-
past losses of corporations. He declared there
be "no greater folly" than to seek to balance
udget under prevailing conditions.

y 12—In his maiden speech in the Senate,
Dulles (R.-N. Y.) urged ratification of the
Atlantic Pact and declared there was "no
ation of any kind whatsoever to give arms to
ountry," but some nations would receive aid
use it will help the common defense."—The
Armed Services Committee, 13 to 12, voted
elve consideration of a new military unifica-
bill pending completion of its investigation of
d irregularities in the Air Force's B-36 pro-
ient program.

Truman Endorses Deficit Spending

y 13—President Truman in a radio talk de-
the country was in a depression, but admitted
increasing unemployment had to be solved.
is end, he explained, he had recommended
t spending to maintain essential national
ams and prevent further inroads on purchas-
ower. He assailed the "selfish interests" and
of little vision" who were urging drastic
n Federal expenditures, which, he said, would
further unemployment.

y 14—Paul Robeson, Negro singer, was a
er of the Communist party and had ambi-
to become "the black Stalin" of the United
s, Manning Johnson, also a Negro and a
dmitted former Communist national commit-
an, told the House Un-American Activities
ittee. Before the same committee, July 18,
e Robinson, Negro second baseman of the
lyn Dodgers, condemned as "silly" a state-
by Paul Robeson that American Negroes
not fight in a war against Soviet Russia.
he: "They'd do their best to help their coun-
in the war—against Russia or any other
y that threatened us."—President Truman
rred with 14 top administration and Con-
onal leaders on a British request for in-
ation enabling the United Kingdom and
da to produce the atomic bomb. (*See July 28.*)

Two Generals Suspended

y 16—The Army suspended Maj. Gen. Alden
aitt, Chief of the Chemical Corps, and Maj.
Herman Feldman, Quartermaster General,
ng an investigation by a Senate committee
arges against them of improper conduct in
warding of military contracts. Secretary of
rmy Gray said Waitt had furnished person-
ata to an unauthorized person and Feldman
supplied procurement information to a con-
or's agent "under circumstances which appear
ular."—Following disclosure by Attorney Gen-
Clark that 25 persons attached to the United
ns were among 685 aliens under investiga-
by the F. B. I., the Central Intelligence Agen-
eported that 82 representatives of foreign
nments, who had been allowed to enter the country, had records showing espionage and Communist propaganda activities.

July 17—President Truman's recommendation of deficit spending to stem a business recession was criticized by Sen. Byrd (D.-Va.) as smacking more of the theories advanced by the late Lord Keynes, British economist, than of American free enterprise. Byrd described the President's Council of Economic Advisers as a "strange group of men" whose "fanciful ideas" should be investigated.

July 19—A war between the world's democracies and the forces of Communism was not inevitable, said President Truman in an address to 50,000 at the diamond pubilee convention of the Imperial Council of the Shrine of North America in Chicago. In a second talk, he accused the Soviet Union of "making agreements for the purpose of breaking them."—Frank Murphy, 59, Associate Justice of the U. S. Supreme Court since 1940, died in a Detroit hospital. He had previously served as mayor of Detroit, High Commissioner to the Philippines, governor of Michigan, and U. S. Attorney General.

North Atlantic Pact Ratified

July 21—The Senate, 82 to 13, ratified the North Atlantic Pact. For ratification—Democrats, 52, Republicans, 32; against—Democrats, 2, Republicans, 11. Three Republican-sponsored reservations to the treaty were defeated by heavy majority.

July 25—Directly after signing the North Atlantic Pact, President Truman sent a message to Congress asking for $1,450,000,000 to help the European signatories, Iran, the Philippines and Korea arm themselves. "So long as the danger of aggression exists, it is necessary to think in terms of the forces required to prevent it," he said. The democratic nations of Europe, he declared, "have seen what the Soviet Union has done to nations for which it professed friendship and with which it was recently allied."—Federal Judge Elwyn R. Shaw in Chicago held the Housing and Rent Act of 1949 unconstitutional because of its local option provisions.

FOREIGN

July 1—For the first time since the Soviet blockade of the Western zones of Berlin began April 1, 1948, and the subsequent strike by non-Communist German workers against the Soviet-controlled railway management, rail communications from the city to Western Germany were reopened. The Russians, however, established check blocks along the West-East border to prevent supplies from Soviet areas reaching Western sectors.—The Chinese Nationalist cabinet in Nanking rejected a United States protest against the blockade of Communist-held ports, and announced it had ordered its naval vessels to sink any ships resisting search.

July 2—John J. McCloy, arriving in Berlin by Army transport plane from New York, became the first civilian U. S. Military Governor in Germany, preparatory to taking over the post of High Commissioner following installation of the new German Federal Republic in Western Germany. He said one of the main objectives of U. S. policy was Germany's "integration into the European family of nations."—Georgi Dimitrov, 67, communist premier of Bulgaria and close associate of Stalin, died in a sanitarium near Moscow of a liver ailment and diabetes. He first became an outstanding figure when, in 1933, he defied the Nazis at his trial as one of the conspirators in the Reichstag fire. He was acquitted.—Because Soviet Russia and her satellites had halted all shipments of war materials to Yugoslavia, Marshal Tito's government announced it would expand its armament industry and produce its own military equipment, including military planes.

Attlee Decries British Communists

July 3—Prime Minister Attlee, in a speech in Manchester, accused British Communists of being "instruments of an alien dictatorship," and trying to destroy British socialism and upset the country's precarious economy.—At the unveiling of a bust of Gen. George S. Patton in Tilly, France, Gen. Charles de Gaulle declared the U. S. Third Army commander could have continued his march into Germany to capture Berlin if he had not been held back by the decisions of the Yalta conference. —At the conclusion of air maneuvers over England, in which British warplanes were joined by the U. S. Air Force and units of the nations of the Western Union of Europe, Air Marshal Sir Basil

Embry declared that Britain still led the world in fighter aircraft.—In an Independence Day statement, Gen. MacArthur, in Tokyo, attacked Communism as "national and international outlawry" which posed the question of "whether such a movement should any longer be accorded the validity, the sanction and the protection of the law."

Included was $3,628,380,000 for the Economic Cooperation Administration, 10% less than requested.—President Truman reaffirmed U. S. friendship for the Philippines as he greeted Elpidio Quirino, Philippine President.

Vaughan Named in "5 Percenter" Inquiry

Aug. 9—Tighe E. Woods, Federal Housing Expediter, testified at the Senate investigation of "5 percenters" that soon after he was appointed in Jan., 1948, Maj. Gen. Harry Vaughan, President Truman's military aide, summoned him to the White House and asked that owners of the Tanforan race track in California, whom he described as "friends of mine," be able to obtain $75,000 in scarce building materials. The investigating committee's counsel said the permit was issued by Woods four days later.—A Pacific union without immediate participation of the U. S. was advocated by President Quirino of the Philippines in an address to the Senate, so that Asia would "not be lost to communism by default."

Aug. 10—James V. Hunt received $71,000 of an $86,000 fee for negotiating a deal with the War Assets Administration under which the Lido Beach Hotel at Long Beach, N. Y., purchased by the Navy in 1945, was sold back to its former owners for $635,000, according to a Senate inquiry report on papers from Hunt's files.

Aug. 11—President Truman named Gen. Omar N. Bradley, Army Chief of Staff, chairman of the Joint Chiefs of Staff, and Gen. J. Lawton Collins, Army Chief of Staff.—At the Senate "5 percenter" hearing, Albert J. Gross, a Milwaukee manufacturer of deep-freeze units and a client of James V. Hunt, testified he had shipped deep-freeze units to Gen. Vaughan and several other persons in Washington. They were paid for, he said, by the Albert Verley Co. of Chicago, perfume manufacturers.

Aug. 13—Maj. Gen. Vaughan acknowledged he had suggested the shipment in 1945 of deep-freeze units as gifts to persons close to the White House. One of the units was sent to President Truman's home in Independence, Mo., and others to Chief Justice Fred M. Vinson, John W. Snyder, Secretary of the Treasury; James K. Vardaman, then the President's naval aide, and Matthew J.

Connolly, a White House Secretary. Vaughan said he saw no impropriety in making gifts as he had been told the units "did not have commercial market value, as they were experimental models."

Aug. 15—Sen. McCarthy (R.-Wis.), a member of the Senate subcommittee investigating "5 percenters", declared Mrs. Harry S. Truman had accepted a deep-freeze unit from Gen. Vaughan as she would a "20-pound cheese or turkey." He said: "She is the type of lady who is incapable of doing anything improper."—In Baltimore, Circuit Court Judge Joseph Sherbow declared unconstitutional a Maryland law making it a crime to join or work for subversive organizations. He held the law violated both the State and the U. S. Constitutions.

Welfare Department Plan Beaten

Aug. 16—A coalition of Republicans and Southern Democrats in the Senate defeated President Truman's proposal for the establishment of a Department of Welfare, a Hoover Commission recommendation. The vote was 60 to 32. Against: Democrats, 23, Republicans, 37; for: Democrats, 28, Republicans, 4. Sen. Taft, opposed, said the vote was not against the Hoover plan but against the Administration's failure to follow the commission's recommendations.—At the "5 percenter" hearing, Maj. Gen. Alden H. Waitt, suspended chief of the Army Chemical Corps, said that, at Gen. Vaughan's request, he had drawn up a memorandum on the qualifications of officers eligible to succeed him, belittling his brother officers and praising himself.

Aug. 17—Because Congress cut his budget from $26,000,000 to $17,500,000 for the 1949-50 fiscal year, Tighe E. Woods, National Housing Expediter, announced he was compelled to decontrol one-third of the country's rent control areas covering about 4,500,000 rental units. The reduced budget forced him to dismiss 2,600 of the 5,600 employees.—Two of President Truman's reorganization plans—transfer of the Bureau of Employment Security to the Department of Labor and of the Bureau of Public Roads to the Department of Commerce—were passed by the Senate, the first by 57 to 32; the second by 47 to 40.—A former Department of Agriculture executive, Herbert C. Hathorn, testified at the "5 percenter" inquiry that Gen. Vaughan had threatened to "get my job" when in 1946 he refused to intercede in behalf of the Allied Molasses Co., Perth Amboy, N. J., which had lost its molasses allocation license because of "flagrant, wilful" violations of departmental regulations.

Aug. 18—The House passed, 238 to 122, a bill authorizing $869,505,000 for foreign military aid, or $580,495,000 less than the $1,450,000,000 asked by President Truman. The proposed appropriation of $1,160,990,000 for the North Atlantic pact nations was reduced to $505,150,000. The allocations to Greece, Turkey, Iran, Korea and the Philippines remained untouched.—The Senate confirmed Attorney General Tom C. Clark as an Associate Justice of the Supreme Court, 73 to 8, the opposition votes being cast by Republicans. The nomination of Sen. J. Howard McGrath of Rhode Island, chairman of the Democratic National Committee, to be Attorney General was approved unanimously. McGrath resigned both his other offices.

F. C. C. Bans Give-Away Shows

Aug. 19—The Federal Communications Commission announced it would refuse to renew licenses of radio and television stations featuring give-away programs which the commission declared violated the U. S. Criminal Code forbidding lotteries. About 50 network shows giving away $4,000,000 in merchandise and other prizes annually were affected by the order. The networks filed court actions.—The House approved $11,500,000 in additional funds for the "Voice of America" broadcasts to overcome Moscow's "jamming" of programs.

Aug. 22—In an address to 12,000 fellow-members of the Veterans of Foreign Wars at their golden jubilee convention in Miami, Fla., President Truman pleaded for speedy enactment of his foreign military assistance program. He declared "it represents an investment in security that will be worth many times its cost." He asked: "Which is better—to make expenditures to save the peace, or to risk all our resources in another war?"—The Senate and the House completed action on a $7,600,000,000 bill for funds for 32 independent agencies.

Aug. 23—Maj. Gen. Herman Feldman, suspended chief of the Army Quartermaster Corps, admitted at the Senate inquiry that in July, 1947, he had given James V. Hunt a copy of the proposed clothing and equipment procurement program for 1948, but asserted he was unaware that Hunt was a "so-called 5 percenter." He also stated that the information was "not classi (secret), and that he had never misused influence of his office.—Secretary of Defense Johnson denounced before the House A Forces Committee as "a lie made out of cloth" the suggestion that he used influenc the B-36 program. He declared the inves tion was the outgrowth of rumors that se to be aimed at "terrorizing" him into haltin B-36 program.

Aug. 24—As an economy measure, Secreta Defense Johnson ordered the dismissal of 1 civilian employees in the military establish the release of 12,073 reserve officers from a duty, and the closing down of 51 Army, Navy Air Force installations in the U. S. and ab Expected savings for the balance of the 19 fiscal year were put at $200,000,000 and after at $500,000,000 annually.—Cedric R. Wort civilian special assistant in the Navy De ment, admitted authorship of the anony letter which touched off the investigation the B-36 procurement program. Secretary o Navy Matthews suspended Worth pending vestigation.—President Truman signed a pr mation putting into effect the North Atl pact following ratification of the treaty b 12 of the signatory nations.

House Committee Clears Air Force

Aug. 25—The House Armed Services mittee, after a two-week inquiry costing $10 cleared top ranking Government officials an Force officers of "charges and insinuations collusion, fraud, corruption, influence or f tism played any part whatsoever in the curement of the B-36 bomber."—After rece a letter from Maj. Gen. Vaughan that Pres Truman was "personally interested" in a John Maragon proposed to take to restricted in Italy, the State Department issued a pas classified as "travel authorized by the Presid it was brought out at the Senate "5 percen investigation. Maragon made the trip in 19 obtain perfume oils.—The House voted its 26-day holiday although the Senate, 58 to 25 refused to approve a formal adjournment. Sp Rayburn said the House would convene Tue and Friday of each week with a few mem present and would then adjourn at once.

Maragon Refuses to Explain

Aug. 26—John F. Maragon refused at the ate "5 percenter" inquiry to answer ques relating to his activities in connection negotiations for Government contracts, on ground his answers "might tend to incrimin him. He admitted knowing Maj. Gen. Vaug An investigator, Carmine S. Bellion, tes Maragon had filed income tax returns indicat total income of $30,000 in the preceding years, but had banked $120,000.

Aug. 27—In a notarized affidavit sent to bers of the Senate subcommittee investig "5 percenters," James V. Hunt denied he ever said that "all I have to sell is influenc

Aug. 29—President Truman, at the Ame Legion convention in Philadelphia, made it that Britain's socialistic program was her business and that the U. S. had no intenti meddling in British internal policies. Four gu principles listed by him were: A sound expanding world economy aimed at satisfyin material and spiritual needs of mankind and serving democratic freedom; sound and prosp relations among nations based neither on "c table enterprise" nor on "trick solutions;" ceasing mutual concession and cooperatio reconcile divergent economic interests; no i ference by the democratic nations in the litical and business affairs of other nations the testimony and evidence presented to before a Senate subcommittee investigatin percenters" was turned over to the Departme Justice and the Bureau of Internal Revenu "possible action."—By a vote of 49 to 28, short of the required two-thirds majority Senate refused to order President Truma cut appropriations by 5 to 10%.

Vaughan Denies Improper Acts

Aug. 30—Maj. Gen. Harry H. Vaughan d at the Senate "5 percenter" inquiry that was anything to conceal in his "record as a servant." He declared he had never acc any money for himself, never performed an proper favors, or committed any acts detrim to the best interests of the Government. H mitted he had accepted $3,000 from Willia Helis, race-track figure, and $2,000 from Jo Maragon as contributions to the Democratic paign fund in 1946. He denied Maragon had him part of the money came from Frank Co New York City gambler.—In letters to the

dors of India and Pakistan, President Tru- urged the two countries to settle their dis- over the princely state of Kashmir which, aid, involved a "grave threat to peace in all outheast Asia."

g. 31—Maj. Gen. Vaughan and his assistant, Cornelius J. Mara, testified at the "5 per- r" hearing that the F. B. I. had investigated arge that Vaughan had accepted a bribe for ng" an income tax case. Mara told the te subcommittee that "my boss" was com- ly exonerated. When Vaughan was asked her he had "exerted influence and pressure" in increased grain allotments for two liquor anies and whether the F. B. I. had inquired this matter, he denied knowledge of such a

FOREIGN

g. 1—Rumania's Communist government or- d the dissolution of 15 Roman Catholic organ- ons engaged in charitable, hospital and social work, and ordered the 1,500 nuns, s and others affected either to retire to three nts and two monasteries, enter old age s, or register for regular jobs.—The U. S. Chiefs of Staff conferred in Frankfort with sentatives of tiny Luxemburg and disarmed on their eventual integration in a European se system.

The charter members were Britain, ce, Italy, the Netherlands, Belgium, Luxem- Sweden, Norway, Denmark and Ireland.— Chinese Nationalist government stepped up vacuation of Canton, its temporary capital, 40 large transport planes flying government members, their families and office equip- to Chungking and Formosa.

g. 10—A European union founded on political rstanding was needed to draw the nations her, former French Premier Edouard Her- declared in the inaugural address at the open- meeting of the Consultative Assembly of the cil of Europe in Strasbourg. The admission ermany to the Council, he said, should be de- until she furnished proof that she embraced precepts of peace and renounced the philoso- of force. Paul-Henri Spaak of Belgium was d permanent President.—German police in ch fired on a crowd of displaced Jews who nstrated against a letter published in a local paper suggesting that all Jews should be sent e gas chamber. Six Jews were wounded by re and 20 German policemen were struck by s and stones. Two companies of U. S. mili- police restored order.

Argentine Foreign Minister Quits

g. 13—President Juan D. Péron of Argentina ted the resignation of Foreign Minister Juan Bramuglia after a violent quarrel between the latter and Dr. Jeronimo Remorino, Argentine Ambassador to the U. S., who had been summoned home without Bramuglia's knowledge. Remorino challenged the Foreign Minister to a duel, claiming he had been insulted, but the challenge was withdrawn. President Péron appointed Hipolito Jesus Paz, a 32-year-old lawyer, Foreign Minister.—The Greek General Staff reported its forces had cut in two the rebel stronghold in the Vitsi Mountains, near the Albanian frontier.

Aug. 14—The rightist, or conservative parties, scored a major victory over the Social Democrats and Communists in elections for the Bundestag, or lower house of parliament, of the new German Federal Republic in Western Germany, the first free elections since Hitler's seizure of power in 1933. Ballots were cast by 23,724,479 eligible voters, with the rightists capturing 205 seats and the leftists 146. Final results for the major parties were: Rightists—Christian Democrats, 7,357,579 votes; Free Democrats, 2,788,653; Bavarian party, 986,606; German party, 940,088; leftists—Social Democrats, 6,932,272; Communists, 1,360,443.—Marshal Husni Zayim, who made himself Chief of State of Syria by overthrowing the government of President Shukry al-Kuwatly March 30, and his premier, Mohsen el Barazi, were taken from their Damascus homes by army officers, tried by summary court martial and executed. The officers accused the Zayim regime of corruption and destroying Syria's freedom. They promised a "legal, legislative government."

Aug. 16—Russia recalled her ambassador in Belgrade, Anatoly Y. Lavrentiev, after having denounced Yugoslavia as "an enemy and an opponent of the Soviet Union." Lavrentiev was named a deputy foreign minister.

Aug. 17—Winston Churchill urged the Council of Europe in Strasbourg to invite the Western German Federal Republic to join. Said he: "A united Europe cannot live without the help and strength of Germany."—In a letter to the Czech State Procurator (prosecutor), Roman Catholic Archbishop Josef Beran protested he had been interned in his palace in Prague since June 19.—The Nationalist key port of Foochow was captured by Chinese Communist forces without a battle.

Communists Call Strikes in Finland

Aug. 18—Finland mobilized her Army as Communist-led unions opened a strike offensive against the Socialist government. In Northern Finland, 1,500 striking lumberjacks fought a pitched battle with police and troops as they tried to stop non-strikers from going to work. One striker was killed and several were wounded. Government spokesmen in Helsinki suspected a Communist coup to seize power.

Aug. 19.—The U. S. Consulate General in Canton, the Nationalist capital, was closed and its personnel moved to Hong Kong as the Chinese Communists drove closer to the city. Most of the embassy's staff was evacuated.

Aug. 20—The Soviet Government, in a note to Yugoslavia, renewed its demand for the release of 31 Russians allegedly held prisoner and warned that, if no action was forthcoming, it would be "obliged to resort to other, more effective measures necessary to defend the rights and interests of Soviet citizens in Yugoslavia and call to order the unbridled Fascist rapists."

Yugoslavs Charge Stalin Doublecross

Aug. 21—A Yugoslav note to Moscow accused the Soviet Union and Premier Stalin personally of double-crossing it in not awarding Slovene Carinthia to Yugoslavia. Belgrade charged that as early as May, 1945, Stalin had promised Chancellor Renner of Austria to help him preserve his country's integrity and that at subsequent meetings of the Council of Foreign Ministers Russia had sided with the Western powers in rejecting Yugoslavia's claims despite earlier pledges to support them.

Aug. 23—In the Russo-Yugoslav "war of words," Belgrade told Moscow that, as an "independent and sovereign state," Yugoslavia and her people "are, under no conditions, willing to allow anyone whomsoever to interfere in their internal affairs." Also, that the 31 Soviet citizens held were "spies, saboteurs and counter-revolutionaries," whom Yugoslavia would gladly "extradite" to Russia. The note expressed willingness "to solve all disputed questions between the two states by agreement."—Dr. Mohammed Hatta, vice president of the Republic of Indonesia, demanded at the opening of the round-table conference on Indonesia in The Hague that the Netherlands transfer sovereignty to his government by January 1, 1950.

Aug. 24—The Finnish Federation of Labor expelled four Communist-led unions, with a total membership of 80,000, for refusing to call off strikes against the government. The ousted unions

were the transport workers, lumbermen, food industries workers and building trades men. The strikes stopped all shipping activities in Helsinki and other ports, halted building construction and left many communities without bread.

Aug. 25—The British Treasury called on all Government departments to reduce current expenditures and to cut requirements under the 1950-51 budget by at least 5%. At the same time, the Board of Trade ordered 5% cuts in the retail prices of utility clothing, footwear and household textiles.

Aug. 28—Greek government troops stormed the northern ridge of 8,500-foot Mount Grammos, routing 5,000 guerrillas and taking 1,500 prisoners. —The Chinese Communists announced establishment of a "People's Government for the Northeast" for Manchuria.

Rebellion in Bolivia

Aug. 29—The Bolivian Government mobilized all men between 19 and 50 in an attempt to check a spreading rightist rebellion, led by the outlawed Nationalist Revolutionary movement (MNR) and disloyal army units. The rebels were in control of most of the large cities except La Paz, the capital.—The Communist-led strikes in Finland spread to the metal industry, halting work on five ships under construction for Russia as war reparations. The Socialist government had predicted the strike leaders would seek to create difficulties with Moscow.

Aug. 30—Belgrade reported that Soviet Russia was massing armored divisions, heavy artillery and warplane squadrons inside of Hungary and Rumania and close to Yugoslavia's northern borders. In a note to Yugoslavia, Moscow accused Marshal Tito's regime of being "malicious deserters" from the Soviet camp to the "camp of imperialism and fascism," and of being subservient to their "Western masters." It was Moscow's intention, the note said, to "unmask" Tito's government and show its "true face" to the Yugoslav people.—The Communist Czechoslovak government announced it had smashed an armed rebellion, which had the support of a "Western imperialist nation," in May and that six of the ringleaders had been sentenced to be hanged, 10 to life imprisonment and others to lesser terms. The "Western power" was not identified.

Aug. 31—A Russian Air Force officer, Lt. Anatoli P. Barsov, was handed back to Soviet military authorities in Vienna by U. S. Army officials after he had been deported from America by the State Department. Barsov and another Russian flier, Lt. Piotr Pirogov, crash-landed their plane in the U. S. occupation zone of Austria Oct. 9, 1948, announcing they had fled from the Soviet Union and did not intend to return. They were granted asylum in the U. S. as political refugees. When the U. S. learned that Barsov, who had a wife and child in Russia, had asked the Soviet embassy to repatriate him, he was arrested and deported forthwith by plane. Pirogov, who asserted Barsov was stupid and would be dead in six months, disclosed he had been beaten by Soviet agents in Washington when he refused to return.

UNITED NATIONS

Aug. 1—By a vote of 8 to 3, the Commission for Conventional Armaments adopted a French proposal for an international census of the armed forces and armaments of members of the U. N. Opposing votes were cast by Russia, the Ukraine and Egypt, with Semyon K. Tsarapkin of the Soviet Union accusing the U. S. of promoting a war of aggression against Russia.

Aug. 3—Soviet Russia admitted in the Economic and Social Council in Geneva that she maintained a "corrective" labor system for those who "undermine the Socialist system," but contended it was a "humane method of reforming criminals."

Stalin "Peace" Offer Reported

Aug. 4—The United Nations World, a privately-published magazine at Lake Success, reported Soviet Delegate Gromyko had told a "top-ranking American businessman" that Premier Stalin would call a halt to the cold war on five conditions: resumption of normal trade relations with the U. S., stimulated by a $2,000,000,000 loan to Russia; a Russo-U. S. treaty formalizing the commitments of the Yalta and Potsdam agreements; four power unanimity on all questions concerning Germany; Western "generosity" on reparations to Russia, and cessation of U. S.-British "support of subversive Fascist and Hitlerite elements."

Aug. 8—In his fourth annual report, Secretary General Lie declared that the year between July 1, 1948, and June 30, 1949, "has been, on the whole, a year of progress toward a more peaceful world." He conceded there had been "crises and alarms," due chiefly to differences among th powers, but, he asserted, "the fear of wa decreased since my last report was made."

Aug. 9—The population of Germany, which dropped to 60,800,000 in 1945 as a result of casualties and loss of territory, was back to 600,000 in 1948, or only 1,100,000 less tha 1938, when Hitler opened war, the Economic mission for Europe reported in Geneva.

Aug. 11—The Security Council relieved Ralph J. Bunche, at his own request, of his d as Acting Mediator for Palestine, and calle Israel and the Arab states to continue obse the armistice agreements negotiated through pending a permanent peace settlement.

Trygve Lie Sees "Cold Peace"

Aug. 16—Returning from a vacation in S dinavia, Secretary General Lie said at Lake cess that the world had moved from a "cold to a "cold peace." Said he: "I believe more ever that the U. N. is doing an increasingly portant job for peace and that we have th creasing support of the people in that task.

Aug. 17—At the opening of the U. N. Scie Conference on the Conservation and Utiliz of Resources at Lake Success, Secretary of Interior Krug declared the U. S. ready to pr substantial aid, "both in technology and in vestment," for the world's needy and u developed areas, as proposed by President man. More than 500 scientists from 50 cou were present.

Aug. 21—Secretary General Lie's proposed get of $44,314,398 for 1950, an increase of $ 270 over 1949, led a nine-man advisory comm to recommend cuts totaling $1,786,850. It w against a tendency toward bureaucracy.

Aug. 26—Statisticians predicted at the S tific Conference that the world's population, mated at 2,000,000,000, would increase to 3 000,000 within 50 years. They and other scie agreed, however, that the food supply would pace with the population and perhaps wou more plentiful per capita.—Secretary Genera appointed Gordon R. Clapp, chairman of Tennessee Valley Authority, head of a comm to study resettling 711,600 Arabs who lost homes in Palestine.

POLITICS

Aug. 2—Candidates backed by the Demo machine headed by U. S. Senator Harry F. were victorious in Virginia's biggest primary tion. In a four-way race for Governor, State John S. Battle, the Byrd choice, received 1 votes to 109,179 for Francis Pickens Miller, spoken critic of the Byrd machine. The othe candidates trailed far behind.

Aug. 4—Guy George Gabrielson, Bernard (N. J.) lawyer-industrialist, was elected chai of the Republican National Committee, suc ing Rep. Hugh D. Scott Jr. of Pennsylvania signed. Gabrielson polled 52 votes in the s committee election to 47 for Axel J. Beck of Dakota and 1 for A. T. (Bert) Howard of Ne ka.—Tammany Hall nominated City Pla Commissioner Robert F. Wagner Jr., son o retired U. S. Senator, for Borough Preside Manhattan.

Southern Democrats Purged

Aug. 24—The Democratic National Comm meeting in Washington, "expunged" the r of five members from four states who supp the States Rights ticket in the 1948 Presid election. They were Marion Rushmore, (Ala B. Snider and Mrs. Hermes Gautier, (M William H. Talbor, (La.), and Mrs. Albert A (S. C.). It also "expunged" the name of G Strom Thurmond of South Carolina, States R candidate in 1948, although he had resi President Truman in a talk invited the bolt return to the party as loyal Democrats. The mittee elected William M. Boyle Jr., Kansas Mo., chairman to succeed J. Howard McGra

Aug. 25—President Truman implied tha would not seek reelection in 1952, but said i too early for him to echo the Coolidge d that he did not choose to run. He indicat might stump the country in the 1950 Congres elections.

Aug. 31—Former Gov. Herbert H. Lehma nounced he had accepted the Democratic Liberal party designations for U. S. Senator New York to fill the unexpired term of Sen. ert F. Wagner who resigned because of ill h The term expires Dec. 31, 1950.

BUSINESS AND FINANCE

Aug. 2—Gen. Lucius D. Clay, former U. S. tary Governor of Germany, was elected a tor of the Marine Midland Trust Co. of New

. 3—After receiving a report from a special ittee that unemployment in New York State ted a serious but not alarming problem, Dewey ordered a speed-up in the state's 00,000 public works program, with special asis on projects in areas where joblessness nost severe.—Unemployment in the nation to 4,095,000 during July, the highest figure January, 1942, the Census Bureau reported.

. 5—At a 23-hour conference in New York at which Gov. Dewey presided, the Port of York Authority and five major airlines ed a compromise agreement on new leases e New York International Airport at Idle- Queens, ending a two-year dispute.—The al Reserve Board lowered reserve require- from 24 to 22%, thereby releasing $1,- 0,000 for potential loans to business.

Review of Federal Taxes Urged

. 7—Thomas B. McCabe, chairman of the al Reserve Board, urged Congress to review ax situation from the point of view of its upon the availability of equity capital, de- g the sluggish market for common stocks in receding two years showed the reluctance of ican investors to take "reasonable risks."

. 11—A 4% increase in railroad freight rates granted by the Interstate Commerce Com- on. This was in addition to a 5.2% increase ed Dec. 29, 1948.

. 15—In reply to a letter from Sen. Johnson olo.) expressing disapproval of radio and sion advertising of liquor, the Federal Com- cations Commission declared it lacked legal rity to ban such advertising, but stated the ic interest" licensing clause might be in- in states and communities having laws st the sale of liquor and against liquor ad- ing.

. 19—In a letter to Rep. Norblad (R.-Ore.), dent Truman stated that "prudent debt man- ent" would enable the Federal Government andle all maturing U. S. Savings Bonds. g the 1948-49 fiscal year, he wrote, about 0,000,000 in bonds were redeemed on or be- maturity. Norblad had expressed doubt her the Treasury, in the face of deficit ing, would be able to pay off.

. 20—Individual incomes throughout the na- averaged $1,410 in 1948, setting a new record, Commerce Department reported. In 1947, the idual income average $1,319. Income pay- s for 1948 totaled $206,000,000,000, a 9% in- e over 1947.

Ban on Private Tin Imports Lifted

. 25—The Government lifted the ban on te imports of tin, which had been in effect Dec. 17, 1941. During that period, the Re- truction Finance Corp. was the sole importer the price of tin rose from 50 cents to $1.03 und.

. 29—The first trade agreement negotiated Western Germany with another country was d with Switzerland with the approval of Allied Military Government. The pact re- lished the principles of free trade, discarded r the Nazis, and called for imports and ex- of food, machinery and other products on a and not a barter, basis.

GENERAL

. 1—July, with a mean temperature of 78.6 ees, was the hottest month in the 78-year ry of the New York City Weather Bureau.— ite an upswing in the number of poliomyelitis throughout the country, the National Foun- n for Infantile Paralysis and the Public th Service, in a joint statement, urged the ic to remain calm, pointing out that im- d treatment had greatly reduced deaths and ling after-effects. The Associated Press re- d 6,883 cases in 44 states and the District olumbia in the first seven months of 1949 com- d with 4,640 cases for the same period in

. 3—The Aga Khan, one of the world's thiest men, and his wife, the Begum, were up by four armed men as they were driving their villa near Cannes, France, and robbed ewelry valued at $450,000.—A Federal grand in Rome, Ga., indicted Sheriff John W. Lynch of Dade County, three of his deputies and eight other men in the masked flogging of seven Negroes at Hooker, Ga., April 12.

Aug. 5—Cardinal Spellman, in a clarifying statement, said that the Roman Catholic Church sought Federal funds for parochial schools only for "auxiliary services," such as transportation, health services and non-religious textbooks. The statement was called "fair" by Mrs. Roosevelt, with whom the Cardinal had been in friendly communication.

Earthquake in Ecuador Kills 4,000

Aug. 6—An earthquake rocked 50 cities and villages in central Ecuador, killing 4,000, making 100,000 homeless and causing property damage of $20,000,000. The city of Ambato, pop. 30,000, was 75% destroyed; 560 persons were killed.

Aug. 7—Twelve members of a team of 15 "smoke-jumpers"—parachutists—who made successful landings on Willow Mountain, Montana, to help ground crews fight a raging forest fire were killed when they were engulfed by the flames. Most of them were college students. The other three escaped by climbing a steep cliff.

Aug. 10—The United States and other nations in the Western Hemisphere, the Vatican, the United Nations and the International Red Cross rushed relief supplies to central Ecuador.—Edward C. Allcard, an English architect, arrived in New York Harbor from Gibraltar after a solitary crossing of the Atlantic in a 29-foot yawl in 81 days.

Aug. 13—In an audience with American newspapermen in Vatican City, Pope Pius XII expressed the opinion that the controversy between Cardinal Spellman and Mrs. Franklin D. Roosevelt over U. S. Government aid to Catholic schools had been satisfactorily resolved.

Airliner Sinks off Ireland; 49 Saved

Aug. 15—A four-engine Transocean Air Lines plane, en route from Rome to the U. S., ran out of gas and was forced down in the Atlantic 15 miles off the West Irish coast after missing Shannon airport in a fog. Of the 58 persons on board, including 47 Italian emigrés and 11 crew members, 49 were saved. Eight of the passengers and Herbert (Jack) Asbel of New York City, the radio operator, were lost. Among those rescued was Miss Ruth Nichols, American flyer.

Aug. 16—Margaret Mitchell, 49, author of "Gone with the Wind," died in an Atlanta (Ga.) hospital of injuries she suffered when struck by a cab while going to the movies with her husband, John R. Marsh. Hugh D. Gravitt, the cab driver, was later convicted of involuntary manslaughter.

Aug. 17—The remains of Dr. Theodor Herzl, founder of Zionism, were reburied on the highest hill in Jerusalem in a simple ceremony. More than 100,000 persons lined the route along which the cortege passed. The remains had been buried in Vienna for 45 years.

Aug. 19—A traditional hero's reception, with a parade, ticker tape and scroll, was accorded Connie Mack, 86-year-old manager-owner of the Philadelphia Athletics of the American Baseball League, by New York City. The occasion was his 65th anniversary in baseball.

82 Die in French Forest Fires

Aug. 21—Fires in southwestern France, below Bordeaux, destroyed 125,000 acres of pine forests and killed 82 persons, including many fire fighters and troops. Heavy rains helped bring the blazes under control. The Paris government proclaimed a national day of mourning.—All 21 persons on board a Royal Canadian Air Force transport returning from a mercy mission into the Arctic were killed when the plane crashed and burned in Northern Manitoba. Among the victims were 8 polio-stricken Eskimos and a nurse.

Aug. 22—Convicted of first degree murder in the slaying of Mrs. Janet J. Fay, an Albany (N. Y.) widow whom they had met through a "Lonely Hearts" column, Mrs. Martha J. Beck and Raymond M. Fernandez were sentenced to die in the electric chair by Supreme Court Justice Ferdinand Pecora in New York City.

Aug. 24—An English public school boy, Philip Mickman, 18, was the first swimmer in 1949 to complete the crossing of the English Channel, from Cap Gris Nez to Kingsdown, south of Dover. He made the crossing in 23 hours 48 minutes, and became the youngest swimmer to date to conquer the channel.—Mrs. Franklin D. Roosevelt reported in her newspaper column that Cardinal Spellman had paid her an informal visit in her home in Hyde Park, N. Y., and that they "had a pleasant chat."

Aug. 26—A Caribbean hurricane, sweeping across Florida on 150-mile-an-hour winds, caused property damage estimated at between $40,000,000 and $50,000,000. The heaviest damage was reported in the areas from West Palm Beach north

to Fort Pierce and around Lake Okeechobee from Belle Glade to Canal Point. The Florida Citrus Commission put grapefruit losses at 12,000,000 boxes, or a third of the crop, and orange losses at 5,000,000 boxes, or 5 percent of the crop. The total citrus loss was estimated at $25,000,000 to $30,000,000.—The U. S. submarine Cochino exploded, burned and sank off the northern tip of Norway while on cold water training maneuvers with three other submarines. All but one of the Cochino's complement of 79 men were saved by a sister-vessel, the Tusk, six of whose crew were washed overboard and lost during rescue operations.

Robeson Concert Broken Up

Aug. 27—A scheduled concert by Paul Robeson, Communist baritone, at a picnic ground near Peekskill, N. Y., was broken up by a three-hour riot between protesting war veterans and pro-Communists after one of the veterans had been stabbed and seriously wounded. Peekskill police and state troopers brought the fighting under control.

Aug. 29—Men and women who saw service in the Army, Navy, Marine Corps and Coast Guard in World War II rushed to Veteran Administration and post offices throughout the nation as applications became available for their shares in a $2,800,000,000 rebate on GI life insurance premiums. About 16,000,000 veterans were eligible. Overseas, U. S. consulates handed out forms to ex-service men and women.

1949—September

WASHINGTON

Sept. 1—President Truman declared at his news conference that he would retain Maj. Gen. Vaughan, a central figure in the "5 percenter" inquiry, as his military aide. Sen. McCarthy (R.-Wis.), a member of the inquiry, said the President's attitude was "inexcusable," put the stamp of approval on "influence-peddling" and would "lead to unlimited graft and corruption in the Government."—Noting that the day marked the 10th anniversary of the outbreak of World War II, President Truman expressed hope that the war of nerves between the West and the Soviets would end in surrender just as the shooting war had and that everybody would get into the mood for peace.

Sept. 2—The State Department charged Moscow with going back on its commitments at the Big Four Foreign Ministers' conference in Paris in June, 1949, by making excessive claims against Austria despite "concessions" made at the expense of Yugoslavia at succeeding talks of the Foreign Ministers' deputies in London.

Sept. 6—Arriving in New York City for the U.S.-British-Canadian economic conference, British Foreign Secretary Bevin declared that, so far as England's economic plight was concerned, "we are not here to blame anybody and we are not going to let anyone blame us." The real aim of the talks, he said, was to extend the "one-world" principle to include the economic as well as the political field. Bevin was accompanied by Sir Stafford Cripps, Chancellor of the Exchequer, and a large group of financial experts.

Sept. 7—A pledge that the U. S. Government would strive to help solve Britain's financial troubles was made by Secretary of the Treasury Snyder at the opening of the tripartite economic conference. Sir Stafford Cripps, after reading a record of Britain's increased production and exports, attributed his country's predicament to the two world wars, but declared his Government was seeking "no charitable aid or direct assistance other than that contemplated through the Marshall Plan."—During debate on a bill giving President Truman more freedom in approving foreign trade agreements on a reciprocal basis, Sen. George (D.-Ga.) warned that "if Britain goes down, we'll go down, too, in a matter of months."—Sen. Connally (D.-Tex.), chairman of the Foreign Relations Committee, opposed further military aid to China, charging that Generalissimo Chiang Kai-Shek had "absconded" to Formosa with $138,000,000 in gold after "deserting" his people.

Sept. 8—Glenn L. Martin, airplane manufacturer, testified at a Navy court of inquiry that he had talked with Cedric R. Worth, suspended technical aide in the Navy Department, about the B-36 bomber procurement program, but had not collaborated in the anonymous letter which led to a Senate subcommittee investigation and authorship of which was admitted by Worth.

Sept. 10—Secretary of the Army Gray announced acceptance, for the "best interests of the service," of the application of Maj. Gen. Alden H. Waitt, chief of the Army's Chemical Service, for retirement. Gray restored Maj. Gen. Herman Feldman, quartermaster General, to duty, sta the general's "lapse of judgment" would no repeated. Both generals were suspended Jul after being mentioned in the Senate "5 center" inquiry. President Truman (Sept. nominated Maj. Gen. Anthony C. McAuliffe, hero of Bastogne, to succeed Waitt.—Asso Justice Wiley B. Rutledge, 55, appointed to U. S. Supreme Court, by President Roosevel 1943, died in York, Me., after a brief illne

Sept. 12—After six days of conferences, U. S., Britain and Canada announced agreer on a basic formula to ease the dollar crisis end the drain on British gold and dollar rese by 1952. The U. S. agreed to allow Britair use Marshall Plan dollars to buy Canadian wh to cut its protective tariff on natural rubber review its tin stockpiling program; to modify terms of the 1946 Anglo-American loan ag ment regulating imports, and simplify its cust procedures.

Sept. 13—President Truman called on the fi cial representatives of 48 nations at a joint m ing of the International Monetary Fund and International Bank for Reconstruction and velopment to eliminate barriers to internati trade by reciprocal trade on a multilateral b

Sept. 15—President Truman's House-appr Reciprocal Trade Agreement bill was passe the Senate, 62 to 19, 15 Republicans voting the Democratic majority. Earlier the Senate feated, 43 to 38, an amendment sponsored Sen. Millikin (R.-Colo.), which would have quired the President to explain reductions tariffs to foreign countries regarded as "peril to domestic producers.

Capt. Crommelin in Controversy

Capt. John G. Crommelin Jr., U. S. N., wh testimony before a Senate subcommittee critic the policy for unifying the armed services, promoted by the Joint Chiefs of Staff to deputy chief of Naval Personnel, but the motion was cancelled a few hours later by retary of the Navy Matthews, who declared C Crommelin had "obviously disqualified hims by his statement assailing unification.

Sept. 16—The Senate rejected, 40 to 28, P dent Truman's nomination of Carl A. Ilgen as chairman of the Munitions Board. The maj opposed the appointment because Ilgenfritz he would continue to draw his $70,000-a-year ary as vice president of the U. S. Steel Co The Navy Department ordered its officers to talking about the controversy within the Nati Military Establishment over alleged favori toward Army aviation and neglect of n aviation.

Sept. 17—The United States and Canada ag to cooperate actively in the joint defense of W ern Europe in implementation of the N Atlantic Pact. The foreign ministers of the si tory powers voted to establish a defense mittee, with the U. S., Britain and France fo ing a supervisory group, to insure that the member nations performed their military obl tions.—Secretary of State Acheson, British eign Secretary Bevin and French Foreign ister Schuman announced jointly that fur aid to Generalissimo Chiang Kai-Shek's natio ist government in China would be futile.

Sept. 19—At the opening of the Senate de on the Administration's $1,314,010,000 foreign bill, Democratic leaders declared Western Eu lacked the defenses to stop, "short of the lantic," an advance by Russia's 5,000,000 tr if it were suddenly launched.——"Plots counter-plots" in the Caribbean area were thr ening hemispheric peace, Secretary Acheson the Pan American Society. He condemned succession of "military adventures" abetted other nations during the preceding two yea

Sept. 20—Sen. Vandenberg of Michigan, publican foreign policy leader, advocated pas of the foreign aid bill, calling it "a bargain surance policy for peace."

Sept. 21—Members of the House returned a 26-day holiday which they had voted th selves because of a log-jam of bills in the Se —Department of Justice officials reported Henry M. Blackmer, Colorado millionaire, spent 25 years in exile in France after fleeing United States to avoid testifying in the Te Dome oil scandal, had returned by air from I and would face income tax evasion charges pending against him. He later was fined $20

Sept. 25—U. S. aid in gifts and grants to eign nations totalled $5,169,000,000 in the year ended June 30, 1949, the Departmen Commerce reported. This brought to $13,260,00 the grand total of foreign grants and loans ir four-year post-war period, with Germany, a

enemy country, being the chief beneficiary, g received $2,041,000,000. Italy had received 6,000,000, Great Britain and France over 0,000,000 each.

pt. 26—In the presence of Cordell Hull, for- Secretary of State, who, in 1934, promulgated Reciprocal Trade Agreements Program, Presi- Truman signed the 1949 extension act passed ongress. He urged approval by Congress of rmanent agreement among the 50 nations dy adhering to it.

Military Aid for Europe

pt. 27—Both Houses of Congress passed, by y majorities, the Administration bill to pro- $1,314,000,000 in military aid for the Euro- signatories of the North Atlantic pact.

pt. 29—Congress approved, without major ges, President Truman's program of $5,809,- 00 in foreign economic aid for the 1949-50 year under the Marshall and Economic Re- y programs.

pt. 30—A proposed report by the Joint Com- ee on Atomic Energy, prepared by the chair- Sen. McMahon (D., Conn.), and Rep. Dur- (D., N. C.), vice chairman, which cleared rman David E. Lilienthal of charges of "in- ble mismanagement," brought protests from Hickenlooper (R., Iowa), who had made charges, and Sen. Knowland (R., Cal.), both hom contended the report should have been ssed first with other committee members.

FOREIGN

pt. 1—Because of shrinkage in dollar earn- and exports during the preceding year, ful- ent of the Marshall Plan by 1952, as sched- was extremely unlikely unless the terms of . aid to the 16 participating countries were ed, two top officials of the Organization for pean Economic Cooperation reported in Paris. organization approved an agreement on the ment of $3,776,500,000 to the 16 nations for -50, a cut of $966,200,000 from 1948-49.

pt. 2—Japanese Premier Shigeru Yoshida ted Japan's recovery to U. S. economic aid and d full repayment of all foreign loans.

Sept. 4—A local revolt in southwestern China unseated the Nationalist government of Yunnan Province and left the capital, Kunming, a U. S. military base in World War II, open to capture by Chinese Communist forces. At the same time, Chungking, which would become the Nationalists' capital if Canton fell, was swept by a fire which killed an estimated 700 persons, left 100,000 homeless and destroyed 7,000 buildings.

Sept. 5—A federal union of Europe with power to make decisions on political and economic issues was overwhelmingly approved by delegates to the 12-nation Consultative Assembly of the Council of Europe in Strasbourg, France.

West German Republic Begins

Sept. 7—The Federal Republic of Western Germany was formally constituted in the Rhineland city of Bonn, as its parliament, democratically chosen in the first free election in Germany since 1933, held its first session. Deputies of all political parties in the two parliamentary chambers, the Bundestag (lower house) and Bundesrat (upper house or Senate) indorsed a Socialist resolution calling on the U. S., British and French Governments to reexamine their reparations policy—making the dismantling of war industries mandatory—on the ground that it opposed the principles of the European Recovery program.

Sept. 8—A $300,000,000 free-trade agreement between the Netherlands and Germany was signed in Frankfort after the U. S. had consented to remove restrictions that made exchange of goods on a dollar basis mandatory, thus permitting payment for imports and exports in Dutch guilders and West Germany's Deutsche marks.

Hungary Blames American "Spies"

Sept. 10—"American imperialism" and Marshal Tito of Yugoslavia were named in an indictment returned in Budapest which accused Lt. Gen. Gyorgy Palffry and seven other officials of plotting to assassinate leaders of Hungary's Communist government. The indictment charged that "the American and Yugoslav spying organization helped them (the defendants) in every way."

Sept. 11—Former Foreign Minister Federico Chaves became Provisional President of Paraguay

Gen. MacArthur's Report on Japan on V-J Day Anniversary, 1949

mark the fourth anniversary of the sur- er of Japan aboard the U. S. S. Missouri in o Bay, Gen. Douglas MacArthur on Sept. 2, published a 3,000-word report on the progress apan during the Occupation. He combined with comment, expressed confidence in the ging democracy, provided a homily on the ntages of free private competitive enterprise dismissed with contempt the obstructive ods of the communist minority. He closed this plea for a peace treaty:

Of the Japanese people I can pay no higher ute than to repeat that they have fully and afully fulfilled their surrender commitments have well earned the freedom and dignity and rtunity which alone can come with a restora- of a formal peace."

en. MacArthur declared that Japanese public lon, rather than "the repressive force of po- power" had effectively repulsed attacks by small communist minority on the democratic tutions. "As a result," said he, "the threat ommunism as a major issue in Japanese life ast. It fell victim of its own excesses."

Representative Government in Effect

overnment was now "truly representative" constitutional, with "healthy public discus- of the vital issue of constitutional interpreta- " Autonomous responsibility in local affairs retarded "by the need for rationalization in field of government finance to permit local nues to support local government." Central- controls are being severed and a new system self-sustaining segments at the community " will support the national government and ent the return of autocracy.

en. MacArthur cited "the growing conscious- of individual responsibility in the conduct of ic affairs," defeat of corrupt public officials, ease in private crime and decentralization of police power, with each community responsi- for order and security and personal privilege guarded. Trade unionization was somewhat ded by irresponsible leadership, but the gen- saw an awakening in the rank and file. A ernized civil service was protecting rights and sting grievances; the enfranchised women had me a beneficial force. The Economic Decentralization plan and the Land Reform program had removed feudal land tenure and laid the economic basis for a broad middle class, which Gen. MacArthur expected to "reject with scorn any will-of-the-wisp economic Utopias which require the surrender of the individual's freedom to the state."

Big Increase in Exports

Production of goods was approaching the 1930-1934 average; coal was being mined at a monthly rate of 3,200,000 metric tons, as against less than 1,700,000 in 1946. Electric power had a monthly volume of 3,200,000,000 kwh., against 2,500,000,000 a year ago. Chemicals had reached 105% of the 1930-34 average, compared with 76% a year ago and 21% in Jan., 1946. Exports in 1946 were $103,000,000; 1947, $173,000,000; 1948, $258,000,000; for the first six months of 1949 larger than the total for 1948. Gen. MacArthur praised the U. S. decision to cease removing industrial plants for reparations, and the authorization by Congress of money for materials needed for rehabilitation.

Post-war inflation was being controlled by sound fiscal and financial policies; unemployment in June was down to 400,000, despite the addition of 9,500,000 people since Oct. 1, 1945 (5,000,000 by repatriation, the rest by natural increase); total employed had reached 37,400,000, "an all-time high." Although much of Asia was closed to Japan, it had begun foreign trade with 113 other countries and territories.

Gen. MacArthur repeatedly expounded the advantages of free enterprise to the Japanese people. He declared that "the farther removed a people becomes from the economic philosophy of free enterprise, in like ratio does its productive capacity deteriorate. This deterioration proceeds until, as under communism, with incentive completely lost, the human energy and individual initiative which find their expression in production give way to indolence and despair." Of his administration, Gen. MacArthur said that it had been buffeted by the ideological protagonists, the special pleaders, the vindictive and the lenient, many seeking to influence public opinion through "prevarication of the truth," but that he expected the judgment of history to rest somewhere between praise and blame.

in the sixth change of administration within 17 months. He was named by the Paraguayan Congress in Asuncion after it had given a no-confidence vote to his predecessor, Dr. Felipe Molas Lopez.

Sept. 12—The Roman Catholic Bishops of Czechoslovakia called on the Communist government to remove "all measures restricting and endangering the religious freedom of Catholics." It was disclosed that Archbishop Josef K. Matocha of Olomouc, second highest Catholic prelate, was being subjected to the same police supervision as Archibishop Josef Beran of Prague.—Theodor Heuss, a liberal, was elected president of the Federal Republic of Western Germany by the National Assembly in Bonn, defeating Dr. Kurt Schumacher, Social Democrat, on the second ballot, 416 to 312. He became the first German president since the death of Field Marshal Paul von Hindenburg, who had aided Adolf Hitler's rise to power in 1934. He reminded the assembly that he represented only "a part of Germany."

Sept. 15—Dr. Konrad Adenauer, leader of the Christian Democratic Union, was elected Chancellor of the Federal Republic of Western Germany by the Bundestag (lower house of parliament) by a vote of 202, winning by a margin of only 1 of 402 votes cast. His election was opposed by the Socialists and the Communists. President Truman sent a message of congratulation to President Heuss who was elected with the support of Adenauer's party and who nominated the new chancellor.

Sept. 16—At the treason trial of 8 former officials in Budapest, Laszlo Rajk, ex-foreign minister of Hungary, "confessed" that he had plotted with Marshal Tito of Yugoslavia, former U. S. Minister Selden Chapin, and others for a military invasion of the country for the purpose of overthrowing the Communist government. In Washington, Chapin, recalled in Feb. 1949, at Hungary's request, issued a blanket denial of Rajk's charges.—An American soldier, Recruit John J. Sienkiewicz of Baltimore, Md., and three British soldiers reached the western sector of Berlin after escaping from a military prison in the Soviet zone where they had been held for almost a year, and, they said, had been tortured by their Russian captors. All four had entered the Soviet sector by losing their sense of direction.

Sept. 19—A Czech court sentenced Theodor Funk, secretary of Archbishop Josef Kaerel Matocha, to 10 years in prison after convicting him of treason for having distributed copies of the Vatican's order excommunicating Communists. Two hundred other Roman Catholic churchmen also were under arrest.

Sept. 21—The military government of Western Germany was ended by the U. S., Britain and France which, under an agreement with the new Federal Government of Germany, promulgated in Bonn a civilian occupation statute with safeguards against a return of the Nazis or other military regime to power, but providing for liberalization of these controls if the Germans carried out a democratic regime.

Sept. 22—Establishment of the "Chinese People's Political Consultative Conference" was announced in Peiping by Communist leader Mao Tze-tung amid salvos of gunfire. Mao told 510 delegates that the purpose of the meeting was to form "the People's Republic of China" which would work in close cooperation with the Soviet Union and the other countries of Eastern Europe. Among the speakers were Mme. Sun Yat-sen and eral of Generalissimo Chiang Kai-shek's f army commanders.

Sept. 24—Laszlo Rajk, former Hungarian eign Minister, was sentenced to death b People's Court in Budapest for having plot overthrow the Communist-controlled govern Two of his seven codefendants also were tenced to death, two received life and one years in prison and the trial of two former officers was transferred to a military court. accused of having conspired with Yugos the U. S. and Britain to build an anti-Balkan empire, told the court the death sen was justified. Marshal Tito filed a protest a Hungary's "subversive tactics" and the trial ing it part of a plot against Yugoslavia.

Sept. 27—Hungary expelled 10 officials an ployees of the Yugoslav legation in Budape "spies and assassins." Marshal Tito reta by expelling nine attaches of the Hungarian tion in Belgrade.

Sept. 28—After three months, talks betwee Western Powers and Soviet Russia over a u rule for Berlin broke down as the U. S., B and French commanders charged the Rus with having violated the wage pledges they to German workers on the Soviet-controlled road at the end of a 38-day strike June 28.

Labor Government Wins Confidence

In the House of Commons Winston Chu accused the Labor Government of bringing ain to the verge of bankruptcy and called general election. Commons rejected his de 350 to 212.

Sept. 29—After a 3-day debate on devalu of the pound and economic policies the Hou Commons voted confidence in the Attlee Go ment 342 to 5, Conservatives and Liberals staining. Sir Stafford Cripps announced a r the tax on distributed profits to 30% from and threatened to stop dividends, calling "rough justice."

Soviet Russia denounced her 1945 trea friendship and mutual assistance with Yugos charging the Tito regime with having carri "hostile and disruptive work" against her. left only nominal diplomatic relations betwee two countries. Poland and Hungary also reno their pacts with Yugoslavia.

Sept. 30—The Anglo-American airlift acros Soviet land blockade of Western Berlin, st June 26, 1948, ended with the arrival at Te hof Airfield of a C-54 carrying two-and-a-hal of coal. The total amount of food and coal ried during the one and a half years of it istence was 2,343,315 tons on 277,264 flights.

UNITED NATIONS

Sept. 1—Mrs. Gifford Pinchot, U. S. deleg the Scientific Conference on Resources, crit the U. N. for assembling 500 of the world's ing specialists on conservation without giving power to recommend specific measures to serve natural resources.

Sept. 6—As progress toward a stable u sal peace continues, the U. N. will devo increasing proportion of its work "to constr efforts for the economic development of the and the raising of the living standards peoples," Secretary General Lie declared a closing session of the Scientific Conference.

Devaluation of Pound by Britain Creates Fiscal Upset

Sept. 18—Sir Stafford Cripps, Chancellor of the Exchequer, announced on this Sunday evening a 30.5 devaluation of the pound in order to export more goods to dollar areas. He said: "In place of the present rate of $4.03 for the pound, the rate will in future be $2.80 to the pound." The effect in the United States was to cut 30% off former prices of British-made goods, thereby stimulating purchases. The change caused a fiscal crisis in European states. In France Paul Reynaud, former premier, charged Britain with an unfriendl in failing to give advance notice to the Cour Europe. In many capitals trading in f currencies was temporarily suspended. In W ington Secretary of the Treasury Snyder closed Britain had consulted the Interna Monetary Fund before taking "a constr economic step."

The result in foreign currencies, tabulat the New York Times:

ot. 7—The Soviet Union invoked its veto for
1st time to block admission of the independ-
kingdom of Nepal, in southeastern Asia, pro-
by Britain in the Security Council, U. N.

ot. 8—Blaming the "world-wide antagonism"
een the U. S. and Soviet Russia, the U. N.
mission on Korea reported failure of its mis-
to settle the differences between the Republic
orea and the Communist regime in the North.
report warned of the possibility of "bar-
ns civil war."

Soviet Vetoes New Members

ot. 13—The Jerusalem committee of the U. N.
tine Conciliation Commission, in Geneva,
erland, announced a plan for internationiza-
of Jerusalem under a U. N. commissioner,
ixed Jewish-Arab council, an international
nal and an Israeli-Arab tribunal.—Soviet
ia and the Ukraine used the veto in the
rity Council to bar Portugal, Italy, Ireland,
and, Austria, Jordan and Ceylon from U. N.
bership.

ot. 15—The proposal of the Soviet to admit
nia, Bulgaria, Rumania, Hungary, Outer Mon-
, to the Security Council was voted down,
et Union and Ukraine voting for all, Egypt
ng them for 3. A Soviet resolution tying
nition of the five nations to admission of the
countries whose membership was vetoed by
ia was beaten.

ot. 16—In the presence of 500 delegates, a
ue in commemoration of Count Folke Berna-
, U. N. mediator in Palestine, who was as-
nated Sept. 17, 1948, was unveiled in the
rity Council chamber at Lake Success by
etary General Lie.

ot. 20—Addressing the fourth annual ses-
of the General Assembly at Flushing Meadow,
., Brig. Gen. Carlos P. Romulo of the Philip-
, who was elected president, declared that
danger of a new war, which overshadowed
deliberations in Paris a year ago, has greatly
ed." He was elected by a vote of 53 to 5 over
Vladimir Clementis of Czechoslovakia, candi-
of the Soviet bloc. For the first time Yugo-
a remained aloof from the bloc. At a dinner
ie U. N. delegates in New York City, British
gn Secretary Bevin said the Western powers
d never use their scientific weapons, includ-
the atomic bomb, to attack or destroy other
ns.

ot. 29—The Assembly voted, 45 to 6, to hear
ges by China that Russia had given aid to
Chinese Communists and endangered the peace
sia. Foreign Minister Vishinsky denied the
ges, declaring the successes of the Com-
st forces in China were due to the "rotting
ie" of Generalissimo Chiang Kai-shek.

POLITICS

ot. 4—U. S. Sen. Robert A. Taft of Ohio,
an audience in Cleveland that Britain, by
adopting a Socialist form of government, had lost "half the battle against the Communist philosophy."

Sept. 5—In Labor Day speeches in Pittsburgh and Des Moines, President Truman appealed to the farm-labor vote. He promised to continue his fight for repeal of the Taft-Hartley labor law and also called for adoption of the Brannan farm-price support program. He asked that the voters in 1950 oppose the "organized selfish interests" seeking to blast his Fair Deal program with "scare words."

"Statism" Becomes Issue

Sept. 7—U. S. Sen. John Foster Dulles, serving by appointment, announced he would seek election to the remaining 13 months of the unexpired term of Sen. Wagner in November. Dulles declared he would fight a "trend to statism" in the Federal Government.

Sept. 10—Opening his campaign as Democratic-Liberal candidate for U. S. Senator, former Gov. Herbert H. Lehman of New York, in a talk to the State C.I.O. at Saratoga Springs, N. Y., indirectly assailed Sen. Dulles for his attack on the Truman Administration for moving toward "statism," declaring that expansion of "human services in government" would continue.

Sept. 12—Following the resignation of Mayor Curtiss Frank Sept. 1, Mrs. Edith P. Welty, 61 and a grandmother, was elected as the first woman mayor of Yonkers, N. Y., on a recount of proportional representation ballots cast in 1947. Mrs. Welty, an independent Republican, defeated Acting Mayor John J. Whalen, 20,587 to 20,310.—Former Vice President Henry A. Wallace declined a bid by the American Labor party in New York to run for U. S. Senator.

Sept. 13—Mayor Michael U. De Vita of Paterson, N. J., and 14 other persons were indicted by the Passaic County grand jury on charges of obstructing justice in a gambling investigation ordered by Gov. Alfred E. Driscoll of New Jersey. The Mayor was accused of intimidating witnesses.—John P. Saylor, Republican, was elected to the House of Representatives in a special election in the 26th Congressional District of Pennsylvania, defeating Mrs. Robert L. Coffey, Democrat, who sought the seat formerly held by her late son, Rep. Robert L. Coffey Jr., 59,164 to 50,275.

Sept. 29—President Truman predicted his Fair Deal program would win both in 1950 and 1952 and, assailing "selfish interests," declared that the national income could be expanded from $200,000,000,000 to $300,000,000,000, permitting a doubling of pay in the lowest income groups. He spoke in Kansas City, Mo., at a testimonial dinner for William M. Boyle Jr., Democratic National Chairman.

BUSINESS AND FINANCE

Sept. 8—A $20,000,000 loan was granted by the Export-Import Bank in Washington to Yugoslavia to reconstruct her mining industry and increase

Atomic Explosion in Russia Ends American Monopoly of Bomb

ot. 23—In Washington President Truman made
e the following announcement marking the
of America's sole possession of the secret of
ng atomic bombs:

believe the American people to the fullest
t consistent with the national security are
led to be informed of all developments in the
of atomic energy. That is my reason for
ng public the following information:
'e have evidence that within recent weeks an
lc explosion occurred in the USSR.
ver since atomic energy was first released
nan, the eventual development of this new
by other nations was to be expected. This
ability has always been taken into account
s.
early four years ago I pointed out that 'sci-
c opinion appears to be practically unanimous
the essential theoretical knowledge upon
h the discovery is based is already widely
n. There is also substantial agreement that
gn research can come abreast of our present
etical knowledge in time.' And, in the three-
n declaration of the President of the United
s and the prime ministers of the United
dom and of Canada, dated Nov. 15, 1945, it
emphasized that no single nation could, in
have a monopoly of atomic weapons.
his recent development emphasizes once
, if indeed such emphasis were needed, the
sity for that truly effective and enforceable
national control of atomic energy which this
rnment and the large majority of the mem-
of the United Nations support."

A similar announcement was made in London. In Washington it was given to the Cabinet and the press at 11 a.m. Secretary of Defense Louis Johnson was asked if the U. S. had ordered a redisposition of its military forces abroad and replied "No." He was asked if this was the first explosion recorded in Russia and replied "No comment." The news had been communicated to Secretary of State Acheson and David E. Lilienthal, chairman of the Atomic Energy Commission, two days before.

How the U. S. discovered the explosion was not disclosed. One theory held that sensitive instruments had picked up radioactive dust. Another credited it to American Intelligence.

Tass, Soviet official news agency, declared Sept. 25 that V. M. Molotov, foreign minister in 1947, was right when he said in Nov., 1947, that the secret of the bomb had ceased to exist. Andrei Y. Vishinsky, reiterated this at Lake Success Oct. 18. Prof. Frederick E. Soddy, physicist and Nobel prize winner, declared in England that the Russian explosion "sounds like an accident." In a subsequent meeting of the UN Jacob A. Malik, Soviet representative, declared the U. S. no longer had a monopoly and pressed the Soviet plan for atomic control. This proved unsatisfactory and one-sided to the U. S., Britain, Canada, France and China, which declared the Soviet Union put national sovereignty above world welfare.

To support expansion of the atomic energy plants at Hanford, Wash., and Oak Ridge, Tenn., President Truman allocated $30,000,000 from the reserve fund of $70,000,000.

her exports of bauxite, mercury, copper, zinc and other strategic materials to the U. S.—President Truman's Council of Economic Advisers reported that unemployment during August had dropped from 4,095,000 for July to 3,689,000; that non-farm employment increased by 1,368,000, and industrial production rose 7%.

Sept. 10—The first rise in national industrial production in 10 months was reported by the President's Council of Economic Advisers. The council's monthly report said industrial production in Aug., 1949, "fully recovered the 4% drop in July, which had been due in part to the spreading practice of plant-wide vacations." The report said the production rise was the first since Oct., 1948.

Sept. 11—France's financial stability and industrial production in 1948-49 equalled that of 1926-27, the most prosperous year between the two World Wars, Edgar Faure, Secretary of State for Finances, reported in Paris.

Sept. 13—The Bureau of the Census in Washington reported that imports of strategic manganese and chrome ores from Soviet Russia rose from $100,000 in June to $1,000,000 in July.

GENERAL

Sept. 1—The American Legion's annual convention in Philadelphia elected George N. Craig, 40, a lawyer of Brazil, Ind., national commander. He became the first veteran of World War II to head the 31-year-old organization.

Sept. 2—A hurricane swept the West Palm Beach-Fort Pierce areas in Florida and caused property and crop damage estimated at $40,000,000.

Sept. 4—Violence broke out after a concert in Peekskill, N. Y., by Paul Robeson, pro-Communist Negro singer. The concert, attended by 15,000 persons, was orderly as a result of a heavy police guard, but anti-Communist war veterans overturned buses and cars in a counter-demonstration.

Sept. 5—William P. Odom, round-the-world flier, was killed when, after he had set a new record of 397.071 miles an hour in the Thompson Trophy event in the National Air Races in Cleveland, Ohio, his plane crashed in Beres, a suburb, setting a house on fire and killing two other persons.

Insane Veteran Kills Thirteen

Sept. 6—Howard B. Unruh, 28, a World War II veteran of the European campaign, killed 13 persons, including women and children, when he went on a rampage in Camden, N. J., using a souvenir Luger pistol. He was adjudged insane and committed to the New Jersey State Hospital for mental patients in Trenton.—The Associated Press reported 550 persons were killed in traffic and other accidents over the Labor Day weekend. This was 122 higher than the 1937 death toll, the former record for a three-day Labor Day weekend. The National Safety Council had estimated the death toll at 280.

Sept. 7—Plans for a $9,000,000, 20-story television building on Broadway, between 51st and 52nd Sts., just north of Times Sq. in New York City, were filed with the city's Housing and Buildings Department by the John Sloan Associates, architects and engineers. It was described as the world's first projected video center, comparable to Radio City in midtown Manhattan.

Sept. 9—Three officials of the Kennecott Copper Corp. of New York City—E. T. Stannard, 66, president; Arthur D. Storke, 55, slated as his successor, and R. J. Parker, 52, a vice president—were among 23 passengers and crew members killed when a Quebec Airways plane crashed and burst into flames en route from Montreal to Quebec. The others were Canadians. Police charged a Quebec jeweler with placing a home-made bomb on the plane for the purpose of killing his wife, one of the victims.

Sept. 13—The "Million Dollar Pier" in Atlantic City, N. J., familiar to many tourists, was damaged to the extent of $250,000 by fire which police ascribed to arson.

S. S. Noronic Disaster

Sept. 17—The 6,905-ton steamer Noronic of the Canada Steamship Lines, largest passenger vessel in the Great Lakes, between the U. S. and Canada, was burned from stem to stern on a vacation cruise from Cleveland to the Thousand Islands while making an overnight stop at Toronto, Ont. Of the 660 passengers and crew members on board, 132, most of them U. S. citizens, were killed.

Sept. 27—For the fifth time, an attempt to repeal Oklahoma's 42-year-old prohibition law was defeated in a special election. The vote was: For repeal, 258,711; against repeal, 306,905. ... state's two largest cities, Oklahoma City and ... sa, voted wet, but the rural districts vote...

Committee Clears David E. Lilienthal

t. 12—An announcement by Secretary of De- e Johnson, without previous consultation with gress, that he would cut $800,000,000 from the nse budget, was denounced as "grandstand " by Chairman Vinson of the House Armed ices Committee.—By a vote of 9 to 6, the Joint gressional Committee on Atomic Energy ab- ed David E. Lilienthal, chairman of the nic Energy Commission, of the charge of redible mismanagement" made against him 22 by Sen. Hickenlooper (R.-Iowa).

t. 13—Adm. Louis E. Denfeld, highest active er of the Navy, denied before the House ed Services Committee that his service was osed to unification, but declared it had not been cepted in full partnership in the national nse structure." He warned that the Navy was g dangerously weakened by uninformed and trary decisions of the Joint Chiefs of Staff, of ch he was a member but which he said, was inated by the Army and the Air Force.—The ate rejected, 53 to 15, President Truman's ination of Leland Olds for a third term as a nber of the Federal Power Commission. Oppon- s charged that Olds had written articles hostile capitalism before he became a commission nber.

Communist Leaders Found Guilty

ct. 14—After a nine-month trial, a jury in eral Court, New York City, found 11 Com- nist leaders guilty of secretly teaching and ad- ating violent overthrow of the U. S. Govern- t and destruction of American democracy. In charge to the jury, Judge Harold R. Medina lared that the right of free speech could be ited if it imperiled national security and that ceful revolution and the principles of Commun- could be taught if "open and aboveboard," but condemned the furtive, secretive propaganda which the defendants were accused. Judge dina found six members of defense counsel ty of contempt of court for various actions ing the trial and sentenced them to jail terms from one to 6 months.

or opening of trial see Jan. 17, p. 319, et seq.

ct. 15—The Senate voted, 36 to 30, to recommit House-approved bill liberalizing the Displaced sons Act of 1948, thus putting off action until 1950 session. Nineteen Republicans and 17 nocrats, most of the latter from the South and thwest, voted to send the measure, which uld admit an additional 134,000 refugees, back the Judiciary Committee.

ct. 16—Secretary of Defense Johnson and the ny and Air Force members of the Joint Chiefs Staff were charged by Gen. Clifton B. Cates, nmandant of the Marine Corps, of using their vers in an attempt to "destroy" the corps. The ps' combat power, he said, was being dissipated cuts in its budget and inadequate representa- n in key positions in the military establishment d at discussions "pertaining to amphibious war- e and other matters relating to the Marine rps."—President Truman, acting on a plea m the Navajo Tribal Council, vetoed a bill pro- ing for a 10-year rehabilitation program for Navajo and Hopi Indians, on the ground that would have done harm by transfering the In- n reservations from federal to state jurisdiction.

Minimum Wage Scale Raised

ct. 18—Congress passed several of the Ad- nistration's bills and sent them to the White use. One increased minimum wage scales in cer- n labor classifications from 40c to 75c an hour d extending coverage by the Fair Labor Stand- ls Act to another 1,500,000 workers, making a al of 24,100,000. Another bill appropriated ,585,863,498 for the Department of Defense.— Secretary Symington charged before the House ned Services Committee that Navy spokesmen d made false statements and were imperiling tional security by disclosing military information a possible aggressor."—As the first step toward 'major expansion program," President Truman thorized the Atomic Energy Commission to thdraw $30,000,000 from its $70,000,000 reserve nd for new construction at the Oak Ridge, nn., and Hanford, Wash., atomic plants.

ct. 19—The first session of the 81st Congress joined *sine die* after sitting for 290 days. It s the longest peacetime session in 27 years. In closing hours, it passed a compromise farm bill viding price support for five basic commodities a sliding scale, ranging from 90% in 1950, to 90% in 1951 and 75 to 90% after that. Both uses approved the $1,314,010,000 military aid d to arm friendly foreign nations.—Gen. Omar Bradley, chairman, Joint Chiefs of Staff, de- rided disgruntled Navy admirals as "Fancy Dans" as he testified before the House Armed Services Committee on the Army's side in the controversy. He accused the admirals of being in "open rebellion" against civil authority and declared they had done "infinite harm" to the U. S. and its world position. Gen. Hoyt S. Vandenberg, Air Force Chief of Staff, told the committee that if war came, the B-36 "can do the job."

Prison Sentences for Communists

Oct. 21—Judge Harold R. Medina, in Federal Court, New York City, imposed prison sentences of 5 years each on 10 top Communist leaders convicted of conspiracy to overthrow the government. The eleventh was sentenced to 3 years. All were fined $10,000 each. Those sentenced to 5 years were Eugene Dennis, John B. Williamson, Jack Sachel, Benjamin J. Davis Jr., Henry Winston, John Gates, Irving Potash, Gilbert Green, Carl Winter and Gus Hall. Robert Thompson received the three-year sentence because of a superior record in World War II. The judge remanded them to jail, denying their application for bail pending appeal.—A Federal grand jury in Washington indicted the Amtorg Trading Corp., Soviet purchasing agency in the U. S., and six of its officers for failure to register under the Foregin Agents Registration Act. Five of the officers were arrested by F.B.I. agents in their New York City offices and held in $15,000 bail each. The sixth was in Russia.

Oct. 24—The six Republican members of the Joint Congressional Committee on Atomic Energy, in a minority report, called for a "bolder, speedier and more effective" development of the nation's atomic program, charging that the Atomic Energy Commission had taken a leisurely approach to the problem and had been loose in its security measures.

Oct. 27—At the request of Secretary of the Navy Matthews, President Truman relieved Adm. Louis E. Denfeld of his duties as Chief of Navy Operations. In a letter to the President, Matthews, who early in August had backed Denfeld's reappointment for another two-year term, declared the Admiral's usefulness had come to an end. A letter from Denfeld was among three written by Admirals released to reporters Oct. 4, in which criticisms of the Department of Defense were expressed.—President Truman appointed George V. Allen, Assistant Secretary of State for Public Affairs, ambassador to Yugoslavia to succeed Cavendish W. Cannon, who resigned because of ill health.

President Holds Back Appropriation

Oct. 29—As he signed the $15,585,863,000 military supply bill, President Truman impounded a sum of $615,000,000 earmarked by Congress for additional airplanes for a 58-group Air Force, instructing Secretary of Defense Johnson to place these funds in reserve. The procurement of additional airplanes for more than 48 groups, the President said, would "place an unbearable burden on the national economy in years to come" and would throw the nations defenses into a state of unbalance. It was essential he added that the military expenditures, which would remain high for years to come, should support balanced military forces at all times.

Oct. 30—Decommissioning of 77 naval vessels, including 35 combat ships, within a few months for reasons of economy was announced by the Dept. of Defense. This would reduce the combat fleet from 268 to 237 ships. On the list were five carriers, including the 27,000-ton Kearsage and Leyte; six cruisers, nine submarines and 15 destroyers.

Oct. 31—The United States requested Czechoslovakia to withdraw Dr. Ervin Munk, Consul-General in New York City, and Jan Horvath, "housekeeper" at the Czech Embassy in Washington, stating their presence had become objectionable.—Four members of the House Armed Services Committee, in a joint statement, charged that Secretary of Defense Johnson and Navy Secretary Matthews, in removing Adm. Louis E. Denfeld as Chief of Naval Operations, had "broken faith with Congress and the American people" and violated their pledge that there would be no reprisals for testimony given before the committee.—Edward R. Stettinius Jr., 49, former Secretary of State, died in Greenwich, Conn., of a heart ailment.

FOREIGN

Oct. 1—In a note handed to the Russian chargé d'affaires in Belgrade, Yugoslavia charged that the Soviet Union, in abrogating its treaty of alliance, had revealed its hostile intentions against her. The note also accused Soviet Russia of having persistently interfered in Yugoslavia's internal affairs and sought to overthrow the legally constituted government. Bulgaria became the third

satellite to follow the Soviet Union's example.—The Chinese Communists formally proclaimed a new Chinese People's Republic in Peiping, and named Chou En-lai premier. The new government was proclaimd by Mao Tze-tung, already chosen president, who declared Generalissimo Chiang Kai-shek's Nationalist regime had collapsed.

Soviet Recognizes Communist China

Oct. 2—The Soviet Union protested to the Western Powers that the formation of the "puppet" Western German state was a violation of the Potsdam agreement and the decisions taken by the Council of Foreign Ministers in June.—The U.S.S.R. accorded formal recognition to the new Chinese (Communist) People's Republic and severed diplomatic relations with the Nationalist Government. The Nationalists recalled their representatives from Moscow.

Oct. 3—Addressing 600 officers at the conclusion of a week's army maneuvers, Marshal Tito declared Yugoslavia was threatened with war, but that her people would rather die in battle than submit to the dictates of Soviet Russia.—Pope Pius XII is concerned over the world situation, but still hopeful of peace, Cardinal Spellman of New York reported after an audience at the Vatican.

Oct. 5—After having headed the French government for 13 months, Premier Henri Queuille resigned in a crisis provoked by his refusal to approve general wage increases in the face of the uncertain monetary situation. He held office for 13 months, longest term of any premier in the post-war period.

Form East German State

Oct. 7—A new state in Soviet-occupied Eastern Germany, the German Democratic Republic, was announced in the People's Chamber, upper house of a bicameral parliament, in Berlin by Wilhelm Pieck, co-founder of the Socialist Unity (Communist) party. Pieck named his co-leader in the party, Otto Grotewohl, minister-president or chancellor. Pieck later was elected President.

Oct. 8—After capturing several key cities in the north and northwest, Chinese Communist columns pushed to within 100 miles of Canton, temporary seat of the nationalist government.—An agreement for an exchange of goods valued at 432,000,000 Deutsche marks ($112,816,000) was signed in Berlin between representatives of semi-official Western and Eastern German trade organizations.—Czech secret police rounded up 10,000 persons suspected of being sympathetic to the West, the Catholic Church or Marshal Tito's regime, and sent them to two labor camps for work in the Czech coal mines or the Soviet-controlled uranium mines.

Oct. 9—In a move to give a semblance of independence to the new German Democratic Republic, the Russians evacuated the Kommandantura and other control points in Eastern Berlin, and moved their military forces to a camp outside the city.—Rightist parties won over the Socialists and Communists in Austria's second free post-war election. The Conservative People's party captured 77 seats in the Chamber (parliament); Socialists, (formerly the strongest party), 67; reactionary League of Independents, 16; Communists, 5.

Russians Back Eastern Germany

Oct. 10—Gen. Vassily I. Chuikov, Soviet commander-in-chief in Germany, announced that on orders from Moscow he had transferred all administrative functions in Eastern Germany to the new German Democratic Republic and that the Soviet Military Administration in future would concern itself only with "fulfillment of the Potsdam and other four-power agreements concerning Germany."

Oct. 14—In a congratulatory message to the leaders of the German Democratic Republic, Premier Stalin declared that the "existence of a peace-loving, democratic Germany along with the existence of a peace-loving Soviet Union" put an end to European bloodshed and made "impossible the servitude of European countries under world imperialists."—With 150 pro-government priests of all denominations present, the National Assembly in Prague unanimously passed two laws making the churches in Czechoslovakia administratively and financially dependent on the Communist government.

Chinese Communists Take Canton

Oct. 15—The Communist Fourth Army took complete possession of Canton without meeting opposition. The occupation proceeded peacefully and without incident. British troops manned the Hong Kong frontier in expectation of an influx of fleeing Nationalist troops and civilians which, however, failed to materialize.—Former Foreign Minister Laszlo Rajk, once one of Hungary's top Communists, and two other former Communists were hanged in Budapest for treason.

Oct. 16—The Free Greek Radio broadcast a l
lamation from the "Provisional Free Greek
erument," announcing that the Communis
guerrillas had temporarily ceased operations
avoid the total destruction of Greece," but ad
the "Democratic army" would remain intact
Athens government spokesmen said the guer
were reorganizing in Albania.—The Soviet U
and the German Democratic Republic appoi
mutual diplomatic missions, thereby establis
direct relations between Moscow and Eas
Berlin.—The 1,700-ton British steamer Anhui
caught in a crossfire between Communist s
batteries and Nationalist guns on Amoy. T
persons on the vessel were killed. The Anhui,
ly damaged above the waterline, succeede
reaching Hong Kong.

Oct. 18—U. S. High Commissioner John J.
Cloy announced in Frankfort that U. S. occ
tion troops would remain in Western Germany
cluding Western Berlin, regardless of any
made by the Russians. He said that in vie
new Russian propaganda against Western
many, the Bonn government must work
closely with the Western High Commissione
Chinese Communist forces took the port of A
after a month's siege.

Czechs Accuse Americans

Oct. 21—Czechoslovakia's Communist gov
ment jailed Samuel Meryn, clerk in the offi
the U. S. military attaché in Prague, and
manded the immediate recall of Isaac Patch
John G. Heyn, embassy attachés, on charges
were leaders of a spy ring. Three other emb
employees, who had left the country, also,
named in a note to James K. Penfield, U
chargé d'affaires. Meryn was released Nov. 8
deported after a formal U. S. protest.

Oct. 23—After Jules Moch, Socialist and
Mayer, Radical, had failed in their effort
form a coalition government, French Presi
Auriol appointed former Foreign Minister Geo
Bidault, Popular Republican leader, as pre

Britain Cuts Welfare Spending

Oct. 24—Britain's welfare program suffer
setback when Prime Minister Attlee propose
the House of Commons cuts totaling £280,00
($784,000,000) in the nation's spending. He a
reductions in food subsidies, the levying
nominal charge for prescriptions under the
tional Health Act, a cut of £35,000,000 in p
housing and an increase of one penny in the
of school meals.—Lt. Gen. Gyorgy Palffy,
merly commander-in-chief of the Hungarian A
was hanged in Budapest after being convicte
having plotted with U. S. and Yugoslav agen
assassinate Hungary's Communist leaders
overthrow the government.

Oct. 25—Czechoslovakia's Roman Catholic
ops authorized priests to swear loyalty to
Communist government and accept salaries
the government, with the reservation, "unle
is in contradiction to the laws of God and
church and the rights of man." The govern
released, or halted legal proceeding against
priests who had refused the loyalty oath.

Russia Ousts Yugoslav Ambassador

Oct. 26—The Soviet Union sent a note to Y
slavia demanding the recall of her ambass
Karlo Mrazovitch, whom the Russians ac
of "spying and subversive activities" and sp
ing "slanderous fabrications" against the S
Union in the Yugoslav press.

Oct. 27—After a two-day debate on Prime
ister Attlee's economy program, the House of
mons defeated, 353 to 222, a Conservative moti
"no confidence" in the Labor Government.

Oct. 28—Poland ordered the Cooperative
American Remittances to Europe, Inc. (CA
to close its Warsaw offices, declraing cond
there had improved to such a degree that
from abroad no longer was necessary. The I
national Red Cross and other internationa
ganizations with foreign personnel also wer
structed to discontinue their activities

Oct. 31—Paul G. Hoffman, Economic Coo
tion Administrator, called on the European
shal Plan Council of Nations in Paris to inte
their economies by early 1950 to create "a per
ent, freely trading area comprising 270,0
consumers in Western Europe." He declared
quantitative restrictions on movements of
and moneys, and eventually all tariffs, withi
area should be swept away.

UNITED NATIONS

Oct. 4—President Truman's Point 4 progr
aid to underdeveloped nations was criticize
fore the Economic and Financial Committee

usz Katz-Suchy of Poland as a scheme for the tration of American "monoply capital" into ial territories.

t. 11—Soviet Russia cast her 39th veto in the rity Council to block a U. S. resolution under h the Council would have given its approval report of the Commission on Conventional aments excluding atomic bombs from its plans disarmament. Soviet Representative Jacob Malik then proposed that the Council adopt claration stating that it "deems necessary the nission by member states of information on entional armaments as well as information on nic weapons."—Before the Assembly's Special tical Committee, Soviet Foreign Minister Vish- y branded as "slanders and lies" Anglo-Amer- charges of treaty violations and suppression of an rights and religion against Hungary, Ru- ia and Bulgaria.

t. 17—Gen. Carlos P. Romulo, Assembly Pres- t, declared in a speech that the U. N. was oled from the outset in its effort to establish sting peace because the Big Five Powers "in- d on having the right to veto any decision or osal" on matters affecting the peace and rity of the world.

Vishinsky Fights Yugoslavia

t. 18—Soviet Foreign Minister Vishinsky ied that Russia could never recognize as ner lawful or just" the election of Yugoslavia he Security Council, as favored by the U. S. other Western nations.—Within three hours the Big Five Powers, at a secret session, had ed to consult before taking a vote on issues y to produce a veto, the Soviet Union cast its and 41st vetoes to block plans for an inspec- checked census of conventional arms and for ision of atomic weapons in an armaments t.—Assembly President Romulo reported fail- of the U. N. Balkans Conciliation Committee ring about a settlement of differences between ce and Albania, Bulgaria and Yugoslavia. The re was laid to Russia's insistence on an am- y for Greek guerrillas and early elections in ece.

t. 20—Yugoslavia was elected to the Security ncil on the second ballot by a vote of 39 to 19. et Foreign Minister Vishinsky accused Yugo- a of having plotted with the U. S. and other ons to obtain the seat, and declared the Soviet on was determined that Yugoslavia "shall not, ot and will not be considered as a representa- of the Eastern European countries." The et bloc had favored Czechoslovakia for the vacated by the Ukraine. Ecuador and India elected on the first ballot to the seats vacated rgentina and Canada.

t. 21—Despite Soviet objections that the body unconstitutional, the U. N. Commission on ea received an indefinite extension in the mbly, 48 to 6. The commission received spe- instructions to be on the lookout for clashes een the Republic of Korea to the south and Soviet-sponsored regime in the north which d lead to civil war.

Intolerance Inquiry Discussed

t. 22—The Assembly voted, 47 to 5, with oslavia abstaining, to request the International rt of Justice to examine the legal possibilities n inquiry into charges that political and relig- freedoms were being violated in Hungary, aria and Rumania.

t. 24—In an address at the laying of the erstone of the U. N. headquarters building. ident Truman said that ever since the first ic explosion the United States had advocated stem of international controls of atomic en- "that would assure effective prohibition of ic weapons, and at the same time would note the peaceful use of atomic energy by all ons."

t. 25—At a secret session of the six permanent bers of the U. N. Atomic Energy Commission Big Five plus Canada), Soviet Russia de- ded that, since there no longer was a mon- y on the production of atomic energy, the . should submit "new concrete proposals" on rnational control, the Baruch plan being out ate. The other five nations—the U. S., Britain, ce, China and Canada—replied that they d continue to support the plan until proposals made which provided equal or more effective ns of control and prohibition.

POLITICS

t. 4—Sen. John Foster Dulles, Republican, paigning in up-state New York for the bal- of Sen. Robert F. Wagner's term, announced avored a new national labor law which would less restrictive to labor unions than the Taft- ley Act." Among principles he laid down was a curb on court injunctions against strikes except during war or when the public health and safety were threatened.

Oct. 19—Sen. Dulles accused former Gov. Herbert H. Lehman, his Democratic opponent in the Senatorial race, of having made "false charges to arouse racial passions of hatred" and, consequently, being "utterly unfitted to hold high public office."

Truman Backs Lehman

Oct. 22—President Truman, in a letter, assured former Gov. Lehman of his "warmest support" in his campaign for U. S. Senator, declaring that the "forces of reaction" were making a desperate fight against him and that "they must be stopped in New York State on Nov. 8."

Oct. 25—Enumerating various measures enacted under the Democratic national administration which, he said, benefited the individual, former Gov. Lehman said that "if this be the indictment of the 'welfare state,' then the Democratic Administration not only pleads guilty; it is proud of its guilt."—Gov. Dewey, in speeches in behalf of Sen. Dulles, called the Truman administration's farm and socialized medicine plans "Alice-in-Wonderland" schemes.

Oct. 26—The A. F. L., C. I. O. and the Brotherhood of Railroad Trainmen united in sponsoring a rally in Madison Square Garden, New York City, in support of former Gov. Lehman for U. S. Senator and Mayor O'Dwyer for reelection. Vice President Barkley predicted repeal of the Taft-Hartley law in 1950.

BUSINESS AND FINANCE

Oct. 6—The Reconstruction Finance Corp. granted a loan of $34,400,000 to the Kaiser-Frazer Corp. to permit completion of the company's "line of cars." Kaiser-Frazer previously had announced plans to produce a low-price car. A second loan, of $10,000,000, was granted later to help finance dealers who market the company's cars.

Oct. 9—New tariff schedules putting lower customs duties into effect to increase world trade were announced in Geneva, Switzerland by 31 nations. The new tariffs were the result to an all-summer conference in Annecy, France. The State Department estimated that U. S. exports amounting to $500,000,000 a year would be affected by the tariff concessions, while the U. S. would accord favorable treatment to imports totaling about $143,000,000.

Oct. 12—Edmond M. Hanrahan resigned as chairman of the Securities and Exchange Commission to return to private business. He had been a member of the commission since 1946 and its chairman since 1948.—Operating control of the Waldorf-Astoria Hotel in New York City was obtained by the Hilton Hotels Corp., which acquired for $3,000,000, 250,000 shares of common stock or 68 percent of the 366,000 outstanding shares.

See article, Conrad N. Hilton and the Waldorf-Astoria, page 767.

Oct. 17—The five grandchildren of the late Edward L. Doheny, oil capitalist, sold the Los Nietos Co., to the Union Oil Co. of California for $22,000,000 in cash and 600,000 shares of new Union Oil common stock of $25 par value.

Oct. 21—Research information on metals and alloys developed by the Atomic Energy Commission was released for the first time to industrial experts in commercial manufacturing at the National Metal Congress and Exposition in Cleveland.

Oct. 22—In a report assailing antiquated customs procedures and "prohibitory tariff rates, the Economic Cooperation Administration warned that unless the U. S. increased its imports from Europe by at least $2,000,000,000 annually, its own exports would "dwindle to a trickle" and living conditions abroad would deteriorate to a point endangering world peace.

Crisis in Coffee Market

Oct. 26—Chaotic conditions developed in the wholesale coffee market as imports dropped sharply as a result of crop failures due to drought and floods in the coffee-growing countries of Central and South Americas. Coffee futures quotations on the New York Coffee and Sugar Exchange fluctuated erratically, traders caught short losing $600 daily on each contract.

Oct. 31—Total assets of the Ford Motor Co. reached a record high of $1,249,240,000 at the close of 1948, an increase of $123,507,000 over 1947, the company's annual report showed.

See earnings report of Ford Motor Co., page 391.

GENERAL

Oct. 2—Associate Justice William O. Douglas of the U. S. Supreme Court was thrown from a horse

and seriously injured while riding on the Pacific Coast Trail 75 miles west of Yakima, Wash. He was taken to a hospital in Yakima where doctors found his chest had been crushed and 14 ribs broken.

Oct. 3—Ten Air Force men from March base, five girls and their chaperon were killed when the driver of an Air Force bus, confused by conflicting directions, drove the vehicle into the path of the Union Pacific's Pony Express at Ontario, Calif. There were five survivors.

Oct. 13—A U. S. Air Force B-50 carrying three tons of live bombs crashed into a wheat field at Isleham, England, while on a test flight to Helgoland, and exploded. Eleven American fliers and a Royal Air Force observer were killed.

Oct. 18—The Guatemalan government reported that more than 4,000 persons died and property damage exceeding $40,000,000 was caused in the worst floods in the country's history following three days of torrential rains. The entire coffee crop was lost and 50 small communities were wiped out. The United States and neighboring South American countries rushed Red Cross personnel and supplies to the stricken areas.

Oct. 28—An Air France Constellation en route from Paris to New York crashed in flames against 3,600-foot Algarvia Peak on Sao Miguel island in the Azores. All 48 persons on board, including 11 Americans, were killed. Other victims were Marcel Cerdan, former world middleweight champion; Mlle. Ginette Neveu, French violinist, and her brother and accompanist, Jean Paul Neveu, and Bernard Boutet de Monvel, French portrait painter.

1949—November

WASHINGTON

Nov. 1—President Truman forecast a deficit of $5,500,000,000 for the fiscal year ending June 30, 1950. He ascribed it to record peacetime expenditures and declines in revenues. Budget Director Frank Pace estimated expenditures at $43,500,000,000 and receipts at $38,000,000,000.—Vice Adm. Forrest P. Sherman, in command of the Sixth Task Fleet in the Mediterranean, was appointed Chief of Naval Operations by President Truman, succeeding Adm. Louis E. Denfeld who was relieved after his appearance before the Congressional inquiry on Navy criticisms of defense policies.

Nov. 2—In New York City, Dr. Vannevar Bush, president of the Carnegie Institution, urged the government to "temper humanitarianism with hard common sense," and warned that if the "Welfare state" policy of personal security were carried too far, national security might be weakened to the point where the country could be forced into another war which it might lose.

Nov. 3—The road to a better life lies "between the reactionaries of the extreme left and their talk about revolution and class warfare, and the reactionaries of the extreme right, with their hysterical cries of bankruptcy and despair," P dent Truman told an audience of 16,000 pe at the centennial celebration of Minnesota's torial status in St. Paul. His Fair Deal adm tration, he declared, was steering the m course.

U. S. Eases Ban on Yugoslavia

The State Department eased its ban on th port of war-potential materials to Yugoslav permit shipments of aircraft gasoline and l cants, announcing it also was ready to con "reasonable" requests from Marshal Tito's ernment for civil aircraft, aviation equip spare parts and used motors.—Dr. Karl T. C ton, top atomic physicist, resigned as chai of the Research and Development Board o Department of Defense because of poor he He warned against "across-the board" cu research and development funds in the de budget, declaring expenditures had been ke a sound basis.—The U. S. Circuit Court of peals in New York City directed the release o 11 convicted Communist leaders in bail tot $260,000 pending appeal.

Nov. 8—Capt. John G. Crommelin Jr., critical remarks on the Defense departm policy on naval aviation touched off a Cong ional investigation, was reprimanded and restored to duty by Adm. Forrest P. Sher Chief of Naval Operations. Sherman told C melin his actions "brought into question you ness to exercise command or to occupy a pos of trust and confidence."

Nov. 10—J. A. ("Cappy") Krug, Secreta the Interior for three and a half years, sen resignation to President Truman. His only ex ation was that he had been wanting to leav a long time. The President appointed U Secretary Oscar L. Chapman to succeed him.

Johnson Warns Potential Aggressors

Nov. 11—In an Armistice Day talk befor American Legion in St. Louis, Secretary of De Johnson warned potential aggressors against taking the differences among the armed se for weakness. "The Army, the Navy and th Force," he said, "are as one in their conf for dictatorships and in their determinatio resist them with all their strength and reso should the occasion ever demand the sacri His department, he said, was determined to "e nate waste, confusion and duplication," but would be no weakening of the nation's def

Nov. 13—Shipments of radioisotopes for p time uses and research tripled within two the Atomic Energy Commission reported. R ents were 300 universities, hospitals and res laboratories in the U. S. and 150 institutio 21 foreign countries.—An Associated Press s showed that the Federal payroll for the fiscal ending June 30, 1950, had increased to $6,214 000, including $3,574,000,000 in pay and allow for the armed services and $6,640,000,00 civilian employees. There were 3,692,000 so

Angus Ward, U. S. Consul General in Mukden, Jailed by Communists

Angus Ward, U. S. Consul General in Mukden, Manchuria, and four employees of his consulate, were arrested by Chinese Communists Oct. 24 on the charge of having beaten a Chinese employee Oct. 11. They were kept in jail, tried by a "People's Court" and given sentences varying from 3 to 6 months and Ward was ordered to pay compensation and extra salaries. The sentences were commuted to deportation. The State Department had appealed to 30 nations to protest the arrests. This came only after the Scripps-Howard newspapers had begun a campaign for determined action by Washington authorities for the release of the five men.

Ward had been attempting since May to get the assent of the Communists to his departure. The State Department learned of his arrest from the consul general in Peiping Oct. 24. On Oct. 31 the Communist radio in Peiping announced that Ward and his employees were in jail for beating a Chinese employee. The other men were Ralph C. Rehberg, Rochester, N. Y., clerk, Alfred Kristan and Frank Cicognia, Europeans, and Shiro Tatsumi, Japanese-American.

On Nov. 10, when the men had been in jail 17 days, the State Department published the text of a letter sent by O. Edmund Chubb, U. S. Consul General in Peiping, to Chou En-lai, Communist foreign minister, demanding Ward's release.

On Nov. 11 the Scipps-Howard newspapers opened their campaign, the New York World-Telegram heading its demand "Angus Ward Alive—or Else . . ."

A stronger tone was then adopted in Washington. Secretary Acheson declared recognition of the Chinese Communists at this time had b impossible. President Truman called the arr outrage. William C. Bullitt, former ambassa Moscow, called on the U. S. to blockad Communists.

On Nov. 21 Secretary Acheson called nations, including Soviet Russia, to prote the Chinese Communists. Twelve nations diately pledged support, and Great Britain nounced it would not recognize the Chinese munists while Ward remained in jail. The C then announced that Ward had been tried verdict would be forthcoming. Its purpor learned by the State Department Nov. 23 Consul General Chubb in Piping. Orders sent through Chubb to Ward that he an complete staff leave Mukden "forthwith."

The Communists seized Ward's deputy, Consul William N. Stokes, Nov. 25, and him to attend, as an "observer," the tr 10 Chinese, Japanese and Koreans bef People's Court on charges of having belong an "American spy ring." Stokes was detain 7 hours and then escorted back to the cons All defendants were found guilty.

Ward and 19 members of his staff and families arrived safely in Tientsin Dec. 8. were taken by tug down the Hai River to Bar where, Dec 12, they boarded the freighter S. S. Lakeland Victory on the fin of their journey home .

The consulate had been isolated by the munists for a year. No reports were allow reach the State Department. Its radio trans had been removed.

s, airmen and civilian employees on the nment payroll.

. 14—The Citizens Committee for the Hoover rt announced that about 20% of the reforms mended by Hoover Commission had been ed, effecting savings of more than $1,000,- 00 a year.—Trial of Harry R. Bridges, presi- of the International Longshoremen's and nousemen's Union, C.I.O., opened in Fed- Court, San Francisco. Bridges was charged perjury for allegedly having sworn falsely s naturalization hearing in 1945 that he was nd never had been a communist.

. 15—Herbert J. Burgman, former clerk in J. S. Embassy in Berlin, who served as a caster for the Nazis during the war, was cted of treason on 13 counts by a jury in ct of Columbia Federal Court.

. 16—President Truman welcomed Shah mmed Reza Pahlevi of Iran at National Air- and, at a state dinner later, promised a deal for Iran."—Federal Housing Adminis- n loans totaling $20,375,400 were authorized resident Truman for plans for new low rent ng in 27 states, the District of Columbia and o Rico under the 1949 Housing Act.

. 17—The State Department announced it rdered the closing of the U. S. Embassy in gking because the Communists were threat- that area, but said the embassy would be ned wherever the Nationalists set up their apital.—The atomic explosion in Russia made perative to draft a policy on civilian defense he dispersal of strategic facilities, including Federal Government, from congested areas, l E. Lilienthal, chairman of the Atomic y Commission, declared.

Navy Closes Crommelin Case

. 18—Capt. John G. Crommelin Jr., Navy whose criticisms of defense policies led to ngressional inquiry, demanded a general court al if Adm. Forrest P. Sherman, Chief of l Operations, refused to withdraw his public mand of him. In releasing correspondence h the Navy considered confidential, he said, d been moved by patriotism only. Adm. Sher- s office announced later that the case was ed."—As the second perjury trial of Alger former State Department official, got under n Federal Court, New York City, Claude B. , defense attorney, told the jury that Hiss had given secret official papers to Whittaker bers, ex-Communist, but that these papers een passed along by Henry Julian Wadleigh, r State Department economist. At the first trial, Chambers was the government's star ss.

. 21—The Federal Government's fiscal and ion policies to finance its "costly program" tened to saddle the nation with socialism to lead to the concentration of government olice powers in Washington, James F. Byrnes, tary of State under President Truman 1945- arned in a speech at the Southern Governors rence in Biloxi, Miss. He said only a small of each tax dollar "trickled" back to the , a scheme that "makes Big Government in ington and makes beggars out of the states." s called on the governors "to stand up and for their share of the tax dollar, and to Washington "with their hats on their , instead of hat in hand begging for a n of the tax money their constituents were d to pay." In every Federal department and y, he declared, there was "a dangerous of selfish men who love to spend the money her people."

Lilienthal Resigns as A.E.C. Head

. 23—David E. Lilienthal, appointed Oct. 28, as the first chairman of the Atomic Energy nission, resigned from that office, as of Dec. 949. In a letter to President Truman, he one of his chief reasons for wishing to return vate life was to be able "to engage in public ssion and public affairs with a greater lati- than is either feasible or suitable for one carries specific public responsibilities." While ng the A. E. C., Lilienthal was under almost nuous attack by the Republicans, but the ity of the Joint Congressional Atomic En- Committee cleared him of charges of "in- ple mismanagement" brought by Sen. Hick- per (R.-Iowa). President Truman accepted esignation with the "utmost regret."—The rg Corp., Soviet trading agency, pleaded no st in Federal District Court to an indictment ing it had failed to register as a foreign , and was fined $10,000. At the Government's st, the fine was suspended and indictments st six of the agency's officers were dismissed, aving complied with the registration re- ment after charges were filed.

Nov. 25—As a result of statements regarding secret weapons made in a television broadcast by Sen. Johnson (D.-Colo.), a member of the Joint Congressional Atomic Energy Committee, President Truman issued instructions to Attorney General McGrath and Sen. McMahon (D.-Conn.) committee chairman, to use their full authority to prevent future unauthorized disclosures. In his broadcast, Johnson stated the U. S. was developing a "super atomic bomb" 1,000 times more powerful than those used against Japan and also working on a plan for detonating enemy atomic bombs before they reached their targets. Johnson denied he had ever violated the atomic energy secrecy regulations.

Nov. 26—All but 15% of the 4,000,000-5,000,000 private papers of the late President Franklin D. Roosevelt would be opened for research purposes after Marc 17, 1950, Dr. Wayne C. Grover, U. S. Archivist, announced. The papers, kept at the Roosevelt Library in Hyde Park, N. Y., cover the period 1910 to 1945. The remaining papers, referring to individuals or relating to foreign relations or national security, would remain sealed for another 25 years, Dr. Wayne said.

Machine to "Breed" Atomic Energy

Nov. 28—The Atomic Energy Commission disclosed that construction had been started on an atomic reactor plant near Arco, Idaho, for the development of a machine to "breed" fissionable plutonium from non-fissionable uranium, with more fissionable material being produced than consumed. At the last press conference presided over by David E. Lilienthal, retiring chairman, he and other members of the commission said the "breeding" machine was 90% complete and experiments would begin in 18 months when the new plant was ready. The main purposes of the experiments would be to increase production of atomic energy for industrial uses, but further development of atomic weapons also would be studied, the commission explained.—New York State's law barring Communists and members of "subversive" organizations from holding positions in the state's educational system was declared unconstitutional by Supreme Court Justice Harry E. Schirick in Albany who called it "witch-hunting."

Nov. 30—On the second day of his trial in Federal District Court on charges of defrauding the Government through payroll padding and receiving salary "kickbacks" from fictitious employees, Rep. J. Parnell Thomas (R.-N. J.), former chairman of the House Un-American Activities Committee, entered a plea of nolo contendere (no contest) and threw himself on the mercy of the court. A similar indictment against Miss Helen Campbell, his former secretary, was dismissed. Before the trial she had told the F.B.I. that, acting "under compulsion," she had put a niece and a maid employed in her home on Thomas' Congressional payroll although they did no work, and had induced them to initial their paychecks totaling more than $6,000.

FOREIGN

Nov. 2—An accord granting full sovereignty to the "Republic of the United States of Indonesia" was signed at The Hague, the Netherlands, between Indonesian representatives and Dutch officials. Under the pact, the two nations set up a partnership "on the basis of voluntariness and equal status with equal rights." Both partners pledged themselves to the democratic form of government and an independent judiciary. Queen Juliana of the Netherlands remained as the nominal head of the new republic. The Dutch granted an amnesty to several thousand Indonesian political prisoners and to 2,000 military prisoners for whom the U. N. interceded.

Russian Warns of Third War

Nov. 6—American "imperialists" were seeking to "convert the whole world into a colony" of the U. S., Georgi M. Malenkov, member of the Russian Politburo, told an audience, which included high Soviet functionaries, at a celebration of the October revolution in Moscow. But, he warned, if the "imperialists" should unleash a third World War, "this war will be the grave not only for individual capitalist states, but for the whole of world capitalism."—Soviet Russia announced it had released Marshal Konstantin K. Rokossovsky, chief of Soviet Western armies and one of the leaders in the campaign against the Germans in World War II, from duty in the Red Army and placed him at the disposal of Poland for service with that country's armed forces. Moscow said the move had been made at the request of Polish President Bierut, who named Rokossovsky Minister of Defense and Marshal of the Armies.

Nov. 7—Communist Premier Antonin Zapotocky

announced in Prague that Soviet Russia and its scientists were aiding Czechoslovakia in exploiting his country's deposits of uranium, radioactive element essential in the manufacture of atomic bombs, "to block the aggression and bandit greed of the warmongers."—Pope Pius XII, in a speech to the central committee of the Union of Catholic Italian Lawyers, called on all Roman Catholic judges throughout the world to abstain from passing sentences based on laws considered unjust by the church. The rule applied to both divorces and political cases, the Pope explained.

Nov. 8—Twenty months after his election, Otilio Ulate, newspaper publisher, became president of Costa Rica. He had been prevented from taking office by his predecessor, Teodoro Picado, who in turn was ousted by José Figueres, whose provisional government, friendly to Ulate, ruled the country for 18 months.

Agree on Western Germany's Role

Nov. 9—Secretary of State Acheson, British Foreign Secretary Bevin and French Foreign Minister Schuman agreed in Paris that Western Germany, along with the Saar region, should be admitted to the Council of Europe as a step toward Germany's reentry into the European community. The standing committee of the Council of Europe's Assembly promptly approved the admission of Western Germany and the Saar as associate members.—The People's Chamber of the Soviet-sponsored Eastern German Democratic Republic voted to grant full civil and economic rights to former Nazis and officers of Hitler's Wehrmacht. The amnesty decree provided for the employment of former German army officers in "the public service."

Nov. 12—Interior Minister Vaclav Nosek announced in Prague that Czechoslovakia would ban church weddings and recognize only marriages performed before the Communist-controlled National Committees in cities and villages. Nosek also rejected the qualified loyalty oath to the Communist regime which Roman Catholic bishops had authorized their priests to take.—Yugoslavia renounced her treaty of friendship and mutual assistance with Albania, severing the last link with her former Cominform allies.

Nov. 13—Secretary of State Acheson arrived in Bonn on a state visit, and told officials of the Western German Federal Republic that the U. S. and its Allies would give every assistance to the new state.

Nov. 15—Chancellor Adenauer told the Bundestag (lower house of Parliament) in Bonn that the Western Allies had agreed to slow down dismantling of German factories pending revision of the dismantling program. He said dismantling for reparations would no longer be enforced except where war-potential industries were concerned.

U. S. Freighter Shelled Off China

A Chinese Nationalist destroyer on blockade duty, shelled the 8,718-ton American freighter Flying Cloud of the Isbrandtsen Line at the mouth of the Yangtze river when her captain refused to obey an order to return to Shanghai. The Flying Cloud, damaged above the waterline, steamed at full speed beyond the three-mile limit where a British frigate stood guard. None of the passengers or crew members on the merchantman were injured.

Nov. 17—The Eastern German Democratic Republic was integrated into the Soviet-dominated Eastern European economic area.—Pope Pius XII, in a talk to visiting U. S. Senators, gave implicit support to the American plan for rearming Western Europe, saying that Soviet Russia was thwarting international cooperation for peace.

Nov. 20—French authorities held the four-man crew of Polish commercial plane after André Simon Robineau, a French consular agent in Poland, who had been booked as a passenger, failed to arrive in Paris from Warsaw. The French demanded that Robineau be freed, but in reply the Polish Government declared Robineau, arrested on an espionage charge as he was heading for the airport had "confessed," implicating two other French attachés, who were expelled at once, and uncovering a big spy ring. French diplomatic officials were not allowed to visit Robineau. The French later released the four Polish fliers and their plane.—Gen. Li Tsung-jen, Acting President of Nationalist China, landed in Hong Kong after a flight from Nanking, and entered a hospital for treatment of a stomach ailment.—Following a bloodless coup instigated by Col. José Antonio Remon, chief of the National Police, President Daniel F. Chanis Jr. of Panama resigned and was succeeded by Vice President Roberto F. Chiari who was sworn in immediately.

Nov. 22—Hungary announced the arrest of Robert A. Vogeler of New York City, a vice pres of the International Telephone & Telegraph on charges of espionage and sabotage, and ass he had "confessed."

West Germans Pledge Anti-War Policy

Nov. 24—In a formal agreement with the ern Allied High Commissioners, the Western man Federal Republic at Bonn pledged itse keep its territory demilitarized, prevent th vival of armed forces of any kind, eradicat last vestiges of nazism and stamp out totalita ism and authoritarianism from all branch the government.—West Berlin newspapers rep that Moscow had ordered the conversion o Russian zone's "people's police," numbering 3 trained Germans, to an army auxiliary equ with tanks, artillery and grenades.—The H of Lords approved, without a record vote Labor Government's bill for nationalizatio Britain's steel industry. Effectiveness of the was made contingent on the outcome of the general election, to be held before July 1, 19

Nov. 26—At an all-night session, the F National Assembly approved the Big Three po policy toward Western Germany, 327 to 249. assembly called on the government, howeve exercise the "greatest vigilance" to prevent toration of Germany's industrial potential first step toward militarism.—Following a ser arrests by Polish authorities of French co officials and other French citizens, Ambas Jean Baelen warned the Communist govern in Warsaw that relations between the two tries had disintegrated "to the point where possible to foresee the worst." He demanded the arrests cease. In retaliation, French rounded up more than 30 Polish subjects, in ing officials. Three Polish consular officials held.—A 24-hour general strike in Paris, jointly by the non-Communist Workers' Forc the Communist-dominated General Confede of Labor to enforce demands for higher w was only partially successful. Transportation industrial workers were idle, but a majority white collar workers in government offices, and department stores reported for work.

Political Turmoil in Panama

After several days of rioting during Daniel F. Chanis Jr. sought to regain the dency, Panama's National Police installed Arnulfo Arias, who was ousted as preside 1941, as chief executive of Panama. Arias orders for the arrest of three former presi Chanis, Enrique Adolfo Jiminez and R Adolfo de la Guardia, but they escaped t Canal Zone. The U. S. withheld recognition the new Panamanian government.

Nov. 27—After months of political strife in more than 1,000 persons were killed, a one Presidential election went off quietly in Colo The only candidate, Laureano Gomez, Cons tive, was elected by a vote of 956,315. The Lib once the dominating party, withdrew their didate, Dario Echanda, and boycotted the tion. Echanda's brother, Vicente, was killed military police opened fire on a Liberal ra

Nov. 28—For the second time in two Chinese Nationalist warships shelled a freighter in the Yangtze river between Sha and Hong Kong. The steamship, the Sir Franklin, was hit 12 times above the wate but there were no casualties and it proceed Woosung. Like the Flying Cloud, fired on Nc it was operated by the Isbrandtsen Line, York.

Cominform Seeks Tito's Downfall

Nov. 29—A crusade against Marshal Tito's ernment by the revolutionary elements Yugoslavia and by Communists and worke all other nations was called for in a reso adopted by the eight Cominform countries secret meeting in Hungary. "The fight a the Tito clique, the clique of the assassin hireling spies, is an international duty f Communist and workers' parties," the reso stated. The resolution made a special to Catholic workers and their organizations ing religious beliefs were no bar to workers' —In the first demonstration of its kind und Franco regime, 1,000 bank employees sta hunger march in Madrid and presented de for higher wages to the Ministry of Labor. broke up the demonstration.

Nov. 30—The Chinese Nationalists eva Chungking, their third temporary capital a year, as 20,000 Chinese Communist crossed the Yangtze and occupied the city Nationalists, with Generalissimo Chiang shek in command, established a new refuge tal at Chengtu, 175 miles to the Northwest. Zealand's Socialist government, in power years, was defeated in elections for the Ho

sentatives by the Nationalists. The Labor captured 34 seats, a loss of 8, and the nal party, a coalition of Conservatives and als, won 46, a gain of 8. The winners ran on form pledged to tax cuts, reduced state con- and free enterprise. Sidney G. Holland, of the opposition, was designated to suc- Peter Fraser as prime minister.

UNITED NATIONS

. 4—The Political and Security Committee d a resolution, 38 to 6, with two abstentions, g all U. N. members to place an arms em- on Albania and Bulgaria until those coun- stopped supplying aid to the Greek guerril- The resolution was sponsored by the U. S., n, Australia and China. The General As- y later adopted the resolution unanimously.

. 5—In letter to the six permanent members e U. N. Atomic Energy Commission—the Britain, France, Soviet Russia, Canada and —Assembly President Romulo proposed a rary suspension of atomic bomb production prohibition of the use of existing bombs.

. 10—Soviet Russia was using atomic energy eaceful purposes, not to stockpile bombs, If, unfortunately, and to our great regret, vere necessary, we should have as many of as we should need—no more and no less," gn Minister Vishinsky told the Assembly's al Political Committee.

. 12—By a vote of 49 to 1, with 8 abstentions, Political and Security Committee adopted a plan for the future of Italy's former African es. The committee approved proposals to Libya independent by 1952, grant Italy a ar trusteeship over Somaliland, and send a commission to Eritrea to determine the s of the people. The resolution was later d by the full General Assembly, 48 to 1, with pia casting the only opposition vote.

Peace Moves by U. S., Russia

. 14—A Soviet proposal for a Big Five ggression pact was countered by the U. S. a 12-point resolution calling on all U. N. ers to comply fully with the principles of J. N. Charter; to refrain from threats or of force which would weaken the indepen- or integrity of other nations, and to carry international agreements. Soviet Foreign ter Vishinsky said the purpose of the Rus- resolution was to seek a decision by the ive on uniting their efforts and concluding t to strengthen peace.

. 16—In a debate on Russia's non-aggres- proposal, Hector McNeil, British Minister of told the Political and Security Committee the acts of the Soviet government had roved this essential for world peace: inter- nal confidence." For four years, he said, tussians had refused to cooperate with the nations except on their own terms. Soviet gn Minister Vishinsky replied that the U. S. d war and that the West did not want c energy control. He charged the U. S. having destroyed 80,000 "wholly innocent in the atom bombing of Hiroshima.

. 18—The Roman Catholic hierarchy in . S., in a statement issued in Washington, zed the proposals of the U. N. Conciliation ission for the internationalization of Je- m to safeguard the Holy Places. The com- n's proposals, the Catholic leaders said, to achieve that purpose, providing merely ontrol or a curatorship. What was needed, declared, was territorial internationaliza- —A formal demand was made on Secretary al Lie and Assembly President Romulo by Chinese Central (Communist) government eiping to deprive the Chinese Nationalist tion to the U. N. of its right to speak for Chinese people. Soviet Russia supported emand.

. 22—President Truman told the fifth an- meeting of the U. N. Food and Agricultural ization in Washington that "an agricultural tion has been taking part in the U. S.," cing new hybrid varieties of field crops, livestock, better fertilizers, and "amazing" weed and insect killers. "Our experience, knowledge, our technical experts are all ble to you," he added.—The Assembly voted, 5, to establish an international guard of 300 trained and uniformed men to t U. N. missions serving abroad.

Jordan Asks Status Quo in Jerusalem

. 26—Maintenance of the status quo in Je- m under divided Arab-Israeli control was nded by Jordan in the Special Political mittee. Jordan's spokesman, Fouzi Pasha el , declared his government was opposed to internationalization of the Holy City and would keep its troops there.

Nov. 28—A hands-off policy for China, with the people being given a free hand in choosing the political government they desired without pressure from other nations was advocated by the U. S. in a resolution offered in the Political and Security Committee. Dr. Philip C. Jessup, U. S. representative, declared evidence at hand "created grave concern that groundwork is in fact once again being laid for a further Russian attempt to dismember China."

Nov. 29—The U. S. extended its "hand of co-operation" to the Soviet Union and its satellites in promoting peace on a "live and let live" formula. U. S. Delegate Warren R. Austin told the Assembly that 53 of the 59 member nations favored the U. S.-British resolution to settle international disputes on the basis of the U. N. Charter which would make unnecessary the conclusion of peace pacts among groups of nations, such as the Big Five treaty proposed by Russia.

Nov. 30—Sava N. Kosanovitch, Yugoslav delegate, declared in the Assembly that the Cominform manifesto calling on all Communists to unite to overthrow Marshal Tito's government was "a danger to the peace and the independence of small countries."

POLITICS

Nov. 3—James S. Kemper resigned as treasurer of the Republican National Committee, citing a drop in party reserves from $832,000 to less than $90,000 in 22 months. In his letter of resignation, Kemper condemned the "so-called bipartisan foreign policy," under which, he said, Republicans were asked "to shower gifts on British Socialism —the younger system of communism."

Nov. 5—Taking part in a broadcast sponsored by the Democratic and Liberal parties in a last-hour appeal to voters, President Truman urged the election of former Gov. Lehman, declaring that "the main issue before the voters of New York State is whether or not they will have a U. S. Senator who will work to promote the general welfare of the people."

Democrats Win Off-Year Elections

Nov. 8—Democratic victories from coast to coast marked the off-year election. In New York, former Gov. Herbert H. Lehman defeated Sen. John Foster Dulles, Republican, serving by appointment of Gov. Dewey, by a majority of 196,000 votes. Mrs. Edna F. Kelly, Democrat, was elected to the House in Brooklyn, defeating Republican and Liberal opponents. New York City's Mayor, William O'Dwyer, won reelection by a plurality of 783,717 votes over Newbold Morris, Republican-Fusion-Liberal, and Vito Marcantonio, American Labor party. Eight up-State Republican Mayors were beaten by Democrats. Mayor James Michael Curley of Boston, seeking a fifth term, was defeated by City Clerk John B. Hynes. Both are Democrats. In New Jersey, Gov. Alfred E. Driscoll, Republican, won a second term, defeating State Senator Elmer H. Wene, Democrat sponsored by former Mayor Frank Hague of Jersey City. Virginia and Texas rejected the proposed repeal of poll taxes.

Pennsylvania approved by a three-to-one majority a $500,000,000 bonus for veterans. Gov. James H. Duff declared the necessary funds would "have to be raised by more taxes."—John F. Shelley, president of the California A. F. L., who ran on the Fair Deal ticket, was elected to Congress from San Francisco to the seat held by the late Rep. Richard J. Welch, Republican.—President Truman's comment was the election results confirmed his belief that the Democratic party was "the party of the people," and predicted they would have a decided effect on the 1950 Congressional elections.—In the Philippines, President Elpidio Quirino was elected to a full four-year term, defeating José P. Laurel, candidate of the Nationalista party. The election was accompanied by violence in 18 of the 49 provinces and 32 deaths were reported.

James Roosevelt Enters California Race

Nov. 15—James Roosevelt, eldest son of the late President, announced he would be a candidate for the Democratic nomination for Governor of California in 1950. He said that, under the state's cross-filing system, he also would run in the Republican primary.

Nov. 27—In a reply to President Truman's speech in St. Paul, Minn., Nov. 2, which the Republicans had called a "political" talk, Guy G. Gabrielson, Republican national chairman, charged in a broadcast that the Fair Deal Administration was leading the nation down the road to a "poorhouse state."

Nov. 28—New York City's victorious Democratic

city administration introduced in the City Council a bill proposing the following salary increases: Mayor, from $25,000 to $40,000 a year; Comptroller, from $20,000 to $35,000; Council President, from $15,000 to $30,000; five Borough Presidents, from $15,000 to $25,000, and 25 members of the Council, from $5,000 to $7,500. The bill was denounced by Newbold Norris and Vito Marcantonio, Mayor O'Dwyer's unsuccessful rivals in the November election, as "indecent" and "shameful."

BUSINESS AND FINANCE

Nov. 1—The year 1949 was "tremendous" for American business, Secretary of the Treasury Snyder told the 75th annual convention of the American Bankers Assn. in San Francisco. While certain industries and localities felt the impact of many readjustments throughout the nation's economy during the year, he said, the basic factors making for growth and progress had been far stronger than the adverse forces. Both incomes and jobs, he stated, had remained close to the 1948 record levels.

Nov. 4—Harry A. McDonald, former Detroit investment banker, was elected chairman of the Securities and Exchange Commission to succeed Edmond M. Hanrahan, resigned. McDonald, a member of the commission for two years, became the first Republican head of the agency since it was established in 1934.

U. S. Exports Gold

Nov. 5—The U. S. exported $108,000,000 in gold to foreign countries in seven weeks, reversing a 15-year trend. Treasury officials said the gold was being sold at the fixed price of $35 an ounce. They ascribed the heavy purchases to rumors that the U. S. would devalue the dollar.

Nov. 6—Coffee futures climbed to 48.20 cents a pound, an all-time high, while retail prices for leading brands rose to 75 to 80 cents a pound, as reports from Brazil pointed to a crop of 12,000,000 to 13,000,000 bags in 1950 compared with a normal average of 15,000,000 to 16,000,000 bags.

Nov. 12—The subcommittee on low-income families of the Joint Congressional Committee on the Economic Report disclosed that in 1948 more than 8,000,000 families and individuals had received cash incomes of $1,000 or less each. The subcommittee's report said that low-income families "have been left behind in the economic progress" of the country.

Nov. 17—Chairman Douglas (D.-Ill.) of the subcommittee on the Economic Report charged that the Kaiser-Fraser Corp. had used $8,000,000 of its $44,000,000 loans from the Reconstruction Finance Corp. to "bail out two Pittsburgh banks which had advanced $20,000,000 to the auto concern. Harvey J. Gunderson, a R. F. C. director, replied the agency considered the loans as sound as Kaiser-Fraser had put up collateral appraised at $114,000,000 to secure them. The jobs of 47,000 workers were at stake, he said.

Nov. 23—Repeal of all but a few of the wartime excise taxes was urged by Beardsley Ruml, chairman of the board of R. H. Macy & Co., before the subcommittee on the Economic Report. He described these taxes as "punitive."

Radio-Active Materials On Display

Nov. 28—Commercial electronic devices permitting the use of radio-active isotopes from Atomic Energy Commission laboratories without excessive risk to employees were displayed by the Radio Corp. of America for the first time at the annual Exposition of the Chemical Industries in New York City. The instruments formerly had been used exclusively by the U. S. Government. Later it was announced that metallic uranium would be sold for $50 a pound to commercial users licensed by the A. E. C.

Nov. 30—Big business, instead of being curbed, should be "encouraged to grow—to produce more goods for more people," Charles E. Wilson, president of the General Electric Co., told a House Judiciary subcommittee investigating monopoly trends. He denied that big business was seeking to crush small business, saying the country needed the combined contributions of both.

GENERAL

Nov. 1—An Eastern Airlines Douglas DC-4 about to land at National Airport in Washington was rammed and cut in two by a Lockheed Lightning fighter plane flown by a Bolivian pilot. All 55 persons on the airliner were killed in the accident, the worst in American civil aviation history. The fighter's pilot, Capt. Eric Rios Bridaux, was critically injured. He was making a test flight in the plane which his government had just purchased from the U. S. Among those killed on the airliner were Miss Helen E. Hokinson, cartoonist; Rep. George J. Bates (R.-M and former Rep. Michael J. Kennedy of York, one-time leader of Tammany Hall.

Nov. 3—A U. S. Air Force B-29 crashed burned at sea a mile off Hamilton, Ber Ten of the 13 men on board were killed.

Nov. 9—The 1,800-ton submarine Tusk rammed by the 13,800-ton supply ship Alde during a mock battle between surface and u sea vessels of the Second U. S. Task For Labrador. The Tusk, which carried a crew officers and men, managed to surface and taken under destroyer escort to Argentia, foundland.

18 Fliers Rescued in Mid-Ocean

Nov. 16—A U. S. Air Force B-29 Superfor en route from California to England for a t ing flight with a crew of 20 officers and men forced down in the Atlantic Ocean 240 northeast of Bermuda when its gasoline s gave out. After the most extensive sea-air s in peacetime history, with more than 100 craft and a score of surface vessels taking two rubber life rafts with 18 survivors sighted 140 miles from the point of the f landing. The men were taken aboard a Can destroyer, weak after 75 hours of exposu stormy sea, and rushed to Bermuda where were hospitalized. The other two crew me were killed in the crash. Another B-29, jo in the hunt, crashed at Tampa, Fla., killing of the nine crew members.

Nov. 17—Two B-29s, on a mass training with 11 other planes, collided 27,000 feet Stockton, Calif., and then crashed at two four miles from the city. Of the 21 crew me on the two bombers, 18 were killed and other three parachuted to safety.

Nov. 18—The Rt. Rev. William T. Man retired Bishop of the Protestant Episcopal Ch in New York, who built up the Cathedral o John the Divine into the largest church o North American continent, died in New City at the age of 83.—The Air Force gro all its B-29s that were without modernized chanical equipment or had been carrying "t mum operating stresses."—Vice President William Barkley and Mrs. Carleton S. Hadl widow, were married in a St. Louis church

Refugee Children Die in Air Crash

Nov. 20—A chartered Dutch airliner, wi Jewish refugee children from Algiers, three n and a crew of four on board, crashed 20 south of Oslo, Norway, after a flight from sels. After a two-day search, rescue workers the wreckage on a densely-wooded hill. The survivor was a 12-year-old boy, who was strapped in a seat in the aircraft's tail, suf only from slight bruises. The children were taken to a Norwegian rehabilitation cent the American Joint Distribution Committe fore proceeding to Israel.

Nov. 23—A jury in Kings County Court, York City, acquitted Benjamin Feldman, a B lyn druggist, of murder in the death of his in 1943. He had been found guilty in two pr trials of having poisoned her and had been sent to the death house at Sing Sing, bu Court of Appeals voided the convictions ordered a new trial in each instance.

Nov. 25—Thanksgiving Day accidents to toll of 147 lives, automobile crashes accou for 94 deaths, the Associated Press rep Tornadoes in Alabama killed 13 persons, incl nine members of a family attending a h dinner.—The Church of the Holy Sepulch Jerusalem's Old City was badly damaged fire which wrecked the dome and other pa the roof. The rotunda was undamaged and ular services were held a few hours afte blaze was brought under control. Damage estimated at between $800,000 and $900,00

110-Mile Storm Hits Northwest

Nov. 27—A 110-mile-an-hour storm, accoi ied by a 7-inch rainfall, caused death and de tion along a 1,000-mile front in Oregon, ington and British Columbia, thirty-eight sons were killed, hundreds of homes were w or flooded, and 15 bridges in British Col and Washington were washed out.

Nov. 29—A New York-Mexico City DC-4 liner of the American Airlines, seeking to la Love Field, Dallas, Tex., with two of its engines dead, crashed into two buildin the edge of the airfield and then explode the 46 persons on board, 26 passengers an stewardesses were burned to death. Three crew members and 15 passengers escaped the wreckage. The two buildings struck b plane, the Dallas Aviation School and a for testing chemicals, were destroyed by fi

DECISIONS BY U. S. SUPREME COURT, 1949

"Equity is rooted in conscience."

E SPEECH AND PUBLIC SAFETY

agitator, addressing an audience of hile over 1,000 demonstrated against outside the hall, was charged with derly conduct by the police under a ordinance intended to stop anyone stirred people to anger invited pubspute or brought about a condition of t." The speaker contended the arrest n contravention of the Constitutional of free speech. The majority of the me Court held for the speaker, but inority, Justices Vinson, Frankfurackson and Burton, dissented and ined that a certain amount of reit was necessary to prevent the abuse e public safety. Mr. Justice Jackson

a people grow in capacity for civilin and liberty, their tolerance will and they will endure, if not wel, discussions even on topics as to n they are committed . . . But on our o this idealistic state of tolerance the e have to deal with men as they are. rowd mind is never tolerant of any which does not conform to its herd on. Released from the sense of per responsibility and brave with the ge of numbers, both radical and reary mobs endanger liberty as well rder. The authorities must control and they are entitled to place some s upon those whose behavior or h calls such mobs into being."

CKETING AND FREE SPEECH

ice peddlers' union picketed a distor in order to stop him from dealing non-union ice peddlers. He testified his business was reduced 85%. The contended that it was publicizing abor dispute. The Supreme Court against the union and held that ght of free speech does not preclude junction against peaceful picketing ercive purposes.

D TRUCKS MAY BE REGULATED

eration of a sound truck on New Jerreets was stopped under a city ordie which prohibits amplifiers on s emitting "loud and raucous s." The conviction for violating the ance was affirmed by the Supreme , which held that sound trucks are ct to reasonable regulation. Justices rfurter and Jackson held that the use und trucks may be absolutely proed without violating the constitutionht of free speech.

IDED BY PRISONER'S RECORD

ury in a New York state court found guilty of murder in the first degree recommended life. The judge, who nstructed the jury: "The court is ound to accept your recommenda imposed death. He said he was d by the unfavorable criminal recf the accused, which had not been to the jury. Defendant appealed this olation of due process clause of the amendment. The Court of Appeals d him. The Supreme Court reversed nd found for the judge.

Justice Black: "Highly relevant, if ssential, to his (the judge's) selecf an appropriate sentence is the posn of the fullest information possible concerning the defendant's life and characteristics." He said probation workers' reports "have been given high value by conscientious judges who want to sentence persons on the best possible information rather than on guesswork or inadequate information."

RACIAL CLAUSE VOIDS CONTRACT

Certain property in the District of Columbia had a restrictive clause that it could not be sold to Negroes without a penalty of $2,000, acting as a lien on the property. White owners sought to have this enforced against a realty dealer and Negro purchasers. The lower court upheld the restriction. The purchasers appealed, on the ground that this was a violation of the Constitution. The Supreme Court reversed the lower court.

Mr. Justice Vinson explained: "The power of the Federal courts to enforce the terms of private agreements is at all times exercised subject to the restrictions and limitations of the public policy of the United States, as manifested in the Constitution, treaties, Federal statutes and legal precedents." Mr. Justice Frankfurter, concurring, said: "Equity is rooted in conscience."

RISE IN PAY MAY BE ILLEGAL

An employer engaged in negotiations with a textile union for higher pay and other matters, announced a "general and substantial" increase in pay for its employees, including most of those with whom it was negotiating, without consulting them. The National Labor Relations Board ordered this pay increase voided on the ground that it was a failure to bargain collectively. The Supreme Court upheld the board.

DAMAGES FOR SILICOSIS UPHELD

A locomotive fireman sued under the Employers Liability Act for injuries sustained by silicosis "caused by continuous inhalation of silica dust from sand materials emitted in excessive amounts by the locomotive's faultily adjusted sand apparatus." The suit was tried as a violation of the Boiler Inspection Act and a lower Court awarded him $30,000. A state supreme court reversed this. The Supreme Court reversed the state supreme court, the majority declaring silicosis compensable under the Boiler Inspection Act.

The minority held occupational diseases were not accidents as described by the Boiler Inspection Act. Mr. Justice Frankfurter declared: "So long as the gamble of an occasional heavy verdict is not replaced by the security of a modern system of insurance, courts must continue to apply the notion of negligence in situations for which it was never intended."

SERVICEMEN MAY SUE GOVERNMENT

Two servicemen not on duty were riding in a motor car with their father when hit by a U. S. Army truck driven by a civilian Army employe. One serviceman was killed, the other injured. A district court gave $25,425 to decedent's estate and $4,000 to the injured man. The Government appealed, contending servicemen had statutory benefits in case of injury. The Supreme Court held there was nothing to bar servicemen from suing the U. S. under the Federal Tort Claims Act.

Deaths, Dec. 1, 1948 to Dec. 1, 1949

— A —

Adams, Dr. James Truslow (70), historian, Pulitzer Prize winner; Westport, Conn., May 18.
Adams, Thomas Parker (103), geneologist, oldest Harvard alumnus; Plymouth, Mass., Feb. 19.
Adler, Emanuel Philip (76), headed newspaper chain; Davenport, Iowa, March 2.
Ahnelt, William Paul (85), magazine publisher; Keyport, N. J., Oct. 5.
Aitken Robert I. (70), sculptor; New York City, Jan. 3.
Alexander, Sir Douglas (84), president of Singer Sewing Machine Co.; Stamford, Conn., May 22.
Alling, Paul Humiston (52), U. S. Ambassador to Pakistan; Bethesda, Md., Jan. 18.
Andrews, Walter G. (59), former Republican Representative from New York; Daytona Beach, Fla., March 5.

Jet Propulsion Gives Supersonic Speed

Nothing could have done more to speed up the American defensive system by airplanes than the announcement by President Truman, on Sept. 23, that an atomic explosion had occurred inside Russia. It came well in advance of final action on appropriations for military airplanes and for research into new ways of attaining high speed and striking power. It gave new impetus to the development of turbo-jet engines and rockets. It became an absolute necessity that fighter planes should rise to great heights swiftly and travel at incredible speed.

The application of jet propulsion to airplanes marks a revolutionary change from the internal combustion engine that made the motor car move and the airplane travel through the skies. In the gas turbine a compressor supplies air to a combustion chamber, where the burning fuel heats the air and expands it. The expanded gas is driven through a turbine that makes rotor and shaft revolve. Hot gases leaving the turbine are exhausted through nozzles to form the jet. This propels the airplane forward. This is the turbo-jet engine. Another is the turbo-propeller-jet, in which hot gases are recovered by the turbine and made to drive an air screw propeller.

Other means of swift propulsion are the pulse-jet, used by the Germans in V-1 bombs, the rocket used by the Germans in V-2 bombs, and the ram jet, which is applied to guided missles.

BRITISH WERE IN LEAD

Precedence in jet propulsion is generally credited to Great Britain, which began working on centrifugal-type jet engines as early as 1930. The Germans tried to apply axial-type jet engines to planes just before the World War, but failed to make them practical. The United States Air Force flew a combat plane with a British jet engine briefly in 1942. German scientists have been working for the Russians since the war, and a great many jet-propelled airplanes took part in the 1949 air show in Moscow, but observers could not agree on what innovations, if any, the Russians had made. At present there is technical rivalry between the British and American engineers, but the respect of Americans for British accomplishments remains high.

Jet-propelled planes are now being used for many types of military planes in the United States. The fastest USAF fighter plane is the North American F-86-A Sabre, which carries swept-wing jets. Planes are being delivered to groups of the Air Force as rapidly as manufactured. By the end of 1949 the equipment of three air groups was practically completed. The F-86 made 670 m.p.h., the world's landplane speed record, in a test at Muroc Air Base, Calif., Sept. 15, 1948. It attained 710 m.p.h. on level flight at sea level, which is calculated as less than sound at that level. It made supersonic speed in a 35-degree drive from 47,000 feet, at the Wright-Patterson field in Dayton, O. This plane has never reached the highest altitude of which it is thought capable, but has a ceiling of 53,000 ft., and has been flown at 57,000 ft. In the National Air Races at Cleveland, O., 1949, it ave 586 m.p.h.

Attainment of supersonic speed in level became the object of numerous attempts in This is possible only with various types propulsion. The Bell X-1, USAF, led in when Capt. Charles E. Yeager hit 1,000 for less than a minute at 60,000 ft., as at by Secretary Symington of the Air Force North American F-86-A, which made 670 in level flight in 1948, has been mentione July, 1949, the Navy's research plane, D D-558-II, hit 710 m.p.h. at 26,000 ft. at Air Base. In October Robert McLarren re in Aviation Week that supersonic speed had attained in level flight by a Lockheed XF 15-ton penetration fighter, at Muroc Air with a turbo-jet engine and solar afterbu using two solid-fuel rockets for takeoff. power is supposed to give an estimated thr 12,000 lbs.

While American turbo-jets are being dev with government contracts, considerable pr has been reported by de Havilland in B working with private capital. Numerous ty jet-propelled aircraft are now in use in E and Canada. Canada has been studying je pulsion since 1943 and A. V. Roe Canada, has been building turbojets for the Royal dian Air Force. Recently the Roe concern duced its Avro jetliner, XC-102, described first jetliner on the continent, capable of ca 50 passengers, and intended to reach 417 at 30,000 ft.

The need of landing soldiers and munitio trouble spots quickly is accelerating experi with jet-propelled transports. The USAF great many regular transports and under tract, but jet-propelled transports are s the designing stage. Late in 1949 the USA ready to test a North American B-54 bombe cargo loads. This is a four-jet plane thi reached 500 m.p.h.

OIL CONSUMPTION A PROBLEM

The problems in jet propulsion are the use of oil and the intense heat generated engines. Little progress has been made in serving fuel. The heat is so great that new compounds that can stand up to 3000 deg are being developed. During 1949 the Off Naval Research experimented with one co ing zirconium and boron. Vibration and must be reduced, and this is done, especi Britain, by the use of redux, a metal b process that eliminates rivets.

Capt. Eddie Rickenbacker, president of E Air Lines, in an interview mentioned the difficulties in jet-propelled aircraft. He s speed, vibration, maintenance and traffic ing. Then there is the heat from the jet ex which interferes with loading. He advocate ernment support of experiments with jet-pr transports, asserting that a jet liner shou cost over $1,000,000, and that $75,000,000 to 000,000 would cover the expenses of necessa perimentation.

MEDICINE

liomyelitis Epidemic; Research in Heart Diseases, Cancer, Tuberculosis, 1949

POLIOMYELITIS

demic, 1949. For the fourth time in story the United States, poliomyelitis, commonly known as polio or infan- aralysis, struck the nation with epi- c fury. Though it had alarmed the ry three times before, its violence ed the peak in 1949.

m Jan. 1 to Oct. 2, there were 33,144 against 19,179 in 1948 and 25,698 in during the same period. The final nting was expected to record more 40,000 cases by Dec. 31, compared the 1948 maximum of 28,000. In 1916, e complete records could be kept, than 27,000 cases were listed for the but these were incomplete as only tes sent in epidemic reports.

t of Epidemic. To combat this disease, nich individual care is the most ex- ve known, the National Foundation nfantile Paralysis was ready in 1949 $25,000,000. This represented the sum cted during the annual March of s campaign, which takes place the wo weeks in January. For the first in its 11-year history, however, the dation was forced to conduct a sup- entary emergency drive in Septem- 1949, for patient care only, with a of $14,000,000.

the $25,000,000 collected in January, remained with the Foundation's 3,000 chapters; the remaining 50% was for allocation by the National Found- . By Oct. 1, 1949, more than $11,000,000 is amount already had been utilized lows: $6,628,805 advanced to chapters; ,000 in grants to 44 institutions for research; $2,000,000 for scholarships ellowships for doctors, nurses, physi- nd occupational therapists and social ers and $378,017 for direct epidemic

om Jan. 1 to Oct. 1, the National Foun- n shipped to emergency areas 626 rators, 495 hot pack machines, 320 and mattresses, 83 beds and mat- es, 4,755 lbs. of wool for hot packing. so recruited for emergency duty 153 ical therapists, 2,427 nurses, 10 con- nts of the Joint Orthopedic Nursing sory Service, 4 epidemiologists, 4 aid teams and 35 resident physicians.

PROGRESS IN RESEARCH

e of the most significant accomplish- s in polio research in 1949 was the ess reported by Dr. John F. Enders, ard University, in growing polio virus test tube in a culture media consisting on-nervous tissue free of protein h might cause serious reaction if used vaccine. This method of growing the marked an important advance in aring an effective anti-polio vaccine fficiently large quantities.

ner research in the Universities of nern California, Utah, Kansas and burgh, has resulted in the establish- of the three known polio viruses and bility to grow two of them. By 1952, expected that determination of the ber and classification of all possible viruses will be completed.

Further development in 1949 was the ulation test by Dr. Eugene Roberts, ersity of California, consisting of the tube method of classifying polio vir- rather than the present lengthy and nsive monkey inoculation tests.

The electro-phrenic stimulator was devised by Dr. James Whittenberger, Harvard University, to be used as an aid to polio victims whose breathing centers or muscles had been affected, and who could not be placed in an iron lung. An electrode is attached to one of the phrenic nerves in the neck, which, as the current passes through, causes the nerve to contract the diaphragm for abdominal breathing.

General information resulting from a study of poliomyelitis outbreaks in America show that, geographically, it is ruthlessly impartial; that, on a population basis, polio strikes less frequently in urban areas, where a higher incidence has been noted among older children and adults; that polio outbreaks occur annually in late June through September, with the peak coming in mid-September in the north and somewhat earlier in the south; that 50% of all those stricken recover without crippling; 25 to 30% suffer minor disabilities; 20 to 25% show marked residual paralysis, while 5 to 10% die. These percentages are variable, depending upon the virulence of outbreaks.

NATIONAL FOUNDATION

The National Foundation for Infantile Paralysis (Basil O'Connor, president), New York, was founded in 1938 by Franklin D. Roosevelt to "lead, direct and unify the fight" against poliomyelitis. It is supported solely by its yearly March of Dimes. Its continuous search for a vaccine against the disease, and for ways of ameliorating the after-effects of polio constitute, together with its vast emergency epidemic aid program, the most relentless and comprehensive attack on a single disease ever made by a private agency.

In the Foundation's 11 years of existence, it has authorized approximately $18,000,000 for research and education, and has awarded several thousand scholarships and fellowships to professional workers. It has established training and demonstration centers for physicians and nurses in connection with Knickerbocker Hospital, New York, Children's Hospital, Boston, City Hospital, Cleveland and the University of Colorado Medical Center.

Four epidemic aid teams were organized in 1945. They make emergency visits to stricken areas at the request of State Health Commissioners. They are located at Harvard University, Boston; D. T. Watson School of Physical Therapy, Leetsdale, Pa.; Northwestern University, Chicago; Stanford University, Palo Alto, Cal.

The Foundation's epidemic reserve fund has been drawn upon many times. In the 1948 epidemic, when North Carolina, Texas and California were most severely hit, these states received advances of $611,000, $303,046 and $246,183 respectively. In the nine months from Jan. 1 to Oct. 1, advances were made to 402 chapters and emergency committees in 41 states, totalling $3,534,228.

All polio patients, adult and children, regardless of race, creed or color, who cannot afford complete medical care, may obtain help through National Foundation chapters. It is estimated that medical cost for a single polio case today averages $2,000, and that 85% of all new cases are thus assisted.

HEART DISEASES

Sources: American Heart Assn., New York Heart Assn., Life Insurance Medical Research Fund, Helen Hay Whitney Foundation; Challenge of Heart Disease, by H. M. Marvin, M.D.

More than 625,000 Americans die annually from 21 distinct types of heart diseases. This death rate, which heads mortality from any cause, is 3 times as high as cancer; 6 times as high as accidents; 10 times as high as pneumonia, and 13 times as high as tuberculosis. Accountable for 90 per cent of these 21 are the three major types of heart diseases, arteriosclerosis (hardening of the arteries,) hypertension (high blood pressure,) and rheumatic heart disease (frequently an aftermath of rheumatic fever.)

Rheumatic fever and the resultant rheumatic heart disease together lead the fatalities of youth from the ages of 5 to 19. Beyond 35, diseases of the heart and blood vessels are first in the death toll, while after 45 nearly one out of every two persons dies from diseases of the heart.

Neither cause nor cure has been found for the three major cardiovascular types, and it was only in the field of rheumatic disease that anything in the nature of a discovery was made by medical science in 1949. This was in the administration of cortisone, or Compound E. (See below.)

There were also presented in 1949 several new surgical procedures designed to ameliorate some of the circulatory effects of heart valves damaged by rheumatic fever. Nothing definitive was reported.

RECENT SCIENTIFIC ADVANCES

Important scientific advances include the prevention of recurrent attacks of acute rheumatic fever by the use of penicillin or sulfa drugs; the surgical treatment of certain congenital heart defects; the relief of symptoms by better methods of managing individual patients with high blood pressure; the use of such anticoagulants as dicumarol in reducing mortality and preventing complications following coronary thrombosis. There have been also many advances in the medical and surgical treatment of diseases affecting blood vessels in arms and legs.

There is hope in the increasing momentum of the attack against cardiovascular diseases through public, private and federal funds for scientific research into causes and cures, and for preventive information to the layman. Until recent years these funds were comparatively few and derived chiefly from three sources: medical schools and universities, large foundations and the Life Insurance Medical Research Fund. The creation of new organizations and funds has considerably augmented these resources and given proof of the growing recognition of needs in cardiovascular research.

AMERICAN HEART ASSOCIATION

This association, of which H. M. Marvin, M.D., New York, is president, was organized in 1922 by a small group of America's foremost cardiologists to fight heart diseases with planned scientific and educational work. The association has expanded into a national voluntary health agency with 43 direct affiliates in major areas of the United States and 1 in Hawaii. Its membership of 5,000 is composed of laymen, physicians and scientists interested in reducing disease, disability and death resulting from disorders of the heart and blood. Its first objective is to sponsor and finance research in diseases of the heart, and its program provides for the support of career investigators, various types of fellowships and grants-in-aid for heart research projects.

In 1948 its annual fund-raising cam
with the accompanying American
Week including St. Valentine's Day
established. In the 1949 campaign $2,5
was raised, of which 70% remained
the affiliated heart associations in l
ties where it was raised. Of the 30%
cated to the National Association,
half was set aside for research.

The American Heart Association a
affiliates allotted $700,000 for scientif
search during 1949, while nearly $2
was awarded by the national assoc
to 26 investigators and six medical sc
and hospitals for studies in heart an
culatory diseases. The awards wer
portioned as follows:

$103,800 for 24 research fellowships, ind
stipends ranging from $3,000 to $4,000 fo
year periods.

$46,210 for six grants-in-aid, including
to Dr. Albert Szent Gyorgi for research on
lar contraction, and to the following insti
for cardiovascular studies: The Children's
pital, Boston; University of Minnesota M
School, Minneapolis; University of Southern
fornia School of Medicine, Los Angeles; St
University School of Medicine, San Fra
Syracuse University College of Medicine, Sy

$37,500 for cooperative research studies, of
$16,170 is for a special training program fo
diovascular investigators under Dr. Carl J.
gers, Western Reserve University, Clevelan

$25,000 to two established investigators:
to Dr. J. R. Elkinton, University of Pennsyl
for research in cardiovascular physiology
$12,500 to Dr. W. Mommaerts, Duke Univ
for research in the biochemistry of muscula
traction.

$25,000 to two established investigators:

fund-raising campaign of the Ame
Heart Association and its affiliates w
for February 1-28, with American
Week February 13-20. The goal was $6
000, with the usual division of 70% to
associations and 30% to the national

NATIONAL HEART INSTITUT

In 1948 the National Heart Institute
created by Act of Conress. It is nov
of the institutes of health within
framework of the U. S. Public H
Service, with administrative headqua
in Bethesda, Md. In addition to more
$1,200,000 allocated to projects under
in 1949, the Institute made a further
for 1949-1950 of $8,614,737.

Of this sum, $5,890,395 was for res
laboratory facilities in 22 non-federa
stitutions; $2,053,310 for 189 researc
vestigations in 66 non-federal institu
in 28 States and the District of Colu
$671,032 for improving and expa
cardiovascular teaching in 46 me
schools in 28 States and the Distri
Columbia.

LIFE INSURANCE FUND

Francis R. Dieuaide, M.D., New
is scientific director. Since it establ
its awards for research on diseases o
heart in 1945, the Life Insurance Me
Research Fund has allocated $2,57
This included, for 1945-1948. $1,688,39
170 institutional grants and $207,875 i
fellowship awards. The total for 194
$677,280: $590,030 for 56 institutional g
and $87,250 for 25 fellowship awards.
grants helped 128 programs of resear
diseases of the heart and arteries, an
awards provided aid for research in
stitutions located in 29 States, 4 Can
provinces and 2 foreign countries. Ir
the fund expects to allocate about $70

HELEN HAY WHITNEY FOUNDA

T. Duckett Jones, M.D., New
medical director. Established in 194
foundation planned to devote its e
income to rheumatic fever and rheu

disease. From July, 1947 through
, 1949, it made 18 grants totalling
4 as follows: 1947, $58,130; 1948, $157,-
949, $177,376.

MASONIC FOUNDATION

Masonic Foundation for Medical
rch and Human Welfare, established
e Masonic Order in New York State
7, raises money within the state to
t rheumatic fever and chronic ar-
. In 1949 it announced grants for
ch to seven medical schools, total-
200,000.

CHILDREN'S BUREAU

U. S. Children's Bureau of the Fed-
ecurity Agency is expending slightly
than $1,000,000 annually in support
eumatic fever programs, under its
orship, in 23 States. It has funds in
e to start three additional programs.

ORTISONE IN ARTHRITIS

or progress in the search for a
on against rheumatoid arthritis was
ted in April, 1949, when Dr. Philip
ich (Mayo Clinic) and associates an-
ed gratifying experimental results
e use of a synthetic hormone made
ox bile acid, isolated by Dr. Edward
ndall (Mayo) and Dr. Lewis H. Sar-
Merck Laboratory). Its technical des-
on is 17-hydroxy-11—dehydro-cor-
terone, called by Dr. Kendall for
nience cortisone. Cortisone is not a
but a control, and daily dosages are
sary. It is so hard to get that 40 head
tle are needed to supply one day's
e for one patient. The Merck Labor-
was able to produce only 200 grams
onth.

Research Corp., a non-profit organ-
n, initiated an investigation of cor-
by the National Academy of Sci-
which appointed a committee,
d by Dr. Charles S. Keefer, Wash-
n, D. C., to allocate the present sup-
r experimental purposes in coopera-
with the National Research Council
he U. S. Public Health Service.
eral other sources of cortisone were
sted. Washington authorities pointed

d that Mexican yams contain some
e chemical ingredients needed.

of large doses of male and female
ormonés (androgenic and estrogenic
ds) to relieve arthritis was reported
embers of the School of Medicine of
niversity of Oklahoma, the doses be-
used in connection with a steroid
d pregnenolone. These ingredients
btained from cholesterol and from
sterols.

EXPERIMENT WITH ACTH

o reported of value in combatting
natoid arthritis, hay fever, asthma,
ha, psoriasis and allergies was ACTH,
rmone obtained from the pituitary
s of hogs. Reports of its use at Johns
ins, Harvard Medical School, North-
rn University and McGill University
made at the conference held in Chi-
by the Armour & Co. Laboratories.
ormone is so scarce that it is esti-
d about 400,000 hogs are needed to
only 1 lb. It has been placed at the
disposal of scientists without charge by Armour & Co.

It is estimated there are 7,000,000 victims of arthritis and 1,000,000 victims of rheumatic fever in the United States.

CANCER

Sources: Sloan-Kettering Institute for Cancer Research, New York, N. Y.; American Cancer Society; Perspectives in Cancer Research, by Cornelius P. Rhoades, M.D.

In the last five years there has been most gratifying progress in many categories of science toward a better control of cancer. Yet cancer remains the second highest cause of death, next to heart diseases, in the United States, and its victims number between 180,000 and 200,000 annually. In 1949, an estimated 278,164 persons were being treated for cancer for the first time; 879,550 others with a history of cancer were living in all the stages from cure to imminent death, while 229,765 had survived treatment for five or more years according to the Sloan-Kettering Institute.

The mounting death rate, which in more than 35 years, has risen nearly 300% for a population increase of about 50%, is attributable chiefly to the fact that cancer is primarily a disease of middle and old age. As the population grows older, there is a corresponding rise in susceptibility and death.

Nevertheless, cancer has been pronounced a curable disease to a large extent, and the death rate, adjusted for the age of the population by the Metropolitan Life Insurance Company, is clearly and sharply on the down grade. This change is ascribed to improved methods of diagnosis, a developing awareness by doctor and patient alike, and greatly improved medical and surgical care.

Cancer is the major cause of death among women aged 30 through 59, and accounts for more than one-fourth of all deaths in this group. It is the second cause of death among both men and women over 60. Cancer of the digestive organs and peritoneum accounted for nearly half of the cancer deaths among men in the United States in 1946, and more than 39% among women. The respiratory and genital systems were the next two important sites in men, and the breast and uterus the next two important sites in women. Leukemia (cancer of the blood) is an important cause of death among children. In general, cancer death rates increase steadily with age, but cancer of the nervous system, lung and bronchus are exceptions, according to the American Cancer Society.

POSSIBILITIES OF CURE

That cancer can be halted, especially by early diagnosis, is demonstrated by the following approximations of percentage of cures drawn up by the American Cancer Society:

Site	Early Diagnosis	Late Diagnosis
Breast	70%	35%
Cervix	70%	15%
Mouth	65%	10%
Lip	90%	15%
Skin	95%	40%
Rectum	37%	3%
Bladder	55%	5%

The regular examination, by competent phyicians, of apparently healthy individuals reveals about 1% with overt but silent cancer, most of which is entirely curable and comparatively easily. Many claims have been made to a precise diagnostic test for cancer, available for the screening of large parts of the population. To date, however, no technic put forward has withstood the test of actual trial except the Papanicolaou smear test. This

method has become widely used in diagnosing early cancer of the cervix and uterus, and is now being applied successfully for diagnosis of the lung.

Accurate and early diagnosis depends upon the cytologist, the physicist and the educator, as well as the practitioner. Curative treatment, still primarily surgical, is undergoing major changes largely because of the work of the bacteriologist, mycologist, chemist and physiologist. Yet their discoveries still do not complete a comprehensive account of the cause, prevention and curative treatment of cancerous cells. To discover why a cell revolts against the body and becomes an eroding growth, experimental research has made progress in the following major subjects:

(1) Heredity: whether the disease is passed from mother to child. General belief is that it is not, but that susceptibility to cancer may be hereditary.

(2) Whether a virus (infectious agent) or external, environmental agitators (carcinogenic agents) such as hydrocarbon compounds or coal-tar products entering the body will incite cancer.

(3) Chemistry of the living cell, particularly the study of enzymes and amino acids.

(4) Hormones, produced by the endocrine glands, or glands of internal secretion, including the testicles and ovaries, adrenals, thyroids and pituitaries.

RESEARCH IN 1949

A review of the findings from research in cancer in 1949 shows progress in the application of the study of cells exfoliated as a diagnostic test for certain forms of cancer; a marked advance principally (1) in the field of radical removal of certain forms of cancer of the uterus, formerly considered impossible to cure; (2) in the ability to control certain serious postoperative complications of cancer surgery by the injection of potassium.

Final proof was established that two forms of cancer (prostate in men and breast in women) can be restrained temporarily by the administration of synthetic products of the glands of internal secretion. This suggests strongly that more effective compounds can be found.

Proof was found that a certain class of chemicals (compounds which have an antagonistic effect on a vitamin called folic acid) is effective in the transient restoration to health of 25% of children with leukemia, a form of cancer up to this time wholly beyond control.

It was also proven that the appetite of one form of cancer—of the thyroid gland—for a particular element, iodine, can be increased to a point which allows effective, though transient, control in certain instances by the use of a radioactive isotope of iodine.

It was found that the new drug cortisone, Compound E., could cause a decrease in the size of certain cancers of the lymph glands without, however, effecting a complete cure.

Other discoveries have resulted in proof that a war gas, nitrogen mustard, and many of its close relations will control temporarily the course of one form of cancer in man; that cancer induction in experimental animals is prevented by dietary means, and that some induced cancer in animals is dependent for growth upon induced chemical circumstances in the host, according to the Sloan-Kettering Institute.

USE OF HORMONES STUDIED

A special committee of the Council on Pharmacy and Chemistry of the American Medical Assn., named in 1947 to stud use of steroid hormones in the treat of mammary cancer, made a repo preliminary results to a conference vestigators in Chicago, Apr. 4 to 7, concluding: "There is now availabl the treatment of breast cancer a weapon in the form of steroid horn . . . useful in treating patients wit tensive and distant lesions who have beyond direct attack on the disease. gical treatment and irradiation, sing in combination, must still be consi the primary forms of treatment."

The therapy with estrogens and a gens was not without dangers; applic of testosterone was associated with h calcemia, hirsutism, voice changes creased libido, endem. The Public H Service, Washington, D. C., on No 1949, granted $907,212 to research tutions in 21 states for the study o relation between hormones and ca

AMERICAN CANCER SOCIETY

The American Cancer Society is the voluntary health agency devoted t control of cancer through education, ice and research. Its nucleus was fo in 1913 at the New York home of Dr ment Cleveland and the first public scription of $10,000 was raised large his daughter, Mrs. Robert G. Mead. C had been approached in fear, shame ignorance and the publication, in 19 an article on cancer by Samuel Ho Adams in the Ladies' Home Journa considered daring.

The society developed slowly, bu the 1930's had broadened its activit include education in cancer for the man as well as the doctor, and to de cancer research facilities and servic prompted the American College of geons to set up standards and plan cancer hospitals, clinics and diagn facilities, and sent a field army of v teers to enlighten women's clubs. In it obtained an Act of Congress esta ing the National Cancer Institute making April National Cancer M By the 1940s its budget reached $8 In 1944 it launched its first national for funds.

In 1945 the society's funds rose to $4 000, then, successively, to $10,000,00 $12,000,000, until in 1948 the figure re $13,500,000. By 1949, Alaska and P Rico had been added to its 59 divi a grant-in-aid program had been b and there were 240 cancer detection ers and 434 clinics in operation.

The public has access to the cancer d tion centers, which give examinations symptoms of this and other diseases. In where no detection center exists, the p is invited to consult the nearest division, v full information for obtaining examina will be given. Consult telephone director location of cancer societies and centers o dress American Cancer Society, 47 Beaver New York 4, N. Y.

For every dollar contributed t American Cancer Society, 25c pays f tionally planned research project remains in the local division wher contributed, and 15c pays for all me professional and public education i cer control, as well as administrativ tistical and consultative services.

Of the estimated $14,000,000 co during the April, 1949, campaign, $1 went for fellowships in 12 states; $1 for grants-in-aid in 32 states; and

or institutional research grants in
tes.
society has charge of the Babe Ruth
r Fund, (page 614) which provided
00 during 1948-49 for cancer research
r states. It cooperates with, but does
ntrol, the Damon Runyon Memorial

TUBERCULOSIS

*ces: National Tuberculosis Association. NTA
l Report April 1, 1948, to March 31, 1948.
York Tuberculosis and Health Association.
ulosis Control Division of Public Health*
e.

berculosis, once known as consump-
or "wasting disease," is seventh and
n the leading causes of death in the
d States. For women it is first in the
of working lifetime and for men
which means that a man between
d 65 loses 16.2 years of his potential
ing life, and a woman in the same
roup loses 24.6 years, if they contract
isease.
1900 tuberculosis was the primary
of death in the United States. Today
nks first only in deaths of persons
een 15 and 34. It is both curable and
ntable, although no specific cure has
found. Its cause, the tubercule bacil-
s known, as are the means of trans-
on and prevention. Nevertheless, it is
y communicable. So far no com-
ly satisfactory immunizing agent has
discovered, although such a vaccine
een used with some success abroad.
e median age of death from tuber-
is today is 46. Ten years ago it was
causes more than twice as many
s in white men as in white women,
the death rate among Negroes is
than three times as high as among
es. While the new cases of tubercu-
registered rose from 133,837 in 1947
5,131 in 1948, the number of deaths
eased from 48,064 to 43,529 in the same

e reason for this decrease is the tre-
lous progress in modern treatment,
as complete rest, collapsible therapy
anti-microbial therapy. These meth-
however, do not necessarily prevent
cases arising from contact with those
have tuberculosis that is neither be-
reated nor isolated, poor living con-
ns with subsequent lowered resist-
and added chances of contagion.
oximately 500,000 persons in the
ed States have active tuberculosis,
of these unknown to health authori-

the recent scientific advances in the
against tuberculosis, the most im-
nt was the discovery of streptomycin
r. Selman Waksman, microbiologist
utgers University. This drug is the
and most hopeful of the antibiotics in
reatment of certain cases of tubercu-
It is toxic, however, and must be
with discretion. More recently para-
aminosallicylic acid (PAS) and promizole
have been found of great value when used
with streptomycin.

REPORTS ON NEW DRUGS

At the Streptomycin conference spon-
sored by the Veterans Administration in
Atlanta, Ga., Nov. 10-13, 1949, attended by
200 specialists in tuberculosis, a coal-tar
derivative from Germany, 4-acetyl-
amino-bensaldehyde-thiosemicarbasone,
or tribione, was cited as an anti-tubercu-
lous agent acting similar to PAS, which
might be used with streptomycin. Another
report, by Dr. Esmond R. Long of the
Henry Phipps Institute and Dr. Walton
van Winkle of the American Medical
Assn., declared that neomycin was not
useful for human beings because of the
danger of over-dosage, and that aureo-
mycin "is of no value in the treatment of
tuberculosis." Another drug, dihydro-
streptomycin, was reported to have no
advantage over streptomycin.

During the last 15 years intensive study
has been made of what may one day be
an effective vaccine against tuberculosis.
This is an avirulent bovine tubercle bacil-
lus called Bacillus Calmette-Guérin
(BCG), named after its French discov-
erers in 1906 and widely used in Europe. In
Nov., 1949, the American Trudeau Society,
the medical section of the National Tuber-
culosis Association, repeated its recom-
mendation of the previous year that com-
mercial firms be licensed under the
National Institute of Health, to produce
BCG as soon as suitable standards could
be established. The society emphasized
that vaccination could not be regarded as
a substitute for hygenic measures or
public health practices.

NATIONAL TUBERCULOSIS ASSN.

Organized in 1904 by medical authorities
and laymen, the NTA is a voluntary serv-
ice agency to its 3,055 affiliated associa-
tions, as well as to the medical profession
through the American Trudeau Society.
The NTA cooperates with the Government
and affiliated associations in studies to
control the disease. It helps state associa-
tions, through grants, to develop services
and new organizations in areas where in-
come is low or the tuberculosis problem
particularly grave.

The association is supported solely by
its annual sale of Christmas seals, begun
in 1907. In 1948 the sale reached $20,153,476,
an increase of 8% over 1947. Of sums col-
lected, 95% remains in the state and ap-
proximately 85% in the city or county
where it is collected. In 1950 the NTA will
get 6% more of the proceeds, and will de-
vote one-sixth of that to research. Mem-
bership is open to the public at $5 a year.
At the end of its fiscal year, March 31,
1949, it had 4,055 members.

FEDERAL AGENCY

In July, 1944, recognition of tuberculosis
as a major public health problem by the
Federal government led to the organiza-
tion of the Tuberculosis Control Division,
which would work through state health
departments in establishing a nation-wide
program based on local needs.

The sum of $10,000,000 was authorized
for the 1945 fiscal year to carry out a pro-
gram embracing four principles: (1) case
finding, (2) medical care and isolation,
(3) after care and rehabilitation, and (4)
protection of the tuberculous family from
economic distress. A further sum of $773,-
000 was appropriated for developing the
central organization of the Division.

Federal appropriation for 1949-1950 was
$9,550,000 for the prevention, treatment
and control of tuberculosis. Grants-in-aid
to various states totaled $6,790,000.

PROGRESS IN OTHER SCIENCES IN 1949

BIOLOGY

Fertilized ova from artificially inseminated pedigreed cows were successfully implanted in the bodies of scrub cows.

Virgin heifers and barren cows were induced to give milk by burying tablets of the synthetic female hormone diethylstilbestrol under their skins.

A blood group in dogs, which, like Rh in humans, may cause jaundice in the young through incompatibility with the mother, was found and named Do.

Early-stage embryos of mice with cells containing three times the basic number of chromosomes were obtained, the first ever reported in mammals.

The cause of swine enteritis, which produces runt pigs, was found to be deficiency of B vitamins; it was cured by vitamin injection.

A female sex hormone was found in fresh young spring grass, which may account for the larger milk yield of cows at that time of year.

Amino acids from urea can be produced in the rumen of cud-chewing animals, it was found.

A cheaper vaccine for the protection of livestock against foot-and-mouth disease was made by culturing the virus on the lining of the rumen.

Proof was found that mosquitoes carry the virus of eastern equine encephalomyelitis.

An inbred strain of corn that produces no pollen was developed, making it possible to grow hybrid seed corn without the laborious and often injurious detasseling process.

Use of hormone sprays reduced the dropping of apples before harvest.

Carbon black was successfully used to raise soil temperature by increased heat absorption from the sun.

Uranium in the form of its nitrate salt was found to cause hereditary changes in widely different kinds of fungi.

Two new insecticides, benzene hexachloride and gammexane, or 666, were found to cause hereditary changes in plants through multiplying the number of chromosomes.

DFDT, apple-scented German cousin to DDT, was found to be a better killer of houseflies than DDT and less toxic to warm-blooded animals and fish.

Pyrethrum was synthesized for insect sprays with more killing power than the natural product.

The aquatic plant pest, water hyacinth, was controlled by spraying with 2,4-D.

DDT-resistant strains of flies were found to require 50 times the normal dose of DDT to kill.

TCA was found to be effective in eradicating quack-grass and Johnson grass as well as prickly-pear cactus, but causes a temporary soil sterility.

Compound 42, chemical relative of dicoumarol, was found in field tests to be a rat killer.

Sudden reduction of osmotic pressure kills certain viruses by "osmotic shock," leaving them "ghosts," that is, empty head membranes with tails attached, it was found.

Actidione, antibiotic derived from the same fungus that produces streptomycin, was found effective against plant-disease fungi.

Micrografting was used to save valuable hybrid plants so weak they couldn't break through the seed-coat normally, attaching them to the stems of stronger, related plants and protecting them in a gelatine capsule.

Seedless figs were produced in half the usual time, by dispensing with wasp pollination, and by spraying instead with the synthetic hormone, 2,4,5,-T.

Plants with large, deep root systems, like corn, make less use of fertilizer phosphorus than do plants with more limited root systems like potatoes, experiments with radioactive phosphorus showed.

The elementary particles, or molecules, of cellulose, consisting of small equal-size rods, were discovered by the electron microscope.

A micro-analysis apparatus was developed which measures the minute quantities of various chemicals present in a cell nucleus.

The virus of mosaic disease in tobacco showed up as tight sheaves of needle-like particles in electron microscope photos.

New preparation techniques enabled bi
to study the nuclei and flagella of bacter
under the electron microscope.

The giant African snail, a plant pes
detected in 15 shipments at American port
was destroyed in all cases.

More flavorful fruit juices were made
by development of a process for extraction
distillation of the "essence" of the fruit.

Elephant seals, once thought extinct,
creasing in numbers off the coast of Mexic

CHEMISTRY AND PHYSICS

Several new atom smashers were comple
under construction during the year: among

rographic study revealed in the upper at-
re two kinds of carbon dioxide; one composed of two atoms of oxygen to one of heavy carbon; the other composed of one atom of ordinary carbon to one of ordinary oxygen and one of heavy oxygen.

PSYCHIATRY AND PSYCHOLOGY

Histamine was found to be effective in treatment of the mentally ill, alone or in combination with electric shock.

Failure of the adrenal glands to respond to stimulation by ACTH from the pituitary was found to lead to inadequacy of the stress-response mechanism; this may be a factor in the production of schizophrenia.

A link was found between the alpha rhythm brain waves and voluntary muscular movements; action tends to take place at the time of the peak of the alpha rhythm.

Kappa brain waves—those electric signals from the brain itself that are associated with thinking—are most active when you are recalling imperfectly learned material and come in bursts as the solution of a problem is found.

The newly founded American Academy for Cerebral Palsy inaugurated a brain registry where brains were accepted for neuropathological studies of cerebral palsy.

On the basis of animal experimentation, regressions and fixations were explained as resulting from early learning too strongly stamped in by excessive motivation or frustration, believed also to account for unreasonable hatred of outsiders.

That crime often has its roots in bickering, nagging and other forms of tension in the home, was disclosed by psychological study of the families of juvenile delinquents and criminals.

Children highly prejudiced against foreigners or minority groups tend to have a biased or distorted memory of things that happen and of stories read to them, it was found.

First study was completed in 10-year program of research on effects of different kinds of groups on the way people act; it was found the highest production occurs when the individuals feel identified with their work.

A temporary loss of sensitivity to sound was found to occur during exposure to sound at all intensities.

Labor Union Memberships

e: Figures on membership of trade unions in the United States are subject to qualifications y cases and uncertainties in others. There is no official check on the membership claims of ions, by either a government agency or the parent labor bodies. The following are figures d by the Department of Labor from union sources:

APPROXIMATE TRADE UNION MEMBERSHIP, JUNE, 1949	
organized workers	16,000,000
an Federation of Labor	8,000,000
ss of Industrial Organizations	6,000,000
ndent or unaffiliated unions	2,000,000

E LARGEST AFL, CIO AND INDEPENDENT UNAFFILIATED) UNIONS	Member-ship

National Marine Engineers' Beneficial Association (CIO)	13,500
International Longshoremen's Association (AFL)	55,376

LABOR REVIEW FOR 1949

Strikes in Steel, Coal, Rails—Communism and Non-Contribu Pensions Become Fighting Issues

An extension of pensions and social insurance, instead of a new rise in wages, became the principal issue in demands by organized labor for new contracts in 1949. Chief of these was the principle of non-contributory pensions, by means of which industries were expected to provide for employees without the latter adding any sums from their pay-checks. To enforce its demands the United Steelworkers of America, C.I.O. called a strike that affected the major units of the steel industry for a number of weeks before settlement in favor of the men. The soft coal industry was largely closed down when John L. Lewis called out the 480,000 members of the United Mine Workers in a maneuver to enforce new contracts for the payment of increased royalties into their pension and welfare fund.

Of importance within the ranks of labor was the ouster of Communist leaders and members from the Congress of Industrial Organizations.

STRIKE AGAINST BIG STEEL

Before a fact-finding board appointed by President Truman, Philip Murray, president, United Steelworkers of America, C.I.O., on July 28 called for a 30-cent-an-hour "package" made up of a 12½c wage increase, 11.23c for pensions (to reach about $125 a month), and 6.27 for social welfare, which would include life insurance and benefits for disability, hospitalization, surgery, etc.

President Truman asked a 60-day truce before a strike, so that his fact-finding board could investigate all claims. Spokesmen for the industry were reluctant to appear, citing the examples of earlier boards, which invariably found for the unions. Benjamin F Fairless, president of U. S. Steel Corp., declared there was "no moral or legal obligation upon us to accept any recommendation that the board might make." Steel men admitted profits were high, but said they were falling rapidly. They feared an increase in wages and pensions would start an inflationary spiral in prices. Representatives of smaller companies told the board they could not afford to meet the demands.

The board ended its hearings Aug. 29 after its offer to mediate on an industry-wide basis had been met by the companies with a proposal for a settlement on a company by company basis. This, the board members replied, would be impracticable because of the many companies involved.

UNION DROPS WAGE DEMAND

In a report to President Truman Sept. 10 the board recommended that the union drop its demand for an increase in wages, saying such an increase would set an example for the industry "with adverse effects upon the general economy." It recommended a pension and welfare plan to be financed by the management, reaching about $70 a month for men of 65, which, with social security payments would bring retirement pay up to $100 a month.

The industry rejected the report as not binding, but offered to resume negotiations. President Murray refused to negotiate further unless the report were accepted "as a basis on which to conclude a settlement." President Truman asked that strike action be postponed until 25, so that the Federal Mediation and ciliation Service, headed by Cyr Ching, could step in. The union inf the President that it accepted the b recommendation to drop demand higher wages. It was said unofficiall U. S. Steel might contribute 10c or to the pension plan, if the union add a contribution.

When negotiations failed Pres Murray called out 530,000 steelwork U. S. Steel and 36 other plants Oct. Oct. 14 John L. Lewis proposed to Wi Green, president, A. F. L., that the U Mine Workers and the A.F.L. unions tribute $2,500,000 to the Steelworke a "common defense fund." Mr. Gree jected the proposal as "impossible impractical." The C.I.O. executive pledged support of the strike an United Automobile Workers put u first $100,000.

The strike spread to 9 of the 25 of the Aluminum Co. of America w Oct. 17, over 16,000 employees walke in a dispute over wages and pensio

COMPANIES ACCEPT PENSION

The first break in the management came Oct. 31 when Bethlehem Steel s an agreement with Mr. Murray p ing for non-contributory pensions o monthly, including social security, a insurance program of 5c an hour, management and employees each co uting 2½c. As a result Ford Moto cancelled plans to lay off 115,000 me cause of the steel shortage.

The Bethlehem contract set an ex for other big steel companies, whi quick succession signed with the U. S. Steel signed Nov. 11 and by N more than 90 percent of the workers back on the job.

The American Telephone & Tele Co. announced Nov. 24 that it had alized its pension plan to bring 600,00 System workers under the Bethl formula. The Communications Work America, C.I.O., protested the acti unilateral and in violation of the Hartley law, contending pensions subject to collective bargaining. So T. & T. subsidiaries signed individua tracts with C. W. A. locals.

JOHN L. LEWIS' ACTIVITIE

John L. Lewis ordered a two-wee cation from work for the 480,000 me of his United Mine Workers Mar. a "memorial" to emphasize that miners had been killed or injured i preceding year. Mr. Lewis professe was because Dr. James Boyd, servi director of the U. S. Bureau of pending confirmation of his nomina that post, had not enforced sufficient guards. The Senate refused to acce Lewis' view and confirmed Dr. B nomination Mar. 22 by a vote of 50

When the miners returned to the Mar. 28, Mr. Lewis warned them: signs indicate that you will have to again during this year of 1949."

The men went out again June 13 one-week "stabilizing" work stoppa reduce coal stock piles and plac union in a better position to negot new contract. The men returned Ju

it again after five days for their 10-day paid vacation. On expira- the U.M.W. contract June 30 and the miners still were on vacation, wls put those in the soft-coal mines the Mississippi on a three-day- schedule. On their return the went back to their jobs without a ct, the first deviation from Mr. "no contract, no work" policy in

controversy over coal centered on elfare and retirement fund of the built up since 1946 by payment by ors of 20c per ton royalty on coal ed. Mr. Lewis found the fund in- te. Outside estimates were that the ad reached $10,000,000 a month but en depleted by high payments for ns, disabilities and death benefits. ne 15, when the fund was down to 000, Mr. Lewis suspended pay-

Josephine Roche, director of the estified before the Senate Banking rrency Committee Aug. 1 that sal- f $35,000 a year were paid to each trustees, Ezra van Horn, operators' entative, and Sen. Styles Bridges H.), neutral. Mr. Lewis, represent- e miners, had declined to accept a salary. On Sept. 16 Mr. Van Horn en. Bridges voted to discontinue salaries and allowances. Mr. Van resigned and the operators named U. S. Judge Charles L. Dawson to e him. His nomination was chal- by Lewis.

MINERS STRIKE AGAIN

sal of members of the Southern Producers Assn. to continue pay- of a 20-cent-a-ton royalty into the W. welfare fund on the ground that gation to do so had ceased with the tion of the contract with the union 30 led to a nation-wide strike of soft-coal miners Sept. 19. Within a oal-burning railroads laid off 30,000

Nov. 9 Mr. Lewis suddenly called off ike, declaring his decision was "an good faith designed to contribute public convenience." But he set 0 as the deadline for a new con- advising public institutions and olds to stock up during the three- period of grace. He also ordered al miners to resume work on a full y schedule.

futile efforts by Ching to arrange ontract talks, Lewis called out soft-coal miners at midnight Nov. ny miners were rebellious because nas was so near, and 10 hours later ended the walkout, putting all ; including 80,000 hard coal diggers, -day-a-week working schedule.

U. S. Supreme Court on Nov. 7 l to review the $1,420,000 fine for ipt imposed on Mr. Lewis and the in April, 1948, by a Federal Court ioring an order to end an earlier The fine was paid Nov. 15.

FORD COMPANY DISPUTES

ging a speedup in assembly lines, ited Automobile Workers, C. I. O., y 5 called out 62,250 employees at rd Motor Co.'s River Rouge and n-Mercury plants in the first strike the company since 1941. In a tele- o Federal Mediator Ching, Henry I described the walkout as a "po- strike" and declared the company resist to the utmost what he called enge to management's right to fix standards. The strike was settled when both sides agreed to submit the speedup issue to arbitration. The arbitrator found for the union.

Early in August, in a three-day election, Ford employees voted, 65,001 to 9,849, to strike, if necessary, to win a fourth-round wage increase, $100 monthly pensions and group insurance. The executive board of the U. A. W. authorized Walter Reuther, the president, to call a strike at any time.

A strike was averted when, on Sept. 29, after six weeks' negotiations, the company and the union agreed on a non-contributory pension plan costing the company 8¾ cents an hour in addition to 1¼ cents for group life insurance. This gave the men the $100 they wanted. The union dropped its wage demands.

A non-contributory pension plan for salaried employees was outlined later by Henry Ford II in a letter to his employees. It contemplated $100 a month pension to those retiring at 65 after 30 years of service, and proportionate amounts for those retiring after serving a shorter period. The plan was to be retroactive to July 1, 1949, if approved by the Treasury Dept., and begin Apr. 1, 1950. A voluntary contributory pension plan was outlined for employees earning over $3,600 a year, who wished to supplement the foregoing.

An agreement between the B. F. Goodrich Co. and the United Rubber Workers, C. I. O., Sept. 30, under which company contributions to existing pension and insurance plans were increased by 10 cents an hour ended a 35-day strike of 16,000 employees in plants in seven states.

HAWAII STRIKE SETTLED

Three of Hawaii's ports, including Honolulu, were tied up May 1 by a strike of 2,000 members of Bridges' International Longshoremen's and Warehousemen's Union, who demanded a 32c hourly wage increase or arbitration. The Territorial Legislature Aug. 6 passed a bill giving Gov. Ingram M. Stainback temporary powers to seize and operate the strike-bound docks, and the Governor then signed orders for the seizure of two major stevedoring firms and the hiring of longshoremen to work the docks. He declared, by proclamation Aug. 17, all of the territory's ports open. The Isthmian Line's freighter William Allen sailed from Honolulu with 11,000 tons of pineapples despite union picket lines. The strike was settled Oct. 6 when Bridges and seven stevedoring firms signed a contract providing for an immediate wage increase of 14c an hour and a second of 7c on Mar. 1, 1950.

PRINTERS' STRIKE ENDS

A composing room strike by the International Typographical Union, A. F. L., against five Chicago daily newspapers, which began Nov. 24, 1947, was settled Sept. 14 when the publishers and the union agreed on a $10-a-week increase. The strike began when Chicago newspaper publishers refused to renew a contract for a closed shop because it violated the terms of the Taft-Hartley act. While unions in other cities were able to maintain old and satisfactory employment arrangements with their employers despite the change in the law, the Chicago locals elected to strike. For nearly two years, while the composing rooms were idle, the Chicago newspapers appeared regularly by means of the Varitype-photoengraving process, which produced a legible page but was slower in composition. The newspapers were the Daily News, Tribune, Herald-American, Sun-Times and Journal of Commerce.

The N. L. R. B., Oct. 28, held the union guilty of violating the Taft-Hartley law

by seeking to impose the closed shop on newspaper publishers, and directed it to desist from such practices.

A strike over interpretations of work rules was called by four operating unions against the 7,200-mile Missouri Pacific Railroad Sept. 9. The walkout of 5,200 engineers, firemen, trainmen and conductors threw 26,000 non-operating employees out of work. The strike ended Oct. 24 when, at a conference called in St. Louis by the governors of eight states served by the road, the unions and the company settled all but a few of 282 points at issue.

A strike of 1,700 members of the U. A. W., Local 501, against the Bell Aircraft Corp. at Buffalo, N. Y., which began June 13, was ended Oct. 18 when the union and the company agreed to a formula proposed by federal and state mediators, providing for resumption of direct negotiations 30 days after termination of the walkout. If these negotiations proved unsuccessful, the issues were to be submitted to a fact-finding board. The union's principal demand was a 15-cent hourly wage increase. Several flareups of violence marked the strike.

LABOR CONVENTIONS

American Federation of Labor—At the opening session in St. Paul, Minn., Oct. 3, President William Green, by inference, criticized the C. I. O. for agreeing to the recommendation of the fact-finding board to waive wage increase in favor of pensions and insurance benefits, declaring that the A. F. L. unions would continue to seek higher pay and share in the profits of the employing interests. He also criticized acceptance by the steelworkers of the principle of a board of inquiry.

Green further emphasized that in the A. F. L. there had never been a division between left and right wing groups, and the organization, he said, was united as never before.

President Truman, in a message, and Secretary of Labor Tobin, in person, promised the C. I. O. to continue to fight for repeal of the Taft-Hartley law.

The convention adopted resolutions calling for defeat in 1950 of nine Republican and four Democratic Senators, and Labor's League for Political Education asked for contributions of $2 each from the 8,000,000 A. F. L. members for the 1950 campaign, though it hardly expected a full response.

Other resolutions denounced "Soviet imperialism," urged continued aid for non-Communist China, and challenged the authority of Harry Bridges' International Longshoremen's and Warehousemen's Union in Hawaii. The convention also launched a drive to recruit 1,000,000 new members in 1950 as a memorial to Samuel Gompers, first president of the A. F. L., in honor of the centennial of his birth.

Congress of Industrial Organizations—A report by President Philip Murray calling for the elimination of Commun fluence in some C. I. O. union adopted at the opening session in land, Oct. 31. As the first step th vention adopted a constitutional a ment barring Communists, Fascis followers of "other totalitarian doc from membership.

On Nov. 2, the convention voted pel the United Electrical, Radio ar chine Workers and the United Equipment and Metal Workers of ica as Communist-dominated. Conv leaders charged the U. E. had laid two months earlier to bolt the C and form a left-wing federation. Th jurisdiction was at once turned o a new union, the International Un Electrical, Radio and Machine W

It was estimated that the C. I. O 40 unions having over 6,000,000 me had 11 unions with about 1,000,000 bers dominated by left-wingers, inc Communists. The United Electrical ers numbered over 400,000 and the Equipment Workers about 50,000. between right and left-wing membe sulted at once in numerous industr

Among the 10 board members r for expulsion from the C. I. O. was Bridges. Ten unions, including B were faced with expulsion. Their were accused of having support aims of the Communist party. One member, Ben Gold, representing th Workers Union, an admitted Comm was not seated.

In resolutions the convention demned the Soviet Union and Spain, urged support of the Unit tions, and endorsed President Tr Point 4 plan for aid to the world's developed areas.

The convention of the National time Union, C.I.O., in Septembe voted to exclude Communists from membership, but refused to expe already in the union. The split wit union led to brawls between righti leftists over possession of the union York City headquarters, the issu being taken into court.

William Green and George Mean reelected president and secretary urer respectively of the A. F. L. Philip Murray and James P. Care reelected president and secretary urer of the C. I. O. Both organi sent delegations of their chief offi take part in the international labo ference at London Nov. 28-Dec. 9 to form an organization in opposi the Communist-dominated World F tion of Trade Unions. Delegates f countries and representing 48 workers adopted a constitution c the International Confederation o Trade Unions, pledged to fight for ing class liberty and against totali ism—rightist as well as Comm everywhere. Brussels was chosen manent headquarters.

of Taxes	2,160,000,000
etirement—Sinking Fund	629,191,100

dent Truman, in January, recom- d a 48-group Air Force to Congress. ss voted money for a 58-group a total of $2,679,000,000 for aircraft. esident, signing the bill, instructed e Secretary Johnson to withhold 0,000, because the increase in air- procurement for 58 groups would tate additional funds for personnel, nance and operation, as well as a n of defense plans. Secretary John- o trimmed his aircraft budget $340,- making a total of $955,000,000 with- nough voted by Congress.

ATOMIC ENERGY—DEFENSE

Congress removed restrictions on construction projects of the Atomic Energy Comm. Provided for construction of new military projects in Alaska and Okinawa. Removed limitations on cost of two experimental submarines. Authorized a system of land-based aircraft warning for defense. Authorized a guided missile research laboratory an a long-range proving ground for guided missiles and other weapons and a flight-test range at least 3,000 miles long. Authorized $252,000,000 for wind tunnels, testing laboratories, etc., which includes $100,000,000 for the Air Engineering Development Center of the USAF. The air-warning radar network gets $50,000,000 of a projected $160,000,000; the long-range proving ground gets $12,500,000 of $75,000,000. The National Bureau of Standards gets $4,400,000 for a radar laboratory and $1,900,000 for research in guided missiles. The Air Force total appropriation in money and orders reached $6,031,000,000. The Navy Bureau of Aeronautics gets $1,618,000,000.

COMMODITY CREDIT CORP.

Congress empowered the Commodity Credit Corp. to acquire realty for storage when private facilities are inadequate, and to make loans to grain growers to build new storage facilities, deducting these loans from proceeds of price support loans and purchase agreements. The CCC may acquire critical materials abroad in exchange for agricultural commodities, transfering them to the Strategic and Critical Material Stockpile. Control placed in Secretary of Agriculture, who appoints board of 6, officers and employees.

EXECUTIVE REORGANIZATION

A bill adopting the measures proposed by the Commission on Organization of the Executive Branch of the Government (Herbert Hoover, chairman), passed by voice vote of both houses. Carries proviso that either house by majority vote can disapprove a plan proposed by the President after it has been before Congress for consideration 60 days.

See Hoover Commission Report, page 283 of this Almanac.

FARM PRICE SUPPORT

Agricultural Act of 1949 supports basic commodities—corn, wheat, cotton, tobacco, rice and peanuts—on sliding scale: 90% of parity through 1950; not less than 80% in 1951; thereafter between 75% and 90% as needed. Flexible price supports are provided for butter, milk, etc. Discretionary power is given Secretary of Agriculture to apply price supports to many non-basic commodities. Farm labor included as farm cost, increasing parity prices about 6%, on the modernized Anderson formula. The older parity formula is retained for 4 years. (Public Law 439)

To be ready for disasters Secretary of Agriculture was authorized to make loans from a revolving fund of $44,000,000. (Public Law 38)

Rural Electrification Administrator was authorized to finance rural telephone improvements by self-liquidating loans at 2% annual interest. (Public Law 423)

Farm-wide, multiple-crop insurance authorized in 50 counties. (Public Law

268) Secretary of Agriculture may establish national marketing quota for cotton to adjust supply to the market, when necessary. (Public Law 272) Farm loan policy extended to Puerto Rico and Alaska. (Public Law 433)

FOREIGN ARMS AID

To help nations of the UN to resist direct or indirect aggression and to maintain internal security Congress authorized $1,314,010,000 for military aid through June 30, 1950, of which $814,010,000 already had been appropriated. (Public Law 329) Of this $400,000,000 will be available when the President approves a defense system under North Atlantic treaty. Greece and Turkey get $211,370,000; Iran, Korea and Philippines, $27,640,000; China, $75,000,000 at the President's discretion. Contracts not obligated until after June 30, 1950, get $500,000,000. At least 50% of armed cargo must be shipped in American vessels. It is estimated that aircraft and aircraft machine tools will take $234,769,975 of total.

FOREIGN ECONOMIC AID

This totals $5,659,990,000 and includes $4,852,380,000 allocated to Economic Cooperation Administration (Marshall Plan) which was extended to June 30, 1950. ECA cash will be $3,628,380,000; loan fund of Export-Import Bank will be $150,000,000.

For Marshall Plan see page 746 of this Almanac.

HEALTH AND HOSPITALS

Congress authorized $150,000,000 for year ending June 30, 1950, and for each of five succeeding years, for construction of public and nonprofit hospitals, Federal share not to exceed 66⅔% of state's allotment. Authorized $1,200,000 to states, hospitals, universities and nonprofit institutions for research relating to hospitals. (Public Law 380)

Also $1,500,000 in additional grants to states for crippled children for year ended June 30, 1949. (Public Law 42)

MILITARY UNIFICATION

Department of National Defense—A bill reorganizing the National Military Establishment as a Department of National Defense was approved by the Senate by voice vote; passed by the House, 356 to 7. Provides for a Secretary of Defense with authority over Army, Navy and Air Force, which become departments with separate administrations. Consolidated action is forbidden, as also is abolition of functions or reassignment of personnel of Army, Navy, Air Force and Marine Corps. Secretaries and joint chiefs of staff of the services retain the right to carry recommendations direct to Congress. (Public Law 216) Another law provides for promotion of Under-secretary of Defense to Deputy Secretary and creates three assistant defense secretaries, one with fiscal duties. (Public Law 36)

MINIMUM WAGE

Congress raised minimum wage from 40c to 75c an hour, giving increases to over 1,000,000 workers. Wage and Hour Administrator can sue for back wage claims on behalf of employees; employees of retail firms doing more than 50% of their business in one state, newsboys, messengers, taxicab operators exempt. (Public Law 393) Expected to add $300,000,000 a year to paychecks.

Overtime Pay—Congress outlawed overtime on overtime, covering all industry, making ban retroactive and prospective. (Public Law 177)

NATIONAL HOUSING ACT

Authorizes 810,000 additional lo units at 135,000 units a year for 6 yea pending on needs, Government m up difference between justifiable re costs up to maximum of $308,000,000 with $1,500,000,000 available for loar revolving fund, for 4 years. Cos equipment limited to $1,750 per roo up to $750 additional available if n Disabled and other veterans to have erence, including those dispossess slum clearances.

Authorizes $1,000,000,000 in loans 5 years for slum clearance and $500, in Federal grants over 5 years to meet losses incurred, Federal Gover taking two-thirds of loss. Not mor 10% of funds to be used in any one Dispossessed must be provided for

Also loans aggregating $250,000,0 improving farms for 33 years at self-sustaining farmers; loans and sidies, the latter not exceeding $5, annually, to farmers not self-susta loans for improvements up to $1,0 grants up to $500 per individual, to $25,000,000. (Public Law 171)

Congress also provided means fo rental housing at military install (Public Law 211); facilitated housin struction in Alaska (Public Law 5 extended insurance and mortgage ties of the FHA and Federal Na Mortgage Assn. (Public Laws 176, 27

PALESTINE REFUGEE FUNI

Congress appropriated $16,000,000 fund for relief of 500,000 refug Palestine, Syria, Lebanon, Transj Egypt and Iraq, this being 50% of which other nations will complete. lic Law 25)

PAY INCREASES AUTHORIZI

Increase in Salaries—President, $75,000 to $100,000 a year, with tax-fi pense account of $50,000 a year. Vice dent, from $20,000 to $30,000 a yea tax-free expense account of $10,000 Speaker of House, from $20,000 to a year, tax-free expense allowan ing from $2,500 to $10,000 a year. Se of Defense and other heads of ex departments from $15,000 to $25,000 Heads and assistant heads of pendent agencies, and asst. heads ecutive depts. up to $22,500 a year. defense secretary, $20,000. Army, and Air Force secretaries, from $1 $18,000. White House staff: 2 at 3 at $18,000; 7 at $15,000. An aver crease of $140 went to 885,000 civil workers and of $120 to 500,000 pos ployees.

Total increase est., $516,000,000

For new Army, Navy and Air Fo scales see pp. 730-731 in this Alman

PUBLIC WORKS

Congress authorized $100,000,00 years to aid states and localities pare plans for public works, to b for construction during hard times lic Law 352)

Congress appropriated $40,000, new public buildings outside Dis Columbia and $30,000,000 for mo tion of old ones. (Public Law 105)

RENT CONTROL

Congress extended Federal re trol through June 30, 1950, but p for decontrol by state legislatu local bodies approved by Gove gave veterans preference in purch

l; provided for fair adjustments to ts and small landlords and a fair perating income for landlords; pro- for recontrol by Housing Expediter ts skyrocketed and control over evic- (Public Law 31) Senate voted 78 52 Dems., 26 Reps.), 11 against (11). House voted 263 for (196 Dems., ps., 1 AL), 143 against (95 Reps., 48 .).

OTHER TRANSACTIONS

gress appropriated $500,000 addi- for the presidential relief fund for -bound states of 1949 . . . Approved l stamps for Alexandria, Va., and polis, Md. . . . Continued Freedom for 2 years . . . Invited 1956 Olympic s to Detroit . . . Sent U. S. Marine to final G. A. R. encampment . . . ted Leland Olds for third term as nan, Federal Power Commission . . . ted Mon C. Wallgren as chairman, nal Security Resources Comm., con- d him as chairman, Federal Power n. . . . Rejected Carl A. Ilgenfritz as of Munitions Board . . . Confirmed nan Minton as associate justice, Su- e Court; James M. Mead as member al Trade Comm. . . . Authorized con- ion of Folsom dam and reservoir on ican River, California, as part of al Valley project, with storage of 00 acre-feet, and hydroelectric plant 0,000 kw., and smaller plants; rev- to aid new projects . . . Extended dent's export controls to June 30, continued war import controls on oils, butter, rice and rice products July 1, 1950 . . . Agreed that a two- vote on motion to take up legisla- ay cut off debate, stopping filibuster.

MEASURES THAT FAILED

or-Management Relations Act, 1949—ill, sponsored by Senators Taft, R., nith, R., N. J., and Donnell, R., Mo., assed by the Senate June 30, 51 to th 34 Reps., 7 Dems., for; 35 Dems., s., against. Bill, which repealed the Hartley act and amended the Wagner 1935, contained the principal provi- of the Taft-Hartley act with changes. minated mandatory injunctions in dary boycotts; prohibited secondary tts except where struck work had transfered to another plant; contin- rohibition of closed shop but allowed yers to notify unions of vacancies in to produce qualified applicants; re- prohibition on feather-bedding; ed employers as well as employees n non-Communist affidavits; put tion of union welfare funds under ary of Labor; confined check-off to nd initiation fees; provided for 60- junctions and plant seizures and ap- nent of an emergency board by the President if a labor dispute becomes a national emergency, with submission of recommendations to Congress, etc. No action taken by House, hence Taft-Hartley act remained public law.

Displaced Persons Act—An attempt to liberalize entrance provisions held in Senate Judiciary committee until Oct. 12; then recommitted for later report by vote 36 to 30.

Civil Rights—A Federal law to abolish poll tax as requisite to voting, now operative in 7 states, and other discriminations, passed House but remained in a Senate committee. Bill to give suffrage and self-government to residents of District of Columbia passed Senate and remained in a House committee.

National Health Insurance—Details of bills on page 623 of this issue of the WORLD ALMANAC.

Federal Aid to Education—Passed the Senate only. Authorizes $300,000,000 annually as aid to states on basis of $5 to $25 per child, provided state assumes fair percentage of expenditure.

Social Security—A bill to extend coverage to about 11,000,000 not now covered; to increase return to present beneficiaries by about 70%; to cover totally disabled persons regardless of wage and give veterans a wage credit of $160 a month for time in service and one-half of 1% for each year of coverage. Passed by House only.

Pension Increase—A bill to "liberalize pensions to veterans, widows and children, at an estimated cost of $67,000,000 to the Government." Passed by House only.

Oleomargarine—Bill to repeal tax of 10c a lb. on yellow-colored oleomargarine passed House, 287 to 89; was held up in Senate to be called up at 2nd session. (Debate on oleo has now run 50 years).

Presidential Powers—President's demand for authority to send arms anywhere without reference to Congress was eliminated.

BILLS VETOED

President Truman actually vetoed 33 bills, but one, a personal relief bill, was passed over his veto. In 20 other bills for personal relief (tax and civil disabilities) his veto stood.

He also vetoed: a project for the rehabilitation of lands of the Navajo and Hopi Indians, which, it was believed, would work to their disadvantage; a bill that certain lands draw water from the San Luis Valley project, Colorado; a bill to provide automobiles for certain disabled veterans; an amendment to the contract settlement act of 1944; relief for the cities of Reno, Nev., Miles City, Mont., and Needles, Cal.; a bill authorizing the Bureau of the Census to furnish information free; an Army and Air Force vitality and retirement equalizing act; the Vermejo reclamation project in New Mexico; a bill to provide U. S. aid in certain fish restoration projects and a recreation plan for the Colorado-Big Thompson project.

FARM PRICE SUPPORT BY U. S. GOVERNMENT

Operations of 15 Years; Loans on 1949 Crops; Storage Costs for One

Source: Commodity Credit Corp., U. S. Dept. of Agriculture

The Commodity Credit Corporation was created Oct. 17, 1933, pursuant to Executive Order and became a part of the Department of Agriculture, 1939. It is authorized to engage in buying, selling, lending and related activities in agricultural commodities, with the object of supporting farm prices. The 81st Congress, in its final sessions, voted price support to be 90% of parity for 1950, 80% to 90% for 1951-1952 and 75% to 90% thereafter. Since Aug. 18, 1945, the CCC has been a part of the Production and Marketing Administration of the Department of Agriculture, the adminisrator of the latter also being president of the CCC.

OVER TWO BILLION LOSS

The consolidated report of the results of buying and selling farm commodities to support prices covers the period Oct. 17, 1933, through July 31, 1949, or since the organization of the CCC. This indicates a total loss of $2,167,395,368. The principal items are:

Price Support		
Basic Commodities	Gain:	$126,675,811
Non-basic Commodities	Loss:	374,897,894
Other Commodities	Loss:	143,879,813
Net Loss		$392,101,896
Supply Program	Gain:	300,842,039
Foreign Purchase Program	Gain:	50,231,583
Commodity Export Program	Loss:	13,746,745
Others	Loss:	65,463,192
Wartime Consumer Subsidies	Loss:	2,101,932,176
Grand total,	**Loss:**	**$2,167,395,368**

The itemized report shows that the CCC in its price support program lost $34,620,064 on corn, $22,334,183 on wheat, and $27,225,140 on peanuts. It lost $41,361,218 on Puerto Rico cotton, but gained $236,096,731 on domestic cotton. In ing under the Steagall act, in non-basic cor ties, it lost $38,486,733 on eggs and $340, on potatoes.

On commodities in the third categor CCC reports a loss of $82,004,456 on wool, o 517,269 on sugar beets, of $21,457,300 on hen hemp fiber. The loss on grapefruit juice w 732,374, all in 1948. Support of prunes be 1948 and has reached $8,512,512.

The foreign purchase program shows a g $38,954,713 for fats and oils.

LOAN OPERATIONS

Loans on commodities to support prices standing July 31, 1949, had a total of $1,40 626.42. Of these loans the largest were on cotton, $600,369,076.99; corn, $477,425, wheat, $151,624,090.77, and tobacco, $13 322.27. These included loans by the CC lending agencies.

Loans on 1949 crops, including loans ap but not fully processed, grouped by PMA territories and reported as of July 31, 1949,

Atlanta (9 S.E. States)	$7,080,3
Chicago (5 N. Midwest States)	3,097,5
Dallas (5 S. & S. W. States)	73,992,0
Kansas City (5 Western States)	41,083,5
Minneapolis (4 N. Midwest States)	1,0
New York (12 N. E. States)	1,249,6
Portland (3 W. and N. W. States)	1,620,6
San Francisco (4 Western States)	8,450,1
Total 1949 crop loans	**$136,575,0**

CROPS IN STORAGE, Oct., 1949

Farm products in storage in mid-October, 1949, the latest figure available to the WORLD AL are given below.

Commodity	Quantity	Estimated value (cost)	Estimated per day storag
Cotton, bales	3,793,561	$602,341,615.58	$37,9

Why the Self-Starter for Motor Cars Was Invented in the U. S.

From Automobile Facts, Detroit.

If most early European cars had not been chauffeur-driven, the U. S. automotive industry might never have heard of C. F. Kettering, its best-known research expert.

Kettering was part owner of a tiny electrical engineering shop in Dayton when, in 1911, he built the electric self-starter that was to end the hand-crank era in motoring.

European car firms had worked on self-s but gave up because Europe's car buyers want them. They had chauffeurs to cran cars.

But since most U. S. cars were owner- Kettering's starter won instant approval. women begin driving, let engines grow powerful, and sped the day of mass ow of cars.

STATE OF NEW YORK

State of New York, known as the Empire was one of the original 13 states that t the American War of Independence. It amed by Charles II, King of England, for rother, the Duke of York, when he ordered Netherland taken from the Dutch in 1664. olony had a population of 180,000, chiefly of h and Dutch origin, when it declared its endence of Great Britain July 9, 1776. It ed its first constitution April 20, 1777 and elected George Clinton governor. It ratified the Constitution of the United States July 26, 1778. New York City became the first capital of the United States and George Washington took his oath as first President in Federal Hall, at Broad and Wall Sts., April 30, 1789.

A new estimate of the population of New York State on July 1, 1949, was made public Nov. 1 by the U. S. Bureau of the Census. It was placed at 14,392,000, an increase of 913,000, or 6.8% over the census of 1940.

Unemployment Insurance in New York State

Source: New York State Department of Labor

8—Contributions, ¢150,714,035; benefit payments, $184,407,661; interest, $21,796,048; refunds by ants and other States, $479,743; funds on hand, December 31, $1,055,655,766.

e Unemployment Insurance Law of the State w York, the second of its kind to be enacted is country, became effective April 25, 1935. Federal Social Security Act was not enacted August 14, 1935, and under the terms of its IX the New York Law was approved by the l Security Board on Jan. 24, 1936.

ms of Law—At the 1944 legislative session the e Law was recodified, i.e., was reorganized ut substantive change to secure greater sim- y and more orderly and logical arrangement. ther 1944 amendatory acts modified the re- Law.

the 1945 session of the Legislature, a system et up for allocating credits to individual em- rs against contributions payable if a "surplus" in the Unemployment Insurance Fund. ribution credits to employers are allocated when the Fund exceeds the lesser of 3½ times contributions due for the previous calendar at the rate of 2.7 per cent, or $900 million. excess reserve over this amount, up to a mum of 60 per cent of contributions due for preceding year, is allocated among qualified oyers. Each employer's credit is based on a ination of three factors which measure his rience with the risk of unemployment: (1) s paid to his former employees who have drawn ast 4 benefit payments compared with the oyer's total payroll, (2) decreases in his erly payrolls, (3) the number of years during h he has been liable for contributions. A total 26,047,296 in tax credits was established for as against $148,560,179 in 1947, $84,163,097 in and $72,366,750 in 1945.

ner 1945 amendments extended the maximum tion of benefits from 20 to 26 weeks, raised the mum weekly benefit rate from $18 to $21, and ced the waiting period before receipt of benefits two weeks to one. In 1948 the maximum ly benefit rate was increased to $26.

or to the 1945 amendments the most important ges in the Law had been affected at the 1942 on of the Legislature. Before that date, a rement for benefit was that unemployment be experienced during seven consecutive days. legislation, known as the "day-base" plan effective on and after Nov. 30, 1942, substi- l the day for the week as a unit for measuring nployment, and supplied a single method for State to deal with partial as well as total un- oyment. The 1942 Legislature also raised the mum benefit rate from $15 to $18, increased duration of benefit payments from 13 to 20 s, and reduced the waiting period from three o weeks. At the 1943 session of the Legislature minimum benefit payable to eligible workers raised from $7 to $10.

What Employer Pays

nployer contributions to the Unemployment rance Fund became assessable Jan. 1, 1936, e rate of 1 per cent of insured payrolls during at 2 per cent during 1937, and at 3 per cent ng 1938 and 1939. By a 1940 amendment to Law, the contribution rates for 1940 and eafter were reduced from 3 to 2.7 per cent. nning July 1, 1945, actual rates could be lower 2.7 per cent because of the rate credit pro- n in the Law. As required by the Social rity Act, all monies collected under the New State Unemployment Insurance Law are de- ed with the Secretary of the Treasury in an nployment Trust Fund, subject to requisition he State Division of Placement and Unemploy- Insurance for the payment of benefits as ided under the State Law. Contributions are ble quarterly and must be accompanied by led payroll reports. However, employers who e to furnish within four days, wage information ndividual employees upon demand, may request e relieved from the usual submission of the led quarterly payroll reports. Since Jan. 1, contributions are payable on the first $3,000 ages of all workers in the employ of covered oyers.

nployers not subject to the Law may become ntarily insured for an initial two-year period for one-year periods thereafter with the con- of the Industrial Commissioner. Both subject non-subject employers are required to keep rate records of wages paid to each employee. subject, an employer ceases to be subject after he has not within any 15 days in the eding calendar year employed four or more ons in employment subject to the Law. An oyer who has become subject to the Law and lly fails to notify the Industrial Commissioner uch fact within six months is subject to a lty in the amount of 100 per cent of accrued ributions not to exceed $500 nor to be less $50 for each calendar year. A delinquent employer who erroneously contributed to the unemployment compensation fund of another State, however, is not held liable for penalties and interest.

Coverage—Employment of four or more persons within each of 13 or more calendar weeks in the years 1935 and 1936 made employers subject to the Law on and after Jan. 1, 1936. Employment of four or more persons within any calendar year after Dec. 21, 1936, makes an employer subject to the Law on and after the first of the fifteen days within which such employment occurs.

Tips, bonuses, vacation pay, and other gratuities are wages on which contributions must be paid; dismissal wages, except under special circumstances, are not. Payments made by an employer under a retirement, sickness, or accident disability plan, effective Jan. 1, 1940, are not wages to be used as a basis for benefit payment.

Exemptions

Exemptions under the Law include: Employers of agricultural labor as defined in the Law; employers of spouse or minor child; non-profit-making religious, scientific, charitable, literary, and educational bodies, New York State's municipal corporations and other governmental subdivisions (except certain employees of the State government); employment as a golf caddy; employment during all or any part of the school year or regular vacation periods as a part-time worker of any person actually in regular attendance during the day time as a student in an institution of learning (as amended on April 1, 1942); and employment covered by the Federal Railroad Unemployment Insurance Act.

Any employer not otherwise liable for contributions may provide coverage for his employee or employers if, as of January 1 of any year, he files an application with the Industrial Commissioner for coverage for not less than two years. By amendment, effective April 6, 1948, any municipal corporation or other governmental subdivision may elect to become liable for unemployment insurance benefits in lieu of contributions.

The New York Court of Appeals in October, 1942, decided that maritime workers are covered under the State Unemployment Insurance Law. Prior to this decision, officers and members of crews claiming benefits had been adjudged not subject to the jurisdiction of the Law. By a 1943 enactment of the Legislature, provision was made that for the period prior to January 1, 1942, no contribution shall be payable on wages paid to officers or members of crews on vessels. A 1945 amendment relieves employers of liability for contributions on wages paid before January 1, 1945, for certain services on vessels engaged in interstate or foreign commerce.

A 1944 enactment authorized the Industrial Commissioner to enter into reciprocal agreements with other States in regard to coverage of services on vessels engaged in interstate or foreign commerce. It adjusted the definition of employment to conform to such agreements. An Interstate Maritime Reciprocal Arrangement accepted by the Industrial Commissioner on October 11, 1945, defines service for the purposes of the Arrangement and provides means for establishing the identity of jurisdiction of coverage. Amendment of the Federal Unemployment Tax Act in 1947 extended federal coverage to the maritime industry on similar terms.

Benefits Payable

Benefits are payable according to a fixed schedule in the Law. Benefits depend upon the earnings of the benefit claimant in the "base year" (the calendar year immediately preceding the "benefit year"). Formerly, a new "benefit year" for all claimants began on each April 1; on June 1, 1942 and thereafter, the "benefit year" is the period from the first Monday falling in June of each calendar year to and including the Sunday which follows the last Monday in May of the next calendar year.

A provision relating to special eligibility and benefit conditions for seasonal workers was repealed in 1946. This provision had never been operative.

If "reasonably fitted" by training and experience, eligible claimants must accept offered employment unless its acceptance includes joining a company union, jeopardizing his labor union status, working in an establishment where an industrial controversy exists, working for substantionally less than the wages, hours, or conditions prevailing for similar work in the locality, or working at a place unreasonably distant from home or requiring expenses of travel substantially greater than that required in his former employment unless the expense is provided for. An employee may also refuse employment for other "good cause."

but benefits are not paid if the employee has withdrawn from the labor market.

A 1941 amendment to the Law provided a disqualification for workers who voluntarily leave their employment without good cause. Another amendment, in effect Sept. 29, 1941, provided for a 7-week suspension of accumulation of benefit rights rather than an extended waiting period for loss of employment due to misconduct, a strike, lockout, or other industrial controversy. The same amendment made provision for reduction of benefits in cases of wilful false statement or representation to obtain benefits.

Provision is made in the Law for hearings by referees on disputed points with regard to benefit claims or with regard to determinations affecting employers' liability. Appeal may be made to the Appeal Board and then, on questions of law, to the Appellate Division of the Supreme Court, Third Department.

Employment Service—On Jan. 1, 1942, the State employment offices were temporarily taken over by the Federal Government to expedite the mobi tion of manpower for the war emergency. The dustrial Commissioner was authorized to use facilities of Federal employment offices within State for unemployment insurance purposes likewise to offer the use of State insurance of to Federal social security agencies. Termina of Federal control of the Employment Service curred on November 15, 1946.

Cooperative Agreements—A 1943 legislative actment extended the power of the Industrial C missioner with regard to cooperative agreem for making investigations and securing infor tion in connection with the administration of employment insurance. Foreign governments addition to appropriate State and Federal agen may now be parties to such agreements. Ap priate arrangements have been worked out Canada. A plan for combining wage credits claimants who have insufficient earnings to qu in any one State is also in operation with a n ber of other States.

New York State Personal Income Tax Law

Source: State Income Tax Bureau

New York State adopted the personal income tax in 1919. The law provides, with respect to any taxable year beginning on or after October 1, 1934, as follows:

The ordinary tax based on net income which is computed as usual is levied at the following graduated rates, which are applied to the amount of net income after reflecting credit for the personal exemptions: 2% on the 1st $1,000; 3% on the 2nd and 3rd $1,000; 4% on the 4th and 5th $1,000; 5% on the 6th and 7th $1,000; 6% on the 8th and 9th $1,000; 7% on all over $9,000. The total of the normal tax and net capital gain tax (see last paragraph) is reduced 25% for the calendar years 1943 and 1944 and fiscal years ending in 1944 and 1945, 50% for the calendar years 1945, 1946 and 1947 and fiscal years ending in 1946, 1947 and 1948 and 10% for the calendar year 1948 and fiscal years ending in 1949.

A single person, or a married person not living with husband or wife, may claim a personal exemption of $1,000.

A person, who, during the taxable year, was the head of a family, or was married and living with husband or wife, may claim an exemption of $2,500. Only one exemption of $2,500 is permitted against the aggregate net income received by husband and wife.

If the exemption status changes during the taxable year the exemption allowable for the periods prior and subsequent to the change must be apportioned on the basis of time.

A "head of a family" is an individual who actually supports and maintains, as a family unit, one or more dependent individuals who are closely connected with him by blood relationship, relationship by marriage or by adoption, and whose right to exercise family control and provide for these dependent individuals is based upon some moral or legal obligation.

In addition to the personal exemptions just mentioned, an allowance of $400 may be claimed for each person, other than husband or wife, under eighteen years of age, or incapable of self-support because mentally or physically defective, or is over 18 years of age and is in fulltime attendance at an approved school or college, who was receiving his or her chief support from the taxpayer. If the exemption status changed during the year the exemption must be apportioned. The dependency credit can be claimed only by the person who provides the chief support and cannot be divided between two individuals.

Returns are due on or before April 15 of each year with respect to the previous calendar year or on or before the fifteenth day of the fourth month following the close of a fiscal year.

A fiscal year means an accounting period of 12 months ending on the last day of any month other than December.

Residents and non-residents of N. Y. State are taxable—a resident on income from all sources except those specifically exempted by the law; a nonresident on compensation from services actually rendered in New York, or income derived from a business carried on, or from property located within, New York State.

A return is required of every taxpayer where if single his net income and net capital gain for the taxable year is $1,000 or more or if married and living with husband or wife the aggregate net income and net capital gain of both is $2,500 or more.

A return must be rendered in any case irres tive of the amount of net income where the g income and capital gain amounts to $5,000 or o

Where a taxpayer actually changes resid from or to the State during a taxable year, a re is required to be filed for period of residence one for period of non-residence provided the income is of sufficient amount for the whole able period as defined above to require one.

The Normal Tax may be paid in full when return is filed or it may be paid in quarterly stallments, the first quarter being due at the of filing the return and the other installm three months, six months and nine months spectively after the due date. In no event s any installment except the last be less than $5.

In addition to the normal tax there is due a capital gain tax. Net capital gain is the exces gain over loss with respect to the sale or exch of capital assets. The rate is one-half of normal rates. It, also, is payable in installment the same manner as the normal tax.

WAR BONUS TAX

For the calendar year 1947 and fiscal years en in 1948, an additional tax is imposed on all payers, including non-residents, of ten percen the rates applicable to the normal tax and the capital gain tax. This tax is payable in the s manner as the Normal Tax and Net Capital G Tax.

UNINCORPORATED BUSINESS TAX

An unincorporated business tax is imposed Article 16-A of the New York State Tax Law. is a tax on net incomes of unincorporated b nesses carried on in New York State and is with respect to the calendar years 1945, 1946, 1 and 1948, and fiscal years ending in 1946, 1947, and 1949, at the rate of 3% of net income of unincorporated business wholly or partly car on within New York State.

An exemption of $5,000 (or a ratable por thereof for a period less than twelve months permitted, and the tax is not due in those c in which the net income is less than the exe tion.

The computation of gross income and net inc follows closely the computation made for purp of the Personal Income Tax Law. However, in dition to the deductions permitted for the Pers Income Tax there is allowed a reasonable am on account of the personal services of the in dual conducting the business or the members partnership carrying on an unincorporated ness, if such person is actively engaged in conduct of the business.

The amount so allowable can, in no event, ex in the aggregate 20% of net income nor can it ceed $5,000 for each individual or member.

If business is carried on both within and wit New York State the net income must be ap tioned so as to allocate to the State a proportic the total income which, under the circumsta in each case, will equitably reflect the amour income actually earned within the State.

The returns must be made in conjunction the returns filed under the provisions of the sonal Income Tax Law. Special blanks for purpose have been prepared by the Tax Com sion and should be secured by every unincorpor business entity which is subject to the tax.

The tax is payable in full at the time the re is filed.

Workmen's Compensation in New York State

are excluded by the Federal Employers'
ity Act.
sters and crews of vessels on navigable waters
xcluded by the Admiralty jurisdiction of the
al courts. Longshoremen and other mari-
workers if injured on docks are protected by
ompensation law, but if injured upon navi-
waters, including dry docks, compensation is
nder the Federal "Longshoremen's and Har-
orkers' Compensation Act," approved March
7. Masters and crews engaged in unloading
pairing are excluded from compensation if
ssel on which accident occurs is under eight-
ns net.

Claims for Injuries

injured employee or others must give written
of the accident to the employer within
days unless failure to give such notice is
ed by the Board on the ground that notice for sufficient reason could not have been given or that the employer had knowledge of the accident, or on the ground that the employer had not been prejudiced by the omission. A compensation claim must be filed within 2 years after injury or disablement. In cases of disablement caused by compressed air illness, by latent or delayed pathological bone, blood, or lung changes, or malignancies due to occupational exposure to certain substances, the claim may be filed beyond two years if filed 90 days after occurrence of disablement and of the knowledge that the claim is or was due to the nature of employment. The requirement as to filing does not apply to a minor, or an incompetent who has no legal guardian or committee, nor to an employee to whom compensation has been paid or medical care furnished.

The first payment of compensation becomes due on the fourteenth day of disability and thereafter is payable bi-weekly.

The accident must not be due to the injured employee's wilful intent to injure himself or another or solely to his intoxication.

In the case of an accident which occurred prior to July 1, 1935, the employer is required to provide proper and adequate medical attention and the employer may select the physician to render treatment.

In case of an accident after such date the injured employee may select a physician authorized by the Chairman of the Board.

Compensation to a disabled employee is ⅔ of his average weekly wages but not to exceed $32 per week, or less than $12 per week, and the minimum rate in cases of permanent total disability shall not be less than $15 per week nor in cases of temporary total disability less than $12 per week

In death cases awards are made to dependents in accordance with a schedule provided therefor. The total amount of benefits must not exceed ⅔ of the average weekly wage of the deceased based on maximum earnings of $227.50 a month. In the case of the widows and children of deceased employees wages are not deemed less than $78 a month.

Temporary total disability—two-thirds of the average weekly wage for the period of disability, but not to exceed $6,500.

Temporary partial disability—when there is a decrease in earning capacity, the compensation provided is two-thirds of the difference between the injured employee's average weekly wages before the accident and his wage earning capacity thereafter, but shall not exceed a total of $5,500.

Compensation for Disease

The Law allows compensation for any and all occupational diseases if the disability is occasioned after September 1, 1935.

For silicosis or other dust diseases, compensation is payable for total disability or death only. A 1947 amendment removed any limitation as to amount of benefits and transferred to the special fund (§15, subd. 8) liability after the first 260 weeks in cases of death or total disability from silicosis or other dust diseases. In cases of death after September 1, 1947, where total disability occurred prior thereto, the special fund is liable after the first 104 weeks.

Minors under 18 years of age who are employed in violation of the Labor Law are entitled to double compensation.

Laws 1945, Chapter 872, provides that an employee who has any permanent physical impairment who incurs a subsequent industrial accident or disease producing a permanent disability caused by both conditions that is substantially greater than that which would have resulted from the subsequent injury or occupational disease alone shall receive compensation and medical expenses from the carrier for the resulting disability. Such carrier, however, shall be entitled to reimbursement from the special Disability Fund for all such payments after the first one hundred and four weeks of disability. If such subsequent injury results in death, the carrier shall be reimbursed for all death benefits payable in excess of one hundred and four weeks.

Public Assistance in New York State

Source: State Department of Social Welfare

lic assistance in New York State consists of
ome relief program—including veteran relief
nced by state and local funds, and the three
l types of assistance in the financing of which
ederal Government participates—old age, aid
pendent children, and to the blind.

ing 1948 a monthly average of 231,793 cases
ed public assistance of $187,840,211. Of this
nt 25.3 percent was from Federal funds, 55.1 percent from State funds and 19.6 percent from local funds.

Home relief expenditures for the year were $53,536,622. A monthly average of 70,533 cases received this form of assistance.

Old age assistance granted to a monthly average of 112,285 persons was $72,681,561.

An average of 45,414 families received $53,077,003 under the aid to dependent children program.

Assistance to the blind, covering an average of 3,561 persons per month was $2,545,025.

The Minimum Wage Law in New York State

Source: New York State Department of Labor

Equal Pay Law

Effective July 1, 1944, women are guaranteed equal pay with men for equal work. The law allows a differential in pay based on factors other than sex.

Minimum Wage Law

A minimum wage law was passed by the New York State Legislature and became law on April 27, 1937. Its enactment followed the decision of the United States Supreme Court of March 29, 1937, reversing its stand in the Adkins case and upholding the minimum wage law of the State of Washington.

The act, entitled "Minimum Wage Standards for Women and Minors," states, "It is the declared public policy of the state of New York that women and minors employed in any occupation should receive wages sufficient to provide adequate maintenance and to protect their health."

The law empowers the Industrial Commissioner to investigate wages paid to women and minors in any occupation, except domestic service in the home of the employer or labor on a farm, and if, on the basis of information in his possession, with or without a special investigation, the Commissioner is of the opinion that a substantial number of women or minors in such occupation receive wages insufficient to provide adequate maintenance and to protect health, to appoint a board which shall report upon the establishment of minimum wage rates for women and minors in such occupations.

The wage board is composed of not more than 3 representatives of employers, an equal number of representatives of employees and not more than 3 disinterested members representing the public. Within 90 days it shall submit a report to the Commissioner including its recommendations as to minimum wage standards for wo and minors in the occupation or occupations der consideration. The Commissioner, in his cretion, may extend such time to 180 days. board is required to hold public hearings an recommending minimum wage standards may into account (1) the amount sufficient to pro adequate maintenance and to protect health, the value of the service or class of service dered, and (3) wages paid in the state for or comparable work.

The Commissioner may accept or reject the board report in whole or part after public h ings. If he rejects the report, he refers the ter to the same wage board or to a new one. he accepts, and, after public hearings, appr the report in whole or in part, he issues a m datory wage order and administrative reg tions to be effective within 60 days.

Violation of a mandatory wage order is a demeanor. Any employee who is paid less the wage established by a mandatory order recover in a civil action the full amount him. Any employer discriminating against employee for giving testimony or serving o wage board is guilty of a misdemeanor.

Provision is made for reconsideration and view of the minimum wage standards afte wage order has been in effect for six months, for appeal to the courts on the validity and sonableness of any order.

No adult male, 21 years of age and over, be paid less than the minimum wage stand or rates fixed for women and minors in any dustry or occupation under a minimum wage or

Minimum wage orders covering 926,000 wor are in effect in the laundry, beauty service, fectionery, cleaning and dyeing, restaurant, h and retail trade industries.

New York State Permissive Local Tax Law

Source: New York State Department of Taxation and Finance

Chapter 278 of the Laws of 1947, approved by Governor Thomas E. Dewey was amended by Chapter 651 of the Laws of 1948. It authorizes any county in New York State to impose any or all of the following:

1. Taxes on retail sales of tangible personal property and compensating use taxes, at rates not in excess of 2%.
2. Taxes on receipts from sales of food or drink, where the charge is $1.00 or more at a rate not in excess of 3%.
3. Taxes on the consumption or use of gas, electricity, water, refrigeration, steam or such services for domestic or commercial use and telephone or telegraph service at a rate not in excess of 3%.
4. Taxes on retail licensees of the State Liquor Authority, at a rate not in excess of 25% of the license fee.
5. Taxes on admissions to places of amusement, including roof gardens, cabarets, etc., at a rate not in excess of 5%.
6. Privilege taxes on coin-operated amusement devices at a rate not in excess of $25.00 per annum for each machine.
7. Taxes on the use of motor vehicles, at a rate not in excess of $5 in the case of a non-commercial passenger vehicle weighing 3,500 lbs. or less, and not in excess of $10 in the of any other vehicle.
8. Taxes on general businesses at a rate of in excess of three-tenths of 1% of rec therefrom and on financial businesses rate not in excess of three-fifths of 1% gross income.
9. Taxes on hotel room occupancy not to ex 5% of the rent.

In addition, any city in the state having a p lation of over 25,000 and less than 1,000,00 authorized to impose any or all of the foreg taxes.

The City of New York is authorized to adopt or all of the above mentioned taxes, except retail sales tax, general business tax and room occupancy tax. Such taxes have been effect in the City of New York for many under authorization granted by the Legislatu

Pursuant to the authority contained in Cha 278 as amended, the following taxes have been posed by counties and cities:

Retail sales and compensating use taxes by County of Erie and the Cities of Syracuse Poughkeepsie; consumers' utility taxes by the C of Troy and Binghamton; a general business by the County of Monroe; and taxes on admiss on the use of motor vehicles and on hotel occupancy by the City of Binghamton.

Savings Bank Life Insurance, New York State

Savings Bank Life Insurance was authorized in New York State by act of legislature in 1938, amending the Banking Act to permit mutual savings banks to establish life insurance departments. Under the provisions of the law, savings banks may issue policies of life insurance in amounts not exceeding $5,000 on each person insured. There are no solicitors in Savings Bank Life Insurance and no selling commissions are paid, its purpose being to make life insurance available to voluntary buyers at the lowest possible cost.

Savings Bank Life Insurance is legal reserve life insurance, and operates under supervision of the State Banking and Insurance Departments. It is the same kind of life insurance as that sold by the largest mutual life insurance companies. The only difference is in its method of merchandising.

In the operation of Savings Bank Life Insurance there are issuing and agency banks. An issuing bank issues policies of all the usual forms of life insurance, including group life insurance, accepting the liability thereof, and keeps all the f and records necessary for a complete life in ance service. The services of an Actuary a Medical Director are provided for all of the b by a central administrative body, the Sa Banks Life Insurance Fund, directed by a b of seven trustees appointed by the Superinten of Banks with the approval of the Governor.

At the present time all issuing banks contr 2% of premium income to the Savings Bank Insurance Fund to serve as a central gua fund, which provides an additional safeguard tecting the assets of all life insurance departm and supplementing their own reserves and su funds which are required in accordance with insurance law.

An agency bank accepts applications for insurance, forwards them to issuing banks, acts as a collection agency for the recei premiums.

In New York on May 31, 1949, there were 264 policies in force for $146,428,766 including g insurance of $12,068,050. There were 39 iss banks and 25 agency banks.

New York State Labor Relations Act

Source: State Department of Social Welfare

pter 443, effective July 1, 1937, and known e N. Y. State Labor Relations Act. The State applies particularly to industries in intra- commerce, excepting from its applications oyers and employees admittedly subject to the nal Labor Relations Act or the Federal ay Labor Act. Employees of the State, cipality or other governmental agency, chari- religious or educational organizations, do- c servants and farm laborers are also ot.

e Act affirms the rights of employees to self- ization, to form, join or assist labor unions, rgain collectively through representatives of own choosing, free from interference, re- nt, or coercion of employers. It makes the sentatives selected by the majority of the oyees the exclusive bargaining agency in re- to conditions of employment. Employees may y time present grievances to employers di- or through representatives.

e State Labor Relations Board is authorized cide the appropriate unit for collective bar- ng, as employer, multiple employer, craft or unit or other; provided that, where the ma- e of employees of a particular craft shall so e, the Board must designate such craft as the opriate unit. It may also conduct investiga- hearings and elections, if necessary, to as- in proper representatives. Individuals hired for the duration of a strike are barred from participation in elections. Company unions cannot be listed on ballots.

The Board cannot intervene in representation controversies between persons or groups within a labor organization or between labor organizations affiliated with the same parent organization.

In cases of alleged unfair practices, the Board can hold hearings, subpoena persons, records, etc., and take testimony. If violations are proved, the Board can serve cease and desist orders upon the employer and may take further action, such as ordering reinstatement with back pay of employees discriminated against by the unfair labor practice. The Board may petition the State Supreme Court for enforcement of orders issued at the close of unfair labor practice proceedings, and the employer may petition the Court to vacate such orders. Interference with the activities of the State Labor Relations Board or with employees' exercise of their rights in an election of representatives is penalized.

The formal decisions of the Board are analyzed in its annual reports which include also an analysis of court decisions and statistical data. In addition, the Board issues printed volumes of its decisions. Both the annual reports and decisions volumes are available at the Board's offices, 250 West 57th Street, New York 19, New York.

The Members of the Board are Keith Lorenz, Chairman, and Meyer Goldberg and Frank P. Maurin.

New York State Canal System

e Erie Canal was opened (Oct. 26, 1825) and ystem made free (as of Jan. 1, 1883).

e construction of the improved canals was n 1905. Their depth is 12 feet; the locks are feet long, with usable length 300 ft., 43½ in beam, overhead clearance not to exceed feet above the water surface.

the Erie branch, the Mohawk River is ed from Troy to Rome; from Rome to Sylvan h, land cuts and the enlarged channel of l Creek are utilized; then Oneida Lake and da River. Seneca and Clyde Rivers to Lyons, e another land cut is made to a point near leton; then Tonawanda Creek to the Niagara r.

e Oswego Canal, which joins the Erie Canal nree River Point and extends to Lake Ontario swego, is practically the Oswego River canal-

e Champlain Canal extends from the Erie l at Waterford to Lake Champlain at White- It is formed by the canalized Hudson River Waterford to Fort Edward, and an artificial nel from Fort Edward to Whitehall.

e Cayuga and Seneca Canal is formed by the lization of Seneca River and Cayuga and ca Lakes. This canal joins near Montezuma. e Cayuga branch extends southerly to the of Cayuga Lake at Ithaca.

e Seneca branch extends from the junction at foot of Cayuga Lake up the Seneca River to through Seneca Lake to Watkins.

e Champlain Canal was opened for traffic in 1916. The Oswego Canal in 1917, and the complete route from Troy to Buffalo in 1918.

The total length of the canals is 525 miles.

They are under the supervision of the Superintendent of Public Works, who acts through the Supt. of Operation and Maintenance.

The principal office is in the State Office Building, Albany, N. Y.; district offices in Albany, Utica, Syracuse, Rochester and Buffalo.

The State grain elevator and the Barge Canal Terminal at Gowanus Bay at Brooklyn was transferred to the port of New York authorities on May 1, 1944, pursuant to Chapter 410, Law of 1944. It was also decided to transfer the remaining canal terminals in Greater New York to the city of New York in accordance with Chapter 409, Laws of 1944. Such transfer was made on May 19, 1944.

The State of New York owns and operates a modern grain elevator of 1,000,000 bushel capacity in Oswego as a facility for handling grain moved on the canal system. Terminals or docks, with warehouses have been established at many of the cities and villages along the canal system. The Federal Government has dredged the Hudson River to Albany to a channel depth of 27 feet at mean low water and the City of Albany has established a modern port so that deep water navigation has been brought 150 miles closer to the Great Lakes. Albany has one of the largest grain elevators in the world with a capacity of 13,000,000 bushels where cargoes are received from the Great Lakes area shipped via the canals and transferred to ocean vessels for export.

New York State Parks with Campsites

Source: Division of Parks, New York State Conservation Department

THE PALISADES INTERSTATE PARK

The Palisades Interstate Park is a chain of parks that lie along the west bank of the Hudson River beginning at Fort Lee in New Jersey, embracing the Palisades, a large part of the Highlands of the Hudson, and terminating at Newburgh, in New York. The rocks of the Palisades are said by geologists to be 150,000,000 years old.

Within the area of the Park, under the supervision of the Palisades Interstate Park Commission, is the Stony Point Battlefield Reservation.

The total area of the Park is 46,991 acres, of which the Harriman Section covers 37,656 acres; Bear Mt. area, 3,830; Storm King, 1,057; Hook Mt. 655; Blauvelt, 536; Tallman Mt. 752; Haverstraw, 73; Palisades, 16; Stony Point, 45.

Every section of the Park is accessible by motor highways and by interior roads. In the summer season, steamboats run to Hook Mountain and Bear Mountain. The West Shore Railroad reaches the eastern borders, and the Erie the western.

The main artery connecting the several sections of the Park is U. S. Route 9-W, readily accessible by way of the Holland Tunnel, the George Washington Bridge or the Dyckman Street-Englewood Ferry from New York City and from Yonkers, over the Yonkers-Alpine Ferry. It is a scenic highway almost constantly in sight of the Hudson River. New York State Route 17 gives access to the southern and western portions of the Harriman Section of the Park and U. S. Route 6 crosses the northeastern corner of the Bear Mountain-Harriman Section. From the east side of the Hudson River, access to the Park may be had over the Bear Mountain Parkway and the Bear Mountain Bridge.

Cabins are available for camping at Ross Camp Dock, a short distance north of the George Washington Bridge. A tourist camp is provided at the top of the Englewood approach to the Henry Hudson Drive. The Blauvelt section provides camping facilities. Automobile tourist camping is encouraged in Harriman State Park for 24 hours. Camping for longer periods is permitted at Lake Tiorati.

WESTCHESTER COUNTY PARKS

Hudson River Shore—Kingsland Point (85 acres) at North Tarrytown; **Croton Point** (504 acres) near Harmon.

Long Island Sound Shore—Glen Island (105 acres) off New Rochelle, connected with the mainland; **Playland—Rye Beach** (273 acres), all-year resort. Playland is the largest recreational center in the Westchester County Park System. In addition to a splendid salt-water beach and fresh-water swimming pool, boardwalk and picnic groves, it has one of the world's most modern amusement parks, game rooms, Playland is an all-year resort.

Inland Parks—Tibbetts Brook (161 acres) at Yonkers, north of Van Cortlandt Park; **V. Everit Macy** (202 acres) at Ardsley, encompassing Woodlands Lake; **Silver Lake** (161 acres) in the Town of Harrison; **Blue Mountain Reservation** (1,586 acres) in the southern part of Peekskill; **Ward Poundridge Reservation** (4,100 acres) forest lands located at Cross River; **Mohansic** (1,100 acres) include Mohansic Lake on Bronx Parkway Extension; **Willsons Woods** (23 acres) at Mt. Vernon, adjoins Hutchinson River Parkway; **Saxon Woods Park** (850 acres) along Hutchinson River Parkway in Scarsdale; **Maple Moor** (140 acres) along Hutchinson River Parkway in Mamaroneck River Valley; **Sprain Lake** (130 acres) in Yonkers; **Hawthorne and Pleasantville Playfields** (28 acres) on Saw Mill River Parkway at Pleasantville, and 6 acres at Hawthorne Circle; **Ridge Road Picnic Area** (170 acres) in the Town of Greenburgh.

PARKWAYS

The **Saw Mill River Parkway** runs from Van Cortlandt Park to Chappaqua. The **Cross County Parkway** connects the Saw Mill River Parkway, Yonkers, with the Hutchinson River Parkway, New Rochelle. The **Hutchinson River Parkway** extends from the New York City line in Pelham Bay Park to the Connecticut line, where it connects with the Merritt Parkway, which extends east. The **Bronx River Parkway** extends from the city line northerly 13½ miles to the Taconic State Parkway at Valhalla. The **Central Westchester Parkway** runs from Westchester Avenue northerly for a distance of two miles to its intersection with Route #22, in the City of White Plains and the Town of Harrison.

LONG ISLAND STATE PARKS

Valley Stream (130 acres), 18 miles from N. Y., from Southern State Parkway to Merrick Road.

Hempstead Lake (903 acres), 21 miles from N. Y., on Southern State Parkway.

Jones Beach (2,413 acres), 40 miles from N

ADIRONDACK REGION

Adirondack Forest Preserve with its 2,177,-
res, its mountains, streams and lakes, is
single exception, the largest forest preserve
United States. Camping is free in the Forest
ve. The State has provided many public
all marked by signs, but visitors should
r with the rangers in charge.
chief campsites are:
George Battleground—route U. S. 9, about
rth mile south of Lake George village at
itherly end of Lake George.
thstone Point—two miles north of Lake
Village on Bolton road, State Highway,
9N.
rs Rock—Two miles north of Hague-on-
George, on route 9N.
e Point—Two miles north of Pottersville on
highway, route 9, on Schroon Lake.
p Bridge—Sixteen miles north of Schroon
n the Schroon River and U. S. highway,
.
dox Lake—On the shore of Dark Bay, about
uarters of a mile from State highway, route
e entrance highway to the camp leaves the State highway two miles east of Severance and one mile west of Paradox.

Crown Point Reservation—Turn east from route 8 and 22, about half way between Crown Point and Port Henry. Route 8 leads directly to the camp and to Champlain bridge, a distance of four miles.

Wilmington Notch—Between the Ausable River and State Highway, route 86. Wilmington is the nearest village, 3 miles away.

Poke-O-Moonshine—On U. S. Highway, No. 9, between Elizabethtown and Keesville, about six miles south of the latter village.

Cumberland Bay—Turn east off U. S. Highway 9, just north of Plattsburg, on road to ferry.

Meadowbrook—On State Highway, route 86, 4 miles east of Saranac Lake.

Meacham Lake—On State Highway No. 10, nineteen miles north of Lake Clear Junction.

Fish Creek Pond—On State Highway, route 10, between Saranac and Tupper Lake.

Cranberry Lake—Turn from State highway route 3 at Cranberry Lake Village; 2 miles over dirt road to campsite.

Lake Eaton—On the north shore of Lake Eaton, a quarter of a mile from State Highway, route 10. Entrance to the camp is two miles west of Long Lake.

Golden Beach—On the easterly shore of Raquette Lake, close to State Highway, route 28, about 3 miles east of Raquette Lake village.

Lake Durant—On State Highway No. 28, 3 miles east of Blue Mt. Lake.

Sacandaga—On State Highway, route 30, and the Sacandaga River, 4 miles south of Wells.

Moffitt Beach—Turn north from State Highway, route 8, 2 miles west of Speculator.

Poplar Point—On State Highway, route 8, on the westerly shore of Piseco Lake about two miles west of the hamlet of Piseco.

Point Comfort—On Piseco Lake and State Highway, route 8, two miles west of the Poplar Point site.

Caroga Lake—On easterly shore of Caroga Lake nine miles north of Gloversville on State Highway, route 29A.

Lewey Lake—Midway between Speculator and Indian Lake village, reached by dirt road from Speculator and partly macadam from Indian Lake. The road is part of State Highway, route 10.

Pixleys Falls—Six miles south of Boonville on State Highway, route 46.

Whetstone Gulf—Just off State Highway, route 12, six miles south of Lowville.

Eighth Lake—At west end of Eighth Lake, five miles west of Raquette Lake village on State Highway, route 28.

Eel Weir—Five miles south of Ogdensburg, near State Highway, route 87. To reach site turn west from route 87 about halfway between Ogdensburg and Heuvelton.

Housing in New York State

Source: State Division of Housing

elp meet New York State housing needs, the
n operates a broad program that: (1) ad-
rs direct aid to localities for low rent hous-
d slum clearance, (2) assists and advises
blems of neighborhood and community de-
ent, (3) consults with local technicians and
rs servicing communities, (4) determines the
r emergency housing and supervises planning
perations, (5) supervises privately-financed
dividend housing developments for lower
income groups, (6) encourages the con-
on of mutual housing developments for and
rans under the State's limited dividend law,
s Bell Park Gardens in Queens, requiring
itial investments and over-all carrying
within the means of a moderate income,
ers consultation to private or community
in large scale housing plans.

The State's capital loan fund for low cost housing and slum clearance totals $300,000,000. In addition, the State can pay cash subsidies up to $25,000,000 each year to such projects in order to maintain low rents. As of March 31 1949, $333,-203,900 have been earmarked for 44 low rent State-aided projects to house 30,000 low income families.

The Division surpervises 75 veterans' emergency housing projects built by the State; helped establish 158 emergency housing and educational projects at 53 colleges and universities; helped create three new emergency State colleges, Sampson, Champlain and Mohawk. About 60,000 veterans and their families are housed in 11,038 apartments and 13,480 dormitory accommodations as a result of this program, put in operation at a cost of $69,-800,000 in State appropriations.

Lake Erie borders on New York State for an airline distance of 64 miles.
Area in U. S.—4,900 square miles.
Lake Ontario forms the northern boundary of N. Y. State for an airline distance of 146 miles.
Area in U. S.—3,470 square miles.
Finger Lakes form a group of glacial lakes in central New York. From west to east they Conesus, Hemlock, Canadice, Honeoye, C daigua, Keuka, Seneca, Cayuga, Owasco, Sk teles, and Otisco.
There are 2,300 lakes, ponds, or reservo New York State, of which 78 have an are square mile or more.

CITY OF NEW YORK

Brief History of the Municipality

Source: Legislative Manual of the State

hattan Island, the present Borough of Man-
a, was discovered by Henry Hudson on Sep-
r 11, 1609. In 1613, the first habitations for
men were built by Adrian Block, where 41
way now stands. On May 6, 1626, Peter
t, appointed Director-General of New Neth-
, purchased Manhattan Island from the In-
for trinkets valued at about twenty-four
s, and the town with a population of less
200 was named New Amsterdam.
first wooden church was erected in 1633. Two
later Fort Amsterdam was built on what is
he site of the Custom House. In 1642 the
ublic meeting place was built on the site of
rl street. In 1653 a wall was built along what
Wall street, as a protection against attack,
extended along Rector street in 1673.
Amsterdam, with a population of about 800,
ncorporated as a city on February 2, 1653.
irst street was paved in 1657, this running
en Broad and Whitehall Streets. On March
64, King Charles II of England granted all
utch land in America, covering what is now
ork, New Jersey and a part of Connecticut,
s brother James, Duke of York. The city
aptured by the English on September 8 of
ear and it was then named New York after
uke of York. Thomas Willett, of Plymouth,
ppointed the first Mayor, taking office in
1665. On August 9, 1673, the city was re-
ed by the Dutch, who named it New Orange,
the Prince of Orange. In November, 1674,
Netherland, including the city of New Orange,
eded to England, and the province and the
enamed New York.
December 8, 1683, the city was first divided
ards, each of the six with an alderman. On
27, 1686, the first charter was granted. The
rinting press was set up on April 12, 1693,
n October 16, 1725, the first newspaper in
York was founded. A new city hall was
eted at Broad and Wall streets in 1700, this
ing "New Federal Hall," and on April 30,
George Washington there took oath of office
t President of the United States. The first
brary was founded in 1754. In 1756 a stage
was started between New York and Phila-
a. In 1762 the streets were first lighted at
expense.
July 9, 1776, in the presence of George Wash-
, the Declaration of Independence was read
e American troops quartered in New York,
he site now occupied by the City Hall. The
h captured the city on Sept. 14, 1776, and it was not until Nov. 25, 1783, that the city below Fourteenth Street was again under the control of the Americans. The final step in the establishment of the first American city government in New York City was completed on Feb. 5, 1784, when Governor George Clinton appointed James Duane as the first Mayor.

By 1790 the city extended from the Battery to the lower end of City Hall Park, and its population was 33,131. New York was the capital of the Nation from 1785 to 1790, and the capital of the State until 1797. On August 11, 1807, Robert Fulton's steamboat, the "Clermont," made its trip from New York to Albany in thirty-two hours. In 1832 the first horse railroad in the world started on Fourth Avenue. In 1844 the first uniformed police force in New York City was organized. On May 2, 1865, the first paid fire department was organized. On May 24, 1883, the first bridge to span the East River, the Brooklyn Bridge, was opened. The Statue of Liberty was unveiled on October 24, 1886.

Excavation for the first subway was made on March 24, 1900; it became operative on October 27, 1904. In 1908 the Hudson river tunnels were opened to Jersey City; and on March 30, 1909, the Queensboro bridge was opened; December 31, 1909, the Manhattan bridge was completed. The Holland Tunnel was completed November 12, 1927. The George Washington Bridge was officially opened October 25, 1931.

On May 24, 1929, construction was begun of New York's first elevated express highway to run along the Hudson river waterfront, the last section was opened February 9, 1937; the West Side Improvement, connecting this elevated express highway with the Hudson River Parkway, was opened October 12, 1937, the first link extending the highway to the Battery was opened February 4, 1939.

The area of the city is 320.26 square miles, its waterfront is 578 miles. Its population according to the 1940 Federal Census was 7,454,995. Its assessed valuation of taxable real estate, including special franchises, is $15,902,977,696. The city's parks, exclusive of parkways and playgrounds, have an area of 22,600 acres. The city's free education system comprises 803 day and evening school organizations with a registration of about 885,614.

New York County became Manhattan Borough on Jan. 1, 1898; Kings County became Brooklyn Borough; and that part of New York County just north of the Harlem River (the upper slice of which had been taken from Westchester County) became Bronx Borough; Queens County became Queens Borough; and Richmond County (Staten Island) became Richmond Borough.

New York City Hall and Other Public Buildings

York's public business is transacted chiefly
roup of buildings extending from the minia-
City Hall of 1812, in City Hall Park—between
way and Park Row, Chambers and Vesey
s—and the huge new Criminal Courts Build-
d Tombs Prison at 100 Centre Street. Half
buildings flank Foley Square and create a
Center of varying architectural designs.

City Hall was erected from 1808 to 1812 from
s by Joseph F. Mangin and John McComb.
a handsome adaptation of formal Italian
ssance, with a large porch and a clock cupola
unted by a figure of Justice. Although one of
nallest buildings in this area—216 by 105
its position in the park gives it a fine setting.
s built of Stockbridge marble save for the
wall, which for economy was made of red
one. The south end of the park was cleared
18 of the unattractive Post office building,
d after the Civil War. The new Post office and
al Office Building is at 90 Church St.

City Hall contains the mayor's office, cham-
f the City Council and the Board of Estimate,
t Commission and a museum. The chair used
ashington when inaugurated president, his
and chairs of the first Congress, used in
al Hall, New York, are here. Large paintings
ayette, Washington, Hamilton, Clinton, John
d Henry Hudson by John Trumbull, S. F. B.
and other painters adorn the walls. The
Hall is frequently used for the formal welcome
tinguished guests and municipal ceremonies.
ctly north of the City Hall stands **City Court
ng**, erected 75 years ago by the Tweed admin-
on. West of the City Hall stands the Liberty
on the approximate spot where the Revolutionary patriots raised five poles that were cut down by the British. Statues of Nathan Hale and Horace Greeley, and a plaque commemorating the first reading of the Declaration of Independence are found here. An oak commemorates the unjust hanging of Jacob Leisler through British tyranny in 1691.

The **Hall of Records**, an ornate building of 1911, ornamented with huge allegorical figures and portrait statues, stands at Chambers and Centre Sts. It contains real estate records, the New York County Register, the Surrogate's Court and the Commissioner of Jurors. East of Centre St. the **Municipal Building** of 1913 stands astride Chambers St., from Centre to Park Row. It is 40 stories high with a tower surmounted with a 20-ft. gilded figure of Civic Fame by Adolph A. Weinman. It contains the marriage license bureau and marriage chapel, the city's broadcasting station, WNYC, and the Municipal Reference Library.

FOLEY SQUARE BUILDINGS

North on Centre St. lies Foley Square. Like the Roman Forum, it was once a pond and a swamp. The nearest building facing Centre St. at the east is the **United States Court House**, designed by Cass Gilbert, architect of the Woolworth building, and completed by his son, Cass Gilbert, Jr., in 1936. Its 32-story tower is filled with federal offices and courts. North of it stands the **Supreme Court Building**, of 1912, an eight-story hexagonal neoclassic structure with Corinthian pillars and a granite staircase 100 feet wide. Across Worth St. stands the **State Office Building**, completed 1930, of a less ornate and more functional classical design. It is the headquarters of the State Tax

Commission. West of Centre St., facing south, is the **Health Department Building**, similar in design to the State building, erected in 1935 and containing the Health, Hospital and Sanitation departments.

These official buildings face the landscaped area of Foley Square, where green grass and plane trees relieve the stark aspect of granite and asphalt. Here office workers and even nurse girls with their young charges take the air. It occupies the site of Collect pond, where John Fitch is supposed to have tried out a model of a steamboat in 1796. On the higher ground to the northwest the slaves who rebelled in 1712 were executed. Behind the Supreme Court Building is the site of Five Points, notorious slum area in the early 19th century, described for horrified Londoners by Charles Dickens.

THE NEW CRIMINAL COURTS

On June 30, 1941, Mayor La Guardia dedicated the new **Criminal Courts Building and Tombs Prison**, which stand directly north of the State Building on Centre St., bounded also by Leonard, Baxter and White Sts. This huge $20,000,000 enterprise replaces the old Criminal Courts Building and Tombs that faced Lafayette St., demolished in 1948. The freed area is temporarily used as a parking lot, but will become a park.

Criminal Courts Building rises 17 stories and is faced with polished green granite and hard white limestone. In contrast with more ornate buildings on Foley Square it is plainly functional. It contains 25 two-story court rooms, and the prison, which occupies 12 stories of the north wing, has 835 cells and is connected with the courtrooms by two bridges.

Here are the offices of the District Attorney and the following courts: General Sessions, Special Sessions, Magistrates and Traffic, also Grand Jury chambers, the Correction Dept., State Parole Board, Children's Society, Legal Aid Society, Probation bureaus, psychiatric clinics, hospital and kitchen facilities and libraries. On the eleventh floor there is a chapel with a revolving platform in three parts, adjustable to the needs of Catholic, Protestant and Jewish services. On the east side the building overlooks Columbus Park, which occupies the site of Mulberry Bend, a slum abolished through the efforts of Jacob A. Riis 60 years ago when Theodore Roosevelt was Commissioner of Police with headquarters nearby.

Area of New York City

Source: Chief Engineer, Board of Estimate, City of New York

The City (five boroughs) of New York has an extreme length, north and south, of 36 miles; and an extreme breadth of 16½ miles, measuring from the North River along 23d Street, Manhattan, and thence to the easterly border of Queens Borough.

From the western border of the Borough of Richmond to the eastern border of Queens Borough, the distance is 25 miles.

Manhattan Borough is 12½ miles long and its extreme breadth is 2½ miles; Bronx, length 8.1 miles, breadth 9.2 miles; Brooklyn, length 11.5 miles, breadth 10.3 miles; Queens, length 14 miles, breadth 13.7 miles; Richmond length 14 miles, breadth 7.0 miles.

The area of the incorporated City of New York is, in square miles, as follows—(first figures are total area U. S. Bureau of the Census, 1940; second figures show land area, exclusive of inland water, Board of Estimate, City of New York): (Bronx) 54.4-43.4, (Brooklyn) 88.8-76.07, (Manhattan) 31.2-22.3, (Queens) 120.6-112.14, (Richmond) 64.4-60.31.

ALTITUDES IN NEW YORK CITY

Data marked with * relate to street elevations.

Manhattan:

1. Fort Washington Avenue at W. 183rd St. (Washington Heights) 276*
2. Fort Washington Avenue at W. 184th St. (Washington Heights) 251*
3. Fort Washington Avenue at W. 190th St. (Washington Heights) 240*
4. Audubon Avenue at W. 193rd St. Fort George 230*
5. Fort Washington Ave. at W. 184th St. (natural surface) 260
6. Inwood Hill Park (natural surface).... 230

The Bronx:

1. Grosvenor Avenue at W. 252nd St. (Riverdale) 276*
2. University Ave. at Strong St. (Kingsbridge) 162*
3. Mosholu Parkway North at West Gun Hill Road (Mosholu) 179*
4. Private property within the loop of Grosvenor Avenue north of W. 250th St. 284.5

Richmond:

1. Windsor Road between Todt Hill Road and Little Clove Road 26
2. Highest point in the city, south of the intersection of Todt Hill Road and Ocean Terrace, 300' s.w. of Todt Hill Road and 540' s. of Ocean Terrace. Coordinate position W. 20,000 S. 21,000 40

Brooklyn:

1. Prospect Park West and 18th St..... 18
2. Barbey Street and Highland Blvd. near the entrance to Highland Park 16
3. Greenwood cemetery, Highway monument on a cemetery road inside the 9th Ave. gate, on Reservoir Hill.... 21

Queens:

1. Southerly Service Roadway, Grand Central Parkway, at Station 374+00 near Glen Oaks Club house 1,650 feet east of Little Neck Parkway and 2,000 feet west of Nassau County line 25

Todt Hill, Staten Island, 409.8 ft. is the highest point on the Atlantic Coast between Maine and Florida. It rises from the Richmond Road at Dongan Hills on the rapid transit railway, and overlooks New Dorp and the Moravian Cemetery, where the Vanderbilts lie buried.

Other elevations in Manhattan above sea level, expressed in feet and decimals thereof, are: Custom House, 17.06; Bowling Green, 21.75; Pine St. and Broadway, 40.78; Municipal Building, 41.61; City Hall, 44.74; Astor Place, 43.01; Union Square, 45.73; Columbus Circle, 86.64; Central Park near W. 93rd St., 114.14; Amsterdam Ave., at Trinity Cemetery, 148.73; Audubon Ave., at W. 174th St., 185.92; Wadsworth Ave. near W. 182d St., 188.33; High Bridge water tower, at the street level, 203.25.

The highest natural elevation in the Bronx—284 feet 6 inches—is on the hill bounded by Iselin Ave., Highland Ave., and W. 250th St., Riverdale Hill. Other Bronx altitudes are: Jerome Ave., near E. 233d St., 210.73; Jerome and Mosholu Aves., Van Cortlandt Park, 193.39; Riverdale Ave. and Spuyten Duyvil Parkway, 178.49; Grand Boulevard and Concourse, and E. 199th St., 148.64; Hall of Fame Terrace, at Universty Ave., 170.32; Poe Park, E. 192d St., 140.22; east approach to Washington Bridge, at University and Aqueduct Aves., 141.

Other Brooklyn altitudes are: Base of Museum on Eastern Parkway, at Washington Ave., 163.44; 9th Ave. (Prospect Park West), 32; south of 14th St., 155.34; Prospect Park W. and 5th St., 162.16; Union St., Plaza, at Flatbush Ave., 146.29; 59th St. and 5th Ave., 116.96.

The highest track elevation (altitude above Mean High water at base of rail) on the subways is 1[illegible] feet, on the Washington Heights Line at [illegible] Washington Avenue and 175th Street (8th Ave. subway system).

The lowest track elevation (depth below Mean High Water at base of rail) is 113.12 feet under the East Channel of the East River on the 60th St. River Tunnels of the B.M.T. Broadway—7th Ave. 60th St.—Queens Line.

Seal and Official Flags of New York City

Source: The City Record

THE CITY SEAL

s: Upon a shield, saltire wise, the sails of a hill. Between the sails, in chief a beaver, in a beaver, and on each flank a flour barrel.

porters: Dexter, a sailor, his right arm bent, olding in his right hand a plummet; his left ent, his left hand resting on the top of the ; above his right shoulder a cross-staff. Sin- an Indian of Manhattan, his right arm bent. ght hand resting on top of the shield his left holding the upper end of a bow, the lower f which rests on the ground. Shield and sup- s resting upon a horizontal laurel branch.

e: Beneath the horizontal laurel branch the 1664, being the year of the capture of New rdam by the English and the first use of the of the City of New York.

t: Upon a hemisphere, an American eagle wings displayed.

end: Upon a ribbon encircling the lower half e design the words "Sigillum Civitatis Novi ci."

whole encircled by a laurel wreath.

City Clerk is the custodian of the City Seal.

THE OFFICIAL CITY FLAG

Description: A flag combining the colors, orange, white and blue, arranged in perpendicular bars of equal dimensions (the blue being nearest to the flag-staff) with the standard design of the seal of the city in blue upon the middle, or white bar, omitting the legend "Sigillum Civitatis Novi Eboraci," which colors shall be the same as those of the flag of the United Netherlands in use in the year 1626.

THE MAYOR'S FLAG

Description: The same in design as the official flag of the city, except that upon the middle or white bar, and above the design of the seal in a semi-circle, there shall be five blue five-pointed stars, typifying the five boroughs of the city. The dimensions of such flag shall be 33 inches by 44 inches.

THE COUNCILMANIC FLAG

Description: The same in design as the official flag of the city, except that upon the middle or white bar there shall be below the design of the seal, in a straight line, the word "Council;" the dimensions of such flag shall be the same as the standard size of flags used for state and parade occasions.

Street Numbers in New York City

ay to find what street is near a certain s in another street without referring to a ory is as follows:

e the address number, cancel the last figure, divide by 2 and add or subtract the key r found below:

ress in	Key Number
e A, Avenue B, Avenue C,	
nue D, First Avenue, Second Avenue	Add 3
Avenue	Add 9 or 10
a Avenue	Add 8
Avenue to Central Park	Add 17 or 18
Avenue above Mount Morris Park	Add 24
e of the Americas (6th Ave)	Subtract 12 or 13
h Avenue	Add 12
h Avenue above 110 St.	Add 20
a Avenue	Add 9
Avenue	Add 13

Address in	Key Number
Tenth Avenue	Add 14
Eleventh Avenue	Add 15

New York City's Puerto Rican Problem

e plight of an estimated 350,000 Puerto Ricans ed together in New York City slum areas d Mayor William O'Dwyer to inaugurate a am for the speedier assimilation of the immi- s from the U. S. island dependency in the Indies. He organized, Sept. 15, 1949, a ittee of 48 public school and health officials, entatives of church, business, industrial and ithropic groups, and prominent Puerto Rican nts to draft a program aimed at improving conditions for the city's Puerto Ricans.

fare Commissioner Raymond M. Hilliard was d committee chairman and Manuel C. Ca- s, New York director of the employment and tion bureau of the Puerto Rican Depart- of Labor, vice chairman.

Puerto Ricans were granted American citizen- n 1917, they require no entry visas and may to the mainland without regard to immi- n quotas. In 1940 the city's Puerto Rican ation was 70,000. But after the war, the of Puerto Ricans more than tripled due to population and lack of work in the home , and every steamship and almost every from there brings in more Spanish-speaking rants, 98% of whom settle in New York City.

here Spanish Language Predominates

those sections of East Harlem, renamed ish Harlem," and of the Bronx and Brook- here they live in dilapidated tenements with three families to each cramped flat, Spanish predominant tongue, as is also the case in of the factory districts where the unskilled, anized Puerto Ricans, particularly girls, nployed.

mmissioner Hilliard reported that 35,000 o Rican families were receiving public assist- ance, or 10% of the estimated population, compared with 4.2% for the city's total population. So pressing was the problem of providing food and shelter for the needy immigrants that he prevailed on the Municipal Civil Service Commission to waive the three-year residence requirement for city employees, enabling him to hire 50 recent arrivals who, in Spanish, interview applicants for relief.

The language handicap was one of the problems with which the Mayor's committee was faced, Hilliard said. Others were: Poor housing facilities, employment disadvantages, racial discrimination, and lack of a well-established community group to help newcomers.

At its first meetings, the committee drafted a tentative program calling for adult education in English, vocational training, special instruction in industries having abundant job opportunities, and dissemination of information on favorable working conditions in other cities.

Reluctant to Leave New York

Because of their reluctance to leave the swarming neighborhoods in New York City where there relatives and friends live, only a small percentage of the Puerto Ricans are willing to accept seasonal employment on farms or other out-of-town jobs, preferring the garbage-littered streets of the city's slums to working in the open air among strangers, according to welfare investigators.

As a result of overcrowding and unsanitary conditions, the mortality among Puerto Ricans from tuberculosis, a disease to which they also are susceptible in their native land, is between two and three times higher than for the city at large. The City Health Department has expanded its tuberculosis clinics and also opened additional child health stations in the Puerto Rican communities.

The Greater New York Fund

Greater New York Fund, organized in 1938, rmanent philanthropic organization which s an annual fund-raising campaign among s concerns and employee groups for "busi- hare" of the financial support needed for g purposes by local hospitals, health and agencies, including organizations and ions operated under Catholic, Jewish and ant as well as non-sectarian auspices. campaign goals approximate about 20% of al funds that must be raised by the participating agencies. In 1949 the total was $40,000,000 of which the Fund asked business for $8,000,000.

Any hospital or social agency in any of the five boroughs, providing free or below cost services to persons living or working in New York City and meeting recognized standards of operation, is eligible to share in the proceeds of Fund campaigns. In 1949 there were 423 such organizations and institutions.

The money raised by the Fund is distributed equitably among the participating social agencies after a careful study of each agency's needs.

Passengers Entering and Leaving New York City

(By trunk line railroad, Hudson Tubes and Ferries)

These statistics were compiled from passenger traffic figures furnished by the various and operators at the request of the Public Service Commission which were accepted without verification or corroboration.

xcludes passengers transferred to or from Penn. R.R., these transferees are included above.
ding to the Regional Plan Association, New York, N. Y., approximately 3,500,000 persons enter rk City, south of 60th Street, Manhattan, on a typical business day.

New York City Transit System in 1949

New York is served by the largest municipally owned and operated transit system in the United States. On June 30, 1949, this comprised the following route miles:

Rapid transit (subway, elevated)	241.56
Bus	444.77
Trolley	108.60
Trolley coach	24.12
Total	819.05

New York also is served by the following privately owned lines:

Bus	649.10
Trolley	4.46
Total	653.56
Total miles	1,472.61

Until 1948 all municipal lines operated at a 5 cent fare. Then, because of increased costs, fares were raised to 7 cents on trolleys and city-owned bus lines and 10 cents on subway and elevated lines. Combination rides were sold at 12 cents and school children were given reduced rates. Transfers on surface lines cost 2 cents and are free on subways. Private coach lines charge 12 cents. The change in fares on municipal lines brought a revenue of $205,867,420, for the year ended June 30, 1949, compared with $133,173,764 for the previous year, a gain of $73,693,656, or 55.33%. Private bus lines acquired since September, 1948, brought in $3,142,000 additional. In the same period there was a decrease of 11% in the number of passengers. Out of earnings about $57,500,000 was needed to meet the rise in wages.

In June, 1940, the city bought the equipment of the two privately-owned subway systems, the Interborough (IRT) and Brooklyn-Manhattan (BMT) as well as the elevated lines destined for demolition, for $326,248,187, of which $9,250,000 was paid for elevated lines. This added 28,000 employees to municipal payrolls. Tunnels and essential structures were largely owned by the city, which had paid $397,920,000 to build them, while the companies contributed $83,201,000 for construction. They were paid for chiefly with 40-year non-callable bonds bearing interest at 3%. William Reid, chairman, Board of Transportation, reported to the mayor Sept. 26, 1949, that this necessitated payment of $9,355,000 interest annually, or $375,000,000 total interest, exclusive of the principal of $315,000,000. In his report Mr. Reid also stated that the outstanding transit debt as of June 30, 1949, was $1,195,115,420, of which $588,554,137 was outside the debt limit. The rapid transit sinking fund reserve stood at $276,992,177, leaving the outstanding unamortized transit debt at $918,123,062.

Chairman Reid recommended to the Mayor that the 1950 State Assembly be asked to approve a constitutional amendment exempting from the city's debt limit $500,000,000, to be used to construct a new subway line in Second Ave., with connections to other lines. After similar approval by the 1951 Assembly the amendment could be placed on the ballot in the November, 1951, election.

NEW SUBWAY CARS

New 60-ft. subway cars were added in 1949. On Sept. 22 the most modern and costly subway train in the world began service on the Brighton Beach line (BMT). It consisted of 8 cars, each 60 ft. long, 10 ft. wide, 12 ft. high and weighing 40 tons. Each car has 8 sets of sliding doors, 4 to a side. About 50 persons can sit and nearly 200 s holding on to metal bars and poles. Interior are light gray and blue; exterior is stainless there are fluorescent lighting tubes, filtered thermostat heat control and a loud-speaker tem for announcing stations.

Each car of this type cost $128,298. This higher than cost of standard railroad rolling s reported as follows by the I.C.C. for 1948: c holding 58 passengers, $87,229; dining car $11 sleeping car, $125,993; club car, $120,000; p car, $90,644.

REVENUE AND EXPENDITURES, NEW Y TRANSIT SYSTEM

(Bureau of Transportation Report, Sept 26,

Capital expenditures since Jan. 1, 1946, for e ment and improvements on the municipal t system, including those in progress:

760 new subway cars	$57,63
1,725 new buses	29,86
200 new trolley coaches	3,70
11 new garages and shops and trolley coaches, overhead wire and bus properties	26,95
32 platform extensions to provide longer trains	13,44
Completion of IND Fulton Street extension	6,41
Hillside Avenue, IND Queens extension	9,43
Culver Line (Brooklyn) and Queens Plaza reconstruction	5,12
Westchester Avenue subway yard addition	6,38
Modernization of power plants, substation facilities	26,68
Transfer connection, subway entrances, stairways, etc	2,31
New office building in Brooklyn	10,00
Total	197,95

Municipal transit revenues under the incr fare, as compared with 1948-49 operation at cent fare:

Increase in Revenue:	
From fare increase	73,69
From Manhattan bus lines (acquired Sept., 1948)	2,70
From miscellaneous sources	43
Total	76,83
Disposition of Revenue:	
(1) Wage increase of 24 cents an hour, effective July 1, 1948, and increased operations and service	28,65
(2) Additional expenses for materials and supplies and other operating expenses	4,21
(3) To offset operating deficit incurred in 1948 due primarily to-	
(a) Wage increase of 20 cents an hour as of July 1, 1946 — $18,500,000	
(b) Increased cost due to operation of bus lines acquired — 1,800,000	
(c) Additional employes to fill vacancies and to give improved service; and increased costs of materials, not offset by increased revenues — 10,307,000	30,60
(4) Excess revenues available for budget notes issued for past deficits	13,35
Total	76,83

Triborough Bridge and Tunnel Authority

eneral Offices, Randall's Isl. Engineering, 10 State St. Construction, Governor's Isl., and 10 Hamilton Ave., Brooklyn

W BROOKLYN-BATTERY TUNNEL

ewest and most modern of New York's r tunnels, was begun 1940 to connect and Manhattan under New York harbor, ess at the Battery. Work was suspended 5 by the war. Completion is scheduled for of 1950.

tunnel has two tubes, each with two nes, 20 ft. below the water and is 9,117 the longest tunnel under water and the ongest vehicular tunnel in the world. The s under the Mersey at Liverpool, 11,254 ft. ave a diameter of 31 ft. Four ventilating and 53 Westinghouse fans, 8 ft. in diam- l supply 25,000 tons of fresh air an hour the tunnels. A garage for 1,050 cars at ery is part of the plan.

f the tunnel as originally estimated is $74,000,000 and $80,000,000. Tolls are ex- o be 35c a car. Bonds carrying 2¾% and nterest were given the Reconstruction Corp. by the Triborough Bridge and Tun- nority to finance loans for its projects.

3, 1949, the Authority sold $141,500,000 rawing 2½% and 2¾%, part of which redeem RFC loans.

Triborough Bridge and Tunnel Authority ned by a board and Tunnel Authority of embers appointed by the Mayor of The New York for overlapping terms of six ach. The members are: Robert Moses, n, George V. McLaughlin, vice chairman, rles G. Meyer, vice chairman. George E. s general manager and secretary. Besides klyn-Battery Tunnel, the Authority ad- s the following:

ough Bridge (opened on July 11, 1936) Manhattan, The Bronx and Queens. The comprises three bridges, a suspension a vertical lift bridge, and a fixed bridge ected by long viaducts. The suspension naving 1,380 feet of main span with side aking a total of 2,780 feet, crosses the er at Hell Gate and spans a channel 800 e. The vertical lift bridge, crossing the River, has a length of 310 feet and spans el of 204 feet. In weight and area it is est vertical lift span in the world. The dge is a truss 383 feet in length and he Bronx Kills. The Triborough Bridge miles long. The connecting arteries, built Authority but maintained by the City in an, The Bronx and Queens, cover fourteen

Whitestone Bridge (opened on April 29, nnects The Bronx and Queens, and crosses River about two miles west of the point widens into Long Island Sound. The main 2,300 feet makes it the fourth longest sus- pridge in the world. The channel width is t.

Henry Hudson Bridge (single deck opened Dec. 1936, upper deck May, 1938) crosses the Harlem River at Spuyten Duyvil where the Harlem connects with the Hudson River. This bridge has the longest fixed arch in the world. The length of the entire structure is 2,000 feet and it spans a channel of 418½ feet.

Marine Parkway Bridge (completed July 3, 1937) crosses Rockaway Inlet from Flatbush Avenue, Brooklyn, to the Jacob Riis Park in the Rockaways. This bridge is 4,022 feet in length and has three main channel spans of 540 feet, the center span being the longest vertical lift highway span in the world.

Cross Bay Parkway Bridge, reconstructed and widened to accommodate six traffic lanes (completed June 3, 1939), crosses Jamaica Bay, leading from the mainland to the Rockaway Peninsula. It includes a bascule bridge over a 100 foot channel.

Queens Midtown Tunnel, built by the New York City Tunnel Authority (opened for traffic Nov. 15. 1940), crosses under the East River between East 36th Street, Manhattan, and Borden Avenue, Long Island City. The length of the tunnel is 7,600 feet. At its deepest point the roadway is 95 feet below the surface of the East River, and consists of two separately driven steel and cast-iron lined tubes, each 31 feet in diameter, accommodating two lanes of traffic.

Triborough Traffic 1948

Triborough	19,731,907
Bronx-Whitestone	12,036,501
Henry Hudson	14,658,365
Marine Parkway	4,167,802
Cross Bay Parkway	4,693,748

RAILROAD TUNNELS

Easy access to Manhattan is obtained by tunnels that serve railroads, subway trains and motor cars. Railroad tunnels are:

Hudson & Manhattan Railroad North tunnels under the Hudson, Jersey City to Morton St., two single track tubes, 5,700 ft. long. Uptown tunnels connect with north tunnels at Morton St., extend to Christopher St. and to Ave. of the Americas (Sixth Ave.) to 33d St. South tunnels under Hudson from Jersey City to Church St. terminals at Cortlandt, Church and Fulton Sts., New York. Two single-track tunnels extend from Hoboken terminal of Lackawanna R. R. to Washington St., with connections to the Pennsylvania and Erie railroads.

Pennsylvania Railroad—Tunnels under Hudson from Pennsylvania terminal, New York, to Newark, N. J. Two tunnels with two tracks each, 60 feet below Manhattan street level, from Pennsylvania station to East River tunnels, four separate one-track tubes, leading to Long Island City.

Port of New York Authority

Headquarters: 111 Eighth Ave., New York 11, N. Y.

The Port of New York Authority is a self-supporting public corporate agency of the States of New York and New Jersey. It was created in 1921 by treaty between the two States to deal with the planning and development of terminal and transportation facilities, and to improve and protect the commerce of the New York-New Jersey Port District.

The Port Authority is administered by a board of 12 commissioners, six from each state, who are appointed by the Governors of New York and New Jersey. They serve without pay for terms of six years. The commissioners are:

New York—Howard S. Cullman, chairman; Eugene F. Moran, Bayard F. Pope, S. Sloan Colt, Charles S. Hamilton, Jr., Chas. H. Sells.

New Jersey—Joseph M. Byrne, Jr., vice chairman; Frank D. Abell, Donald V. Lowe, F. Palmer Armstrong, Horace K. Corbin, John Borg.

Charged with the protection of port commerce, the Port Authority appears before such regulatory bodies as the Interstate Commerce Commission, the Civil Aeronautics Board and the United States Maritime Commission in the interest of the unified port area. It maintains branch offices in Washington, Chicago and Cleveland to promote the movement of commerce through the port of New York.

The Authority's Lincoln and Holland tunnels and the George Washington Bridge, spanning the Hudson River, and its Bayonne and Goethals bridges and Outerbridge Crossing, connecting Staten Island and New Jersey, join the two states into one metropolitan business, residential and recreational area.

Traffic for One Year

Traffic over the Authority's bridges and tunnels in 1948 was: Lincoln Tunnel, 11,121,107 vehicles; Holland Tunnel, 15,600,124; George Washington Bridge, 15,484,364; State Island Bridges, 4,836,380. The total traffic for all Port Authority crossings during the first nine months of 1949 was 39,539,000.

During 1949 the Port Authority began construction of a $3,100,000 new exit viaduct at the New Jersey exit of the Holland Tunnel and a $7,400,000 mile-long tunnel under West 179th St., New York, to relieve congestion at the New York approaches to the George Washington Bridge.

New Terminals Being Built

The bi-state agency's terminal facilities include the Port Authority Building (111 Eighth Ave., Manhattan), housing the Union Railroad Freight Terminal, and the Port Authority Grain Terminal and Columbia Street Pier on Gowanus Bay, Brooklyn, the Port Newark Marine Terminal, Newark, N. J., and the New York Union Motor Truck Terminal, 325 Spring St., opened Nov. 1, 1949. A similar Union Motor Truck Terminal, the world's largest, under construction at Delancy Street near Route 25, Newark, N. J., will begin operation in 1950. The Port Authority is also constructing a $24,000,000 Bus Terminal to occupy the entire New York City block between 40th and 41st Sts. and Eighth and Ninth Aves., to be comp late 1950.

LaGuardia and Idlewild

The Port Authority also is engaged in velopment of regional air transport facili services to maintain the New York-New Je trict as the crossroads of the world's a The Authority undertook (June 1, 1947), u terms of a 50-year lease with the City York, the development and operation at a $300,000,000 of LaGuardia Airport and Ne international Airport (formerly called Airport). A similar 50-year lease covering Airport and Port Newark was signed ((1947) between the Port Authority and the City Commission.

LaGuardia Airport originally cost $45 and was opened to scheduled operatio 2, 1939 by the City of New York. It occu acres, and is situated in the Borough of New York City. One of the busiest comme terminals in the world, LaGuardia Airport the first eight months of 1949 handled plane movements and 2,167,064 air passe which 233,068 were overseas travelers. Du same period, New York International handled 10,976 plane movements and 128 passengers of which 57,605 were overseas ers; and Newark Airport handled 50,17 movements and 485,688 domestic air pas

New York International Airport at I Borough of Queens, was opened by the P thority July 1, 1948, and was dedicated b dent Truman, on July 31, 1948. Constructio airport was started April, 1942, by the New York, on a tidal marsh bordering Bay, over which more than 68,000,000 cubi of hydraulic fill were placed. Responsibi completion and future development of the was transferred by the City to the Port A June 1, 1947. During 1949 the Port A completed at the airport a $4,900,000 Building and began construction of thr hangars to cost $9,000,000. The airport co 900 acres.

Teterboro Airport Bought

To assure future availability of an adeq terminal in the northwest quadrant of the New York District, the Authority, on 1949, purchased the 500-acre Teterboro Bergen County, N. J., from Frederick L. for $3,115,000. This airport is only 25 minut Times Square. It has three 100-foot wi ways, two of which are 4,500 feet long, th 3,000 feet. During 1949, Teterboro Airpo did a average of 500 plane movements p of which most were training and nonsc cargo and passenger flights.

To finance new projects and for refundi poses, the Authority had issued as of D 1948, bonds having a face value of $578,451, had expended about $292,365,642 on the co tion of new facilities. Its gross revenue totaled $299,973,000. During the first eight 1949, gross revenues amounted to $24,418,3

Major Construction Projects of the City of New York

New York City's construction projects exceed in cost and extent those of some nations and often total several billions of dollars. On Sept. 12, 1949, Robert Moses, City Construction Coordinator, made a report on the progress of the work to Mayor William O'Dwyer and the Board of Estimate, citing the following total costs:

CITY PROJECTS

Plans completed for work	$1,150,000,000
Plans for work under way	1,800,000,000
Construction completed	195,000,000
Construction under way	505,000,000

STATE AND OTHER AUTHORITIES

Plans completed for work	$1,075,000,000
Construction completed	260,000,000
Construction under way	555,000,000

Some plans are held ready for use in the event of a business recession and unemployment.

Mr. Moses listed these major projects:

Hospitals and Health Centers—Six hospital projects and four new health centers are under way, including the new tuberculosis and chronic disease hospital at Kings County Hospital, the Bird S. Coler Memorial and the James Ewing cancer hospital. A total of $38,900,000 has been paid for hospital work constructed or under way a 800,000 for health stations.

Schools—Since 1946 41 new schools an tions have been completed or are under more are ready to start building. The c modernized 20 and has funds for 30 mo 1950 program envisions 32 schools costin 000,000. The Board of Education's four-ye lay, 1946-1949, was estimated at $107,089

Transportation—Transit lines received i ments worth $123,634,000 through May 3 Rehabilitation of ferries and piers conte spending $4,500,000 for three new ferry $2,200,000 for Harlem river drive bulkhead; 000 for reconstruction of South and W Sts. ferry terminals; $6,000,000 for St. ferry terminal, to replace one destroyed The total cost of the St. George terminal $21,000,000. Mr. Moses reported that the Ci $61,250,000 on Idlewild airport in 1946 bed Port of New York Authority took it over.

Housing—"In less than 10 years one per of every 13 in New York City will look City Housing Authority as his landlord—g ing thought," writes Mr. Moses. Public aided by the Federal Government, the S the City, accounted for 35,515 dwelling uni pleted or under way since 1946; quasi-publ

ıded 24,621 completed or under way. In
er category are Stuyvesant Town, 8,755
ɔsting $90,000,000; Peter Cooper houses,
its, costing $30,000,000; and Fresh Mead-
eens, 3,008 units, costing $30,000,000. In
ısive slum clearance plan the city as-
an area and then offers it to private
, with the help of the Federal loan
r slum clearance.

Supply—The new Delaware aqueduct
1 540,000,000 gallons of water a day to New York City's water supply by 1955. Emergency operation, begun in 1944, now supplies 93,000,000 gallons a day. Work on the first stage was started in 1937. This costs $289,100,000 and includes the 85-mile Delaware aqueduct, a rock tunnel from 13½ to 19½ ft. diameter extending from Rondout reservoir at Lackawack to Hillview reservoir, Yonkers. The Merriman dam in this section will be 1400 ft. thick at widest bottom and 200 ft. high. The second stage will cost $151,000,000 and will include a tunnel 25 miles long, connecting the Pepacton and Rondout reservoirs.

CENTERS OF PUBLIC INTEREST IN NEW YORK CIT

Capsule Guide to Parks, Libraries, Art Galleries, Monuments

American Acad. of Arts and Letters

The American Academy of Arts and Letters is a privately endowed, honorary institution, founded in 1904 by the National Institute of Arts and Letters, (a body consisting of 250 members which had been organized in 1898 by the American Social Science Association.) The purpose of the academy is the furtherance of literature and the fine arts. Membership which is limited to 50 is based upon distinguished creative work in literature, art and music. Only members of the National Institute are eligible for election.

The academy occupies its own buildings at 633 West 155th Street and 632 West 156th Street, New York City. Its annual meeting takes place in November. In May of each year the academy meets with the National Institute of Arts and Letters, at which new members of both organizations are inducted, medals awarded and fifteen $1,000 arts and letters grants given. An exhibition of the works of newly elected members and by the recipients of honors opens in the Art Gallery.

Officers serving in 1949 were President, Paul Manship; Chancellor-treasurer, James Truslow Adams (died May 18, 1949); Secretary, Archibald MacLeish.

Members—James Truslow Adams (d); John Taylor Arms, Gifford Beal, Bernard Berenson, Ernest Bloch, Van Wyck Brooks, John Alden Carpenter, Gilmore D. Clarke, Walter Damrosch, William Adams Delano, John Dos Passos, Barry Faulkner, William Faulkner, James Earle Fraser, Douglas Southall Freeman, Robert Frost, Charles Hopkinson, M. A. DeWolfe Howe, Anna Hyatt Huntington, Archer Milton Huntington, Robinson Jeffers, Leon Kroll, Lee Lawrie, Sinclair Lewis, Walter Lippmann, Archibald MacLeish, Paul Manship, John Marin, Frank Jewett Mather, Jr., Edna St. Vincent Millay, Frederick Law Olmsted, Eugene O'Neill, Bliss Perry, Herbert Putnam, Edward W. Redfield, Agnes Repplier, Carl Sandburg, Henry D. Sedgwick, Henry R. Shepley, John Sloan, Albert Spalding, Eugene Speicher, John E. Steinbeck, Deems Taylor, Chauncey Brewster Tinker, Mark van Doren, Charles Warren, Adolph Alexander Weinman, Thornton Wilder, Mahonri M. Young.

For 1949 awards see page 602.

New York Botanical Garden

The New York Botanical Garden occupies 235 acres of diversified land in the northern and western parts of Bronx, New York, N. Y. The Bronx River, with a gorge and waterfall, is one of its natural features. Along the banks of the river is the Hemlock Grove, containing more than 3,000 native trees. Ruins of the millrace of Delancey's Mills, site of skirmishes in the American Revolution, are visible here.

The museum includes a herbarium of more than 2,925,000 pressed plant specimens; a reference library of more than 50,000 bound volumes and 150,000 pamphlets, comprising the country's largest combined library on botany and horticulture; a display of the important economic plants of the world and fossil plants.

The main conservatories house thousands of tender plants from more southern climes. In the Floral Display House, also the Tropical Flower Garden, there is a continuous show from November through May. The Tropical Rain Forest, naturalistic plantings of begonias, aroids, aquatics, tropical ferns and of cacti and other succulent plants of the Old and New Worlds, as well as the collections of living plants that are useful to man, are on continuous display the year around.

Announcements of courses of study, free programs, and special exhibits are mailed free upon request.

Brooklyn Activities

Brooklyn Institute of Arts and Sciences—Located in the Academy of Music Building, Lafayette Ave. and Ashland Place, Brooklyn, this organization, privately endowed, supports lectures and cultural movements. It administers also the Brooklyn Museum, Brooklyn Children's Museum and the Brooklyn Botanical Garden. The City of New York contributes to the support of these three organizations.

Brooklyn Museum, Eastern Parkway and Washington Ave., occupies a large building that went considerable reconstruction by the W the 1930s. It houses valuable collections d strating the arts and crafts of many peoples primitive times to the present. It has larg Eastern and Near Eastern exhibits, inc Chinese, Japanese, Persian, Turkestan, M tamian and other art objects; Egyptian and p tive American collections, and paintings rep tative of the principal schools and times. Int especially of American houses, from 1665 to are shown. The museum carries on lectur tivities.

Brooklyn Children's Museum, Brooklyn and Park Place, founded 1899, has exhib birds, beasts, insects and handicrafts, esp inviting to children and placed within reach. It gives lectures and motion picture grams.

Brooklyn Botanical Garden, Eastern Par Washington and Flatbush Aves., covers 50 near Prospect Park. The horticultural garde extensive; there are special plantings of water lilies, wild flowers; the rock garden the Shakespeare garden are popular. The oratory was built in 1918 and has a li herbarium, lecture and study rooms. The dren's House and Garden are devoted to int ing children in practical gardening.

Brooklyn Civic Center

In the Borough Hall section of Brooklyn a plete architectural transformation is under with the development of Brooklyn Civic C Obstructing buildings have been levelled, an streets built and the Board of Transport building is being erected. Fulton Street w pushed back 60 to 75 feet to widen Ca Plaza, so that there will be an open approa Borough Hall from the Brooklyn Bridge. A Street will be widened. Here will stand thi city prison and remand shelter and the Wa morial. Robert Moses, city construction coo tor, reported to the mayor in September, that "a great deal of effort has been expend working out plans for Concord Village, the Sa Bank housing project at the Civic Center."

Brooklyn Public Library

The Brooklyn Public Library in Brooklyn, has a Central Building, 34 branches, five branches, and more than 400 agencies for th tribution of books in schools, hospitals, fire tions, factories, etc.

Administration headquarters are in the C Building (Ingersoll Memorial), Grand Army Brooklyn. This building, built by the City at of $5,000,000, was opened in 1941. There are se Children's and Young People's Rooms. The l serves the largest children's reading public country. Its juvenile circulation reaches 2,000,000 a year.

Twenty of the branches are housed in bui erected by Carnegie funds. 11 are in temp quarters. All branches have reference servic addition, special reference work, aimed to business men, is done in the Business Refe Branch at 197 Montague St.

The Library has a total collection of ap mately 1,400,000 volumes. Notable are the coll of music books and scores, books on costumes, and checker collection, Civil War and World libraries, and Old Juvenile collection. A larg lection of phonograph records is available public for home use.

The Cloisters

The Cloisters in Fort Tryon Park, New N. Y., is a branch of the Metropolitan Muse Art, devoted to European medieval art. Inco ated in the building are five cloisters reconstr with original elements from the French m teries of Cuxa, St. Guilhem-le-Désert, B font, Trie and Froville. Among the other me monuments shown here are a Romanesque rebuilt with sections of the former chur Langon, a complete chapter house of the century from Pontaut and a 13th century tured portal from Moutiers-St. Jean.

s setting are exhibited notable examples
ture, painting, stained glass, metalwork
iture of the Middle Ages. Important ad-
first shown in 1949 are a 13th century
f the Virgin, originally from the choir
f Strasbourg cathedral, and the major
of a set of tapestries depicting the Nine
one of the only two surviving series of
ntury tapestries. During the year the
et of 15th century tapestries representing
t of the Unicorn was reinstalled in a
ing especially designed for them. The site
Cloisters, the building and, in large part,
ections, are the gift of John D. Rocke-
r.

Cooper Union Museum

ooper Union Museum for Decorative Arts,
Square, New York 3, N. Y., was founded
y the granddaughters of Peter Cooper as
n of his "Union for the Advancement of
and Art."
tions include: textiles from 1500 B.C.;
s, prints, furniture, ceramics, woodwork,
rk, costume accessories, wallpaper; 13,000
drawings for ornament and decoration by
n and American masters from the 16th to
century; representing collection of engrav-
d etchings from Mantagna to Picasso;
n of works by American artists including
Homer, Thomas Moran, F. Hopkinson
Daniel Huntington and Frederick E.

Museum Library, which is one department
ooper Union Library (the first free reading
New York), contains books, pamphlets and
catalogs on fine and applied art, including
al collection of engravings and original
f design of the 17th, 18th, and 19th
s. The Picture Library contains 1,040
ks and over 500,000 classified clippings
otographs. A special feature of the mu-
its winter schedule of evening hours of

ooper Union Free Forum series, held three
eekly in the Great Hall where Abraham
made his famous pre-nomination speech
, 1860). Other famous speakers were: Henry
eecher, Woodrow Wilson, Booker T. Wash-
John Quincy Adams, Louis Brandeis, Ben
Jane Addams, Henry George, William
s Bryan, Mark Twain, and 12 other presi-
esides Lincoln.

efenders Memorial Grove

ders Memorial Grove, at 122nd Street and
e Park, north of Grant's Tomb, was
d Oct. 20, 1946, and presented to the City
York by the Daughters of the Defend-
the Republic, U. S. A. The location is
of a battle fought during the Revolu-
War, then known as Harlem Heights.
rove contains thirty-four elm trees, planted
edication services in honor of the Republic's
's. Those so honored are George Washing-
than Hale, James Monroe, Commodores
Decatur and Oliver H. Perry, Generals
Scott and Phil Sheridan, Abraham Lin-
miral David G. Farragut, Bugler James
Shaw, Colonels Robert P. York and
Cooper, Thomas Wise, Lieutenant Gilbert
Drum Boy Duncan J. McMillan, Admiral
Dewey, Col. Theodore Roosevelt, Lieut.
Lansdown, Floyd Bennett, Alexander de
Commodore David Porter, Rear Adm.

urice Rose, Joseph Stillwell, John J. Per-
William Everson, Douglas MacArthur,
D. Eisenhower, Jonathan Wainwright, and
er A. Vandergrift, Admirals Chester
and William Halsey, and the Unknown
r of the Republic of the U. S. A.
Memorial Day, May 30th, services are
l each tree is decorated with an American
n Armistice Day, Nov. 11, a laurel wreath
n the bronze tablet which bears the names
efenders.

Fraunces Tavern

ces Tavern is located at Broad and Pearl
ne example of American-Colonial architec-
was erected (1719) as the DeLancey man-
was acquired (1762) by Samuel Fraunces
then known as Queen's Head Tavern.
After harsh use in the 19th century, it was fully restored. A restaurant uses the first floor.

The Museum contains numerous relics of the Revolution, historical paintings by John Ward Dunsmore, and water colors of scenes of the Revolutionary War, by Harry A. Ogden. The Long Room was the scene of Washington's farewell to his officers (Dec. 4, 1783). It is the headquarters of the Sons of the Revolution in the State of New York.

Freedom House

Freedom House, estab. 1941, was formed to advance the ideals of a free society. Among its founders were Wendell L. Willkie, Dorothy Thompson, Herbert Agar and George Field. The president is Robert P. Patterson, former secretary of war. It is housed in the Willkie Memorial Building, established by Freedom House in association with friends of the late Wendell L. Willkie, and dedicated Oct. 8, 1945, the first anniversary of his death. The aim of the founders of this Memorial Building is inscribed on a plaque at the entrance: "We Carry on in the Spirit of his Service to All Men and One World."

The Memorial is a nine-story structure at 20 West Fortieth Street, New York, N. Y., facing the New York Public Library and Bryant Park. Inside the lobby, a tablet extends from the floor to the two-story ceiling against a terra cotta background. On this is inscribed in stainless steel letters a quotation from a speech made by Willkie at Duke University (Jan. 14, 1943): "We must establish beyond any doubt the equality of man."

On the wall opposite the tablet is a portrait of Willkie, painted by Joseph Margulies, and presented to the Memorial by the Chinese Consul-General in New York City on behalf of his people.

The auditorium, on the second floor and known as the "One World Center," has a seating capacity of 250; the first floor Assembly Room, which seats 150, contains a bust of Willkie by Malvina Hoffman. The building also contains a conference room, library and reading room. Entirely financed through voluntary contributions from the public, the building was purchased and remodeled at a cost of $250,000.

Organizations which make their headquarters in the building include Freedom House, the National Association for the Advancement of Colored People, the Anti-Defamation League and Metropolitan Council of B'nai Brith, the Citizens' Housing and Planning Council of New York, the Common Council for American Unity, the Public Education Association, the World Student Service Fund, the Labor League for Human Rights, and the Lisle Fellowship.

Frick Collection

The Frick Collection, 1 E. 70th St., New York 21, N. Y., was founded by the late Henry Clay Frick (1849-1919).

The principal part of the Collection consists of 14th to 19th century paintings, several of which have been acquired since Mr. Frick's death. Among the masters represented are Duccio, Castagno, Piero della Francesca, Gentile and Giovanni Bellini, Titian, Tintoretto, Veronese; Holbein, Hals, Van Dyck, Rembrandt, Terborch, Ruisdael, Vermeer; El Greco, Velázquez, Goya; Monet, Renoir, Gauguin; Boucher, Fragonard, Chardin, Ingres, Cezanne, Hogarth, Gainsborough, Reynolds, Romney, Raeburn, Constable, Turner and Whistler. Closely related to these are a smaller number of drawings and prints.

There are also bronzes and portrait busts by Vecchietta, Laurana, Bertoido, Pollaiuolo, Bellano, Riccio, Cellini, Giovanni Bologna, Hans Vischer, Adriaen de Vries, Jonghelinck, Derbais, Girardon, Coysevox, Pajou, and Houdon—of whose famous Diana a unique terra cotta version is here.

The Collection further includes Limoges painted enamels of the 16th century, with pieces by Nardon Pénicaud, Léonard Limosin, Martial Reymond, and Jean Court; 17th and 18th century Chinese and French porcelains; English, French and Italian period furniture; and a few rare Persian rugs.

These works of art are not displayed as in the conventional museum but are the furnishings and decoration of an early 20th-century house which is itself a part of the Collection. One of the rooms is an oak-panelled library, hung with portraits and landscapes of the English School. Another is a drawingroom, containing French 18th-century furniture of exceptional interest and a notable series of wall-panels by Fragonard. A

third, reproducing an 18th-century boudoir, is decorated with panels which Boucher painted for Madame de Pompadour.

American Geographical Society

The American Geographical Society, Broadway at 156th St., New York, N. Y., was organized in 1852 and is primarily a research institution. Its object is the advancement of geographical knowledge. To this end it carries on original investigations, issues publications, maintains a library and map collection, presents an annual course of lectures, and awards honors and medals for outstanding achievements in exploration and geographical research.

Intensive studies in the geography of Latin America were begun in 1920 the results of which have appeared in the form of maps, monographs, and bibliographies, including a 107-sheet map of the American continent from the Mexico-United States boundary to Cape Horn, in conformity with the scale and style of the International Map of the World on the scale of 1: 1,000,000. Certain sheets have been used officially in negotiations for the settlement of international boundary disputes in Central and South America. Work was recently completed on sheets covering northern North America of the Society's Map of the Americas (scale 1: 5,000,000).

Research projects being carried forward include studies of changes in the glaciers of Alaska and western Canada, studies in medical geography, and in mathematical geography.

Most recent publications of the Society are a new map of the world, and The Coast of Northeast Greenland by Louise A. Boyd and others.

The Society's collection contains 122,288 volumes of books and periodicals, 178,570 maps, 2,612 atlases and 32,464 photographs.

Governor's Island

Governor's Island, lying in New York harbor half a mile south of the Battery and reached by a small ferry, has been the headquarters of the First U. S. Army since June, 1946. Its jurisdiction extends over New York, New Jersey, Connecticut, Massachusetts, Rhode Island, Maine, New Hampshire and Vermont. Before that it was headquarters for the Second Corps Area. Tradition tells that Wouter van Twiller, second governor of New Netherland, bought Nutten island (as it was called) from the Indians June 16, 1637 for "two axes, a string of beads and some nails." In 1698 the British administration of New York restricted the island to "His Majesty's governors," hence the name. It was fortified by the Continentals in the American Revolution. Castle Williams, built 1807-1811 is a circular fort 200 ft. in diameter, with walls 40 ft. high, 8 ft. thick, and openings for three tiers of guns. Like Castle Clinton at the Battery—later Castle Garden and the Aquarium—it was never used for defense. During the Civil War it held Confederate prisoners. South Battery, built 1812, is now the Officers Club. Fort Jay, 1794-1806, is the center of administrative offices and officers' houses.

Hall of American Artists

The Hall of American Artists is located in the rotunda of the Gould Memorial Library, at New York University in New York, N. Y. Founded by W. Francklyn Paris and offered to the University (1919) as a memorial to American painters and sculptors, this group contains portraits in bronze of the following artists, all executed by American sculptors and endowed by popular subscription:

James A. McNeill Whistler by Edmund T. Quinn; J. Q. A. Ward by Hermon A. MacNeil; J. Q. A. Ward by himself; Elihu Vedder by Albin Polasek; Augustus St. Gaudens by John Flanagan; Walter Shirlaw by Paul W. Bartlett; Charles S. Pearce by Paul W. Bartlett; Clinton Ogilvie by Paul W. Bartlett; Samuel F. B. Morse by Horatio Greenough (1841); Francis D. Millet by Albin Polasek; George Inness by Scott Hartley; Charles W. Hawthorne by Albin Polasek; Charles Grafly by Albin Polasek; Daniel Chester French by Margaret French Cresson; Frank Duveneck by Charles Grafly; William M. Chase by Albin Polasek; Henry K. Brown by H. K. Bush-Brown; Carroll Beckwith by George T. Brewster; Charles H. Niehaus by Adolph Alexander Weinmann; Henry Merwin Shrady by E. Amateis; Frederic MacMonnies by John Flanagan, and a self-portrait by Frederick Ruckstull.

Publications comprise The Hall of Am Artists series, of which five volumes hav issued, and numerous pamphlets honoring can artists and architects.

Hall of Fame

The Hall of Fame for Great Americans is on the campus of New York University o versity Heights in the Bronx, New York, N. Hall and adjoining buildings was built with contributed by the late Mrs. Finley J. S (Helen Gould).

Names to be inscribed in the Hall of Fa chosen every five years by a College of E consisting of approximately 100 American m women of distinction, representing every S the Union and several professions. Follow order of selection, are the names of the 77 thus far chosen. The busts and tablets are th of associations or individuals. New names chosen in October, 1950.

Hayden Planetarium

The Hayden Planetarium of the Am Museum of Natural History, 81st Street nea tral Park West, New York 24, N. Y., is a of the sky. Here, guided by an astronomica puting mechanism, the stars and other he bodies are projected by rays of light on a dome, giving an illusion of the night sky. 9,000 stars including stars of the sixth mag are shown.

Each month a new sky-show is presented. shows deal dramatically and scientifically w various aspects of the heavens. When a new comet appears in the real heavens, those are also made visible in the planetarium sky ing it always up to date.

In recent years a great variety of sky have been presented, among them The Pan the Planets, Color in the Sky, Our Sun, from Space, etc. A special Christmas show i each December in which various theories reg

Hayden Planetarium played a vital role in
War II by adapting its unique facilities to
navigation instruction. With the end of
flict the Planetarium reconverted immedi-
peacetime activity. Expanded courses, open
ublic, were established in "Celestial Naviga-
'Star Identification," "Astronomy without
natics," "Young People's Astronomy," "Life
er Worlds" and "Basic Meteorology."

eur interest in astronomy is encouraged by
facilities available to the public for instruc-
telescope making. Anyone may make a mirror for his own telescope at cost by registering for these courses. Additional Planetarium activities include a special course for school teachers where in-service credit is given.

In the corridors of the planetarium building are many interesting scientific exhibits including a large collection of meteorites, several transparencies of the world's finest astronomical photographs, a series of dioramas illustrating the anatomy of storm areas and many other unusual items.

Hispanic Society of America

The Hispanic Society of America maintains a library of 100,000 vols. and a permanent exhibit of Hispanic objects, arts, crafts and paintings, in two monumental buildings on Broadway between 155th and 156th Sts., New York. The object of the society, which was founded by Archer M. Huntington in 1904, is to provide information about the culture of Spanish and Portuguese-speaking peoples, and thus further the cause of international understanding. The buildings were given by Mr. Huntington, who is president of the society.

hs, writing masters, embroiderers and lace-
There are also important series of trade-
ookplates, and cigaret insert cards. The bulk
prints may be seen for the asking in the
tudy Room in the basement of Wing J on
s through Fridays, 2-4:45 P.M. The Study
closed except by special appointments from
through Labor Day.

RELICS OF ANCIENT EGYPT

Egyptian Wing presents a chronological
of this highly developed civilization. Out-
g in the display are a mastabeh tomb
about 4,400 years ago for a Memphite
y named Pery-neb, rebuilt in its original
series of painted wooden funerary models
e tomb of the Theban grandee, Meket-Re
XI dynasty (about 2,000 B.C.); jewelry from
b of the Princess Sit Hat-Hor-Yunet (XII
), equaled only by the group in the Cairo Museum; a series of life-size and colossal statues of Queen Hatshepsut of the XVIII dynasty (about 1,500 B.C.) and small works of art of the New Kingdom and later.

Outstanding among numerous examples of the arts of Greece and Rome and notable in the collections are a Greek statue, the best preserved of the early Attic Kouroi; a number of Athenian sculptured gravestones ranging from the 6th to the 4th century B.C.; Roman copies of the two statues by Polykleitos, the Diadoumenos and the Amazon; Greek and Roman pottery; a Cycladic marble statuette of a harpist of about 2500 B.C.; bronzes from the 8th century B.C. to the third century A.D., among them the statue of the sleeping Eros.

ARTS OF NEAR EAST

The collection of sculpture, metal work and pottery representative of ancient art of Mesopotamia, Persia, Palestine and Syria was augmented through substantial purchases made in 1947. Several objects date back 4,500 and 5,000 years to Sumerian times.

The decorative arts of the Near East in later periods are also well represented in the Museum's collections. A number of Syrian mosque lamps and other pieces of enameled glass of the 13th and 14th centuries is among the rarest and most precious objects. A 14th century Iranian prayer niche of faience mosaic is an outstanding exhibit. The Persian and Indian manuscripts and miniature paintings, including those in the Alexander Smith Cochran Collection, represent some of the greatest names in Persian calligraphy and painting from the 15th to the 18th century. The collection of rugs, enriched by the gift of James F. Ballard, is especially important, representing with characteristic specimens the development of rug weaving in the Orient. A recent addition to the collection was the "Anhalt" carpet, a 16th century example, one of the finest and best preserved Persian rugs in existence, presented by the Samuel H. Kress Foundation (1946). Fine specimens of pottery illustrate the development of ceramic art in the Near East. A domed room from a Jaina temple represents the art of woodcarving in India. It is supplemented by an extensive collection of Indian and Tibetan jewelry, Indian miniatures of all schools and periods, and some remarkable examples of early Indian stone carving.

Various phases of the Museum's collection of Far Eastern Art are world-famous in respect to extent and quality. The Chinese sculpture, the most important unit, includes superb pieces ranging in date from the late Chou dynasty (C. 1050-249 B.C.) to the Ch'ing (1644-1912). Especially noteworthy are the great Wei dynasty Stele (dated A.D. 533-543), a black marble stele of the T'ang dynasty, (618-906 A.D.) and a seated bodhisattva from Yün Kang, gift of Robt. Lehman. A few early Chinese bronzes are among the most celebrated in the world, notably the Chou dynasty (1122-256 B.C.) altar set formerly belonging to the viceroy Tuan Fang, and two Buddhist altarpieces of the Wei dynasty (A.D. 386-557).

MEDIEVAL TAPESTRIES

The collections of medieval art in the Metropoli-

tan Museum together with those at The Cloisters, form the most important assemblage of medieval art in America. Collecting toward the turn of the Century by the late J. Pierpont Morgan and subsequent gifts to the Museum by his son J. P. Morgan Jr. brought to the Museum world-famous groups of Early Christian, Byzantine, Romanesque and Gothic objects. Notable sequences of ivories, enamels, sculpture and furniture have been enriched by other gifts and purchases. The Gothic tapestries, ranging from the 14th century to the beginning of the Renaissance are unique. A stained glass window from Saint-Germain-des-Près in Paris, a Romanesque and a Gothic head from Nôtre-Dame of Paris are noteworthy. The metalwork of the Migration tribes, the Albanian gold and silver treasure, silver plates from Cyprus, Byzantine enamels, jewelry and ivories, a 13th century Rhenish statue of Saint James the Less and sculptures from the Chateau de Biron, are outstanding.

Of decorative arts of the Renaissance the little intarsia room (about 1480) from the Ducal Palace at Gubbio is one of the most interesting and important Renaissance interiors in any museum. The sculpture of this period contains fine examples by Leoni, Lombardo, Maiano, Mino, Riccio, Rossellino, Sansovino and Vittoria. The maiolica is the most distinguished group of this material outside of Europe. Outstanding in the realm of Renaissance goldsmiths' work is the famous Cellini cup in the Altman collection. Tapestries include two unique French hangings from a set made for Diane de Poitiers.

In the decorative arts of the 17th and 18th centuries in France the Morgan Collection alone contains a wealth of French woodwork, furniture, ormolu, decorative paintings and faience. The collection of gold, enamel and jewelled snuff-boxes and dance programs is one of the most comprehensive in existence, as is likewise the collection of French silver. The group of Beauvais and Gobelins tapestries includes a famous set of ten, representing the Months of the Year, the gift of John D. Rockefeller, Jr. Among the French sculptors represented are Bouchardon, Caffieri, Clodion, Coysevox, Falconet, Girardon, Houdon, Lemoyne, Pajou and Pigalle.

HISTORIC MUSICAL INSTRUMENTS

The collection of 4,000 musical instruments includes pre-historic instruments, as well as those of Europe, Asia, Africa, Oceanica and America and a section devoted to basic types of instruments, models and tools.

The European section, of about 1,300 objects, includes the first pianoforte, built (1721) in Florence by Bartolommeo Cristofori (still in playing condition): the earliest known virginal, built by Johannes Rueckers in Antwerp (1581); a double harpsichord by Ludovicus Grovvelus (1600); numerous virginals, among them examples by Jerome de Zentis, Jcannes Couchet, Louis Bellot, and others; clavichords dating from 1537 to the 18th century; a rich array of pianoforti, among them a piano by Johann Andreas Stein, Augsburg (1778); and two violins made by Antonius Stradivarius, the "Francesca" and the "Antonius" (dated 1694 and 1721 respectively).

ARMOR WORN BY NOBLES

The collection of arms and armor contains signed works by the best known artist-armorers of Augsburg, Nuremberg, and Milan and over 450 pieces with historical associations are included, among them the embossed casque signed by Philip de Negroli of Milan and the embossed shield of Henry II of France; the etched and gilded armor for man and horse (dated 1527) of Galiot de Genouilhac, Grand Master of Artillery of France; four harnesses from the English Royal Armoury at Greenwich, once worn by the Queen's Champion and other nobles of Elizabeth's reign; and the sword with chiseled hilt of Ambrogio di Spinola, famous commander-in-chief in the Netherlands.

AMERICAN ROOMS

The American Wing is devoted to American decorative arts from the 17th through the first quarter of the 19th century. In rooms, reconstructed in most cases with original woodwork, there have been assembled furniture, metalwork, ceramics, glass, prints and paintings.

The earliest room is the parlor from the Thomas Hart House, Ipswich, Mass., 1640. Also exhibited is the Assembly Room from the City T Alexandria, Va., where Washington at (1798) his last birthnight ball. The south e wall of the wing is the facade of the United Branch Bank formerly at what is now 30-3 street (built between 1822 and 1824). An a to the wing houses the great hall from t Van Rensselaer Manor House at Albany, and a room from Providence, R. I. A t hensive collection of Pennsylvania German rative arts of the 18th and 19th centuries played in two galleries.

The collection of the Costume Institute i some 8,000 items of dress of three centuri reference material in books, old fashion patterns, and sketches of Paris openings. Textile Study Room adjoins the Costume Ins with separate entrance on 83rd St.

The Museum maintains a branch, The Cl in Fort Tryon Park, New York, N. Y. (See ate article, The Cloisters, page 418.)

Museum of American India

The Museum of the American Indian, Foundation, at Broadway and 155th Stree York 32, N. Y., forms one of the group of bu which New York owes to the public spirit of M. Huntington, who gave the site of the m which was built at a cost of $250,000 and $ for equipment.

The Museum has more than 2,000,000 e and can display but about one tenth of th one time. The top floor is devoted to labors work and study rooms, which are open suitable conditions to students, Dr. Geo Heye, who founded the Museum and turne to it nearly 500,000 specimens, is the di

In 1925 Mr. Huntington gave to the Muse acres, near Pelham Bay Park. A modern and study museum building has been erec the site. Four totem poles and replicas of types of Indian dwellings occupy a portion grounds. The library of the Museum, con some 25,000 volumes, complete serial runs important periodical publications in its fiel many thousands of pamphlets, is deposited new building of Huntington Free Librar Reading Room, 9 Westchester Square, the New York, N. Y.

Museum of City of New Yor

The Museum of the City of New York or Avenue between 103rd and 104th Streets York 29, N. Y., was incorporated (1923) t trate the life and history of the city by me permanent and special exhibitions. Its coll include miniature groups or dioramas, pai prints, maps, photographs, portraits, mini vehicles, fire engines, ship models, cos furniture, silver, manuscripts, rare and re books, theatrical and musical memorabilia tary memorabilia, and other objects, all r to the City of New York and its history.

Its permanent exhibitions include: New from Indian Times to the Federal Period (J ence Davies Gallery); New York from t auguration of Washington to the Present man Foundation Gallery); History of Fir Fire-Fighting; Silver by New York Silvers History of the New York Stock Exchange; I of Communications; An Old New York Toy A New York Drawing Room of 1800; two from the late John D. Rockefeller's House; costume alcoves showing interiors of 1700 1760, 1830 and 1855; History of New York M Organizations; a History of the Port of New in collaboration with the Marine Museum City of New York and the Bertha King B Memorial—Early 18th Century Bedroom. year on the average of ten special exhibitio arranged which illustrate some particular pl the City's history such as School Days— Centuries of Education in New York, Three —Around the Rim of Manhattan Island, F Dolls of the Theatre World, Inside Centra —Photographs by Ray Long, etc.

The Museum's Department of New York P raphy contains over 50,000 views of New City in various media from the earliest representation (c.1626) to the present. Th atre and Music Collections has a file of New theatre programs from 1775 to the present a mented by play manuscripts, original sce signs, stage properties and costumes, photo

and players, prints, paintings, posters, s, as well as a comprehensive collection reviews and biographies of stage person-The Costume Department has about 700 dating from 1725 to the present and s of costume accessories. Associated with the museum is the Hayden Planetarium..

American Numismatic Society

The American Numismatic Society, founded 1858, maintains the only numismatic museum in the country at Broadway and 156th St., New York.

The museum is devoted to coins, medals and decorations, which furnish the subject matter of numismatics. It is concerned with coinage for all countries, from its beginnings in the seventh century B. C. to the present, as well as with its antecedent media of currency.

On exhibition is a type collection of coins struck in the United States from colonial days until the present, including the special series of commemorative pieces. Tokens or "store cards" issued by merchants during the Civil War period and the Confederate Half Dollar, the only coin struck by the Confederate States of America, form a part of this exhibit. Changing exhibits are devoted to coins of the ancient Greeks and Romans, mediaeval and modern Europe, the Orient and South America.

In the collection of decorations there are badges of honor from many countries of the world, ranging from the mediaeval orders of knighthood to medals of military award such as the Victoria Cross and the Congressional Medal of Honor. A particularly interesting group among the decorations are the "Indian Peace Medals," pieces given to tribal chiefs by the government to enlist the friendship of American Indians.

A library covering every phase of numismatics is housed in the museum building.

Municipal Reference Library

The Municipal Reference Library was established 1913 as a special branch of the New York Public Library to serve the officials and employees of the City of New York. The Library also renders reference service to the general public. The Library's collection contains more than 100,000 volumes; an important portion consists of New York City Documents dating back to the Records of New Amsterdam (1653). The Library is in the Municipal Building on the 22nd floor and has a Public Health Division at 125 Worth Street to serve the Departments of Health, Hospitals, and the Chief Medical Examiner.

The most important business and financial services are on file in the Municipal Reference Library as well as the real estate atlases and valuation volumes.

For the benefit of those aspiring to enter the City's service, the Library maintains a Civil Service Desk where all previous civil service examinations are kept on file as well as study manuals in all city department activities. The Library also prepares bibliographies for the various positions and these are constantly used by those wishing to prepare for forthcoming examinations as well as those city employees who wish to take promotion examinations.

A monthly publication, the Municipal Reference Library Notes, is published by the Library.

New York Historical Society

The New York Historical Society (founded 1804) is located at 170 Central Park West between 76th and 77th Streets, New York, N. Y. The society maintains a library, museum and gallery of art. The library contains 300,000 volumes and large collections of pamphlets, newspapers, prints, cartoons, broadsides, maps and manuscripts, relating to American and New York history.

Here are to be found a file, beginning in 1730, of New York's first newspaper, the New York Gazette, a complete file of New York City Directories, from the first one printed in 1786; an unusual collection of genealogical material; and an excellent local history section covering every state in the Union. The manuscripts include the Horatio Gates, James Duane, Rufus King, Albert Gallatin, James Alexander, John Lamb, William Alexander, General Steuben, Beekman, Luther Bradish, and Cadwallader Colden Papers, and 200 George Washington letters.

Also of importance are the original articles of Burgoyne's surrender; an orderly book record of Nathan Hale's execution; letters patent from Charles II to Edmund Andros, 1674, authorizing him to take over New Netherland from the Dutch Governor; Lord Cornbury's Charter to the City of New York; the correspondence of the American

Fur Co. with its Western posts; the manuscripts of Henry O'Reilly relating to the telegraph, and Philip Hone's manuscript diary, 1828-51.

The Landauer Business History Collection comprises letterheads, advertising cards, broadsides, posters and other ephemeral material relating to commercial products and supplies a comprehensive source for American business, industrial and advertising history.

Among the museum collections are important asscciation pieces, including the Beekman family coach, used before the Revolutionary War in this city, the remains of the famous equestrian statue of King George III, and the statue of William Pitt (the Earl of Chatham), champion of the American cause in Parliament; some original furniture of Federal Hall, where Washington was inaugurated first President, and an almost complete collection of the John Rogers plaster groups with 35 of the original bronzes.

The Port of New York Gallery is given over to the maritime history of New York and is fitted in the style of a sailing vessel, from the "cabin" of which views of the New York skyline may be seen as it appeared at various times in its history.

The Gallery of Art now numbers more than 1,700 paintings, including European old masters, 1,200 of the paintings are American portraits by such artists as Charles Willson Peale, Gilbert Stuart, John Wollaston, Benjamin West, Asher B. Durand, John Wesley Jarvis, and many others.

The Society also possesses the original water color drawings made by John James Audubon for his "Birds of America."

Non-Objective Paintings

The Museum of Non-Objective Painting, currently at 1071 Fifth Ave., New York, N. Y., until a new building, designed by Frank Lloyd W has been erected at Fifth Ave. and 89th S contains the collection of non-objective paintin merly owned by Solomon R. Guggenheim a da Rebay, which were acquired by the S R. Guggenheim Foundation (1937).

In the paintings represented, the artist, of reproducing concrete objects, uses a forms such as circles, squares and trian varied rhythmic combinations and manifol variations to express his conception of Although the non-objective movement sta Europe in 1908, it now has its center in A European museums have put on loan exhi paintings from these New York collections.

Pierpont Morgan Library

The Pierpont Morgan Library, 20-33 Eas St., New York, N. Y., is based on collectio gun by J. Pierpont Morgan in 1889. In 19 son, J. P. Morgan, gave the library and dowment to a board of trustees as a memo his father. On March 26, 1924 the Libra incorporated as an educational institution New York State legislature. Its facilities a to students engaged in research and the has access to the periodic exhibitions dail a.m. to 5 p.m. except Sundays, holidays an ing August.

From April 5 to July 23, 1949, the librar an exhibition of 256 items representative of acquired by gift or purchase during its f years as a public institution. During this the library acquired about 200 mediaeval a naissance manuscripts, including sixth c gospels in Syriac; many illuminated bible pels and liturgical texts and elaborately volumes, the work of mediaeval miniaturis

NEW YORK PUBLIC LIBRARY

The New York Public Library, which, with the Library of Congress and Harvard University Library ranks as one of the three largest in the United States, was given its present organization in 1895, by the consolidation of the Astor and Lenox libraries and the Tilden Trust. These constitute the basis of the Reference Department of the Library, at Fifth Ave., and 42nd St., which is supported from private funds. A number of circulating libraries were acquired, from 1900 to 1904, to form the basis for the present Circulation Department, which is maintained by the city of New York. This department operates 38 branch libraries in Manhattan, 20 in the Bronx and 7 in Richmond.

Besides the vast collection of reference volumes, the Library possesses many rare books and maps, which are regularly on exhibition. One of the most noteworthy exhibitions occurred from Nov. 23 to Dec. 31, 1948, when 100 treasures were exhibited to observe the centenary of the first library. The Library placed on view the Gutenberg Bible that James Lenox bought in London in 1847 for $2,600, and which was recently insured for $500,000; a First Folio Shakespeare; the only known copy of the original edition of Columbus' letter announcing the discovery of a new world; a Carlovingian manuscript of the gospels dated 950 A.D.; the Bay Psalm Book, first book printed in America, in 1640; the final draft of Washington's Farewell Address in his own hand; New York's first newspaper the Gazette of 1726, and first editions of many of the finest literary works in English.

The Annual Report of the Librarian, made public Nov. 21, showed that in the year between July 1, 1948 and June 30, 1949, an average of 8,229 daily visitors was recorded at the central building, Fifth Ave. and 42nd St. The number of readers in the Reference Dept. was 1,259,327. There were 3,259,075 bound volumes in the Reference Dept. an increase over last year of 58,119. The total number of books in the Circulation Dept. was 1,642,889. To this must be added the 93,107 volumes in the Municipal Reference Library in the Municipal Building, Chambers St. and City Hall Park, making a total for the Library of 4,995,071. The 65 branch libraries, comunity libraries and substations lent for home use a total of 9,191,595 books.

The staff comprised 1,576 full-time employees on June 30, 1949, with 669 in the Reference Dept. and 907 in the Circulation Dept.

BERG COLLECTION

This collection was founded (1940) by Dr. Albert A. Berg in memory of his brother, Henry W. Berg, and is one of the world's great collecti English and American literature. It is p larly strong in the writings of the 18th an centuries and, in addition to first editions, p tation copies and other unusual volumes, co a large amount of manuscript and associatio terial. The collection consisted origina books gathered by the Berg brothers. Lat important collections of the late W. T. H. and Owen D. Young were added. The Ber lection is kept on the third floor, and incl reading room, exhibition room and stacks.

GEORGE ARENTS COLLECTION

This is a special library of books and material about tobacco formed by George and given to the Library by him and his There are approximately 5,000 volumes. begin with the earliest mention of tobacco printed accounts of 15th-century America ploration, and include historical, literar economic material relating to the develo enjoyment and commercial status of tobac the tobacco industry. It is a rare book as we subject collection.

SPENCER COLLECTION

The Spencer Collection of Illustrated Boo Books in Fine Bindings came to the L through the will of William Augustus Spenc died in the Titanic disaster. Some of the Li finest illuminated manuscripts, includin "Tickhill Psalter," an English manuscript 14th century, are in this collection. O drawings for illustrations, as well as p books, are featured.

OFFICERS AND TRUSTEES

Officers, 1948-1949: Morris Hadley, pres Lucius Wilmerding, first vice-president; Bruere, second vice-president; Roland L. mond, secretary; Henry Bruere, treasurer; A. Beals, director.

Board of trustees, 1948-1949: Vincent Ralph A. Beals, Dr. Albert A. Berg, Henry Dr. Harry Woodburn Chase, William Adam lano, John Foster Dulles, Morris Hadley, Larsen, George De Forest Lord, Julius S. M Newbold Morris, Charles Pratt, Roland L. mond, Elihu Root, Jr., John Mortimer Francis Cardinal Spellman, Henry C. T Myron C. Taylor, Lucius Wilmerding, Ex- the Mayor of New York, the Comptroller a president of the Council.

hs. Five books printed by William Caxgland's first printer, have recently been the 65 Caxton items in the library. Also l were the earliest dated piece of printing rica; the Gutenberg Indulgence of 1455; tions of ancient classics, the earliest bibles French, German and Italian vernaculars; f Vesalius, Copernicus and Galileo; the Latin editions of Columbus' account of ge of discovery. Among manuscripts the exhibited the autograph manuscript of Eugenie Grandet, as well as letters and ts of Ferdinand and Isabella of Spain, oleyn, Galileo, Rousseau, John Paul Jones omas Jefferson.

brary owns many rare bibles, among them enberg bible of 1455, the first bible in the lgate printed from movable type: the first bible of de Spira, 1471, and the first edition of the Hebrew Old Testament, he last two are the only copies in America.

eens Borough Public Library

Queens Borough Public Library has adation headquarters in the Central Build-14 Parsons Boulevard, Jamaica 2, N. Y. ntral Building houses the Central Circulaentral Children's Room, General Reference nent and special rooms devoted to Long nistory and genealogy, art and music, busicience and technology, periodicals, educad a lending collection of over 1,000,000 .

are 28 branch libraries giving reference as lending service, 18 sub-branches, a book 1 98 other agencies for the distribution of

e year ended June 30, 1949, the library had books, 225,132 registered borrowers, and ed 3,425,369 books for home use.

heodore Roosevelt Museum

Theodore Roosevelt Museum, established y the Roosevelt Memorial Association, is in Theodore Roosevelt House, the re-birthplace of the late President at 28 East reet, New York, N. Y. In the Museum are d photographs, cartoons, letters, books, ripts, guns, swords, saddles, hunting tro-wearing apparel and numerous other items rest related to the late President. Much material is chronologically arranged.

g the items are his buckskin "chaps," his g irons and other paraphernalia as a cowboy, the spectacle-case which saved his life when he was shot in Milwaukee (1912), and the bullet-pierced speech he carried in his left breast pocket, as well as trophies of the Spanish War and letters and documents relating to the Presidency. The cartoon collection is especially notable. The mounted lion, shot by the former President in Africa, attracts younger visitors.

Theodore Roosevelt House is itself a museum. The first and second floors of the residence in which the Roosevelt family lived in the 1850s and 1860s have been restored by the Woman's Theodore Roosevelt Memorial Association, and apart from their Roosevelt interest are important as a reproduction of a well-to-do American home of the middle nineteenth century. Many original pieces of furniture are shown, including the bedroom set of the room in which Theodore Roosevelt was born, and the miniature chairs he used in his earliest childhood.

Science and Industry Museum

The New York Museum of Science and Industry is located at the Avenue of the Americas (6th Ave.) entrance of the RCA Building, Rockefeller Center. Here the developments of science and industry are presented in a panoroma of exhibits which the ordinary layman can readily understand, and many of which he can operate himself, in animated models, vivid dioramas and ingenious push button displays.

The visitor interested in railroad models can operate, by pressing buttons, everything in railroading, from the early De Witt Clinton up to the giant mogul engines of today. In the Marine Section can be seen models dating from the first U.S.S. Cabot to the present day baby flat-top.

In the Electrotechnology section there is a comprehensive presentation of the development of electricity, as the servant of mankind. Starting with Faraday's experiments in magnetism, a series of operating exhibits shows the progressive steps in development which are the basis of today's myriad uses of electricity.

In addition to being able to hear one's own voice in the Communications Section, the story of telephone communication is shown. Dating back to the earliest devices used in communication, the exhibit includes a visitor operated dial system showing the many mechanical operations required to "put through" a local telephone call in metropolitan areas.

Numerous other exhibits include mechanics, power, optics, aviation and transportation.

ROCKEFELLER CENTER; RADIO CITY

feller Center, the largest privately-owned s and entertainment center in America, is in the heart of New York City, from 48th Streets, between Fifth Avenue and the of the Americas. More than 75,000 men rectly employed in the construction of its dings. Construction of the first—the RKO g—was started in September, 1931. The ecent structure in the development is the Esso Building. The surface area of Rockeenter covers 549,856 sq. ft., more than 12½ of which 450,705 sq. ft. are leased for a riod from Columbia University.

edifices in the west part of the Center: RCA g (850 ft. tall), RCA Building West (243 , Radio City Music Hall (121 ft. tall), RKO g (409 ft. tall), Center Theatre (106 ft. omprise "Radio City." The studios and arters of the National Broadcasting Comnd the American Broadcasting Company ated in the 70-story RCA Building.

en other structures are: The United States Co. Building (278 ft. tall), British Empire g (90 ft. tall), La Maison Francaise (90 ft. alazzo D'Italia (92 ft. tall), International g North (92 ft. tall), International Build-2 ft. tall), Time & Life Building (490 ft. Associated Press Building (226 ft. tall), Air Lines Building (225 ft. tall), Esso g (424 ft. tall).

estimated daily population of Rockefeller is 160,000. More than 32,000 work there ,000 persons visit there every day. In the are the business offices of more than ompanies and their subsidiaries.

e Center are 25 eating places; an 800-car garage; U. S. Post Office; government passport bureau; group of 12 landscaped sky gardens; consulates of 20 foreign countries; many special exhibitions; an employee gymnasium, and, in season, an outdoor skating pond. The RCA Building, in gross area 2,908,903 sq. ft., has a ground area of 99,770 sq. ft. with a frontage of 155 ft. on the Avenue of the Americas, 472 ft. on 49th St., 468 ft. on 50th St. and 191 ft. on Rockefeller Plaza. On the 70th floor are the Observation Roofs, 904 ft. above mean high water level, and 850 ft. above the street.

The Radio City Music Hall is the largest indoor theater in the world and seats 6,200 people. The Center Theatre, seating 3,500, has been used for musical comedy and grand opera and for the last few years has been the home of ice shows.

A series of sub-surface concourses 2½ miles long—air conditioned and flanked by specialty shops—provide pedestrian traffic facilities beneath the buildings and streets, so that it is possible for visitors to pass underground through most of the buildings; air-conditioning plants give the Center the world's largest air-conditioning system for human comfort in a commercial development.

The Esso Building is the tallest office building to be completely air-conditioned. The "Main Street" of Rockefeller Center is Rockefeller Plaza, a privtae street 60 feet wide running between 48th and 51st Streets, 315 ft. west of Fifth Avenue and parallel to it. From Fifth Avenue a promenade, the Channel leads down toward the Plaza and the RCA Buildinf. It is 57 ft. wide and 200 ft. long and contains six shallow reflecting pools surrounded by shrubs and flowers. At the end of the Channel lies the Lower Plaza, a court 125 ft. wide and 95 ft. long, used for ice skating in the winter, and for an outdoor cafe in the summer. The Prometheus Fountain is located in the Lower Plaza.

STATUE OF LIBERTY NATIONAL MONUMENT

A statue known the world over and symbolizing to European immigrants the freedom and security of a democratic land is the statue of Liberty Enlightening the World, popularly known as the Statue of Liberty, on Bedloe's island in the harbor of New York. Rising 305 ft. above the water line, this substantial figure of a woman holding aloft a torch that is illuminated at night, is located 2,950 yards southwest of the Battery in Manhattan and reached by a ferry that accommodates well over 500,000 visitors a year. The island is the property of the Federal Government and is administered by the National Park Service of the Department of the Interior.

The United States owes this great symbolical statue to French friendship and the personal enthusiasm of an Alsatian sculptor, Frederic Auguste Bartholdi, who was born Apr. 2, 1834 in Colmar, Alsace, and died Oct. 4, 1904, in Paris. Bartholdi is known in France for a number of famous works, foremost among them the sculptured lion commemorating the heroic defense of Belfort. He is also the sculptor of the Bartholdi fountain in Washington, D. C., and of a statue commemorating Lafayette's arrival on American shores that was placed in Union Square, New York. During the Paris Commune that followed the defeat of France by Prussia in 1871, Bartholdi came to the United States. He was moved by the idea of placing a statue in the harbor and immediately began plans to bring it about. With the help of the Franco-American Union, in which E. de Laboulaye was active, he solicited contributions from French citizens, supplying a large part of the expense himself. In France 180 cities formed committees and $250,000 was raised, chiefly by small donations.

Bartholdi's Mother Was Model

Bartholdi began his work in 1874. His model for Liberty was his mother, Charlotte Beysser Bartholdi. He made a 9-foot cast in plaster and then enlarged it four times to 32 ft. On this basis he computed the statue in sections. Wood patterns were made and sheets of copper 3-32 of an inch thick were hammered into shape on them by hand. A framework of four huge steel supports was designed by Gustave Eiffel, whose fame endures in the Eiffel tower.

The hand of the statue holding aloft the torch was exhibited at the Centennial exposition in Philadelphia in 1876. It was then taken to New York City and exhibited on a pedestal in Madison Square.

On Washington's birthday, Feb. 22, 1877, President Hayes authorized the use of Bedloe's island for the statue, the site having been suggested by Bartholdi and approved by Congress.

The head was shown at the Paris exposition of 1878. When framework and base were put in place in Paris the American ambassador, Levi P. Morton, drove the first rivet on Oct. 24, 1881, the centennial of the battle of Yorktown, in which French and Americans were allies.

The statue was finished in 1883 and formally presented to Ambassador Morton July 4, 1884, by Ferdinand de Lesseps, head of the Franco-American Union. He had built the Suez Canal and was at work on the ill-fated Panama Canal project at the time.

CORNER-STONE OF PEDESTAL LAID

On Aug. 5, 1884, the Americans in turn laid the cornerstone for the pedestal on Bedloe's island. This was to be built on the foundations of the star-shaped Fort Wood, which had been erected by the Government in 1841. The fort originally mounted 70 guns and had a garrison of 350. The island, which had been sold to Isaac Bedloe by the colonial government of New York, had been used for a pest-house by the colony after 1750.

The Amerian commmittee had raised $125,000, but when the pedestal was 75 ft. high, t found to be inadequate. Joseph Pulitzer, of The World of New York City, on Mar. called for general subscriptions. By Aug. 1 he had raised $100,000. This came from individuals. The statue was already on shores, having arrived dismantled, in 210 cases, in the steamship Isere, which reach York from Rouen, France, in June, 1885.

New York citizens eagerly followed the fitting the statue together. The pedestal wa of concrete with granite facing and steel were built into it to connect with the fra of the statue and hold it in place. The fir of the statue was driven July 12, 1886 a last on Oct. 28, 1886, when President Cleveland dedicated the statue in the pres the sculptor, Bartholdi.

The cost of the statue was estimated at and that of the pedestal at $280,000, but e mounted and estimates of the total rang $500,000 to $600,000. The statue weighs lbs. or 225 tons. The copper sheeting 200,000 lbs. It is estimated that there steps from the land level to the top, co of 195 steps from the land to the top pedestal, 154 steps inside the statue to th and 54 rounds on the ladder leading to t that holds the torch. Visitors may enter th which will hold 12 persons, but not the tor statue is open every day in the year.

The torch was originally maintained Lighthouse Service. Funds for permanentl ing the whole statue were raised by subs by The World of New York in 1916 and Pr Wilson turned on the lights Dec. 2, 191 island was used by the United States Arm 1937, when the post was abandoned. Since has been maintained by the National Park

EMMA LAZARUS' FAMOUS POEM

A poem by Emma Lazarus, which is gra a tablet within the main entrance of the p on which the Goddess stands, follows:

THE NEW COLOSSUS

Not like the brazen giant of Greek fame,
With conquering limbs astride from land t
Here at our sea-washed, sunset gates shal
A mighty woman with a torch, whose flar
Is the imprisoned lightning, and her name
Mother of exiles, from her beacon-hand
Glow world wide welcome; her mild eyes co
The air-bridged harbor that twin cities f
"Keep ancient lands, your storied pomp!" c
With silent lips. "Give me your tired, you
Your huddled masses yearning to breathe
The wretched refuse of your teeming shor
Send these, the homeless, tempest-tost
I lift my lamp beside the golden door!"

Aching corns are a sign of rain in all countries. In Ireland applications of hot ivy-le house-leek are said to relieve painful corns. An early English folk device for extractin was to steep a pearl button in lemon juice until dissolved, then to place a piece of lemon soaked liquor upon the corn every day until the corn could be easily extracted. Another English pres says to steal a small piece of beef and bury it. As the meat rots, the corn will diminish. Both c remedies have traveled as far as Mississippi. Another southern corn cure is to rub a kernel on the toe-corn and feed it to an old rooster—From Funk & Wagnalls' Standard Dictionary of F Mythology and Legend.

ZOOLOGICAL PARK AND AQUARIUM (BRONX ZOO)

By William Bridges, Curator of Publications

e five ways by which a zoological garden cquires its animals: 1, by purchase from .lers; 2, by births to animals already in ion; 3, by exchange of surplus animals - zoos; 4, by "deposit" or temporary private owners; 5, by its own collecting .

York Zoological Park (familiarly known onx Zoo) uses all these methods except an-deposit, and is one of the few zoos rld that regularly sends out major col- editions. Not only are expeditions likely considerable expense, but there are or four really great animal collectors orld today—men with the specialized climatize and transport safely the more ammal and bird rarities. The Bronx ns to have on its staff the greatest col- them all, Charles Cordier, who has ore "first time on exhibition" animals do-China, South and Central America a, than any other collector.

of a zoo's own expeditions is one which June of 1949 with the return of Charles nd his wife, Emy, from the Belgian h some 200 mammals, birds and reptiles, the Congo peacock, the giant pangolin, con finfoot, black guineafowl and Hart- cks—mammals and birds never before anywhere in the world—and a whole eatures seen for the first time alive in d States. Mr. and Mrs. Cordier had rly 20 months in the Belgian Congo, ut of a base camp near Stanleyville, and plane was chartered to bring them and ction directly back to New York.

MYSTERY BIRD OF CONGO

go peacock—which is not a peacock at a member of the pheasant family—is the most celebrated bird in Africa. It known to the scientific world only since Dr. James P. Chapin of the American f Natural History, the world authority f the Belgian Congo, accidentally dis- vo stuffed, dusty specimens in a small n Belgium. They had been there for leadingly labelled. Something about them Dr. Chapin of two feathers he had taken hat of a native hunter in the Congo in which he had never been able to identify. ers proved that the birds actually did the Congo, and subsequently a number were obtained for important museums. ird had never been brought out alive New York Zoological Society focussed its edition on the capture. Charles Cordier ut 6 males and a single female, all in ndition.

other great rarities resulting from this dition were Torday's elephant shrews, nkeys, Johnston's mangabey, Jackson's irrels, Emin's tree hydrax, Bates's ser- , Schubotz's francolin, Uele crested and len's crested guineafowl, Whiteside's , Cameroon finfoot, and half a dozen brilliant, iridescent sunbirds.

h not collected by him, since their cap- nder the strict control of the Belgian vernment, Charles Cordier brought back ountain gorilla and an okapi, the latter second specimen of this peculiar animal distant relative of the giraffe—in the ates.

w York Zoological Park is now engaged ansion program planned during the war new "cooler" house for the summer ex- f antarctic penguins was built in 1949, utting on exhibition an interesting series hat previously could be shown only dur- inter months.

were found, also, for the beginning of on of a great Conservation exhibit, show- is happening to our soils and waters, and type of house and barless enclosures for bition of the great apes, particularly rang-utans and chimpanzees. This latter on is in line with the modernization pro- reby a large proportion of all the animal ventually will be bar-less. The African ction of the zoo, opened in 1941, was f these modern continental units.

r 1949 marked the fiftieth anniversary of the Bronx Zoo, which was opened to the public on November 8, 1899. During that time it has had more than 100 million visitors and they keep coming at the rate of 2,500,000 to 3,000,000 a year.

HIGHLIGHTS OF COLLECTION

Outstanding among the approximately 2,600 mammals, birds and reptiles in the collection (of about 1,100 kinds) are:

Two adolescent lowland gorillas and a baby mountain gorilla (the latter from the Cordier collection).

A giant panda from the mountains of western China.

A bongo, most beautiful of all the African antelopes, the only one of its kind in the New World.

Two duck-billed platypuses, queer egg-laying mammals, from Australia, and also two echidnas from the same continent. The platypus and the echidna are the only mammals in the world today which lay eggs. The male platypus also has poison spurs. These were brought from Australia in 1947 by David Fleay, an Australian naturalist, and to house the platypuses the Bronx Zoo built a special out-of-doors swimming pool and hay-filled burrow, called a "Platypusary," where visitors may see the animals between the hours of 3 and 4 o'clock every afternoon during the warm months. The zoo also operates a large "Worm Farm" in the basement of the Lion House to provide the hundreds of earthworms that the platypuses eat every night, along with crayfishes, frogs, mealworms and egg custard.

African elephants are seldom seen in zoological gardens because of their reputation for being hard to handle. The Bronx Zoo however has four, including three young ones presented by the Belgian Congo government, and expects eventually to exhibit them on a large, moated area adjacent to the present African Plains exhibit.

Many of the birds in the Main Bird House are exhibited behind glass and one whole room, called the Jewel Room, contains small, brightly-colored tropical birds in brilliantly lighted compartments, the public viewing them from the darkened center of the room. This technique has been entirely successful in bringing out the colors of sunbirds and hummingbirds particularly. Among other bird rarities are the scarlet cock-of-the-rock, the umbrella bird and the quetzal, all shown at the Bronx Zoo for the first time.

Gorillas, orang-utans and chimpanzees also are exhibited behind glass, for the protection of the animals from the coughs and colds of visitors.

Supplementary services of the New York Zoological Society are Question House, a building in the center of the zoo where visitors' questions about animal life are answered by trained zoologists; a Children's Zoo where youngsters may play with tame animals; and the Farm-in-the-Zoo for the exhibition of domestic animals. The Children's Zoo and the Farm operate only during the spring, summer and fall.

THE AQUARIUM

Since the closing of the old New York Aquarium at the Battery in 1940, a portion of the collection has been exhibited in the Lion House in the Bronx Zoo. The staff has been kept virtually intact, and much time has been spent on experiments in new exhibition techniques, and in making detailed blueprints for the new New York Aquarium eventually to be built at Coney Island.

Whitney Museum

The Whitney Museum of American Art at 10 West Eighth Street, New York 11, N. Y., was founded (1931) by Gertrude Vanderbilt Whitney for the advancement and the dissemination of an appreciation of American art, especially of contemporary art. The Museum's Permanent Collection consists of about 800 oils; 575 watercolors and drawings, 141 sculptures and 1,000 prints. All works in the collection are by American artists with emphasis on work by living artists.

The Museum holds comprehensive annual exhibitions of contemporary American paintings, sculpture, watercolors and drawings, and retrospective and historical exhibitions of all phases of American art. Books on American artists of the past and present are published by the Museum.

Building the U. N. World Capitol in New York City

The largest and most important building construction project in the country is now being carried out for the United Nations on a plot of ground east of First Ave., between East 42nd and East 48th sts., Manhattan, New York, N. Y. Work on the site began in 1946; work on the first building, the Secretariat, began Sept., 1948, and is to be completed early in 1951.

The site was chosen after a Committee on Plan and Scope, appointed by the Mayor and with Robert Moses, chairman, found the proposed world capitol in Flushing Meadow Park too remote for daily business. John D. Rockefeller bought the first tract on the East River for $8,000,000 and gave it to the UN, contingent on the addition of other parcels by the City.

The City granted the use of the waterfront, closed the streets from East 42nd to East 47th, east of First Ave., transferred a playground north of 42nd St., widened First Ave., and constructed a traffic tunnel, granted an easement over Franklin D. Roosevelt Drive, and provided for tax exemption. The UN in turn assumed the cost of certain property adjustments.

COST TO NEW YORK CITY

The City of New York is investing over $23,000,000 in the UN enterprises. In reconstructing the City building at Flushing Meadows for the General Assembly it spent $2,000,000. For land, water rights and tenant relocation, the City is paying over $8,000,000.

Fifteen different projects related to clearing and rehabilitating the site will cost $13,000,000. These will include $2,080,000 for transferring sewers, public utilities and making temporary roads; $1,000,000 for paving; $1,500,000 for superstructures for overpasses; $4,620,000 for a tunn First Ave., of which $79,000 comes the UN and utility companies; $2,5 for reconstruction of East 42nd St tween First Ave., and Second Ave.

PAYMENT BY UNITED NATIO

The UN in turn will pay for the l ings of the world capitol. These w erected under eight contracts tot $51,300,000. Excavation will cost $5 the Secretariat building will cost $2 000; the foundations, $2,650,000; the ing halls, $12,000,000; an underg three-level garage for 1,500 cars, $4,0 the library, $650,000; the General A bly, $7,500,000; landscaping, $1,500,00

The UN has a loan of $65,000,000, be no interest, from the United States ernment, for construction and equip

FORMAL DEDICATION

The cornerstone of the UN was for laid Oct. 25, 1949, by Trygve Lie, Secr General of the UN, in the presen President Harry S. Truman and other dignitaries, after President Tr had delivered the dedicatory addres General Assembly, UN, convened a 42nd St., and the East River, belo towering 39-story steel frame of the retariat building, which rises like a oblong plinth on the river's edge. A those in the seats of honor were, be President Truman, Brig. Gen. Carl Romulo, president of the General A bly, Secretary of State Dean Ach Governor Thomas E. Dewey of New Warren R. Austin, U. S. delegate t UN. Mayor Wm. O'Dwyer and repres tives of the 59 nations in the UN. Th ercises were broadcast in 26 languag

NEW JERSEY STATE SENATE

County	*Frank S. Farley, (R)
County	*David Van Alstyne, Jr. (R)
and County	W. Howard Sharp, (D)
County	*Edward J. O'Mara, (D)
County	J. Richard Kafes (D)
County	*David Young, 3d (R)
unty	*W. Steelman Mathis (R)

New Jersey State Assembly

Sixty assemblymen were elected to office.

Democrats	22
Republicans	38

New Jersey Proposals

Aid to State Institutions: 762,278 yes—367,607 no.
Veterans Bonus: 570,764 yes—585,175 no.
Housing Bond Issue for $100,000,000: 386,239 yes —636,569 no.

OHIO

Approved manufacture and sale of colored oleomargarine in state by a majority of 489,000.

OKLAHOMA

Prohibition
Special Election (Sept. 27, 1949)

Repeal defeated. Drys 301,844, wets 254,715. Of 3,701 precincts 252 uncounted.

Prohibition scored its sixth solid victory since statehood in 1907.

PENNSYLVANIA

Veterans Bonus

Pennsylvanians approved a $500,000,000 veterans' bonus by a three-to-one majority. Veterans of World War II will receive payments up to a $500 maximum.

U. S. House of Representatives
Special Election (Sept. 13, 1949)

John P. Saylor (R)	59,164
Mrs. Robert L. Coffey (D)	50,275

VIRGINIA

Governor

John S. Battle (D)	132,412
Walter Johnson (R)	38,171
Clarke T. Robb (Soc.-D)	2,323

Poll Tax

Amendment for its repeal was rejected. A poll tax of $1.50 per year must be paid up for three years to permit an individual to vote. Funds are earmarked for school use.

What It Costs to Attend College in 1950

Estimates of the current cost of attending college for one year were collected by the Conn Mutual Life Insurance Co. from many institutions and published in November, 1949. The sum of tuition, books, clothes, room and board at representative institutions follows:

Boston Univ.	$1,600	Indiana Univ.	1,485	Purdue	
Brown Univ.	1,650	Iowa	1,125	Rutgers	
Bryn Mawr	2,000	Johns Hopkins	1,490	Smith	
U. of California	920	U. of Kansas	1,070	Southern Methodist	
Carnegie Tech	1,525	Maine	1,075	Stanford	
U. of Chicago	1,845	Mass. Tech	1,560	Swarthmore	
U. of Colorado	1,105	U. of Michigan	1,110	U. of Texas	
Columbia	1,720	Minnesota	1,540	Vassar	
Cornell	1,635	Mt. Holyoke	1,875	U. of Virginia	
Dartmouth	1,715	New York U.	1,695	U. of Washington	
Duke	1,200	Northwestern	1,455	Wellesley	
U. of Florida	1,060	Notre Dame	1,815	Williams	
Fordham	1,470	Oberlin	1,365	U. of Wisconsin	
Georgetown	1,725	Oklahoma	1,270	Yale	
Harvard	1,600	Pennsylvania	1,800		
U. of Illinois	1,145	Princeton	1,850		

Concessions on tuition are made by state universities and in many institutions scholarships pay or part of tuition fees are available for qualified students.

An instance of direct-mail solicitation that went astray was described at the conven the Direct Mail Advertising Assn., in Philadelphia, according to the Associated "A young friend of mine," said one of the speakers, "was separated from the girl of his choi determined to court her by mail. So he sent her a proposal every day for 65 days. On the 66th d girl married the mailman."

UNITED STATES POPULATION

ns of the American People; Figures for Nation, Dependencies

pple of the United States comprise a fusion ite stocks of Europe; the descendants of a ck of Negroes from Africa, direct or he Caribbean; small segments from other s and the descendants of the aboriginal By the beginning of the 18th century the erican was generally applied to the colon- American type is now freely distinguished cteristics of attire, bearing and political ns common to the sons of naturalized no less than to those who have behind ht generations of life on American soil. esident Franklin D. Roosevelt, himself a ative of the latter, said "We are all im- " he emphasized a common bond, an- son why Americans are determined to re- ee and equal."

he reasons for the original settlements in century are adduced, the spirit of daring nture, so often celebrated, is found less l than the desire to escape the hard living s of Europe. While early attempts to Virginia and the Carolinas were inspired ors taking commercial risks, these colonies successful than those of men forced to ocean by religious intolerance, feudal op- military havoc and famine. The Dutch mercially inspired when they settled col- Dutch in the Hudson Valley and Swedes s on the Delaware, but the Mayflower ts at Plymouth were nonconformists who he strictures of the Established Church. e English Revolution put the Puritans in 48-1660, Catholic Cavaliers settled in Vir- d when the revocation of the Edict of n 1685 brought intolerance to France, s emigrated to New York and South

Spaniards in the Southwest

ttempts to establish colonies were made paniards in Florida and the French in the est and along the Mississippi river. The Spanish influence came late in the 16th rom Mexico, led to the establishment of missions for the Indians and the Spanish- colonization in the Southwest. This oc- hen New England and Virginia were their dominant English settlements. New ds had both Dutch and English, and New Amsterdam became New York. rsey absorbed groups of English and Welsh Pennsylvania, established by English nd settled by English, Swedes and Finns, 1710, to absorb Swiss Mennonites, Dunk- Germans from the Palatine; when the Revolution broke out in 1775 Pennsyl- 100,000 settlers of German origin. Their nts today cultivate homely crafts in middle ania and speak a dialect called Pennsyl- tch. Palatine peasants also settled in the and in the Mohawk valley of New York.

Coming of the Irish

sh came for two reasons—persecution by blished Church and famine. In the early he 18th century Scotch-Irish settled in Atlantic states. In the middle of the 18th famine forced the sons of South Ireland ate to the colonies at a rate of 10,000 a s, by 1775, the colonies had a large body English settlers, ready to back up the eadership, which was chiefly in the hands dants of earlier settlers from England.

Hardy Sons of Toil

rliest Americans not only were immi- ut invariably were poor. Some families of ceived patents to large estates, but most of s were hardworking people, eager to strike eir own into the wilderness. The lure of d led them to brave such hazards as un- rests, floods and hostile Indians. f them had been deported for such in- of the laws as stealing a loaf of bread; d fled political persecution. Many reached es as indentured servants, bound for years ter before they attained freedom. These erally employed in the northern colonies. Mayflower carried laborers who did not sign the Compact. But all, whatever their beginnings, unleashed new energies as new opportunities opened.

In the South, the sinister traffic in human slaves, beginning with the first cargo at Jamestown in 1619, expanded with the plantation system until, by 1775, there were between 400,000 and 500,000 slaves. By 1850 there were over 3,000,000; by the time of the Civil War, about 4,000,000.

Millions at Castle Garden

In the 19th century the flood-gates of immigration opened; America was now the great land of opportunity. The Irish, suffering from famine, continued to come in great numbers. Germans, Scandinavians and central Europeans increased, especially after the political disorders of 1848. American immigration, which had reached 1,173,251 in 1850, totalled 2,598,214 in 1860. From 1815 to 1852 a total of 2,064,581 left British and Irish ports for the United States; from 1853 to 1905 6,120,911 departed from the same ports. Castle Garden, New York, became the Plymouth Rock for vast multitudes whose children were to sit in the seats of the mighty.

As Germany became more prosperous after the Franco-Prussian war this flood dried up, but now Russia, Russian Poland, Austro-Hungary, the Balkans and Italy began sending their sons. The persecution of the Jews in Russia from the 1880s on led to vast migrations. From 1901 to 1905 Italy sent 959,768 emigrants to the United States; Russia sent 658,735; Austro-Hungary (which included Bohemia) sent 944,239; Germany sent only 176,995. But Britain and Ireland were still sending 385,469.

This immigration changed the appearance of American cities, but did not affect the American pattern that had emerged with the growth of the Republic. Boston, once a Puritan city, was now largely Roman Catholic; New York had more Italians than Rome and more Jews than Jerusalem. Chicago attracted immense blocks of Poles, Hungarians and Bohemians.

Quota System Introduced

In 1915 the first attempts to limit immigration by demanding a literacy test were made in Congress and defeated; in 1917 the same tests were passed over the veto of President Wilson. The possibility of huge migrations after the first World War, during the post-war depression, frightened labor and government officials. An Emergency Immigration Act, restricting foreign nations to quotas, was passed in 1921, amended in 1922 and replaced by a new act in 1924. This provided that the quotas of 150,000 allowable immigrants be based on national origins, so interpreted as to insure a larger immigration from northern Europe than from other states, and thus support the preponderance of that strain in American life.

But developments have shown that the effect of America on its children is greater than that of any one group on America, and that personal leadership, industrial enterprise and cultural qualities have been contributed as freely by America's youngest as by her oldest sons.

Population

The population of continental United States, including armed forces overseas, was estimated at about 148,902,000 on June 1, 1949, by the Bureau of the Census, Department of Commerce. This was an increase in 9 years of 17,232,000 or 13.1 per cent of the 131,669,275 persons reported on April 1, 1940.

The increase in population during the first quarter of 1949 was the same as during the corresponding period in 1948—580,000. The 17th decennial census, announced to begin April, 1950, is expected to record the largest population increase for any decade between census-taking, exceeding the previous decade by 100 per cent. The reasons for this increase are believed to be a high increase in wartime and post-war birth rate, a high level of employment, a high marriage rate, and post-war demobilization. Low death rates have also influenced the figures.

The total population in the United States on April 1, 1949, excluding armed forces overseas, was estimated at 148,018,000.

Mrs. Truman's Ozark Pudding

Mrs. Harry S. Truman's favorite recipe for Ozark pudding received national attention, according to Frederick C. Othman, Scripps-Howard Washington correspondent, when she contributed it to a symposium. It calls for one egg, ¾ cup of sugar, two tablespoons of flour, 1¼ teaspoons of baking powder, ⅛ teaspoon of salt, ½ cup of chopped raw apple, ½ cup of chopped nuts and one teasoon of vanilla. Beat the egg and the sugar together until the result is very smooth. Mix the salt, flour and baking powder and stir th Add the apple, nuts and vanilla and bake minutes in a medium oven in a buttered pie

Mr. Othman wrote that one corresp printed the recipe as calling for baking soda of baking powder, resulting in indignant from experimenters. Mrs. Truman's ad others who didn't get the best results was th should do their mixing with a fork and power, as the housewives in the Ozark d before electrical mixers were invented.

The Dionne and Diligenti Quintuplets

Dionne quintuplets—Emilie, Yvonne, Cecile, and Annette—were born to Mr. and Mrs. Dionne May 28, 1934 in Callander, Ontario. Dr. an R. Dafoe, a country doctor, since delivered the babies, all of whom were thin a half hour in the log farmhouse of arents. Their aggregate weight at birth was nds 6 ounces but they gained in weight than the average child of their age.

aby boy, weighing approximately eight pounds, was born to the Dionnes Sept. 3, 1946, the 14th child.

The Diligenti quintuplets—two boys and three girls—were born to Franco and Vallotta de Diligenti July 15, 1943 in Buenos Aires, Argentina. Senora Diligenti, 42 years old, was attended only by a midwife in whose home the births occurred. The children were named Franco, Maria Fernanda, Maria Ester, Maria Christina and Carlos Alberto.

40 census states that of the 329,478 native males numbered 168,964; females, 160,514; the males were 21 years old and over, as 17 of the females; urban Indians totaled which 13,149 were 21 years old and over. 940 census gave the total of native U. S. s 329,478 as against 328,845, a revision of total. In 1940 alien Indians born in the outside the United States totaled 4,491, t 3,552 in 1930.

—(1920) 244,437; (1910) 265,683; (1900) 1890) 248,253.

dian population in 1492 was estimated ht 846,000. In 1865 there were 294,574.

30 census shows 41 linguistic stocks di- o 96 tribes; about 35,000 Indians were not by stock and tribe.

lgonquin stock, toaling 40,670, includes Blackfeet, Cheyenne, Chippewa, Kicka- Shawnee, Ottawa, Delaware, Gros Ven- nominee and Potawatomi tribes.

skan stock (47,418) includes Apache and ribes.

Iroquoian stock (52,457) takes in Iroquois, Wyandot, Cherokee and Kiowa.

Muskhogean (33,633) includes Chickasaw, Choctaw, Creek and Seminole.

Shoshonean (15,985) embraces Bannock, Comanche, Hopi, Paiute, Shoshone, Ute.

Siouan (37,329)—Crow, Dakota, Mandan, Osage, Ponca and others.

Indian land holdings total about 53,000,000 acres. In 1887 they had 137,000,000 acres. The chief Indian reservation lands are in Arizona, California, Florida, Idaho, Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wisconsin and Wyoming.

Of the 332,397 American Indians in 1930, the full-bloods totaled 153,933 (46.3 per cent) as against 60.7 per cent in 1910. The proportion of full-bloods in 1930 was highest (97.9 per cent) among the Pimàs (mostly in Arizona), and lowest (4.2 per cent) among the Wyanoy.

VITAL STATISTICS

Based on provisional data compiled by the National Office of Vital Statistics in the Public Service of the Federal Security Agency, it was estimated that 3,559,000 births were registered United States in 1948. This was about 4 percent lower than the record high of 3,699,940 births previous year. The total number of births (registered and unregistered combined) was estim 3,876,000 for 1947 and 3,715,000 for 1948. The birth rate for 1948 of 24.4 registered births p population was, with the exception of that for 1947, higher than any rate recorded since 1918.

The number of deaths in the United States in 1948 was estimated to be 1,449,000, slightly ab total of 1,445,370 deaths registered for 1947. The death rate for 1948 was 9.9 per 1,000 estimated population. This rate is the lowest ever recorded for the Nation and represents a slight declin 10.1 for 1947 and the previous low of 10.0 for 1946.

Both the number of marriages and the marriage rate declined in 1948 from corresponding for the preceding year. There was an estimated total of 1,815,000 marriages in 1948, represe decrease of almost 9 percent from the total of 1,991,878 marriages in 1947. The marriage rate from 13.9 per 1,000 population in 1947 to 12.4 per 1,000 in 1948.

A provisional estimate indicates that 415,000 divorces were granted in the United States representing a decrease of about 13 percent from the estimated total of 474,000 in 1947. Divor for 1947 and 1948 were 3.3 and 2.8, per 1,000 population, respectively.

*Include both traffic and nontraffic motor-vehicle deaths.

**The mileage death rate is the number of deaths per 100,000,000 vehicle-miles; the population d rate is the number of deaths per 100,000 population.

†From state health authorities.

Resident death rates are the numbers of resident deaths (regardless of place of accident) per 10 population.

Totals are not sums of state figures, except National Office of Vital Statistics, 1946 and 1947.

Note: Traffic authorities generally collect reports of non-fatal injury accidents and, in most c of property damage accidents. Comparisons from state to state lack validity, however, becau wide variation in completeness of reporting.

Of the 32,000 motor vehicle deaths in 1948—deaths from collisions with pedestrians, 9,850; motor vehicles, 10,100; railroad trains, 1,492; street cars, 100; bicycles, 500; animal drawn vehicl animal, 100; fixed objects, 1,000; non-collision accidents, 8,850.

Approximate total of non-fatal injuries, 1,100,000.

AGE OF DRIVERS MOTOR-VEHICLE TRAFFIC ACCIDENTS, 1948

Source: Reports from 28 state traffic authorities.

Age group	In fatal accidents		In all accidents	
	Number	Per cent	Number	Per ce
All ages	**37,400**	**100%**	**15,500,000**	**100**
Under 18 years	1,300	4	470,000	3
18-20 years	3,400	9	1,300,000	9
21-24 years	6,700	18	2,360,000	15
25-44 years	18,500	49	7,960,000	51
45-64 years	6,000	16	2,830,000	18
65 years and over	1,500	4	580,000	4

Sex of driver. In 1948, 2,200 women drivers were involved in fatal accidents and 1,400,000 accidents. This made up 6 per cent and 9 per cent, respectively, of all drivers involved in accid It is estimated that the fatal accident mileage rates of male and female drivers would be equal, t drove five or six times the mileage of women.

Note: The distribution by age of driver, of miles driven, or number of licensed drivers is not k

Major Kidnaping Cases Since 1932

Source: Official Records since passage of Lindbergh kidnaping law, 1932

eb. 12—Charles Boettcher, Denver. Re-
rch 1.—May 27—Mary McElroy, Kansas
eased May 28. Walter McGee sentenced
risonment.—June 15—William A. Hamm,
Paul, banker. Released after one week.
rpis sentenced to life imprisonment.—
August Luer, Alton, Ill. Released. Three
a woman sentenced to life imprisonment.
—Charles F. Urschel, Oklahoma City. Re-
ter nine days. George (Machine Gun)
five others sentenced to life imprison-
ov. 9—Brooke Hart, San Jose, Cal. Killed.
Thurmund and John M. Holmes, his ac-
napers, lynched by a mob.
an. 17—Edward G. Bremer, St. Paul. Re-
er three weeks. Two sentenced to life im-
t.—May 16—William F. Gettle, Los An-
ee men sentenced to 37 years' imprison-
h.—Oct. 10—Mrs. Alice Speed Stoll,
Released unharmed. Thomas H. Robin-
erving life sentence.
ay 24—George Weyerhaeuser, Tacoma,
eleased after seven days. Kidnapers sen-
m 20 to 60 years' imprisonment.
ec. 26—Charles Mattson, 10; Tacoma.
ad. Kidnaper escaped.
ept. 25—Charles S. Ross, Chicago. Found
n H. Seadlund put to death.—Dec. 4—
ied, White Plains, N. Y.; body not found,
have been burned in the cellar of a public hall in 6th St., Manhattan Boro, 4 days after he was seized; two of the kidnapers, Joseph Sacoda and Demetrius Gula, convicted and executed in Sing Sing prison on Jan. 11, 1940.

1938—Feb. 24—Peter Levine, 12; New Rochelle, N. Y. Body recovered May 29. Kidnapers escaped. —May 28—James Bailey Cash, Jr., 5, Princeton, Fla. Body recovered June 3. Franklin P. McCall pleaded guilty to the kidnaping and was put to death in the electric chair Feb. 24, 1939.

1940—Sept. 20—Marc de Tristan, 3, Hillsborough, Calif. Boy recovered Sept. 22, alive and well. Wilhelm J. Muhlenbroich, 39, German immigrant of 1935, arrested, charged with the crime. He was convicted and was sentenced to life imprisonment. On Dec. 26, 1940, in San Quentin Prison, he attempted suicide.

1942—Oct. 12—Ruby Evelyn Cremeans walked into the nursery at Saint Ann's Hospital, Columbus, O., and, directing a revolver at the attendants, kidnaped Daniel Joseph Scanlon, an eight-months-old baby. The kidnaper left by the ambulance door of the hospital where a car was waiting, and drove off at a high rate of speed. The kidnaper transported the baby from Columbus to Huntington, W. Va. Subsequently she carried the baby to Portsmouth, O., where on Dec. 5, 1942, she was apprehended at a hotel with the baby. She advised FBI agents that she kidnaped the baby because she was lonesome. She pleaded guilty and was sentenced to serve twenty years' imprisonment.

The patients were by type of hospital in 1946—State, 77,518; veterans, 19,317; county and city private, 21,162.

[1]Excluding veterans hospitals.

How to Help Avoid Automobile Accidents

Source: National Safety Council, Chicago

When you reach a corner and another car is approaching fast from a crossroad, let him cross first even if you have the right of way.

When the driver in the car ahead holds out his hand, slow down or even stop until you know what he is going to do—turn right, or left, or stop.

When passing a parked car, especially in school zones, slow down and blow your horn to warn any child that may dash into the street.

Don't drive after having one or more drinks. Alcohol dulls your driving ability.

If you meet a car hugging the center line and weaving, don't try to force him back by holding your lane, but give way to the right, blo horn and slow down quickly.

Slow down when following a truck uphill you can see whether a car is approaching fi opposite direction. Always slow slightly a to the right when rounding hilltops.

When driving along an open road, don't go at more than 50 miles an hour even if no visible traffic. It isn't worth it in t both safety and economy.

When starting on a trip, check not on brakes and tires, but also lights, wiper an

The 39 electoral votes of Alabama (11), Louisiana (10), Mississippi (9), South Carolina (8) and Tennessee (1), in 1948 were cast for the States' Rights Democrats candidates, James Strom Thurmond (S. C.), for president and Fielding L. Wright (Miss.) for vice-president.

The Constitution, Article 2, Section 1 (pages 99-100), provides for the appointment of electors, the counting of the electoral ballots and the procedure in the event of a tie.

**The election 1876 was contested and Congress appointed an Electoral Commission of five Representatives, five Senators and four Supreme Court justices. The justices chose another justice as the 15th member of the commission—in all eight Republicans and seven Democrats. The comm sion, by a strict party vote, awarded the 22 el toral votes of Florida, Louisiana, Oregon and So Carolina to the Republican candidates, whereu Congress, in joint session (March 2, 1877) clared Hayes and Wheeler elected President Vice President by an electoral vote of 185 Hayes and 184 for Tilden. The Senate was R publican. The House, which was Democratic, solved and declared as a separate body (March that Tilden and Hendricks were elected on face of the returns.

Method of Congressional Apportionment

Public Law 291 (H.R. 2665), signed by the President on November 15, 1941, directs that all future apportionments of representatives in Congress shall be made by the method of equal proportions.

This method, devised by Professor E. V. Huntington of Harvard University in 1921, sets up the following criterion of a good apportionment. Suppose an actual apportionment bill, allotting any given number of seats (say 435) among the several states, is before Congress for consideration; and suppose an attempt is made to improve the bill by transferring a seat from one state to some other state. Such proposed transfer of a seat from one state to another state should be made if, and only if, the percentage difference between the congressional districts in these two states would be reduced by the transfer.

For example, Arkansas has a 1940 population of 1,949,387, and Michigan 5,256,106. Under the method of equal proportions, Arkansas gets 7 seats and Michigan gets 17 seats, so that Michigan's district (309,183) is 11.02 percent larger than Arkansas' district (278,484). But if a seat were transferred from Arkansas to Michigan giving Arkansas 6 and Michigan 18, the Arkansas district (324,898) would be 11.26 percent larger than the Michigan district (292,006). Since 11.26 is greater than 11.02, the transfer should not be made.

Representative-at-Large Defined

Source: Clerk of the House of Representatives

The term Representative-at-Large is applied to a Representative in Congress selected by the voters of the entire State instead of by the voters of a specific district within a State. Representatives at-Large are selected in this manner when the State fails to re-district after an apportionment of Representatives following a decennial census

VIRGINIA

(See Addenda 1949 Election)

(1945)—Tuck, Dem., 112,355; Landreth, Rep., 52,-386; Carwile, Ind., 4,023; Scattering, 19.

WASHINGTON

(1948)—Langlie, Rep., 445,958; Wallgren, Dem., 417,035; Fluent, Prog., 19,224; Killman, Soc. Lab., 780; Roberts, Soc. Workers, 144.

WEST VIRGINIA

(1948)—Patterson, Dem., 438,752; Boreman, Rep., 329,309.

WISCONSIN

(1948)—Rennebohm, Rep., 684,839; Thompson, Dem., 558,497; Berquist, Prog., 12,928; Uphoff, Soc., 9,149; Boulton, Soc. Workers, 356; Cozzini, Soc. Lab., 328.

WYOMING

(1946)—Hunt, Dem., 43,020; Wright, Rep., 38,333. (Hunt elected to Senate Nov. 2, 1948. A. G. Crane fulfilling unexpired term.)

Political Committees

REPUBLICAN NATIONAL COMMITTEE
(1337 Connecticut Ave., N.W., Washington 6, D.C.)
Chairman—Guy George Gabrielson.
Secretary—Mrs. Charles P. Howard.

DEMOCRATIC NATIONAL COMMITTEE
(1200 18th St., N.W., Washington 6, D. C.)
Chairman—(see Addenda for names of officials)
Executive Director of Women's Division—
Secretary—

AMERICANS FOR DEMOCRATIC ACTION
(1740 K St., N.W., Washington 6, D. C.)
National Chairman—Hubert H. Humphrey.
National Director—Charles LaFollette.
National Executive Secretary—James Loeb, Jr.

AMERICAN LABOR PARTY
(570 Seventh Ave., New York 18, N. Y.)
Chairman—Vito Marcantonio.
Secretary—Douglas L. MacMahon.
State Executive Secretary—Arthur Schutzer.

COMMUNIST PARTY, U. S. A.
(35 East 12th St., New York 3, N. Y.)
Chairman, Nat'l Comm.—William Z. Foster.
General Secretary—Eugene Dennis.
Organization Secretary—Henry Winston.

GREENBACK PARTY
(2315 E. Troy Ave., Indianapolis 3, Ind.)
National Chairman—John Zahnd.
National Secretary—M. F. Greenstreet.

INDUSTRIAL GOVERNMENT PARTY
The ballot designation of the Socialist Labor Party in certain states—New York and Minnesota, and, on occasion, Pennsylvania.

RAILWAY LABOR'S POLITICAL LEAGUE
(261 Constitution Ave., Washington 1, D. C.)
Chairman—A. E. Lyon.
Secretary-Treasurer—C. T. Anderson.

SOCIALIST PARTY
(303 Fourth Ave., New York 10, N. Y.)
Chairman, National Executive Committee—Darlington Hoopes.
National Secretary—Harry Fleischman.

SOCIALIST LABOR PARTY)
(61 Cliff St., New York 8, N. Y.)
National Secretary—Arnold Petersen.

SOCIALIST WORKERS PARTY
(116 University Place, New York 3, N. Y.)
National Chairman—Farrell Dobbs.
National Secretary—James P. Cannon.

LABOR'S LEAGUE FOR POLITICAL EDUCATION, AFL
(1525 H St., N.W., Washington 5, D. C.)
Secretary-Treasurer—George Meany.
Director—Joseph D. Keenan.

LIBERAL PARTY OF NEW YORK STATE
(160 West 44th St., New York 18, N. Y.)
Chairman—Adolf A. Berle, Jr.
Secretary—Joseph V. O'Leary.
Executive Director—Ben Davidson.

POLITICAL ACTION COMMITTEE, CIO
(1346 Connecticut Ave., N.W., Washington 6, D. C.)
Director—Jack Kroll.
Secretary-Treasurer—David J. McDonald.

PROGRESSIVE PARTY
(56 West 45th St., New York 19, N. Y.)
Chairman—Elmer A. Benson.
Secretary—C. B. Baldwin.

PROHIBITION NATIONAL COMMITTEE
(900 Park Ave., Winona Lake, Ind.)
Chairman—Virgil C. Finnell.
Secretary—James A. W. Killip.

Proportional Representation and How It Works

Proportional representation is the method used in an election by which the votes are so counted that each party has representation in the elective body in proportion to its strength.

The voter finds on the P. R. ballot handed to him party or group designations after the names of those candidates who are officially supported by the parties or groups. Emblems are barred, but opposite each name is a small square. Instead of marking a cross in the square the voter marks the ballot with the figures 1, 2, 3, 4, etc., in the order of his preference for the candidates. If Candidate A is the voter's first choice, the numeral 1 is written in the square opposite Candidate A. If Candidate B ranks second, 2 goes in the square opposite his name. The voter distributes the figures 3, 4, 5, 6, etc., opposite the names of the candidates as they rank in his preference. The voter does not have to vote for every candidate on the ballot.

The N. Y. City Charter provides that when a man has received 75,000 votes he shall be declared elected to the Council. Since some candidates will receive more than the quota on the first tally their extra ballots will be transferred to the next available choice marked on that extra ballot. If both the number 1 and 2 choices are elected, the ballot will be cast for the number 3 choice. If enough candidates are not elected by this process after the first tally, the candidate with the smallest number of first choices is eliminated and these ballots are now transferred to the next available choice indicated on the ballot. This process of elimination and distribution continues until the proper number of candidates has been elected.

National Convention Cities Since 1856

Chicago, Ill., 19—Rep., 1860, 1868, 1880, 1884, 1888, 1904, 1908, 1912, 1916, 1920, 1932, 1944. **Dem.**, 1864, 1884, 1892, 1896, 1932, 1940, 1944.
St. Louis, Mo., 5—Rep., 1896; **Dem.**, 1876, 1888, 1904, 1916.
Philadelphia, Pa., 7—Rep., 1856, 1872, 1900, 1940, 1948; **Dem.**, 1936, 1948.
Cincinnati, O., 3—Rep., 1876; **Dem.**, 1856; 1880.
Baltimore, Md., 2—Rep., 1864; **Dem.**, 1912.
Cleveland, O., 2—Rep., 1924, 1936.
New York City, 2—Dem., 1868, 1924.
Kansas City, Mo. 2—Rep., 1928; **Dem.**, 1900.
Minneapolis, Minn., 1—Rep., 1892.
Charleston, S. C., 1—Dem., 1860.
Louisville, Ky., 1—Dem., 1872.
San Francisco, Calif., 1—Dem., 1920.
Denver, Col., 1—Dem., 1908.
Houston, Tex., 1—Dem., 1928.

Qualifications for Voting by States

A voter must be at least 21 years of age (18 in Georgia), a citizen; not a convict; able to read or write; must be registered. In some States paupers are ineligible.

MUSEUMS AND ART GALLERIES

See also Washington, D. C., New York City and Collections in University Libraries

NEW ENGLAND

Antiquarian, Worcester

...e American Antiquarian Society, Worcester, ..., has one of the largest reference libraries of ...ican history and printing in the country. It ...nearly 1,000,000 titles, covering 11 miles of ...ing. It has the most complete collection of ... American newspapers, almanacs, and Amer... printing before 1820. The collections of ... history for the entire country, biography, and ...ican literature are notable. Graphic arts, ... as lithographs, early American engraving, ...engraved bookplates are other fields in which ...ibrary is constantly used by researchers. Its ...tion of manuscripts numbers more than ...,000 pieces.

Antiquarian, Concord

...tiquarian House, Concord, Mass., situated at ...ntersection of Lexington Road and Cambridge ...pike, contains Revolutionary and 19th century ... associated with the military and literary his... of Concord, the seat of Nathaniel Hawthorne, ...y D. Thoreau, Ralph Waldo Emerson, Amos ...son Alcott, Louisa M. Alcott, Elizabeth Pea... Frank Sanborn, William Ellery Channing, ...el Chester French, Ephraim Bull and other ...us Americans. The study of Emerson's house, ... his books as he left them, has been moved ...the museum; here are also relics of Thoreau's ... at Walden; mementoes of the Alcotts and ..., furniture, letters, glass and other memor... of old Concord, where "the embattled farm... stood and fired the shot heard 'round the ...l."

Berkshire Museum, Pittsfield

...e Berkshire Museum, Pittsfield, Mass., is an ... science and local history museum. The ... art galleries include painting, sculpture and ...ry from the earliest times to the present, ...s by Rubens, Van Dyck, Reynolds, Raeburn, ...rt and a large Hudson River group, as well as ...ern masters. "The Adoration of the Magi," ...d 1477, by the Spanish painter Juan Pons, is ...most famous work to be discovered by this ...t and teacher. An active education program of ...es, lectures, motion pictures, and music is ...ed on throughout the year.

...e natural history collections include miniature ...ps of large animals by Louis Paul Jonas, a ...gy room with the story of life on its walls, and ..."Stellarium," a miniature planetarium. In the ... of Man is one of the five sledges with which ...rt E. Peary reached the north pole, while in ...historical collection is the original "One Hoss ...," immortalized in the poem by Oliver Wendell ...es.

Boston Museum of Fine Arts

...e most distinguished Department of the Boston ...eum of Fine Arts, Boston, Mass., is the Asi... and the collection of Chinese and Japanese ...oture and painting is the most important in the ...dent and outside of Tokyo. Certain pieces like ...Chinese Dragon Roll of the thirteenth century ...e so-called Keion Roll of the same period in ...n are well known.

...e Indian collection is, too, probably the most ...nguished one outside of India. There is a ...ler but very important collection of the arts ...he Near East. Many of the objects were ob... by the Museum's excavations. The collec... of the Egyptian Department were obtained ...st entirely through excavation, especially at ...h where the Museum has been at work for ...y years. The majority of the pieces in the ...sical Collection go back to the early years of ...Museum when it was especially active in that ... A few, like the two fourth century heads, ...Eros Relief, the Chryselephantine Statuette, ...the Gold Bowl would equal in importance any... in the Acropolis Museum.

...ere is a large and growing Department of ...iles, especially strong in the French and ...ish Art of the Middle Ages, and in Asiatic and ...vian Textiles. The collection has been added to ...he gift of the Elizabeth Day McCormick Col...on, a large group of textiles. The Department ...ecorative Arts contains sculptures, furniture, ... minor arts, from the beginning of the Middle ... to the present day. Its best known display, ...ever, is probably the series of American Period ...ns of the seventeenth to the early nineteenth ...ury. Recently the M and M Karolik Collection of American Art from 1750 to 1820 has been opened. There are also other fine Period Rooms, French and English and a very important collection of English and American silver. Among the latter are many famous pieces by Paul Revere.

The Print Department has the most extensive and important collection of prints in the United States. One of the largest Departments and most active is that of Western Painting. It contains important pieces of the artists of all the important schools from the early Sienese and Florentine to the present day. Certain pictures like Velasquez' Infanta with the Dwarf, El Greco's Fray Paravicino, Van der Weyden's St. Luke Drawing the Virgin, Rembrandt's St. John, Ambrogio Lorenzetti's Madonna, Duccio's Crucifixion, Canaletto's great View of Venice, Gauguin's Que Sommes-Nous, Rubens' Queen Tomyris with the Head of Cyprus, and Renoir's Bal à Bougival make the Department a place of pilgrimage.

Currier Gallery, Manchester

The Currier Gallery of Art, Manchester, N. H., contains:

15th century Tournai tapestry.

Italian Renaissance sculpture, including examples by Benedetto da Maiano and Antonio Rosselino.

Italian Renaissance paintings by Lorenzo Costa, Tintoretto.

American 18th, 19th and 20th century paintings, including examples by Copley, Stuart, Trumbull, Sargent, Henri, Homer, Hassam, Hibbard, Waugh, Bierstadt, Alexander James, Fransioli, Sample, Sheeler; also American primitive paintings.

French 19th century scenic wallpaper from a house in Vermont and New Hampshire furniture of the 17th, 18th and 19th centuries.

American and English silver including examples by John Coney, Benjamin Burt, Hester Bateman, and Andrew Tyler, Paul Revere, Edward Winslow, William Cowell, Samuel Edwards, Edward Webb, William Homes, Sr.

American textiles, hooked rugs, embroideries.

American pewter and household accessories.

A large collection of American glass of all types, including an important group of Suncook, N. H., glass, also a large display of cup plates.

Harvard Computation

The Computation Laboratory of Harvard University, Cambridge, Mass., is a compact glass and brick building which was specifically designed to house large scale digital calculating machines and to provide laboratories for their design and construction. The first such machine, the IBM Automatic Sequence Controlled Calculator, sometimes referred to as the "mechanical brain," occupies a central room sixty feet square. Under the supervision of Prof. Howard H. Aiken, co-inventor of the calculator, the machine works 24 hours a day, seven days a week, solving highly complex mathematical problems.

The machine multiplies 23 digits by 23 digits to give a 46 digit product in six seconds. Addition of 23 digits can be performed in one-third of a second. The entire machine is under the control of an automatic sequence control mechanism which reads punched paper tape containing the coded instructions to the machine. If the machine makes an error, it automatically stops, and a signal light is turned on. Answers to problems are automatically recorded on specially adapted electric typewriters. The paper tape bearing the instructions to the machine is prepared by a staff of highly trained mathematicians.

Completely modern in design, the two-story structure includes such modern innovations as an almost solid ring of large windows on all sides which permit maximum vision and sunlight and a huge two-story glass window for observation purposes. A large visitors' lobby, provided with a 30-foot glass wall, sofas, and chairs, allows spectators to view the machine without interfering with the work of the operators.

Downstairs, the building houses a complete machine shop, containing lathes, drill presses, milling machines, and other tools, a drafting room, a print room, experimental laboratories, and a sixty-foot square construction room. These facilities are provided for the design and construction of future calculators, of which the second has been completed and erected at the Naval Proving Ground, Dahlgren, Virginia. A third calculating machine was finished in September, 1949.

New Hampshire Historical

The New Hampshire Historical Society was organized (1823) to "collect, preserve, and com-

municate historical knowledge." It maintains in Concord, N. H., a library building and a museum building. The library contains some 75,000 volumes, pamphlets, and manuscripts, state papers, maps and documents relating to early New Hampshire records, a nearly complete file of New Hampshire newspapers up to 1900, an extensive genealogical section and a portrait gallery and auditorium.

Displayed in the Society's gallery are portraits painted in Concord by Samuel F. B. Morse, inventor of the telegraph, besides the originals of "The Death of Lincoln" by Alonzo Chappel, and "The Battle of Gettysburg" by James Walker, both composites designed by John B. Bachelder. Here also are original paintings or authentic reproductions of New Hampshire notables, including those of Daniel Webster, Ebenezer and Abigail Webster, his parents; Dudley Leavitt, almanac publisher; John Wheelwright, founder of Exeter; Lewis Downing, maker of the Concord coach; Josiah Bartlett by Trumbull, and many others. The painting "Crawford Notch" by Thomas Hill was a gift by popular subscription.

The Society displays two Revolutionary War flags of the Second New Hampshire Regiment, Continental Army, which were captured by the British at Fort Anne, New York (1777). Exhibited here also are collections of New Hampshire-made glassware and silver, the Durgin Collection of historic china, silver and pewter services from New Hampshire churches, miniatures, paper money, and the Daniel Webster, General Stark, and President Pierce Collections.

Peabody Museum, Harvard

The Peabody Museum of Archaeology and Ethnology at Harvard University, Cambridge, Mass., was founded (1866) by George Peabody. It is in charge of a Director and Faculty responsible through the Provost to the President and Fellows of Harvard University.

Since its founding, more than 500 expeditions have been sent to every continent, resulting, with the addition of important gifts and purchases, in the building up of one of the most comprehensive and best balanced collections of ethnology, archaeology and physical anthropology.

The first scientific studies of Mayan archaeology were made under its direction and its collections from this area, and from Middle America generally, are among the finest in existence. Its collections of Old World archaeology, typologically arranged, are unequalled in the New World. In ethnology, the material from the Pacific Islands, secured in part through the vision of Alexander Agassiz, is important, and the Museum is also rich in material representing the native tribes of Africa, of South America and of the Plains and Northwest Coast Indians of North America, where some of the objects date from the Lewis & Clarke expedition of 1806. The archaeology of the southwestern United States, including the Pueblo Indian area, is also strongly represented. The library possesses over 50,000 vols. in anthropology.

Peabody Museum, Yale

The Peabody Museum of Natural History in Yale University, New Haven, Conn., founded 1866 by George Peabody, is primarily intended for aid in teaching and research in connection with the scientific departments of the University.

Its collection in Vertebrate Paleontology, built up by Prof. O. C. Marsh, Peabody's nephew, is one of the greatest in the world; and it has extensive collections in Zoology, Invertebrate Paleontology, Mineralogy, and Archeology. Connected with the Museum is the Bingham Oceanographic Laboratory, with large collections of deep-sea fishes and invertebrates.

The first floor gives a survey of life, both recent and fossil. The Hall of Invertebrates includes general exhibits of an introductory nature such as The Tree of Life, The Scale of Time, Fossils, and Paleogeography. It also has two systematic exhibits, one showing the succession of faunas in the geologic past, the other a synopsis of the phyla of invertebrates in which fossil and recent specimens are associated. The Great Hall is devoted to reptiles, amphibians, and birds, and includes one of the foremost collections of dinosaurs in America. In its center stands the skeleton of a Brontosaurus 67 feet long and 16 feet high. On one wall is a great mural, "Land Life of the Age of the Great Reptiles," believed to be the largest painting of a natural history subject ever undertaken. It is 110 feet long and 16 feet high and shows dinosaurs and associated animals and plants in a natural landscape and at natural size. There are two halls of mammals which show in systematic arrangement the dominant forms of the several orders of mammals. The fine fossil specimens from western United States form a notable feature of these halls.

On the third floor one enters the Hall of Astronomy which displays a large collection of meteorites among which is the Weston Fall, the first to be observed to fall from the sky. At the left is the Hall of Minerals, housing the notable collection started by George Gibbs and increased by J. D. Dana and his son, Edward S. Dana. Two halls of local zoology lead into the Hall of Southern New England which attempts to bring to focus the branches of natural science in showing ecology as the interdependence of animals and plants—including man—and the physical environment.

Rhode Island Historical

The Rhode Island Historical Society, Providence, R. I., occupies the historic John Brown House, Power St. Its library comprises 100,000 bound vols., 50,000 pamphlets, 200,000 manuscripts and nearly complete files of Rhode Island newspapers.

Whaling, New Bedford.

The Old Dartmouth Historical Society and Whaling Museum, New Bedford, Mass., contains a collection of furniture, costumes, portraits, relics of all kinds and documents illustrating the history of the territory.

One of New Bedford's most interesting spots is considered one of the finest collections anywhere on the whaling industry is the New Bedford Whaling Museum. A large and unique collection of whaling implements, log-books, shipping lists and curios are preserved here. Of especial interest is the Lagoda, largest ship model in the world, given by Miss Emily H. Bourne, as a memorial to her father, the late Jonathan Bourne, one of the most successful whaling merchants, the humpback whale skeleton, and the collections of scrimshaw and whaling irons. The DeCoppet collection of 40 ship models is also of interest.

Worcester Art Museum

The Worcester Art Museum was founded in Worcester, Mass., (1896) by Stephen Salisbury.

The permanent collections contain selections of European, American and Asiatic art of all periods. They are notably strong in paintings of the Italian, French, Spanish, Flemish and American Schools. Sculpture and decorative arts of Egypt, Mesopotamia and the ancient East, and of Classical and Mediaeval times are also represented, as well as the art of Asia and the Near East.

Yale University Art Gallery

The Yale University Art Gallery, New Haven, Conn., was founded (1832) by Col. John Trumbull (aide-de-camp of Gen. Washington) and his nephew-in-law, Prof. Benjamin Silliman. The first Trumbull Gallery (demolished in 1901) was the earliest art gallery connected with a university in America.

The collections contain objects illustrative of the art of the ancient Orient, of Greece and Rome (notably antiquities from the University's excavations in Dura-Europos, a Hellenistic-Roman trade route city on the Euphrates, and from Gerash in Transjordania); of the Near and Far East (The Hobart Moore Memorial Collections of Textiles); Europe (the Jarves and Griggs Collections of Early Italian Painting, and French Impressionists from the Webb Collection); America, Colonial interiors, Trumbull Collection of paintings of the American Revolution, the Garvan Collection of American Arts and Crafts, the Morgan Collection of American Miniatures, and the Edwin Austin Abbey Collection, of modern painting Société Anonyme Collections; and of prints and drawings, Achelis Collection; Hanna Collection and Green Collection of Portrait Engravings.

MIDDLE ATLANTIC

Albright Gallery, Buffalo

The Albright Art Gallery and the Albright Art School in Buffalo, N. Y., are under the same corporative management, The Buffalo Fine Arts Academy. The Gallery, noted for its modern sculpture and painting, includes in its permanent collection works by David, Seurat, Cezanne, Renoir, Degas, Vuillard, Picasso, Souine, Maillol, Despiau, Brancusi, Lachaise, and Lehmbruck.

Among ancient sculptures are a famous wood carving, the life-size figure of St. Gorgon represented as a French courtier of the 15th century holding a falcon on his wrist; an 11th century sculpture (fragmentary) of a Cambodian Goddess; a Chinese stone Chimera of monumental size from the 6th century; the image of Mahavira, Jain sculpture of the 7th century from India; the world-famous relief portrait of Akhenaton, the heretic Pharaoh of Egypt; a life-size statue of a Roman Poet (perhaps Ennius), of the 1st century B.C.; an Italian 17th Century Portrait Bust of the Princess Anna Colonna Barberini

-size 15th century North Italian Entomb-
Group in terra cotta, representing the Virgin,
hn and Mary Magdalene, and life-size marble
s of the Duke and Duchess of Maqueda by
eo Peoni.

ng the well-known American paintings are:
r, Jean and Anna," by George Bellows;
Church at Old Lyme," by Childe Hassam;
uet Players," by Winslow Homer; Portraits
onel and Mrs. William Taylor, by Ralph Earl,
Mr. and Mrs. Gabriel Manigault, by Gilbert
. European paintings of note include a "Por-
of Pierre Desmaisons" by Jacques-Louis
; "The Lady's Last Stake" by William Ho-
; "Cupid as a Link Boy" by Sir Joshua
lds; "Miss Evans" by Thomas Gainsborough;
Hamilton Reading a Newspaper" by George
ey; "Miss Rosamond Croker" by Sir Thomas
nce; "Philip Baptizing the Eunuch," by
e Lorrain; the Angel and the Virgin of the
nciation, by Giovanni del Biondo; "The Ado-
of the Child," by Lorenzo di Credi; "Festi-
Montenero" by Giovanni Paolo Pannini, and
et in Meknez" by Eugene Delacroix.

Buffalo Museum of Science

Buffalo Museum of Science, Humboldt Park,
lo, New York, is operated by the Buffalo
y of Natural Sciences.

permanent exhibits in full color are ar-
d in seventeen compact halls and tell a
uous and related story of man's scientific
edge, beginning with the constitution of
r and ending with civilization.

er exhibit rooms are Earth Science, Geology,
Invertebrates, Vertebrates, Aquaria, Zoology,
Life, Evolution, Primitive Races, and Civili-
t. There is also a Hall of the Niagara Frontier
ining local flora and fauna.

standing among the permanent exhibits are
Transparent Man, the Malvina Hoffman
es of selected racial types, the electrically
ted doll exhibit illustrating the laws of hered-
he Bermuda Coral Reef group, the famous
and wax flowers in the Hall of Plant Life
he Hall of Conservation, the collection of
tones of Science embracing first and early
editions of books epochal in the several fields
ence, the African and South Pacific collec-
of primitive art, the folk art textiles from
esia, and the collections of Chinese ceramics
ronzes, and of Mesopotamian seals.

ere are also frequently changing special ex-
., including the International Salon of
e Photography, conducted annually since
by Hobbies, the Magazine of the Buffalo
um of Science.

Buhl Planetarium, Pittsburgh

e Buhl Planetarium and Institute of Popular
ce is the gift of The Buhl Foundation to the
e of Pittsburgh, Pa. Built as a memorial to
y Buhl, Jr., Pittsburgh merchant and phi-
ropist.

e auditorium seats 500 spectators and is
ped for presentations of astronomical science.
dition to the 9,000 stars and planets ordinar-
nown on the dome, special devices permit
nstrations of comets, the aurora, cloud for-
ns, and other phenomena of the heavens.

que at this star theater is an elevator which
s the planetarium projector out of sight, so
dramatic scenes may be presented on a stage
rolls out of the wall.

ır galleries are devoted to exhibits in the
al sciences. The "Micro-Zoo," showing
gh micro-projectors microscopic water ani-
magnified to monster size, living, moving, de-
ng one another, is a popular feature.

the observatory a 10-inch siderostat telescope
ailable to the public. Here the visitor may
he actual planets and stars, study the night
in the comfort of indoor temperature. The
Planetarium has also developed a program
ening classes in popular science for adults;
a year-round program of science tours and
nstration-lectures for high school students,
rated with the curricula of the public and
hial schools of Western Pennsylvania.

Carnegie Institute, Pittsburgh

rnegie Institute, located in Schenley Park,
burgh, Pa., founded and endowed by Andrew
egie (1896), houses under one roof the central
h of the Carnegie Library of Pittsburgh, with
al departments covering technology, art, and
; the Department of Fine Arts, with a rep-
tative and growing collection of modern paint-
nd sculpture, and with the distinction of hav-
he only annual international exhibition of
ings in the world; the Carnegie Museum,
ing the natural sciences and applied arts, and
Carnegie Music Hall.

Fort Ticonderoga Museum

Fort Ticonderoga Museum is located in the restored fort, commanding the waters connecting Lake George with Lake Champlain in Essex Co., N. Y. The village of the same name is one mile east. The fort and adjacent grounds are owned by the Pell family, with Stephen H. P. Pell museum director. The ruined casements and walls have been restored and barrack structures similar to the originals have been built inside the walls and are filled with relics of Indian, colonial and Revolutionary days, including arms, shot, utensils, glass, etc., picked up on the grounds, occupied by thousands of troops in the 18th century.

The fort was begun 1755 by the French and named Fort Carillon. In 1758 it was the headquarters of Gen. Montcalm, who captured Fort William Henry on Lake George. In 1759 Montcalm with 3,800 stood off the British Gen. Abercromby with 15,000. In 1759 the fort was captured by the British Gen. Lord Jeffrey Amherst and renamed Ticonderoga. On May 10, 1775 Ethan Allen and his Green Mountain Boys, with Benedict Arnold joining in, surprised and overwhelmed the small British garrison.

It was at the gate of this fort that Allen was supposed to have summoned the startled British commandant with "Surrender, in the name of the Great Jehovah and the Continental Congress!" although folk testimony records that he shouted: "Come out of your hole, you white-livered skunk!" The cannon of the fort were hauled across New England by Gen. Henry Knox to Washington's batteries at Dorchester Heights, opposite Boston. In 1777 Gen. John Burgoyne captured the fort in a bloody action in which the regiment of the Black Watch was decimated. When Burgoyne surrendered at Saratoga the fort came back into American hands. Benedict Arnold built his ill-fated fiotilla on the beach below the fort.

The village of Fort Ticonderoga is headquarters of the New York State Historical Assn.

Franklin Institute, Philadelphia

Franklin Institute, founded 1824, is one of the oldest institutions in the country devoted to the study and promotion of the mechanic arts and applied science. The cornerstone of the old building it occupied for more than a century, on the east side Seventh Street below Market in Philadelphia, was laid in 1825. Classes of instruction developed into the Franklin High school, which continued until 1832, when the city opened its first public high school. Thereafter classes on technical subjects were continued until 1923. In 1933 the Institute moved to its present building at Benjamin Franklin Parkway and 20th St. This contains a memorial hall dedicated to Franklin, a museum, offices, library and the Fels Planetarium. A heroic sized statue of Franklin by James Earle Fraser stands in the hall.

The **Journal of the Franklin Institute** was first issued (1826) and has remained in continuous publication, having reached its 248th volume. This periodical has had many notable contributors and a very high standard has been maintained in its contents. Papers are published upon the latest developments in science and their applications to industry and commerce by workers who are outstanding in their respective fields.

The Library, also begun with the inception of the Institute, has now grown until it represents one of the finest collections of scientific literature in the country. It now contains more than 130,000 volumes and 44,000 pamphlets. It is noteworthy for its unusually complete patent literature and for the "runs" of its domestic and foreign technical periodicals.

Beginning with awards made for the encouragement of industry, the Committee on Science and the Arts now awards a number of medals and certificates of merit to men or organizations whose distinctive contributions to the advancement of science or its applications justifies recognition. The most coveted of these is the "Franklin Medal."

Among the recipients of this medal are Albert Einstein, Orville Wright, Sir James Jeans, Irving Langmuir, Niels Bohr, Thomas Edison, Elihu Thomson and Lord Rutherford, Dr. J. C. Hunsaker, Dr. P. D. Merica, Dr. Harlow Shapley, Dr. Henry Clapp Sherman and Sir Henry Thomas Tizard, Dr. Enrico Fermi, Sir Robert Robinson, Dr. Wendell M. Stanley and Dr. Theodor von Karman. [See Awards.]

The Franklin Institute Laboratories for Research and Development, expanded and enlarged during World War II, specialize in research for industry and government along the lines of the applied physical sciences. A research laboratory, the Bartol Research Foundation of the Franklin Institute, Swarthmore, Pa., studies problems in physical science and industry.

The Biochemical Research Foundation became affiliated (1935) with The Franklin Institute. Its

laboratories study the processes of disease from a chemical viewpoint; new organic compounds with regard to their therapeutic, medicinal, and beneficent values. The laboratories are located in Newark, Del.

The Fels Planetarium, donated to the Franklin Institute, 1933, by Samuel S. Fels, reproduces the stellar world of past, present and future. It is mounted on wheels so that its two tons may be rolled across the room on a track, making the hall available as an auditorium. The planetarium chamber seats 500.

Mellon Institute, Pittsburgh

Mellon Institute of Industrial Research, Pittsburgh, Pa., was founded 1913 by Andrew W. Mellon and Richard B. Mellon to provide qualified workers with facilities for investigating thoroughly problems of importance in pure and applied science. The Institute is allied cooperatively with the University of Pittsburgh.

Since then the Institute has opened up paths for developing technology and public health through non-profit scientific research. It has been active in cultivating the natural sciences, in improving chemical education and investigation, in building up chemical engineering and industrial hygiene. Since the close of World War II the Institute has emphasized fundamental investigations in the natural sciences for the benefit of mankind through public health, the professions, education, and technology.

During the institution's fiscal year (March 1, 1948 to March 1, 1949), there were in operation 80 industrial research programs most of them in the fields of chemistry, public health, metallurgy, and ceramics. On these 80 fellowships have been 550 senior and junior scientists and engineers.

The Institute also has departments of research in pure chemistry and in chemical physics and physical chemistry.

Montclair Art Museum

The Montclair Art Museum, Montclair, N. J., is the only public museum in the state dedicated entirely to art. The museum houses hundreds of art treasures, including comprehensive examples from the four cultural groups of North American Indians; a large collection of American and foreign paintings, sculptures, and prints; an Eighteenth Century Dutch clock; various pieces of furniture; early costumes; a Fifteenth Century illuminated Book of the Hours; English, Irish, Scotch, French, and American silver; Chinese snuff bottles and other Oriental art objects; Roman glass dating from 1000 B. C.; and Greek and Roman pottery.

The museum offers a permanent Indian exhibition, changing exhibitions from the permanent collections, and monthly assembled exhibitions. In addition to a veteran approved art school, the Museum Art School of Montclair, elective classes for adults and children provide art instruction on a non-profit basis.

National Baseball Hall of Fame

The National Baseball Hall of Fame and Museum (opened 1939) in Cooperstown, N. Y., is an attractive, fireproof building in which is housed a distinguished collection of baseball souvenirs. Old balls, uniforms of famous players, like Babe Ruth and Cy Young, pictures of old time clubs, trophies presented to many stars, lithographs and paintings of early games and famous incidents, a complete set of souvenirs of World Series winners and pictures of the winning teams, are among the more than 3,000 items in the collection. One of the items is Ruth's No. 3 uniform, permanently retired (June 13, 1948) by the New York Yankees and awarded to the museum.

The museum also contains a library which is becoming better equipped annually to answer the questions sent in by fans.

The building contains the Hall of Fame where are commemorated, in bronze plaques furnished by the National and American Leagues, the immortals of baseball. The selection of players who were active in the 25 years preceding the election is in the hands of the Baseball Writers' Association of America. Only those members of the Baseball Writers' Association who have been members for at least ten years are qualified to vote. All other selections are made by the permanent Baseball Hall of Fame Committee originally appointed by the late Judge Kenesaw M. Landis.

Natural Sciences, Philadelphia

The Academy of Natural Sciences of Philadelphia, housed in a fireproof structure at 19th and the Parkway, was started 1812 and is the oldest scientific institution of its kind in the United States.

The Academy possesses a collection of natural objects in many respects unrivaled and its library, numbering more than 150,000 volumes, is rated the most important of its kind. Its Fi Natural History Museum exhibits animal li groups, minerals, birds common to Philadelp and vicinity, and from all parts of the earth; Fluorescence exhibit, which reveals glowing col hidden in certain minerals, and the Hall of Ear History, which graphically depicts the story the earth and its first inhabitants. A hall of bir is named for John James Audubon, a member the Academy.

The Academy's study collection of birds conta more than 150,000 specimens, and its insect c lection more than 2,000,000 specimens. Its sh collection is equally notable. The herbarium co tains plants from all parts of the world.

The Academy publishes The Proceedings, co tinuous annually since 1841. This volume conta the scientific papers of Academy and other scie tists. Another scientific publication is Notula Nat ural. In the popular field, it publishes a magazi Frontiers, devoted to natural history for the l man. The Academy is supported by gift.

Newark, N. J., Museum

The Newark Museum, dedicated to art, scien education and industry, is in Washington Stre across from Washington Park, in Newark, N. The original building, given (1926) by Louis Be berger, on ground provided by the City of New contains the Museum's exhibition galleries, a erence library, and the Science and Registra Departments. The Museum Addition houses Junior Museum with exhibition galleries and wo shops in arts, crafts and the natural sciences; lending department and the museum offices. the Museum Garden is Newark's oldest scho house, moved to its present site in 1939.

The Museum owns one of the outstanding lections of Tibetan art and ethnology in country. Among its other important possessi are Japanese netsukes and other Oriental objects; a representative collection of Ameri paintings and sculpture acquired gradually with discrimination from the time of its found including contemporary works and "primitive some 6,000 coins representative of all nations; moving models showing the art and science mechanics. The collections of the Science Dep ment cover the fields of astronomy, the ea sciences, biology and man.

See New York City for Museums, Art Galleries and Historic Buildings.

New York State Museum

The New York State Museum, Albany, N. Y., its origin (1836) in the materials gathered by Geological and Natural History Survey of the S of New York. These materials, constituting State Cabinets of Natural History were pl (1845) under the jurisdiction of the Board of gents of the University of the State of New Y In 1870, the State Legislature established the York State Museum of Natural History, un supervision of the Board of Regents. Today Museum is the custodian of all state-owned p erty appropriate to a general museum which is placed in other custody by specific law.

The extensive collections of the State Mus are grouped by subject matter under the head of Geology and Mineralogy, Paleontology, Zool Entomology, Botany, Indian Archaeology Ethnology, History and Industry, and Fine A Its most important collections are those in fields of geology and biology. These contain t scientific source materials, including many h dreds of type specimens assembled by such pio scientists as James Hall, paleontologist, Jame Lintner, entomologist, and Charles H. H botanist. The collections include material the customs and history of the Iroquois India comprehensive record of Shaker materials and toms, and a variety of illustrations of the w of Edward L. Henry, the New York artist.

The exhibit halls of the State Museum are on fifth floor of the State Education Building in heart of Albany. Some of the more famous hibits are the restoration of the Gilboa Devo Forest, the Cohoes Mastodon, the six life Iroquois Indian groups, and the large serie original water color bird paintings of Louis A siz Fuertes.

The New York State Science Service in Alb N. Y., was created 1945 by the State Legisla By this act, the long existing objectives of research services of a portion of the staff o New York State Museum were formally recogn The Service engages in scientific research fo benefit of the people of the state and coope with scientific agencies of other states, the fe government, educational institutions and ind

discovery, analysis and dissemination of
fic information within the several fields
ented by the state scientists.

Pennsylvania Academy

Pennsylvania Academy of the Fine Arts
ladelphia, Pa. (founded 1805), is the oldest
titution in the United States. Throughout its
both in the use of its galleries and in the
standard of excellence continuously main-
in its schools, it has endeavored to carry
ce original purpose of its founders "to pro-
he cultivation of the Fine Arts in America."
ough during the early years many works
were bought for exhibition from Europe
nphasis in exhibitions and acquisition of
is now almost entirely on American art, the
tion possessing a very representative cross
. of American Art, from its famous Peales,
s and Sullys, through Eakins, Homer and
up to contemporary artists of national im-
ce such as Burchfield, Watkins and Sloan.
s supplemented by smaller collections of the
h, Dutch and French schools. The Print
ion is one of the largest in the country.

University of Pennsylvania

University Museum of the University of
lvania in Philadelphia, Pa., was founded
and is concerned with the study of the
of mankind, particularly as exemplified by
mains of ancient civilizations and the cus-
primitive peoples. Its activities comprise
esearch in archaeology and ethnology con-
through its expeditions to all parts of the
and Museum research conducted by the
rs of the scientific and technical staffs.

American Section contains exhibits illus-
the customs, arts, and industries of the
c Indian tribes of North America; a group
rticularly fine material from the Tlingit
s of Alaska; Maya and Mexican pottery and
ire; archaeological objects from South Amer-
omprising Colombian gold work, Peruvian
y and textiles, and ethnological collections
ating the living tribes.

ew Middle American Gallery synthesizes
and other Mexican cultures in an original
amatic presentation of the Museum's finest
al selected from the ancient and contem-
civilizations of the area.

Babylonian Section, oldest in the Museum,
ns the most extensive collection of Baby-
antiquities in the country. The tablet li-
with about 20,000 cuneiform documents
Nippur, Ur, and other important cities, is
led.

949 the University Museum in conjunction
he Oriental Institute of the University of
go began a new series of excavations in Nip-
ith promise of many Sumerian tablets of
periods.

Egyptian Section is noted for its collection
-dynastic and archaic objects. The results of
kley B. Coxe Museum expeditions are repre-
by the unique architectural pieces from the
of Merenptah, while the Nubian collection
standing.

Far Eastern Section comprises a collection
ly Chinese sculpture, Chinese pottery, wall
ngs, bronzes and porcelains; fine examples of
sculpture and iconography of the Gupta,
ara and South Indian schools.

Islamic Section comprises mosaic fountains,
ork, textiles, bronzes and illuminated manu-
s from India, Iran, Arabia and Turkey.

Mediterranean Section contains collections
Ancient Crete, Cyprus and Etruria; Greek
Greek and Roman sculpture, glass, mosaics,
s, gems and coins.

Palestinian Section houses collections ob-
through the Museum's expedition to Beisan,
excavations have been carried on through
en culture levels. The finds are sculpture,
cs, glass, pottery and jewelry of the Egyptian,
istic and Byzantine periods.

Elkins Library of the Museum contains ap-
nately 21,000 volumes relating to archaeology,
opology, ethnology and allied subjects. The
y has on file many serial publications, aug-
d by exchanges with museums throughout the

The library contains the Brinton Collection
ericana, including, besides important exam-
f aboriginal literature, the Berendt linguistic
ion.

Johnson Film Library contains approximate-
00 feet of 16 mm. motion picture films, some
or. The Educational Department gives classes
llery talks for school, college and club groups.
ds a large collection of slides, photographs
ther visual aids. Regular motion picture pro-
and concerts offer information to adults on
eoples of the world. Games, radio dramatiza-
tions, motion pictures and story hours are presented for children.

Philadelphia Museum of Art

The Philadelphia Museum of Art, at Benjamin Franklin Parkway and Spring Garden St., Philadelphia, Pa., occupies a monumental building, Greek in design, completed in 1928. Its extensive collections present the arts of Europe and Asia, principally since the beginning of the Christian era, and are especially rich in medieval French and Renaissance art, in painting, sculpture and tapestries. Noteworthy among them are the Romanesque cloister of the 11th century from Saint-Genis de Fontaines, France; three rondels of French Gothic glass of about 1270 A. D., a portal from the abbey of St. Laurent of the 12th century; a French Gothic chapel from Pierrecourt of the 14th century; an altar from the Church of the Templars at Norroy-sur-Vair (Vosges) about 1400, and a French Gothic room of the 15th century from near Le Mans.

Conspicuous among the Renaissance objects from Italy and France are the sculptures and carvings in marble, bronze and wood from the Foulc collection, including a Virgin and Child by Desiderio, an Adoring Virgin by Luca della Robbia and numerous 15th century bronzes. Among the architectural units are elements from the Picolomini Palace in Siena, Santa Maria del Popolo in Rome, and the Chateâu de Pagny, including its choir screen and the sculptured Virgin of Pagny.

Particularly interesting is the series of French rooms of the Louis XIV, XV and XVI periods. The north wing has at either side suites of antique English and American rooms, several of the former being hung with British paintings.

The south wing of the Museum is devoted to oriental art, beginning with the Near East, where the installation includes the carpets of the McIlhenny Collection and the Joseph Lees Williams Memorial Collection. From Sasanian Persia comes an arched portal excavated at Damhan, as well as a series of bas-reliefs from Rayy. Islamic art of Egypt, Anatolia and Persia is represented, the last by a mosque revetment of mosaic tile and by a vaulted interior of painted stucco—both of the Safavid period. The display of art of India includes an entire sculptured temple portico of the 15th century from Madura besides many works of the Graeco-Buddhist, Buddhist and Hindu periods. The section devoted to the art of China surrounds a large palace hall of the Ming period, and includes as other major units a stone tomb chamber of the T'ang dynasty.

On the first floor, the John G. Johnson Collection comprises over 1,000 works illustrating the evolution of painting, with many masterpieces in the Italian and Flemish schools, by such masters as Van Eyck, Van der Weyden, Masolino, Antonello da Messina, Botticelli, etc.

A collection founded by Anna H. Wilstach includes especially Italian and Spanish baroque paintings, characteristic works by many Dutch masters, English 18th century portraits and landscapes, American paintings by Whistler, Sargent, Inness and Mary Cassatt, and a French 19th century group crowned by Cézanne's Grandes Baigneuses.

Presbyterian Historical Society

The Presbyterian Historical Society Museum and Library were founded in Philadelphia (1852) to collect materials related to the history of the Presbyterian Church in America. It contains 75,000 volumes covering religious and other phases of the colonial and later periods in America, a record of the ordination of the first Presbyterian minister in this country and records of many Presbyterian and Reformed churches as well as collections of sermons, hymnology and liturgies.

A collection of more than 50,000 manuscripts includes a letter from Benjamin Franklin to John Witherspoon, the proclamation by John Penn (1763) offering a bounty for Indian scalps, the John Dabney Shane Collection of papers dealing with early religious and frontier history 1716-1860, 14,000 letters in the American Indian Missionary Correspondence, 50,000 letters in the Domestic Missions Collection, the Henry van Dyke Papers; illuminated manuscripts; pamphlets on slavery, the Lincoln Memorial sermons and early editions of religious magazines.

The museum and gallery contain portraits, engravings and photographs of prominent church leaders, autographs, photographs and engravings of every moderator of the Presbyterian General Assembly; the John Witherspoon clock, saddle bags of Marcus Whitman; early communion sets in silver and pewter; a large collection of communion tokens; gavels constructed of historic pieces of wood; David Brainerd's conch shell with which he called the Indians to his church service, and many other relics.

Rochester Arts and Sciences

The Rochester Museum of Arts and Sciences, Rochester, N. Y., is community museum concerned with the natural history, archaeology, ethnology, industrial arts and cultural history of Western New York. 113,000 visited its building in 1948. Thirty-two adult hobby clubs, affiliated as Rochester Museum Hobby Council, oldest federation of the type, meet in its building. There are lectures, motion pictures, field trips and publications for youths and adults. Its lending exhibits of models and specimens were seen by 180,000 persons in 1948.

Franklin D. Roosevelt Library

The Franklin D. Roosevelt Library at Hyde Park, N. Y., was established by joint resolution of Congress approved July 18, 1939, to preserve and make available for use the books, manuscripts and other historical material donated to it by President Roosevelt, and such other related historical material as it might acquire. The building was erected with privately subscribed funds on a section of the Roosevelt estate donated by Mr. Roosevelt and was turned over to the Government July 4, 1940. The museum portion of the Library, which houses Mr. Roosevelt's collection of ship models, naval pictures and numerous art objects and curios, was opened to visitors June 30, 1941, and the books and part of the manuscripts were made available for use in 1946. The Library now has over 3,000 cubic feet of manuscripts, of which Mr. Roosevelt's White House papers are the largest and most important single group, and about 15,000 books and 31,000 pamphlets. In addition to the presidential papers, the manuscript collections include materials relating to Mr. Roosevelt's family and personal life, and to his political career from 1910 to 1932.

The Library is maintained by the Government and is administered by the Archivist of the United States.

Utica, N. Y., Institute

Munson-Williams-Proctor Institute, 312-318 Genesee St., Utica, N. Y., is a cultural center for Utica and surrounding towns, functioning through the Community Arts program and the School of Art. In the Music building are conducted lectures on music, classes in music history and appreciation, travel lectures and motion picture programs. There is an extensive record library. Four rooms exemplify a cultured home of the 1900 period. The Art Gallery has an annual exhibit by artists of Central New York and an informal Sidewalk Show. The School of Art offers courses in painting, drawing, design, graphic arts, sculpture, ceramics and all the visual arts. Exhibits, lectures by visiting artists and publications extend the influence of the Institute for a radius of 100 miles.

SOUTH

Alabama—Natural History

The Alabama Museum of Natural History, University, Ala., contains a geological section with 20,000 specimens of minerals; a large collection of fossils of the Cretaceous and Tertiary ages from Alabama and the Gulf Coast; a collection of 200,000 marine shells, native and foreign, and an herbarium of 2,500 Alabama ferns and flowering plants. The collections of birds, beetles, reptiles and batrachians is very large. The Fletcher collection of objects from northeast Arkansas include 30 burial urns and pottery.

Associated with the Museum is a tract of 300 acres at Moundville, containing 36 mounds that have yielded many skeletons and artifacts. The archaeological museum, built of concrete, contains 57 prehistoric burials in situ.

Baltimore Museum of Art

The Baltimore Museum of Art in Baltimore, Md., started with a small nucleus of permanent treasures and has grown to respectable size through gifts, bequests and purchases. The Print Collection of approximately 65,000 original woodcuts, engravings, etchings, dry points, lithographs, mezzotints and aquatints was started with the Garett collection of 28,000 items from the 15th through the 19th centuries.

The Jacobs Collection, a bequest of Mary Frick Jacobs, consists of paintings, tapestries, furniture, jades, crystals, china, snuff boxes, miniatures and fans, representing the work of artists and designers from the Renaissance to the present. The paintings carry most of the great names of the French, Italian, English, Flemish and Dutch schools. Twelve large 18th-century Royal Aubusson tapestries are in the collection and a salon suite covered in 18th-century Royal Beauvais tapestry. Among te Sèvres porcelains are the famous flower-monogrammed, Madame DuBarry plat

The Museum joined with Princeton Univers and the Worcester Museum, the Musees Nationa de France and the Syrian Government in t excavation of Antioch which commenced 19 and was suspended since the war. So far t Museum has installed 25 large pavement mosai dating from the third to fifth centuries A

The American Wing has three early Maryla rooms, removed from historic old homes, instal and furnished with gifts of authentic period fu niture, glass, china, etc. Early American paintin of the collection include works of Hesselius, Gilb Stuart, Charles Willson Peale, Rembrandt Pea etc.

The Renaissance Collection of Mrs. Saidie May is displayed in a panelled room removed fr a mansion in Shrewsbury, England.

The Oriental Collection in the Levy Memor Room has been increased in recent years thro the William Whitridge collection of Chinese ramics, the Harvey collection of blue and wh porcelain and the Goodenow collection of ea bronzes, ceramics and sculpture.

The Elise Agnus Daingerfield collection paintings of the 18th century from Engla France and America includes fine examples Rommey, Tilly Kettle, Rembrandt Peale, etc.

The Jacob Epstein collection of Old Ma paintings and bronzes, a recent bequest—inclu outstanding works by Raphael, Titian, Tintoret Van Dyck and Franz Hals.

Among the extensive collections lent to the seum indefinitely are the Lucas Collection (o by the Maryland Institute) of French 19th cen works by Corot, Pissarro and the Barbizon sch and the Saidie A. May Collection of Modern by Picasso, Braque, Rouault, Derain, Chag Gris, Klee, Miro, etc., and bronzes by contem rary French sculptors.

The museum has a very active Education partment with lecture series for children adults, drawing classes for children and spe exhibitions in the Junior Museum. Plans for a wing containing the Young People's Art Cen will be executed in the near future.

Delgado Museum, New Orleans

The Isaac Delgado Museum of Art in City P New Orleans, La., houses the Delgado Collect in a special room. Other collections are t of the Art Association of New Orleans; the Ma Whitney Collection of Jade and Other Hard Sto the Frank T. Howard Collection of Greek Vases; Ancient Etruscan Glass; the Chapman H. Hy Collection of Paintings and Statuary along a sum of money for the upkeep of the room; Isaac M. Cline Collection of Ancient Orie Bronzes; the oil paintings given by Mr. Sa Henry Kress; the most outstanding of "Mad and Child," by Giovanni Del Biondo, 1370 A the Louisiana Room, composed of well known Orleans and Louisiana Painters; "Hercules" by toine Bourdelle recently acquired by the muse and various individual pieces of art.

Louisiana State Museum

The Louisiana State Museum, New Orleans, estab. 1906, consists of the Cabildo, the Pre tere, the old State Arsenal (Museum of War), Jackson House, War Annex, the Pontalba his house, set up as of 1850; Madame John's Leg the oldest residence in the Mississippi Valley; Huey P. Long Memorial house and the St. Street Pontalba building (Lower Pontalba).

In the Cabildo, built 1795, where the Louis Purchase was consummated, 1803, are exhib paintings of Andrew Jackson, Gen. Beaure Gen. Philemon Thomas, Louis XIV, Major Baptiste Plauche, the Lafittes and others. In est attaches to the painting by E. D. B. Falk Julio of the last meeting between Gen. Robe Lee and Gen. Thomas J. Stonewall Jackso Chancellorsville.

In the Transfer room is the only known lik of Jean Lafitte, the pirate and soldier of Jack battle, painted on wood by John Wesley Ja nephew of John Wesley, founder of Metho Jean Lafitte, his brother Pierre and Capt. inique You are shown drinking in the Cafe Refugees. Also in the Transfer room are traits of Spanish governors of Louisiana a the builder of the Cabildo, Presbytere and Ca dral, Don Andres Almonester y Roxas. The an original portrait of John Paul Jones by Michel Moreau and one of John Slidell, and 10 flags flown over Louisiana are shown. Presbytere is given over to natural history.

Mariners' Museum

The Mariners' Museum was founded 193 Archer Milton Huntington. It is situated on

ia Peninsula near Hampton Roads, six miles of Newport News, Va.

Museum contains one of the largest collec- of ship models, marine pictorial material, heads, navigation instruments and memor- in the Western Hemisphere. It includes more 750 models ranging from bark canoes to large ship models, and working mechanical scale s of ship propulsion machinery. More than 80 figureheads show the art of the ship carver, masterpiece of which is an eagle with a wing- of 18 feet, from the U. S. Steam Frigate caster" of 1858.

ut 85 full size craft from various countries; s, dugouts, etc.; boats of reeds, skin and ng are shown; also lifeboats and lifesaving

ls of the ship trades are displayed in wide y; axes, pikes and swords; bronze and iron n recovered by salvage operations and from sources, and guns and revolvers form an sive group.

eral thousand lithographs, engravings and ings depict the world harbors of importance almost every type of vessel. These subjects so shown on marine china, coins, stamps and s.

Marine Library is composed of over volumes on shipbuilding, navigation, voyages xploration, naval history, merchant marine, ther maritime subjects; a collection of over photographs of sailing ships, steamships and vessels; a collection of several thousand maps harts; a collection of ship papers, lines and of vessels, etc.

Marine Studios, Florida

ine Studios, world's only oceanarium, Marine- Fla., was organized in 1937 and is headed . Douglas Burden, trustee of the American im of Natural History and member of the York Zoological Society. Cornelius Vanderbilt ney is chairman of the board of directors.

rine Studios was built originally as an under- motion picture studio and to give scientists ter opportunity to study and observe marine as lived in the open sea. The maximum er of salt water fishes and animals on exhibit y one time is approximately 20,000 of about pecies. The specimens range in size from coral fishes to large sharks. All specimens laced together in the two oceanaria and are segregated by species. One oceanarium is ar in shape, 75 feet in diameter, and 12 feet containing 380,000 gallons of sea water. The is 100 feet long, 40 feet wide, and 18 feet containing 420,000 gallons of sea water. There ver 200 portholes set at varying levels for vation.

Maryland Historical Society

e Maryland Historical Society in Baltimore, has a library of approximately 40,000 volumes, pamphlets and several thousands of prints riginal plans and drawings and a large col- n of manuscripts. Among the printed ma- s are a copy of Eliot's Indian Bible, a complete f the Gentleman's Magazine, a considerable f the Maryland Gazette of Annapolis, files of more newspapers and rare American imprints.

o over 1300 papers of the Calvert family, arliest dating from Henry VIII, and including papers describing the establishment of the y; the papers of John H. B. Latrobe, Otho nd Williams, Robert Gilmor, Robert Oliver, tor James A. Pearce and of the Carroll, Lloyd Ridgely families. There are large collections of alogical papers, Bible and church records.

ong the drawings are the original designs itted in competition for the United States ol (1792), and two submitted anonymously homas Jefferson for the President's House and water color drawings of Benjamin H. Latrobe he United States Capitol (1810), the Cathedral altimore, the Bank of Pennsylvania and St. 's Church, Washington.

addition to the large Gallery where portraits stinguished Marylanders and other Americans shown, the Society has 15 rooms of fur- ngs of varying periods. Worthy of special ion are the banquet table and card table ot nas Jefferson; the family heirlooms of the partes, descendants of Betsy Patterson, who ied Jerome Bonaparte, brother of Napoleon; Redwood Collection of costumes, jewelry, silver, iture and pictures of the Buchanan, Coale and kinson families; the Marine Room, displaying els, paintings and prints of ships, and else- e large quantities of furniture, silver, china, and ornaments of early date, firearms and ntation swords.

Mint Museum of Art

The Mint Museum of Art, Charlotte, N. C., is a free educational institution founded to foster the appreciation of the visual arts by means of exhibitions, classes and lectures of high standard. Monthly the Museum presents two or three collected or traveling exhibitions. Separate galleries are set aside for exhibition of work of the members of the Guild of Charlotte Artists, Charlotte Photographic Society and Public School art. The Museum's permanent collections include "Portrait of a Man" by Francesco Salvatti, "Mother and Child" by Francesco Granacci, "Two Martyr Saints" by Fungai, "Madonna and Child and Four Saints" by Rudolfo Ghirlandaio, "Queen Charlotte" by Alan Ramsay, "Stone House, Old Lyme, Connecticut" by Childe Hassam, "Rosalie Sully" by Thomas Sully, "The Golden Hour" by William Hart, and "Woman in Black" by John W. Alexander.

The Mint Museum building is a rebuilt structure, originally erected (1835) as the first branch of the Philadelphia Mint. At the time of erection of the Mint Building, the Southern Appalachian Region was the only gold mining territory in the United States. In the historical rooms may be seen preserved equipment from the Mint and Government Assay Office, and Confederate Army relics.

Morehead Planetarium

The University of North Carolina, Chapel Hill, N. C., opened its new Morehead Building and Planetarium May 10, 1949. This is the sixth planetarium built in the country and the only one owned by a university. It was donated by John Motley Morehead of Rye, N. Y., Class of 1891. The planetarium has a large Zeiss instrument and 250 projectors. The building houses astronomical exhibits and has a large memorial rotunda, dedicated to the memory of the donor's wife, Genevieve B. Morehead, where paintings and objects of art collected by Mrs. Morehead will be exhibited.

Norfolk Arts and Sciences

The Norfolk Museum of Arts and Sciences, in Lee Park in Norfolk, Va., was opened to the public in 1933. It contains fourteen galleries comprising 19,230 feet of floor space. One gallery is given over to the Irene Leache Memorial Association among whose collections are two fine tapestries circa 1600. The library contains the Cornelia Fernstrom Horticultural Library, the records of the D.A.R., books on music, drama and kindred cultural subjects.

The diversified permanent collections include paintings, sculpture and decorative arts. Among these are the Serpell collection of ivories, enamels and fans; the Dr. J. C. Perry collection of Chinese ceramics; South, Central and North American Indian artifacts; 18th century furniture and early 20th century paintings. The Natural History section contains the Adams collection of shells, geological specimens and habitat groups of birds.

Ringling Museum of Art

The John and Mable Ringling Museum of Art in Sarasota, Fla., was established by the late John Ringling. The museum and its art collection, valued at many millions, with his adjoining palatial home, were left to the state at his death in 1936.

The approximately 400 original paintings include the works of Peter Paul Rubens, Rembrandt, Titian, Tintoretto, Paolo Veronese, Van Dyck, Fra Bartolomeo, Frans Hals, Andrea del Sarto, Frans Snyders, Murillo, Velasquez and El Greco.

The museum, built around three sides of a tropic garden court, with the open end facing the west, is recognized as one of the continent's architectural gems. Hundreds of antique columns, statues, arches and doorways were brought from Europe and incorporated in the structure.

It was the intent of John Ringling that his residence, Ca' d' Zan, on Sarasota Bay become a museum of Venetian art. Many Venetian pictures from the collection have been hung in the building, which is reminiscent of the Doges' Palace.

The Museum of the American Circus was built on the grounds, and opened March 27, 1948. It contains old parade wagons and other exhibits.

Tulane Research Institute

The Middle American Research Institute of Tulane University, located near St. Charles Ave. in New Orleans, La., founded in 1924, is devoted to research, education and public service related to Middle America, a region limited arbitrarily to Mexico, Central America, the West Indies, and the Bahamas.

The museum gallery features archaeological relics of the ancient civilizations of Middle America, in-

cluding the Maya of Yucatan and Central America, the Aztec and earlier cultures of Mexico, and the circum-Caribbean tribes of southern Central America. Also on display are exhibits on modern Indians, and rare historical books and documents, including the Codex Tulane, a pre-Columbian genealogy of Mixtec kings painted on a white deerskin scroll 14 feet long.

The Institute has sent out many expeditions, ranging from simple reconnaissance and mapping to intensive studies in many fields. It issues publications based on the findings of these expeditions. Since 1924 the Institute library has acquired approximately 75,000 books, manuscripts, and pamphlets. Qualified scholars and students are provided study space at the Institute and may make use of the extensive catalogue, photographic, and site files for their studies.

Virginia Museum of Fine Arts

The Virginia Museum of Fine Arts, Boulevard and Grove Avenue, Richmond, Va., was opened in 1936. Among the founders was the late John Barton Payne. The Museum is owned by the Commonwealth of Virginia; among its more important items are the following:

Works of the Italian School, 15th to 17th centuries, by Francia, Giovanni di Paolo, Desiderio da Settignano, Giovanni della Robbia (workshop of), Andrea del Sarto (attributed), Guido Reni, Antonio Canaletto, Bernardo Cavallino, Bernadino Fungai, Carlo Crivelli, Jocopo della Quercia (attributed to), Donatello (attributed to), Luca della Robbia (attributed to), Giovanni della Robbia (attributed to). Also samples of Italian Renaissance furniture. In addition it has a fifteenth century Siennese Cassone; and a Nativity Salver, "The Judgment of Solomon," attributed to the Master of the Jarves Cassone.

The Dutch School is represented by Nicholaas Berghem, Ferdinand Bol, Cornelis Delff, Michael Janse Mierevelt and Cornelis Saltleven. The Anglo-Dutch painters are represented in Cornelius Johnson the Younger and Cornelis Janssens van Keulen. There is a 16th century Flemish painting, "Christ Appearing to the Virgin" and Joost Van Cleve: "The Crucifixion."

The English School contains the name of Sir Joshua Reynolds and attributions to Sir Thomas Lawrence and to Sir Peter Lely. Of interest is an early 17th century English portrait of Captain Adams who made many voyages to Virginia.

Works of the French School of the 18th-19th centuries contain those by Victor Emile Cartier, Charles Nicolas Cochin, Thomas Couture, Jean Jouvenet, Gaspard Dughet, Nicholas de Largilliere and Claude Joseph Vernet.

Works belonging to the American School are representative. The following American artists figure in the collection: William Merritt Chase, Walter Clark, Arthur B. Davies, Thomas Doughty, Thomas Eakins, Marsden Hartley, Childe Hassam, George P. A. Healy (eight works), George Inness, George Luks, Gari Melchers, Rembrandt Peale, Hiram Powers, Augustus Saint-Gaudens, Frederick Judd Waugh, Chauncey F. Ryder, Charles E. Burchfield, Lamar Dodd, Philip Guston, Bernard Karfoil, Yasuo Kuniyoshi, Henry Lee McFee, Kenneth Hayes Miller, Hobson Pittman, Henry Varnum Poor, Eugene Speicher, Karl Zerbe, Robert Gwathmey. Well-known Virginia-born artists are John A. Elder, Jerome Myers, Robert Loftin Newman, Dugald Stewart Walker.

The Museum possesses some 400 examples of the work of Carl Fabergé, court jeweler to the last czar of Russia. It has collections of early American glass, English porcelains, English and American silver. Its tapestry collection contains examples of 16th and 17th century Brussels works as well as 18th century Gobelins.

The museum has long-term loans from The Metropolitan Museum of Art, New York, and from The Museum of Art, Boston. In addition to three works by Gari Melchers owned by the museum, it has on indefinite loan some 20 paintings by this celebrated artist; among these is the world-famous "Last Supper." Mr. and Mrs. Arthur Glasgow have recently placed on loan five Brussels tapestries of the early XVII century, part of the Trojan War series, and an Italian XV century marble statue of Saint Catherine.

Virginia War Memorial

The War Memorial Museum of Virginia (formerly The War Memorial Museum of the American Legion) in Newport News, Va., was founded (1923) and established (1942) in its own fireproof building in Huntington Park. Thousands of implements and memorabilia of World War I and World War II are displayed. Here one can find not only the war instruments used by doughboys (1918) and the more modern weapons used by "GIs" in the later conflict, but also weapons and equipment used by the French, Japanese, Russians, English, and many other nations. Everything from the small cartridge to a huge tank is included in the collection.

A few of the outstanding relics from World War I are: a seven-ton Whippet tank, a four-wheel drive truck, wooden airplane propellers, helmets and gas masks, trench knives, rifles of all types, pistols, medals, decorations, uniforms and scores of other items. Topping the list of the World War II items is the watch used by Pvt. Lockhart when he timed the approach of the Japs at Pearl Harbor (Dec. 7, 1941).

Other outstanding items of the World War I collection include: Gen. Montgomery's shoulder patches worn by the British Eighth Army in Africa; a tank which entered Paris the first day of liberation and later was used by the late Gen. George S. Patton; a calling card of the Japanese admiral in charge of Okinawa, which was sent to Fleet Adm. C. W. Nimitz, U.S.N., who also presented to the museum a large collection of other captured Japanese war material. France, England, Belgium, and the Netherlands have sent in an infantryman's complete uniform and gear.

Walters Art Gallery, Baltimore

The Walters Art Gallery in Baltimore, Md., a gift to the city from the late Henry Walters, whose collection as a whole represents the results of the activities of Mr. Walters and his father, William T. Walters, over a period of 70 years and only a small portion can be shown in the present building.

The exhibits illustrate the history of all the arts from the civilizations of ancient Mesopotamia and Egypt to the art of the nineteenth century. The most outstanding sections of the collection may be listed as the Egyptian small sculptures; the Greek, Roman and Etruscan bronzes and ceramics; the Roman sarcophagi; the medieval arts in general, with particular emphasis upon Byzantine art and upon enamels, carved ivories, stained glass and illuminated manuscripts; Renaissance bronzes, enamels and jewelry; eighteenth-century English and French porcelain, ormolu, and small sculptures; the collection of Bayre bronzes; the Oriental ceramics; and the Islamic pottery and metal-work.

The collection of paintings ranges from Italian and Spanish examples of the thirteenth century, the chief French schools of the nineteenth, before the advent of Post-Impressionism. The library, besides the important collection of eastern and western illuminated manuscripts, contains over 1300 incunabula, subsequent examples of important printed and illustrated books, and a notable collection of bindings.

Individual objects of exceptional interest are the original manuscript of The Star Spangled Banner and the first printed broadside of it; the bilingual seal of Tarqumuwa, King of Mera, which provided the key for deciphering the Hittite language; the two heads from the large figures once on the portal of the Abbey of St. Denis, where the Gothic style first took form.

See Washington, D. C., for Museums, Art Galleries and Historic Buildings.

Williamsburg Institute

The Institute of Early American History and Culture, Williamsburg, Va., sponsored jointly by the College of William and Mary and Colonial Williamsburg, Inc., was founded in 1943. It is dedicated to the furtherance of study, research and publications bearing upon early American history. Emphasis falls upon no single section, but rather the whole of American civilization from the 16th to the 19th centuries; likewise history is interpreted broadly to embrace the study of the letters, religion, science and thought as well as the usual fields of political, economic and institutional history. The Institute cooperates with institutions and learned societies engaged in activities pertaining to the early history of the country, especially with respect to the maintenance of accepted standards of historical accuracy and integrity. It exposed the forgery of the Deane Papers in 1947.

The William and Mary Quarterly (founded 1892) is a journal of early American history and is published by the Institute. Its publications program, promoted in part by grants-in-aid of research, includes both historical monographs and original material edited from original manuscripts or from rare imprints. The following books have been published: Robert Beverley, "The History and Present State of Virginia," ed. by Louis B. Wright; "Colonists in Bondage: White Servitude and Convict Labor in America, 1607-1776," by Abbot Emerson Smith; "Gentleman's Progress: The Itinerarium of Dr. Alexander Hamilton, 1744," ed. by Carl Bridenbaugh; "Meeting House and Counting House: The Quaker Merchants of Colonial Philadelphia,

ederick B. Tolles; "Connecticut's Years of oversy, 1750-1776," by Oscar Zeichner; Harrison, First American Architect," by Bridenbaugh.

MIDDLE WEST

cademy of Science, St. Louis

Academy of Science of St. Louis, 4642 Lin- oulevard, St. Louis, Mo., was founded 1856. museum serves as a nucleus from which more comprehensive museums may develop e fields of anthropology, natural history, e and industry. The museum's most out- ng collection is the Whelpley Collection of Relics. The library contains some 75,000 es of scientific periodicals.
Academy has been publishing "Transactions Academy of Science of St. Louis" since 1856.

Adler Planetarium, Chicago

Adler Planetarium and Astronomical Mu- on Chicago's lake front, was the first insti- of its kind in America. It was presented to ople of Chicago by Max Adler, May 12, 1930, s operated by the Chicago Park District. Al- h commonly referred to as the Planetarium, really an Astronomical Museum, of which the tarium instrument is the principal exhibit.
circular Planetarium chamber with a hemi- ical ceiling 68 feet in diameter contains the tarium instrument and seating facilities for ectators. This instrument enables the demon- or to reproduce the sun, moon, planets and the stars visible to the naked eye under ideal con- s. With this mechanism, time and space are cturer's tools, used to demonstrate astronomi- henomena.
e astronomical museum contains an unexcelled tion of antique astronomical and mathemati- struments among which are astrolabes, noc- ls, armillae, celestial globes, sun dials, early opes, etc., beautifully made by the most skilled smen of the 16th, 17th and 18th centuries as as modern instruments, together with ex- s explaining various phases of astronomy. Set the walls of the main floor corridors are 72 transparencies of astronomical photographs with the world's foremost telescopes. These de photographs of planets, constellations, ts, solar prominences, sun spots and famous vatories.

Art Institute of Chicago

e Art Institute of Chicago combines a mu- , school, theater and libraries of art in Chi- Ill. It was founded 1879 and covers eight of ground. It has an endowment of $14,603,- nd the attendance in 1948 was 1,338,761.
e museum has collections of paintings (alto- er over 1,000) especially French, Dutch, Flem- Italian, and American; Egyptian and classic ulities; about 500 sculpture casts of all periods, ding architectural sculpture; prints and ings of all periods; a special Gallery of Art pretation; a new Textile room; collections riental Art, representative collections of Eu- an and American decorative arts—ceramics, metalwork, textiles and accessories, wood- furniture and period rooms—originals and ature models, notable medieval and Renais- sculptures, special textile study room, print room, and Japanese print study room.
e Ryerson Library of Art and Burnham Li- of Architecture contain 52,000 volumes, 36,700 rn slides, 77,000 photographs, 14,600 color s, 50,000 postcards.
filiated organizations domiciled in the Art tute are: The Antiquarian Society of the Institute of Chicago, The Orientals, Print and ving Club, Society for Contemporary American and Chicago Public School Art Society.
nong outstanding paintings owned by the Institute of Chicago are the following: As- otion of the Virgin by El Greco (perhaps his erpiece); Young Girl at an Open Half Door, tembrandt; Rinaldo and Armida (4 decorative els), by G. B. Tiepolo; Stoke-by-Nayland, by stable; Sunday Afternoon on La Grande Jatte id, Seurat's masterpiece; Chardin's The White ecloth; Adoration of the Magi, by Lucas van den; Interrupted Reading, by Corot; Edouard et, by Fantin-Latour (probably his best por-); Crucifixion, by Crivelli; Degas' The Milli- Shop; Mère Grégoire, by Gustave Courbet; er's The Herring Net; Gilbert Stuart's Maj. Henry Dearborn; St. John on Patmos, by olas Poussin; Education of Cupid, by Titian; Moulin Rouge, by Toulouse-Lautrec; Seven els from the School of Amiens; six panels (Life ohn the Baptist), by Giovanni di Paolo; and y others; Chester Dale loan collection.
itstanding among Oriental Art Collections are: Buckingham Collection of Chinese bronzes; Chinese pottery and porcelain; a wood Kwanyin of Sung Dynasty. The Clarence Buckingham Collection of Japanese prints ranks third in America.
Outstanding in Decorative Arts Department are medieval collection (Buckingham), Renaissance and eighteenth century textiles (Ryerson and Deering), European glass (Rosenwald), English lusterware (Buckingham), Wedgwood (Gunsaulus), Mexican majolica (Lewis), Thorne Miniature Rooms.
In the Department of Prints and Drawings are many famous prints in fine impressions such as: The Adoration by Master E. S.; Christ on the Cross by Master I. A. M. of Zwolle; St. George by Martin Schongauer; others by Giulio Campagnola; Albrecht Dürer; Jean Duvet; Rembrandt; Eighteenth Century color prints; Daumier; Gauguin; large collection of Redon, Zorn, Millet, Whistler, Toulouse-Lautrec, Meryon; Mrs. James Ward Thorne collection of color plate books, and many others; important Nineteenth and Twentieth Century drawings and a fine group of drawings by Thomas Rowlandson.

Chicago Academy of Sciences

The Chicago Academy of Sciences, Museum of Natural History, in Lincoln Park at 2001 N. Clark St., Chicago, Ill., was founded 1857 for "the promotion and diffusion of scientific knowledge."
Emphasis in the public exhibits is placed upon the natural history of the Chicago region. The Chicago Environs Hall is composed of large habitat groups illustrating ecological relationships in replicas of typical dune, marsh, prairie, and woodland sites in the vicinity of Chicago. Study collections also represent many other areas in North America.

Chicago Historical Society

The Chicago Historical Society, Chicago, Ill., incorporated 1857, is located in Lincoln park. While specializing in the history of Chicago and the Midwest it includes exhibits of national importance.
In the presentation of exhibits, the Society has made extensive use of the principles of visual education. The story of American History is given in the chronological arrangement of period rooms. Each exhibit in the building is displayed so as to deal with a specific subject and its related facts as a unit. One of the 18 period rooms is the Senate Chamber, a reproduction of the original in Congress Hall, Philadelphia, the seat of the Government of the United States prior to its transfer to Washington (1800.) Authentic relics which belonged to George and Martha Washington are displayed.
Lincoln Hall contains one of the greatest collections of Lincolniana in existence. Besides many personal effects, original letters, documents and books give interesting sidelights on the disposition and character of the Civil War President. A corridor lined with etchings, lithographs and engravings of Abraham Lincoln, leads to the Lincoln Parlor, a reproduction of the front parlor of the Lincoln Home in Springfield, Ill. There is also an exact reproduction of the bedroom where Lincoln was carried after he had been shot on that fateful night of April 14, 1865. The room has been carefully and authentically reproduced in size and detail. The bed, the chair, chest of drawers, scrim curtains and gas jet were taken from the original bedroom in which Lincoln died. Another unique and popular Lincoln exhibit is the series of twenty dioramas which represent important episodes from the life of Lincoln.
The Gilpin Reference Library has available general Americana although the emphasis is placed upon the history of Chicago and the Old Northwest. The book collection of 80,000 volumes and pamphlets embraces current historical works as well as interesting material on early America, reports of foreign travelers, pioneer sketches of political development. The Lincoln collection, which numbers more than 1,000 volumes and pamphlets, also includes a group of Lincoln letters and documents.

Chicago Natural History

Chicago Natural History Museum, formerly Field Museum of Natural History, is at Roosevelt Road and Lake Shore Drive, Chicago, Ill.
The exhibits, and the scientific study collections, are divided into four departments—anthropology, botany, geology and zoology. Each of these includes many subdivisions such as archaeology, ethnology, plant economics, paleobotany, meteoritics, mineralogy, paleontology, mammalogy, ornithology, ichthyology, herpetology, etc. The Museum library contains 130,000 volumes.
The Hall of Babylonian Archaeology contains the results of ten years' collecting and eight additional years of research on the site of the ancient city of Kish in what is now Iraq.

A unique exhibit, occupying an entire hall, is the famous Races of Mankind series of sculptures in bronze and stone, representing types of the principal living peoples in all parts of the world. These are the work of the noted sculptor Malvina Hoffman. Complementing this series is the Hall of the Stone Age in which types of prehistoric men, from the Chellean period (about 250,000 years ago) down to the dawn of history (about 6,000 B. C.) are restored, life-size, in dioramas depicting scenes and activities of their times. The Department of Anthropology includes also exceptionally extensive archaeological and ethnological collections representative of the Indians of North, Central and South America; ancient Egypt, Babylonia, Etruria and Rome; China, Tibet, and other parts of Asia; Africa; and the various island groups of the South Pacific. The North American Indian exhibits constitute a radical departure in "subjective" exhibition methods.

The botanical exhibits, occupying five large halls, give a general idea of the plant world, its range of forms, and its relation to human life. In the Hall of Plant Life is a display of characteristic forms of plants from the lowest minute species such as bacteria and algae (represented as they would be seen through a microscope) to the highest forms reproduced in meticulous detail as they appear in life. A feature of this hall is a large diorama reproducing part of an alpine meadow in the Rocky Mountains with its characteristic vegetation. Two halls are devoted to plant economics (food plants, palms, and plant materials used in industry), and two to woods (North American, and foreign).

The Department of Geology's exhibits are classified in two groups, one illustrating the scientific, the other the economic and industrial relations of mineral products of the earth. The department is especially notable also for its great hall of paleontology, and for possession of the most complete collection of meteorites in the world. In the division of paleontology, in addition to a large and important collection of fossil skeletons of prehistoric animals, there is an extensive series of large mural paintings by Charles R. Knight showing these extinct creatures as scientific research indicates they must have appeared in life, and several three-dimensional exhibits restoring important species in life-size. There is also a large exhibit representing in life-size a section of a forest of the Coal Age.

Exhibits in the Department of Zoology include the Carl E. Akeley Memorial hall devoted to African game animals, which contains the principal taxidermic masterpieces of the naturalist for whom it is named. Among the groups in the hall of Asiatic animals is one of giant pandas, containing the first specimens of this animal ever to reach the U. S. or to be obtained by white hunters.

John Crerar, Chicago

The John Crerar Library, Chicago, Ill., has these special collections: Senn, Medical; Ely, mostly on American labor and social movements; Gerritsen, on social and economic subjects especially finance, banking, labor, and socialism, also on the social, political and legal status of woman; portions of the Chanute, on aeronautics; portions of the DuBois Reymond on comparative physiology; the Meissner, on physiology; the Baum, on historical medicine; the Martin, on gynecology; the Grulee collection on Pediatrics; government documents especially British, Canadian, United States and state; cremation; cook books, including the Levis collection; international congresses and expositions. Subjects especially strong: bibliography, aeronautics, radio, medicine, dentistry, pharmacy, botany, zoology, biology, social sciences particularly labor, scientific periodicals and society publications, engineering, chemistry pure and applied, geology, physiology, railroads, constitutional law, international law, and scientific periodical indexes and abstract journals. Portrait collection of physicians, surgeons, and scientists.

Lincoln Park Zoo, Chicago

The Lincoln Park Zoological Gardens in Chicago, Ill., operated by the Chicago Park District, covers 25 acres, exhibits more than 2,600 mammals, birds and reptiles collected from lands ranging from the ice-bound arctic to the torrid tropics.

The exhibits are housed in five buildings, five barns, 30 outdoor yards and enclosures, nine dens for wolves and foxes, nine bear pits, raccoon pit, outdoor pool for sea lions, penguin pool, wild fowl pond, bird of prey cages, pheasantries, flightless bird section, and the world's only Zoorookery. This is a landscaped rock garden with a meandering stream in its center. There are no fences, only a water barrier, and visitors may photograph birds without interference of wires and bars. Included among the many winged creatures are flamingos, cranes, storks, swans and peacocks. A "Zoo Answer Shop" has been established, at which visitors may ask questions about the various members of the animal kingdom.

The zoo is the home of "Bushman," the world famed male gorilla, reputed to be the finest anthropoid specimen in captivity—6 feet, 2 inches tall, 550 pounds in weight, and 21 years old (as of April 1, 1949). Millions of visitors have viewed the amazing creature as he peers savagely through the thick plate glass of his 2-room steel "suite." His diet, scientifically prepared, usually consists of pounds of grapes, lettuce of which he is fond, pears, peaches, bananas, carrots, sweet potatoes and occasionally a snack of American cheese for additional Vitamin B-1. He washes it all down with three quarts of milk to which has been added raw eggs and vitamin tablets.

Added to the collection, Oct. 1, 1948, were four young gorillas flown over from Africa by Lincoln Park Zoo Director, R. Marlin Perkins. Their ages are: Sinbad, 8 months—11 pounds; Rajah, months—28 pounds; Irvin Young, 2 years—28 pounds and Lotus, the only female, 3 years—42 pounds. Studies made since their arrival show that on string-pull tests Lotus is as intelligent as a human infant of the same age (April, 1949).

Newberry Library, Chicago

The Newberry Library, Chicago, Ill., was founded in 1887 by a bequest from Walter Loomis Newberry and incorporated 1893 as a free public reference library. Its books and manuscript collections, about 600,000 in number, fall within the general field of the humanities and include all important texts, printed source materials and documents in the history of thought and culture of classical times. Chief emphasis has been upon English and American literature and history. The Library is especially strong on the Arthurian Legend, ancient Gaelic texts, Edmund Spenser, seventeenth-century novels and poetical miscellanies, the American Revolution, slavery and the Civil War, nineteenth century American periodicals, genealogy, and linguistics. In the last-named field the Bonaparte collection was, at the time of its purchase, among the best, in existence.

The Edward E. Ayer Collection on the American Indian includes all printed materials, with some manuscripts, on the anthropology, ethnology and language of the Indian both in North and South America, and the history of his relations with white men from the voyages of discovery and exploration to the present day.

The John M. Wing Foundation in typography and allied arts, and the library's music collections are large and important.

The Library's collections on the social, economic and cultural history of the Midwest include the central-office papers of the Chicago, Burlington and Quincy Railroad, 1850-1901, and of the Illinois Central Railroad, 1851-1906, the correspondence of Victor F. Lawson, and the letters and manuscripts of such midwestern authors as Sherwood Anderson, Floyd Dell, F. F. Browne, Henry B. Fuller, Joseph Kirkland, Mary Hartwell Catherwood, and Hobart Kitchell Webster.

Oriental Institute, Chicago

The Oriental Institute of the University of Chicago in Chicago, Ill., is a research laboratory for the investigation of the early human career which is now believed to have occurred in the ancient Near East, including Egypt, Palestine, Syria, Iraq and Iran.

The field expeditions have contributed to the archaeological background of Stone Age man in the Near East. The Institute's prehistoric survey has traced pleistocene man's successive flint workshops on the banks of the Nile and along the Red Sea, and uncovered evidence of green savannas and lakes in North Africa passing through a period of slow desiccation to become vast deserts. The story of the earliest potters and metal workers has been unfolded at Megiddo, Palestine; Tell Asmar, Tell Agrab and Khafajah, Iraq; Alishar, Anatolia; and Persepolis, Iran. From Tell Judaidah in North Syria has come a hoard of copper statuettes carrying the beginnings of competent metallurgy farther back to man's call than had heretofore been supposed. The discovery of early Sumerian stone statuettes in Iraq brought about a reconsideration of all former valuations of pre-Greek art.

Excavations of the palaces of the Assyrian emperor Sargon II at Khorsabad and of the Persian emperors at Persepolis have contributed to the history of late pre-Greek oriental monarchy. Foundation records, coins, thousands of clay tablets at Persepolis, and a brilliant collection of gold ornaments for personal adornment provide material for rewriting the story of Achaemenid life and times.

Five exhibition halls in the Institute headquarters contain representative collections of objects from the field, featuring among them three col-

sculptures: a 40-ton human-headed winged
rom Khorsabad, a 16-foot statue of Tutenkha-
from Egypt and a ten-ton bull's head from
polis.

Science-Industry, Chicago

Museum of Science and Industry in Chicago,
s housed in the restored Fine Arts Building of
Columbian Exposition, one of the finest re-
ructions of classical architecture. The Mu-
. founded by the late Julius Rosenwald, con-
hundreds of exhibits devoted to scientific and
trial processes which fill the needs of a mod-
ivilization, illustrating the theme inscribed
the central dome: "Science Discerns the
of Nature; Industry Applies them to the
s of Man."
etching away from the central rotunda are
it pavilions dedicated to Physics, Chemistry,
, Metals, Medicine, Agriculture, Transporta-
the Graphic Arts, and Engineering Con-
ion. The Museum is particularly famous for
sitor-operated devices and exhibits in which
pectator finds himself a part of the scene.

the huge reservoirs under the building are
1,000,000 gallons of fresh water and 1,000,000
ns of ocean water, all constantly circulated,
ed and aerated, heated and cooled according
e requirements of the fish that live in it.

Vanderpoel Gallery, Chicago

e John H. Vanderpoel Memorial Art Gallery,
verly Hills, Chicago, Ill., was founded in 1912
mmemorate the work of one artist, and then
ually expanded as the work of other native
s was contributed. The most recent count
ed 691 paintings there. Vanderpoel (1857-
was a native of Holland, a pupil of Lefebvre
Boulanger in Paris and long an instructor in
Art Institute of Chicago.

Cincinnati Art Museum

e Cincinnati Art Museum and the Art Acad-
of Cincinnati comprise the Cincinnati Museum
iation in Cincinnati, Ohio. The museum
ins the Mary M. Emery Collection of 15th
h century paintings. The Mary Hanna Collec-
of 17th to 19th century paintings, the J. J.
y Collection of European and American
ings, Emilie Heine collection of 17th to 20th century paintings, the Herbert Greer French Collection of Print Masterpieces from the fifteenth through the nineteenth centuries, Nabataean Antiquities from Khirbet-Tannur, Egyptian, Graeco-Roman, Medieval and Oriental sculpture. Edna F. and Millard F. Sheit collection of Egyptian objects, Islamic pottery and miniatures, Chinese ritual bronzes and paintings, decorative arts material of many periods and countries, and an outstanding collection of American Indian objects. Important loans to the Museum include the Arthur Joseph Collection of Meissen Porcelain and a comprehensive historical collection of playing cards.

City Art Museum, St. Louis

The City Art Museum of St. Louis in Forest Park, St. Louis, Mo., is a municipally owned museum established in 1912. The art collections present a survey of art from ancient Assyria and Egypt to the present. Paintings and prints illustrate the course of Western European pictorial art from Italian primitives through the developments of the renaissance to the current schools of today both in America and abroad.

The historic phases of European and American decorative arts are similarly outlined in furniture, textiles, ceramics and other objects. Included are typical medieval, gothic, Hispano-Moresque, Jacobean, Queen Anne, Georgian, Louis XV and American rooms from Georgian to Victorian times. Unusual among the European rooms is the Gothic Court with its great XVI century stairway from Morlaix, France. Sculpture, pottery, textile and other crafts illustrate the primitive arts of America and Africa.

The Oriental collections contain sculptures, bronzes, jades, textiles and paintings representative of the historic periods of Far Eastern culture and one of the great collections of Chinese ceramics in America. Among the Chinese sculptures, porcelains and early bronzes are specimens ranking among world masterpieces. From the Near East are carpets, velvets and other textiles, ceramics, metalwork, etc., originating in Persia and the adjacent regions. The classical galleries contain Greek sculptures in marble and bronze, ceramics, glass, mosaic and gems, Roman portrait busts, ceramics, glass and metalwork.

Cleveland Health Museum

The Cleveland Health Museum in Cleveland, Ohio, is the first health museum in the Western Hemisphere. It was incorporated (1936) on a non-profit basis. "Health through Knowledge" is the motto which governs construction of its three-dimensional exhibits, which in many instances require visitor participation. Largely designed and built in the Museum's studios, exhibits are animated and show the workings of the human body, dramatizing the advantages and means of maintaining good health. Among exhibits are a collection of life-size models showing human reproduction and birth; transparencies of the body organs; a huge plastic tooth which shows the various parts by sectional illumination; the races of mankind; duties of doctors and nurses and other subjects.

Cleveland Museum of Art

The Cleveland Museum of Art, Cleveland, Ohio, includes in its permanent collections and visiting exhibitions primitive, ancient, and classical art; various periods of Europe; Near and Far East; Pacific localities; Africa; North, Central, and South America; as represented in sculpture, painting, graphic processes, the decorative arts in furniture, tapestry, lace, and other textiles; metals, pottery, jewelry.

Richness of quality is to be found in its medieval collections, including an important portion of the great Guelph Treasure of the House of Brunswick; the Holden Collection of European paintings, including "The Holy Family with St. Margaret and St. John" by Filippino Lippi; the Louis XVI Rousseau de la Rottiere Room; the J. H. Wade Collection with its great decorative art and paintings; the collections of nearly all forms of art of the highest quality bequeathed by John L. Severance and Elisabeth Severance Prentiss. Recent additions include paintings by Rubens, Hals, Goya, Gauguin, Picasso, Renoir, Van Gogh.

Detroit Institute of Arts

The Detroit Institute of Arts, 5200 Woodward Avenue, Detroit, Mich., is a municipally owned museum of art.

The aim of the museum is to represent within one building the whole meaning of the arts in human society since the first appearance of the instinct of design. It represents in orderly historical sequence every stage of human culture and every great art producing epoch from prehistoric man to the twentieth century. The collection includes the history

of western civilization, of Africa, Asia, and the Americas.

Within this general plan the most distinguished sections are the arts of the Italian middle ages and the renaissance, the arts of the Netherlands from the fourteenth to the seventeenth centuries, the baroque and rococo period of European culture, the American colonial period and the romantic period, the European twentieth century arts, the arts of the Near East and Far East.

The collection consists of more than 1,000 paintings, one of the richest collections of sculpture in America, and representative examples of furniture, goldsmiths' work, glass, ivory, graphic arts, textiles.

Among the important late accessions are: Copley, Watson and the Shark; Whistler, Nocturne in Black and Gold; the Falling Rocket; Rembrandt Peale, Portrait of Robert Fulton; Pannini, The Roman Forum and The Colosseum; Homer, The Dinner Horn; Murillo, The Flight into Egypt; Desiderio da Settignano. Profile Portrait; Ribera, St. Jerome in the Wilderness; Georges de la Tour, St. Sebastian. The gallery of seventeenth century American colonial art has been reinstalled and enriched by important gifts of rare early furniture.

A new gallery of the arts of French Canada was inaugurated early in 1949.

Herron Institute, Indianapolis

The John Herron Art Institute of Indianapolis, Ind., including an art museum and a school in separate buildings, was erected 1906 from funds bequeathed to the Art Association of Indianapolis by John Herron. It is owned and operated by the Art Association of Indianapolis (organized 1883).

The collection of more than 11,000 objects is arranged in 12 galleries in the museum building, and represents the arts of countries throughout the world, from ancient to modern times. The type of material includes costumes, textiles, prints, drawings, porcelain, glass, metal objects, sculpture and paintings.

Illinois State Historical

The Illinois State Historical Library, Springfield, Ill., has a Lincoln collection of 5,000 vols. and over 400 original Lincoln letters. The Alfred W. Stern Civil War library is one of the largest in the country. The library contains about 85,000 vols., which may be consulted by scholars. It is constantly adding to its store of Illinois historical material and recently obtained the papers of Gov. Henry Horner, weighing over three tons, which were impounded for 15 years. The Illinois State Historical Society (J. Monaghan, Secy.) is a department of the Illinois State Historical Library.

Independent of this library is the Illinois State Library, Springfield, Ill., which is administered by the secretary of state of Illinois.

Iowa State Historical

The State Historical Society of Iowa, Iowa City, Ia., incorp. 1857, is housed by the State University and contains about 96,000 books and 6,000 bound vols. of newspaper files. It specializes in Iowa and midwestern history, publishes a monthly, the Palimpsest, a quarterly, Iowa Journal of History, and books on Iowa history, biography and government. It has 2,125 members and about 400 depositories and exchanges. The state appropriated $45,000 for the biennium, 1947-49.

Joslyn Art Museum, Omaha

The Joslyn Memorial Art Museum in Omaha, Nebr., was a gift of Mrs. Sarah H. Joslyn in memory of her husband, George A. Joslyn. The building is of Georgia pink marble (completed 1931). Surrounding the patio and concert hall are 10 galleries. The permanent collection of paintings, furniture, and other art objects are shown in the south galleries in period arrangement from the Early Renaissance to the present day. Paintings, drawings, prints, photographs, industrial arts and architecture are among the four or five new exhibitions shown each month.

Other exhibit rooms accommodate additional displays including Oriental and Classical groups and the Graphic Arts Section. The Museum has a substantial Art Reference Library. The Lecture Hall and other special rooms are available for group meetings. Three studios accommodate day and evening art classes for adults and ages down through pre-school.

Kansas City Museum

The Kansas City Museum, Kansas City, Mo., is a municipally owned institution, administered by the Kansas City Museum Association. It was founded in 1939, as a private corporation, and was taken over by the city in 1948. It is located at 3218 Gladstone Boulevard.

The Museum contains valuable collections a exhibits of ethnological and archeological mater dealing with the American Indian and many f eign cultural groups; also, geological specime birds and mammals of the region and histori material of Kansas City and the surrounding ar

Nelson Gallery, Kansas City, Mo

Jones Gift of Prints, collection of Pre-Columbian arts of Mexico, al and South America, and the French, Eng-and American Period rooms presented by John an Derlip, Mrs. John Washburn and daughters, Eugene Carpenter and Mrs. Folwell Coan, and and Mrs. James Ford Bell.

the field of painting, masters of Europe and ica are represented by typical works dating the primitive to the contemporary periods. ng the most famous paintings in the collection atinir's Rest on the Flight into Egypt, Titian's tation of Christ, El Greco's Purification of Temple, Rembrandt's Lucretia, Rubens' Sketch the Ceiling of Whitehall Palace, Hobbema's iscape with Water Mill, Degas' Portrait of Hortense Valpincon, Matisse's White Plumes, guin's Under the Pandanus, and Copley's Por-of Mrs. Nathaniel Allen.

ong private collections on extended loan at Art Institute, none is more important than distinguished collection of Ancient Chinese zes and Jades lent by Alfred F. Pillsbury.

alker Art Center, Minneapolis

e Walker Art Center in Minneapolis, Minn., n educational art museum emphasizing the con-porary arts. It is an outgrowth of the Walker Gallery, begun (about 1879) by Thomas Bar-Walker, a lumberman and Minnesota pioneer. Walker was an extensive collector of paintings, ital ceramics and oriental jade. His purchases n the nucleus of the present permanent collec-of the Walker Art Center.

e four main divisions of the permanent col-on are: (1) European paintings, (2) Oriental modern pottery and porcelain, (3) Chinese , and (4) contemporary American painting sculpture.

ne feature of the Center program is a per-ent gallery and reading lounge devoted to the yday arts. This department maintains con-ly changing exhibitions of modern furniture, ics, utensils, glassware, pottery, household pment, etc. Modern architecture, particularly he field of house planning, is emphasized. In reading lounge a complete library of house s, books on modern architecture, magazines decoration, and trade journals on household ob-s is available to the public.

Minnesota Historical, St. Paul

n Capitol Hill in St. Paul, Minn., adja-to the State Capitol, the Minnesota His-cal Society, chartered 1849 by the first nesota territorial legislature, is the oldest in-porated institution in the State. The museum he society, with its varied displays, shows how nesotans of the past lived in terms of the tools implements they worked with, the clothes they e, the furnishings they used in their homes, eyances in which they traveled, and countless er articles relating to the state's history.

he library of the society contains over 200,000 ks, pamphlets and newspaper volumes, and trong in the general field of Americana. It has extensive collection of materials relating to the ndinavian elements in the United States; and one of the largest collections of genealogical biographical publications in the country.

n the manuscript division may be found a con-ntly growing body of letters, diaries, and other uments left by men and women who have played e part in making Minnesota.

Natural History, Cleveland

he Cleveland Museum of Natural History in veland, Ohio, has 54,000 specimens of birds, 00 specimens of mammals, and one of the ld's most important collections of upper Devonian fossil fishes. The Museum also has extensive collections of insects, shells, minerals, precious and semi-precious stones, and of botanical and ethnological materials.

The Museum has sponsored or participated in several expeditions to Africa, one to the islands of the South Atlantic, one to the vicinity of the North Pole, one to the Azuero Peninsula of Panama; MacMillan Arctic Expedition to Greenland, and many to various parts of North America. Many of the objects brought back from these expeditions are on exhibit in the main building of the Museum. Here also is the Hanna Star Dome, used extensively by school classes for the study of the stars. Also for use of schools is the Science classroom. A special exhibits gallery has been added recently.

The Museum operates a Traveling Trailside Museum, three Trailside Museums for the Cleveland Metropolitan Park Board, and one for the city of Cleveland. It also manages the Holden Arboretum in Kirtland Hills, and the Cleveland Zoo in Brookside Park for the city of Cleveland. In 1949 an affiliation was made with the Cleveland Astronomical Society for the operation of a Junior Astronomy Club.

Toledo Museum of Art

The Toledo Museum of Art was founded 1901 and endowed by Mr. and Mrs. Edward Drummond Libbey "for the benefit of all those who seek self-improvement." Its Museum School of Design carries on a program of free art education and music appreciation.

Situated in the "glass capital of the world," the Museum has one of the world's largest and most complete collections of ancient glass. Its painting collection numbers more than 500 European and American works, including masterpieces by: El Greco, Velasquez, Goya, Holbein, Rembrandt, Le-Nain, Filippino Lippi, DiCosimo, Cezanne, Gauguin, Van Gogh, Picasso; Robert Feke, Samuel F. B. Morse, Gilbert Stuart and Benjamin West.

Sculpture includes Greek and Roman examples, pieces from the French and Spanish Gothic periods and the Italian Renaissance, as well as from the 19th and 20th centuries.

Other collections are: Egyptian and Mesopotamian antiquities, Oriental art, ceramics, modern glass, books, manuscripts and prints.

Five galleries are reserved for the display of temporary, special or traveling exhibits and one gallery is devoted to local art.

The Museum has a reference and lending library of 12,000 volumes, 25,000 slides; and a music lending library of 6,500 records and 300 scores.

Western Reserve Historical

The Western Reserve Historical Society, 10825-10915 East Boulevard, Cleveland, Ohio, founded 1867, occupies two 70-room buildings opposite Wade Park. Among the museum collections are: early Cleveland dioramas; the Warren Miniature rooms depicting the homes of one family from Plymouth Colony to the present; an American Indian collection, including eight Indian settings; a log cabin interior and pioneer tools; the Bierce collection of Washingtoniana; a comprehensive lighting exhibit; early Western Reserve materials; a large costume collection; the D. Z. Norton collection of Napoleana; and the original of the Willard painting, "The Spirit of '76."

The library of 19th Century American history has about 200,000 books, 100,000 pamphlets (many unique), 20,000 vols. of newspapers, an estimated 1,000,000 manuscripts, many pictures, and maps. In addition to the materials on the Western Reserve, which include the papers of the Connecticut Land Company, the collection contains much on other parts of Ohio and the eastern United States. Strong sections are: the William P. Palmer Civil War collection, including many Southern newspapers and other material on the Confederacy; Lincoln; railroads; the American Indian; Shaker manuscripts; a costume collection; exploration, travel and genealogy, including some 12,000 family histories and supporting local history.

A feature of the grounds is a noted formal garden, the Cuyahoga County Cultural Garden. An outlying feature, near Unionville, is Shandy Hall, a frame house built in 1815 and occupied by one family until 1935, and containing its original household articles and furniture.

Wisconsin State Historical

The Library of the Wisconsin State Historical Society, Madison, Wis., estab. 1853, is the largest of any American historical society, and contains upwards of 343,531 vols. and periodicals; 365,489 pamphlets; 827,370 manuscript items and 3,844 bound manuscripts (1948 report). There is a large genealogical collection. Although collecting Wisconsin records is its primary purpose, the library serves the University of Wisconsin in the field of

American history. Foremost among its collections are 500 vols. of manuscripts relating to the old West gathered by Dr. Lyman Draper. Another is the collection of John R. Commons. There is a large group of manuscripts dealing with labor. The American newspaper collection, 1690-1820, is sixth in the country, first west of the Alleghanies.

SOUTHWEST

Arizona State Museum

The Arizona State Museum, a department of the University of Arizona, in Tucson is chiefly anthropological, stressing particularly the archaeology and ethnology of the Southwest. However, there are historical and natural history materials. There are about 35,000 specimens in the Museum Outstanding exhibits and collections include the following:

Set of six original Navaho Indian sand paintings; Western Apache exhibit; tree ring exhibit, including a 10-foot section of Giant Sequoia with over 1700 annual rings; prehistoric Southwestern textile, pottery, stone and bone work. One alcove devoted to Ventana Cave, a stratified record of Man's occupancy for about 10,000 years.

Hall of State, Dallas

The Hall of State was erected with state funds at a cost of $1,200,000, and is located in Fair Park in Dallas, Texas. It was built in commemoration of Texas heroes as part of the centennial program in 1936. Later leased by the state to the City of Dallas, it has been the home of the Dallas Historical Society (founded 1922) since 1938.

At the entrance are the heroic figures of Sam Houston, William Barret Travis, Stephen Fuller Austin, James Walker Fannin, Mirabeau Buonaparte Lamar and Thomas Jefferson Rusk.

The walls of the Hall are of Texas limestone. Around them a frieze records names distinguished in the history of the region.

Murals are by J. O. Mahoney Jr. (South Texas Room), Arthur Nordorf (North Texas Room), Olin H. Travis (East Texas Room), Tom Lea (West Texas Room), and Eugene Savage, Reveau Bassett, and Buck Winn Jr. (Hall of the Six Flags).

Above the central entrance stands the heroic statue of a Tejas warrior, by Allie Tennant. Pompeo Coppini made the figures of Travis, Rusk, Houston, Austin, Lamar, and Fannin in the Hall of the Heroes. A portrait bust of Fleet Admiral C. W. Nimitz, by Felix de Weldon, was added to the Hall of the Heroes in 1945. A statue of a Cowboy, carved of wood by Dorothy Austin, is in the West Texas Room.

Museum exhibits are frequently changed and are drawn from the society's collections of more than 750,000 items. The Texana Reference Library and Archives are open to qualified students.

Museum of Northern Arizona

The Museum of Northern Arizona, situated three miles north of Flagstaff, Ariz., is operated by the Northern Arizona Society of Science and Art, Inc. The Museum library contains 3,300 books, 7,500 pamphlets, 125 journals.

The permanent exhibits, exclusively devoted to Northern Arizona, present the results of research in graphic form: earth history, animals and plants, and the history and activities of the human inhabitants, prehistoric and contemporary.

San Jacinto Museum

San Jacinto Monument and Museum are located on San Jacinto battleground, a state park of about 460 acres, 22 miles southeast of Houston, Texas, scene of the battle on April 21, 1836, between the Texas and Mexican armies, which won independence for Texas. The memorial, constructed in 1936-1939 with federal and state funds, commemorates the heroes of the Battle of San Jacinto and all other patriots. The monument and museum are operated by the San Jacinto Museum of History Association, a non-profit, educational organization.

The monument, 570 feet high, is built of reinforced concrete faced with Texas fossilized buff limestone. The museum proper, which forms the base of the building, is 125 feet square. On the outside of the base are eight massive panels on which is engraved a brief account of the history of Texas. Above the panels, at the base of the shaft, which is 47 feet square at its foundation, tapering to 30 feet square at the observation tower, is a frieze by Wm. M. McVey, depicting significant phases in the Anglo-American colonization of Texas. At the apex of the building is a star 35 feet high.

Four bronze doors depict flags, in relief, of the six governments which have exercised sovereignty over Texas. Two large bronze tablets bear the names of the participants in the battle. The m seum displays follow the history of the region a chronological line, from the Indian civilizat to Texas as a state in the Union. The displays clude documents, maps, books, broadsides, gravings, paintings, daguerreotypes, photograp coins, costumes, and other memorabilia. Empha is placed on the cultural development of Texas the region under the two civilizations: Spani Mexican and Anglo-American. The museum hou a reference library of Texas history, includ newspapers and archives.

Texas Memorial Museum

The Texas Memorial Museum in Austin, Tex directed by the Regents of The University of Tex Exhibits cover anthropology, botany, geology, tory, and zoology.

The anthropology exhibits show the tools, ut sils, weapons, ornaments and costumes of seve races of man and many tribes. Interesting col tions of objects of the Chinese, Japanese, Javane African Negro, and American Indian are sho Many cases are devoted to the stone and flint w of the Texas Indians. Others contain numer specimens of Caddoan and Asinal pottery, smok pipes, and shell ornaments. Seven dioramas re sent the domestic life of some of the better kn tribes of Texas Indians.

Exhibits of vertebrate fossils in the Muse include several unusual skeletons of extinct anim from the several geologic periods in Texas. Ti is the skeleton of one of the largest of the b fishes. The collection of extinct Triassic vertebr is particularly good including, among other thin a mounted skeleton of an extinct amphibian, ge Buettneria; and skeletons of two reptiles, Trilop saurus and Typothorax. Cretaceous reptiles represented by the skull of the Mosasaur, a sw ming lizard. The Tertiary and Pleistocene per are well-represented by such animals as the Ma don (four species), the elephant, sloth, glyptod giant wolf and many others. Four cases show ex its of early man, represented by artifacts associa with remains of extinct animals, such as the Colu bian elephant, the American horse, and the lo horned bison. Maps show the land areas of Te during successive geologic periods.

Woolaroc Museum, Oklahoma

Woolaroc Museum, located 14 miles southwes Bartlesville, Okla., is owned and operated by Frank Phillips Foundation, a charitable insti tion. The museum is open free to the public w conducted tours and is devoted to the story of development of America and the Southwest. exhibits are divided into sections, starting w the "Dawn of History" and continuing with "L of Forgotten Cities," "Red Man and Buffalo, " neers of the West," and "Trail Blazers of Histo The exhibits include many examples of In handicraft, baskets, blankets, pottery, rugs, arm heads and jewelry, as well as models of primi Indian villages and scenes depicting the surg civilization to the West. There are paintings famous artists, including Frederic Remington, R. Leigh, J. H. Sharp and E. I. Couse, and m bronzes by well-known sculptors. On the 4 acre ranch, which includes 12 lakes, are 2,000 animals, including buffalo, deer, elk, gnu, tahr and audads.

FAR WEST—PACIFIC COAST

Alaska Historical Library

The Alaska Historical Library & Museum, neau, Alaska, exhibits the material culture Alaska's Eskimos, Indians and Aleuts as wel relics of Russian tenure and the Days of '98. display are Eskimo masks, Attu and Tlingit bas and totem poles, Haida argillite carvings. Asso ted are the Alaska Herbarium, the Librar Alaskana and natural history exhibits .

Colorado Springs Fine Arts

The Colorado Springs Fine Arts Center, a $2,0 000 institution given to the Pike's Peak Regio Alice Bemis Taylor, and completed 1936, h small permanent collection of paintings by con porary artists and features an extensive exhibi program in all fields of the arts. The Te Museum of the Fine Arts Center specialize cultural history of the American southwest Latin America, and is famed for its collection religious Folk Art of New Mexico, Latin Amer and Southwestern materials and the John Fred Huckel collection of 112 Navaho Sand Pain reproductions. In addition to the gallery facil the Art Center houses a complete theatre, m room and library as well as a school (enroll 100).

Denver Art Museum

n Denver Art Museum, Denver, Colo., contains
sections devoted to oriental art, European
ngs, drawings and sculpture from the medi-
o the modern periods; American painting,
ng, sculpture and prints from the colonial
modern period; French, English, Spanish and
can furniture and period rooms and American
n art of the 19th and 20th centuries.
ent accessions include four large Spanish-
can bultos, a French Gothic panelled room, a
of American colonial rooms, 2 Kansu vases,
uthrie-Goodwin Hindu collection of 200 pieces,
th Sea collection of 200 pieces, an African
collection, and paintings by Lucas Cranach,
O'Neill and Hieronymus Bosch.

Denver, Natural History

Denver Museum of Natural History, in City
Denver, Colo., has as its nucleus the pioneer
a Carter collection of Colorado fauna, to
has been added large collections of birds,
ls, fossils and minerals. There is an annual
dance of approximately 1,000,000.

iffith Observatory, Los Angeles

Griffith Observatory, on the slope of Mount
wood, was given to Los Angeles, Calif.,
m, Griffith J. Griffith. It includes a 12-inch
cting telescope, three eight-inch solar re-
rs, the Planetarium Theater and the Hall of
ce. The planetarium show is held in an air-
tioned theater having a seating capacity of
In the center is the planetarium projector,
reproduces upon the dome all the stars
e to the naked eye.
ong the astronomical exhibits in the Hall
cience are the Foucault pendulum, a large
ng model of the moon, a model of the solar
m, telescopes for viewing the sun and its
rum, a series of artificial solar eclipses pro-
on a screen, a collection of meteorites, a
l of our galaxy, models of the planets, an
it of the work of amateur telescope makers,
umerous transparencies.
ysics, chemistry, and geology are represented
uch exhibits as a million-volt Tesla coil,
ized light, electrical discharge through gases,
oscope, Wilson cloud chamber, spectra of
reflection and refraction of light, magnetism,
escence, minerals and rocks, geological form-
s of Griffith Park, oil field and underlying
ture, geological clock and chemical elements.
w exhibits include elaborate working model
clotron; large working scale model of the 200-
telescope and dome. During the year several
dicated "space-travel" projectors have been
i to the planetarium, in order to give a spec-
ar imitation of travel to the moon, the
ts, the vicinity of the sun, clusters, nebulae,
even to galaxies.

Helms Hall, Los Angeles

e first unit of Helms Hall, 8760 Venice Blvd.,
Angeles, Cal., was completed Oct. 15, 1948, on
2th anniversary of Helms Athletic Foundation,
n supervises the hall. This unit comprises
al offices, lobby, library and hall of fame. A
amphitheatre adjoins the building. Con-
tion of the second unit was begun early in

nder and sponsor is Paul H. Helms, Southern
ornia philanthropist, who established the hall
5, 1936, to honor the greatest athletes, coaches
others who have contributed in an important
o amateur, collegiate and professional sports.
ed at Helms Hall are trophies, medals, wards,
ographs, commemorative items and a complete
s library.
ction to Helms Hall is by vote of a board,
e members are Al Santoro, George T. Davis,
Cronin, Paul Zimmerman, Robert Hoenig, Paul
elms and W. R. "Bill" Schroeder. Character
portsmanship receive equal consideration with
tic achievements. Candidates are elected to
Hall of Fame at the discretion of the board.
ls have been designated for excellence in
all, basketball, baseball, track and field, ten-
golf, swimming, boxing, yachting, polo, row-
nd automobile and other racing.

Henry E. Huntington Library

e Henry E. Huntington Library and Art Gallery
an Marino, near Los Angeles, Calif., is an
wed educational institution devoted to advanc-
the cause of higher learning. It includes a
rch library for the preservation and diffusion
owledge, particularly in the fields of English
American literature and history. It also main-
a free public museum, art gallery, botanical garden of 50,000 specimens and desert plant garden of 25,000 representatives of 1200 varieties.

Among the treasures of the library are:

The Ellesmere manuscript of Chaucer's Canterbury Tales, made about 1400.

The Gutenberg Bible (Mainz, about 1450-55), first printed Bible and the earliest extant book produced with movable type in Europe.

The first book printed in the English language, The Recuyell of the Historyes of Troye. Printed at Bruges, by Caxton & Mansion in 1475.

Benjamin Franklin's Autobiography in his own handwriting.

There are two vaults equipped with every known device for the protection and preservation of their contents—the rare books and manuscripts. The former vault contains approximately 165,000 items, the latter about 1,000,000 letters and documents. The great majority of the rare books and manuscripts were collected by Mr. Huntington (1907-1927). The reference collection numbers nearly 150,000 volumes.

The collections center on English and American history and literature, but an exception to this generality is the group of nearly 5,400 incunabula (books printed between 1450-1500), the eighth largest in existence. The group of English imprints before 1641 numbers over 11,000 volumes.

The principal collection in the Art Gallery is a representative group of 18th century British paintings, including characteristic works in portraiture and landscape. Among the canvases exhibited are 11 by Gainsborough, 12 by Reynolds, 11 by Romney, 4 by Raeburn, and 7 by Lawrence. Thomas Gainsborough's "The Blue Boy," Sir Joshua Reynolds' "Mrs. Siddons as the Tragic Muse," and Sir Thomas Lawrence's "Pinkie" are in the Gallery.

Los Angeles County Museum

The Los Angeles County Museum in Exposition Park in Los Angeles, Calif., was founded 1910 and is administered by the County Board of Supervisors through a Board of Governors and the Director.

Permanent art galleries include American and European art in historical sequence: William Randolph Hearst Hall of Ancient Art, containing Egyptian, Greek, Roman, Persian, Chinese and Indian collections; Gothic Room, 14th-15th century, French, Italian, Flemish, German, and Spanish; Renaissance gallery, 16th century; Southern and Northern Baroque, 17th century; collection of 16th century Limoges; collection of 16th-17th century Swiss and Flemish stained glass; English, 18th century (Marion Davies collection); French, 18th century; American painting and watercolors, early 20th century (William Preston Harrison collection); French Impressionist and Modern, 19th-20th century (Harrison, Mabury and De Sylva collections); English and American decorative arts, 17th-19th century; American galleries, 19th-20th century.

Permanent history galleries include Early Man; American Indian cultures including Plains Indians, Mexican, Central and South American, California and Northwest tribes, Eskimo and Southwestern peoples; Pacific Island Cultures; California History devoted to early periods; History of Transportation; and World War II, Axis weapons.

The science galleries include the famous collection of Rancho La Brea Pleistocene Fossils and fossils from Conkling Cavern, also minerals. Natural history galleries are African and American mammals (habitat groups); Birds; Fishes and corals (submarine groups); Insects; Modern Osteology and "Evolution of the Horse"; Reptiles and shells.

Southwest Museum

The Southwest Museum in Highland Park, Los Angeles, Calif., was incorporated 1907 as "a free public institution of history, science, and art." Its collections number hundreds of thousands of objects illustrating the cultures of the American Indians, while its scientific reference library aggregates about 50,000 items. Field work has been conducted in California, Nevada, Mexico, Ecuador, and the Southwest, and has made notable contributions especially to our knowledge of early man in America.

Natural History, Oregon

The Museum of Natural History is connected with the University of Oregon in Eugene, Oreg. It has collections relating to geology, botany, zoology and anthropology.

Included in the Condon Museum of Geology is material from the John Day fossil beds in central Oregon; collections of minerals arranged according to the Dana classifications; an educational set of rocks and minerals, given by the U. S. Geological Survey; suites of fossils, both vertebrate and invertebrate, from various regions in the western part of the American continent; a complete skele-

ton of the saber-tooth tiger from the Rancho La Brea near Los Angeles, Calif.

The anthropological collections which make up the Oregon State Museum of Anthropology contain specimens of basketry and other crafts from the Pacific Northwest; valuable scientific materials from the early cave culture of the Northern Great Basin; materials from the Southwestern United States; the Van de Velde collection of Congolese iron work and other specimens.

Pasadena Art Institute

The Pasadena Art Institute, Pasadena, Calif. has small permanent collections in the fields of Chinese pottery, mainly sculpture, contemporary American paintings and prints. The exhibition program is changed frequently and exhibitions in all fields of the fine arts are shown.

Fine Arts, San Diego

The Fine Arts Gallery, San Diego, Calif., places emphasis first on contemporary American art and secondly on old masters. Old Asiatic arts also are abundantly represented. Among the modern canvasses owned by the gallery are paintings by Henri Matisse, Vlaminck's Derain; Andre Masson; Toulouse-Lautrec, and Renoir, American examples of importance include work by such artists as Frank Duveneck, Winslow Homer, A. P. Ryder, J. H. Twachtman, Doris Rosenthal, Guy Pene du Bois, Umberto Romano, Maurice Sterne, Karl Zerbe, R. Breinin, Maurice Prendergast, Arthur B. Davies, H. G. Dearth, and Henry Varnum Poor.

Among artists represented in the modern group are: Charles Burchfield, Lyonel Feininger, Robert Gwathmey, John La Farge, Wyant, Robert Henri, J. Sloan, Millard Sheets, Emil Carlsen, Mary Cassatt, Thomas Eakins, George Inness, George Luks, Charles Reiffel, E. Hansen, Gladys Rockmore Davis, Jean de Botton, Julio de Diego and Joseph de Martini.

An important acquisition of 75 prints from the Bertie Heilbron estate, includes prints by Van Dyck, Rembrandt, Tiepolo, Callot, Meryon, Whistler, McBey, Zorn, Brockhurst and Cameron.

The old Spanish painting with the contemporary work of Spain, is second in this country only to that of the Hispanic Society of America in New York City. Included is the portrait of the Marques de Sofraga by Goya, the equal of the best Goya portraiture. The four Zurbarans in the permanent collection comprise an important feature in the San Diego Gallery. Other gems in the old Spanish section are by Velazquez, El Greco, Bermejo, and Fray Sanchez Cotan. The Modern Spanish painters include de Caviedes, Pedro Pruna, Salvador Dali, Joan Miro, and the brothers de Zubiaurre.

Outstanding sculpture examples are by Jacob Epstein, I. Mestrovic, Maillol, Maria Martins, Derjinsky, J. Flannagan, Donal Hord (9 examples), and William Zorach.

San Diego Natural History

Founded and operated by the San Diego Society of Natural History, which is the oldest scientific organization in southern California (incorporated 1874), the San Diego Natural History Museum occupies a modern fireproof building in centrally located Balboa Park, San Diego, Calif.

Public exhibits, study collections and library occupy three floors 220 feet long and include up-to-date habitat groups, identification series and a few manually operated displays. The Museum is devoted to the fields of zoology, botany, and geology. Prominence is given to the natural history of the southwestern United States and northwestern Mexico, with particular emphasis on San Diego County. Many of the cases are arranged to aid in the identification of local wildlife, fishes, native plants and minerals.

In addition to the public exhibits, there are some 800,000 scientifically prepared study specimens, many of them collected on the Museum's field expeditions, which are used for the advancement of knowledge by their curators, by research workers, and by various Governmental bureaus.

DeYoung, San Francisco

The M. H. de Young Memorial Museum in Golden Gate Park, San Francisco, Calif., contains works of art from almost every period and country in its more than 60 galleries. The galleries are divided into four main wings: one devoted to loan exhibitions changing from month to month; one presenting the art traditions of Europe and America from the antique world through the 19th century; one showing art of the Orient and the Pacific Basin; and one of Californiana, which provides a graphic biography of San Francisco and its region. Collections of armor, musical instruments, ship models and American Colonial arts exist as additional interests.

The East Wing of loan exhibitions presents ever-changing variety of shows, each lasting ab a month—contemporary painting, sculpture, arc tecture, photography, decorative arts. Noteworc examples of past exhibitions in this wing have be "The Painting of France Since the French Revo tion"—chosen with the assistance of the Fre government from the public and private collecti in Europe; "The Chair"—a complete history actual examples of this most common item furniture; "Meet the Artist"—an exhibition self-portraits by the leading painters and carto ists of America, "Loan Exhibition of Masterw by El Greco."

The Central Wing, with 21 galleries surround a central court, is devoted to the arts of Europe America. It contains: examples of Egyptian, Gr and Roman sculpture, ceramics, textiles and je ry; medieval and renaissance stained glass windc European sculpture from the 13th to the 19th c turies, including some exceptionally fine Gothic amples and an outstanding recent accession— "Reclining Boy" carved in marble by Andrea Verrocchio; tapestries, Flemish and French, f the 15th to the 18th centuries; furniture and nishings characteristic of the highest qualities each period, and master paintings of the great p ods of European culture with American painting the 19th century. The masterworks in paintings clude such great examples as "St. John The Bi ist" by El Greco, "The Tribute Money" by Rubi and "Virgin and Christ Child with the Infant John and Angels" by Lucas Cranach, the Elder.

In the Northeast Wing the arts of the Orient of the Pacific Basin are displayed in seven galle one large gallery of Chinese sculpture, ceram bronze vessels and textiles; two galleries of Ja nese art, including a reconstruction of a Japa interior, and one gallery each for the arts crafts of Indo-China and the Dutch East Indies islands of the South Pacific, Precolumbian Cer and South America, and North American Indi Especially rare is the large collection of gold n laces, bracelets and other ornaments of the Inca Peru.

San Francisco's colorful history is the them the West Wing. It is illustrated by paintings, pa and maps of the City and region from its ear development, by four reconstructions of Califo living rooms of 1850, '65, '70, and '85, and comprehensive costume collection which show items of apparel from the fashions of 1760 to th of yesterday. Portraits of early San Francisc illustrating the fashions as actually worn, com the document of changing taste. There is als gallery of paintings gathered in Europe, the se tion and hanging of which typifies the taste of wealthy American collector of the '90s. This contains such famous items of their day as I guereau's "The Broken Pitcher" and Makow "The Russian Bride's Attire."

Of the special collections those of arms and models are the most popular. The Armor R contains weapons of war of all countries from 15th Century to the present. The collection of models, paintings of famous vessels and the ap tenances of navigation are shown for their sig cance in relation to the great port of San Franc

Legion of Honor, San Francis

The California Palace of the Legion of Ho San Francisco, Calif., was given to the city of Francisco in 1924 by the late Adolph B. Spr els and his wife Alma de Bretteville Spreckels museum of painting and sculpture dedicated the memory of California soldiers who fell World War I.

Situated in Lincoln Park, the museum overl the Golden Gate and the Pacific Ocean. Archi turally, the building is Louis XVI in period, b upon the palace of the Legion of Honor in P A triumphal arch, surrounded by colonnades, stitutes the entrance and extends into the C of Honor. In the center of the court is Ro The Thinker.

collections of paintings by contemporary tern artists, also contemporary European and tern American, and Latin American, especially ican.

portant exhibitions organized by the Museum: ution of Landscape Painting from 15th Cen- Through 19th; Paintings, Drawings, Prints aul Cezanne (1936); Paintings and Prints by Gauguin (1937); Abstract and Surrealist Art he United States (1944); Dominant Interna- al Art Trends (1945); Spanish Masters of 20th ury Painting (1948); Domestic Architecture of San Francisco Bay Region (1949). Lectures, film rams of all kinds, art appreciation and flower gement courses, studio workshop, and special rative art and photography galleries within the eum, and extension exhibitions of reproductions explanatory material. The Museum offers to Francisco in addition exhibitions from the Mu- n of Modern Art in New York and other exhi- ns of special interest in the contemporary art

alifornia Academy of Sciences

he California Academy of Sciences, San Fran- , Calif., incorporated (1853) for the ad- ement of the natural sciences through public ation, exploration and research, is the oldest tific institution on the Pacific coast. It main- s in Golden Gate Park a public museum of ral history, the Steinhart Aquarium, a scien- library, and research departments with large tific collections. In its large halls of North rican mammals and birds are preserved in anent form some of the most beautiful and ing aspects of the natural history of the west. he Academy's research collections include some mammals, 62,000 birds, 69,000 reptiles and hibians, 500,000 fishes, 350,000 plant specimens ,000 insects, and 1,600,000 specimens in the of paleontology. Its collections are especially in material from California, Alaska, and the apagos Islands.

Navajo Art, Santa Fe

he Museum of Navajo Ceremonial Art in Santa N. M., occupies a site of 10 acres in the foot- s of the Sangre de Cristo mountains. esigned as an interpretation in modern form of avajo ceremonial hogan, the building itself is ntegral background for the exhibition of sand paintings, as well as a repository for the myths, music, poetry, sacred lore and objects connected with Navajo religion.

In the Research Department, the Wheelwright Collections include over 300 sand paintings transcribed from the originals by various recorders on different parts of the Navajo Reservation; music records of approximately 2000 Navajo chants; ceremonial objects, baskets, blankets and silver; and an extensive library of books and manuscripts on Navajo art and religion. Comparative material from Asia and other countries is also represented.

Museum of New Mexico

The Museum of New Mexico, in Santa Fe, N. M., has its headquarters in the historic Palace of the Governors, oldest public building in the United States, built 1610, on the Plaza of Sante Fe.

The exhibits of the Museum are almost entirely confined to the Southwest. The Palace proper contains the archaeological exhibits and a section on the post-Spanish periods is under the direction of the Historical Society of New Mexico.

A second building, an Art Museum, contains permanent and temporary exhibits of the work of Southwestern artists. The Hall of Ethnology illustrates the living Indian of the Southwest and his cultural attainments. The Laboratory of Anthropology is used mainly for research projects and houses important anthropological collections.

Seattle Art Museum

The Seattle Art Museum in Seattle, Wash., was given to the city in 1933 by Mrs. Eugene Fuller and her son, Dr. Richard E. Fuller, "for the recreation, education and inspiration of its citizens."

The Museum originally specialized with its permanent collections in the arts of China, Japan, and India, but now has enlarged to include representative monuments from all cultures of the world, especially in the Egyptian, Near Eastern, Pre-Columbian fields and in the crafts of Medieval and Renaissance Europe. It has always assisted the artists of the Northwest with exhibition and accession and has specialized in contemporary art from this region. There are over 100 gallery changes a year showing traveling and loan exhibits together with exhibitions from the Museum's own permanent collections.

Massachusetts Historical Society

he Massachuetts Historical Society, oldest his- cal organization in the United States, was ded, 1790, by Jeremy Belknap, a Congrega- al clergyman and historian of New Hampshire, held its first meeting in Boston, 1791. Mem- ship is limited to 125 resident members, 50 responding members not living in Massachu- s, and 10 honory members, who are custo- rily not inhabitants of the United States. There no dues and assessments. The endowment ds of the society total $1,000,000.

he museum, or cabinet, of the society contains cs associated with American history and valu- portraits by Smibert, Harding, Copley, Stuart, other American painters. Among the pictures he sole surviving copy of the earliest view of vard College made by William Burgis in 1726. o private collections of coins, given to the so- y by William Sumner Appleton and by Henry ms are of rare excellence.

he society's Library of over 300,000 printed mes and pamphlets contains rare Americana. The chief treasure of the society is its huge collection of manuscripts, including all the Winthrop papers, covering three centuries of the history of New England, and all the private papers of Thomas Jefferson. The collections of autographs is among the finest in existence. Manuscripts not restricted as to use and all the printed books are available to the public five days a week from 9 a.m. to 5 p.m. The society is closed on the days of meetings, the second Thursday of every month from October to May, inclusive.

The publications of the society have been issued regularly since 1792, and are indispensable to students of American history. These consists chiefly of 79 volumes of Collections (1792-1941) and 67 volumes of Proceedings (1859-1944), as well as The Lives of Harvard Graduates: 1642-1725, and special publications such as The Education of Henry Adams (1918) and The Winthrop Family in America (1948). For detailed information as to the history and publications of the society, see Handbook of Publications and Photostats, 1937, and Handbook of the Massachusetts Historical Society, 1949.

Ups and Downs of Daylight Saving

n 1907 an Englishman, William Willett, star- d his countrymen by advocating turning back clock in summer to overcome that "waste of light." In 1916 the Germans, who needed more light for fighting, introduced daylight saving e. The United States followed suit—except farmers, who declared it interfered with milk- time. This happened about 140 years after an erican named Benjamin Franklin first pro- ed the plan.

In 1949, Grand Central Terminal Station in New York City, used by more passengers than any other railroad station in the country, adopted two sets of summer time. The New York Central adhered to eastern standard time. The New Haven changed to daylight saving time. While trains departed on their regular schedules, they were apparently an hour apart. To accommodate travelers, all clocks were furnished with an extra hour-hand.

" Edward R. Stettinius, Jr., Secretary of State, 1944, in "Roosevelt and the Russians: the lta Conference": "At the Potsdam conference, I understand, Marshal Stalin actually wanted the ited States to recognize the various governments in eastern Europe before the elections provided the Yalta agreement had been held. Stalin said: 'A freely elected government in any of these ntries would be anti-Soviet, and that we cannot allow'."

COLLECTIONS IN UNIVERSITY LIBRARIES

The immense growth of the libraries of American universities in recent years is reflected in the ...s of librarians published herewith. Not only will the reader note large increases in cultural ...tions, but new emphasis on regional usefulness. Political and social studies from the ends of the ... are made available to students. Technical knowledge from everywhere helps the interest of ...l sections, such as petroleum in Oklahoma and forestry in Washington. A new appreciation of ... and beginnings has resulted in the acquisition of many letters, diaries and original documents by ...ical libraries.

...ever, not every university can obtain all the essential research material, house the millions of ... now needed, or adequately pay the huge staff that must administer them. This has led to the ...stepp—the cooperative library. Already union catalogues are provided in different urban and ...ban centers, such as that of the libraries of Westchester County, N. Y., in White Plains. ...rative storage of "little used books" inspired the New England Deposit Library, organized ... which houses about 1,000,000 vols. in that part of Boston known as Allston. Members are ...rd University, Radcliffe, Simmons and Tufts Colleges, Hebrew Teachers' College, Boston Uni...y, Boston College, Mass. Institute of Technology, Boston Athenaeum, Boston Public Library, ...n Medical Library, Mass. Historical Society, and Mass. State Library. The president is Dennis A. ...y, State Librarian, Mass. State Library; vice president in charge of operations is Keyes D. Metcalf, ...or, Harvard University Library.

...s service has been further extended. On March 4, 1949, came about the official organization ...e **Midwest Inter-Library Corporation,** with the object of establishing in Chicago a library ... for the cooperative custody, housing and servicing of little-used research materials, to be ... available to participating universities of the Middle West. Plans were developed by a committee ...iversity presidents and librarians, under the direction of E. C. Colwell, president, University of ... go, and E. W. Diarmid, librarian of the University of Minnesota and president (1948-49) of the ...ican Library Assn. An original grant of $500,000 from the Carnegie Corp. of New York was ...emented by its offering $250,000 more if a similar sum were obtained from another donor; ...ondition was met when the Rockefeller Foundation gave $250,000.

...initial unit of six stories, warehouse type, to contain 1,000,000 to 1,250,000 vols. will be erected. ...original directors are E. C. Colwell (University of Chicago); William H. Combs (Michigan State ...e); Ralph E. Ellsworth (State Univ. of Iowa); Coleman R. Griffith (Univ. of Illinois); Henry ...eald (Illinois Inst. of Technology); R. W. Kettler (Purdue); W. T. Middlebrook (Univ. of ...esota); J. H. Nelson (Univ. of Kansas); Jens Nyholm (Northwestern Univ.) and Ora L. Wildermuth ...ana Univ.). E. C. Colwell was made chairman and Coleman R. Griffith, vice chairman, and ...en Frodin, secretary.

Baylor University

...lor University, Waco, Texas, shelters in its ...y the most comprehensive collection of works ...d about Robert Browning in the United ...s, if not in the world. First editions, manu...s and drawings, including Browning's love ...s and his personal books, are preserved in ...Browning room, which is decorated with ...d glass windows illustrating his poems.

Brown University

...wn University Library, Providence, R. I., ...ins 715,000 vols., 19,000 maps, 18,000 manu...s, 20,600 broadsides and leaflets, 3,200 films, ...0 pieces of sheet music, 9,000 phonograph ...ds. The yearly accessions average 18,000 vols. ...,000 other items. The University was founded ...and a gift to the college library by President ...s Manning is dated 1767. The John Hay ...ry houses the general collection.

...rkeley. Founded in 1869, this library is the ...st, containing over 1,500,000 vols. The Ban... Library, 85,000 vols., specializes in the history ...lifornia and western America, Mexico, Central ...rica and colonial South America. Regional re...h is served by the University archives, Cali...a documents and collections of California lit-erature and printing. Here also are the Bender collection of fine printing and binding, 1,000; the John Henry Nash collection of typography, with a complete file of his own work 2,500. Noteworthy sections have the Russian materials; the East Asiatic Library with extensive Chinese and Japanese holdings; the Kofoid Library on the history of science, which includes 70,000 pamphlets on protozoology and parasitology. Largest departmental and special libraries include the Giannini Foundation of Agricultural Economics Research, 6,000 vols., Bureau of International Relations, 11,000; Bureau of Public Administration and Library of Economic Research, 175,400, and Law Library, 87,800.

Los Angeles. About 625,000 vols. Particularly strong collections in folklore, German and Scandinavian philology, California history, and British Commonwealth history. Branch libraries in Agriculture, Biology, Biomedicine, Chemistry, Engineering, Geology, Industrial Relations, Law, Meteorology, Physics, and Theater Arts are operated as a part of the University Library. There is a music library of more than 8,000 scores. Supplementing the University Library is the William Andrews Clark Library of about 45,000 books, pamphlets, and manuscripts, specializing in English culture of the seventeenth, eighteenth, and nineteenth centuries, and the history of Montana.

San Francisco. Medical Center Library, 81,900. Medicine, pharmacy, dentistry, nursing. Special collections: Esther Rosencrantz collection of Osleriana; history of anesthesia. Hastings College of the Law Library, 27,000.

Davis. College of Agriculture Library, 59,300.

Santa Barbara. Santa Barbara College Library, 42,500. Wyles collection on Civil War and Lincoln, 9,471. One branch.

La Jolla. Scripps Institution of Oceanography Library, 22,100. Marine biology, physical, chemical and geological oceanography.

Mount Hamilton. Lick Observatory Library, 19,200. Astronomy, physics, chemistry, mathematics.

Riverside. Citrus Experiment Station Library, 13,200.

Catholic University of America

The John K. Mullen Memorial Library of the Catholic University of America, Washington, D. C., contains 380,000 vols., with important collections of Patristics, Christian Orientalia, Medieval Literature and History, Brazilian and Portuguese Literature and History, Bibliography, Canon Law and Catholic Church History and Literature. Recent major accessions have been microfilmed news-

papers, including an 80-year file of the San Francisco Monitor, a 40-year file of the New York Freeman's Journal and a 35-year file of the Baltimore Catholic Mirror.

University of Chicago

The Libraries of the University of Chicago, established 1892 in Chicago, contain more than 1,750,000 books. Central in the system is the William Rainey Harper Memorial library, which has the purchasing and cataloging divisions, as well as the Rare Book room.

The collection includes: Nicholas Bacon Collection of English manor rolls, 3,000 pieces; Stephen A. Douglas papers, 16,000 papers. Reuben T. Durrett Collection of Kentucky history, biography and newspapers, 15,000 volumes; George Morris Eckles Collection of Cromwelliana, William H. English items on the Western Territory, Indiana and Mid-western history, 7,500 items; Elijah Grant Communistic Colony Letters, 1,200; Samuel Harper Collection on Russia, Bonaventure Lafayette Collection of Manuscripts, 250 pieces. Barton, Oldroyd, and Hannah Collections of Lincolniana, 4,000 volumes and manuscripts. Wyndham Robertson Collection of Civil War papers, 10,000 pieces; the Harriet Monroe Library of Modern Poetry, Delos Franklin Wilcox Collection on public utilities, 10,000; letters and papers of Hermann von Holst, a large collection of public documents, city, state, national, and foreign; some 6,000 volumes of early children's books including the Encyclopedia Britannica collection of books for children, vertical files of material on labor and business.

In the extensive departmental libraries the Bio-medical section now contains 121,000 vols., while the Law library holds 123,000 vols. and 2,052 pamphlets, including American, Canadian, English, Irish, Scotch reports, as well as reports from the British Commonwealth and India, and sets of statutes and codes. The Swift Hall library of theology and philosophy contains 102,000 vols., including ancient Bible manuscripts, Greek texts and early editions of Bibles. The Far East library has 140,000 vols.; the Education library 95,000 vols.

City College of New York

At the close of the 1948 school year the Library of the City College of New York contained 343,565 vols., of which 298,819 were at the main center, Convent Ave. and 139th St., New York, and 44,746 at the School of Business, 23d St. and Lexington Ave. The general library is at the main center, which also houses the Davidson Library of Judaica, 7,000 vols., and the collection of the School of Technology, 13,306 vols. The Library is strong in the field of education, divided between the two locations, while a new Business Reference library, with the beginnings of a collection in public relations, has been established at 23d St.

University of Colorado

The Library of the University of Colorado, Boulder, Colo., contains 702,740 vols. The strong collections are in the fields of church history, central European history, English literature and the physical sciences.

Columbia University

Columbia University Libraries, New York, N. Y., house over 2,000,000 vols. Prominent among them are the Business School library, 87,000 vols.; the Engineering Library, 95,000 vols.; the Library of the Graduate School of Journalism, 80,000 vols., and a complete newspaper morgue; the Law Library, 285,000 vols.; the Medical Library, 150,000 vols. The East Asiatic collections include 138,000 fascicules in Chinese and 30,000 in Japanese. The Avery Architectural Library includes architectural drawings and photographs; the typography collection includes the former American Type Founders library.

Stephen Whitney Phoenix bequeathed (1881) his library of 7,000 volumes, containing a Shakespeare folio, 1623, and other notable volumes. Other special collections are Plimpton (early textbooks), Dale (weights and measures) and Smith (early mathematics) libraries; Seligman Collection (early editions in economics); Epstein Collection (history of photography—3,000); Montgomery Library of Accountancy; Webster Collection on Plastic Surgery, 12,000; Huntington Collection on Anatomy; Curtis Collection on Physiology; Joan of Arc Collection, 2,100 titles; Kilroe Collection of Tammaniana; De Witt Clinton Papers; Lodge Collection of early editions of the classics. The Columbiana collection in the Low Memorial Library includes the university archives, dating back to 1754, about 15,000 books and pamphlets relating to Columbia and its alumni; also one of the world's best collections of Spinoza items.

Important additions recently received by the Columbia University Libraries include the professional library of Edith Elmer Wood, 7,264 items in the field of public housing; the files of the Citizens Union of New York, 1897-1938; the Bernstein Russian Underground collection of 2,500 books, titles of periodicals, prepared by radicals outside Russia, 1855-1922; 162 titles of newspapers in Russia, 1910-1925; Lenin letters and first editions; the Alexinsky collection of 1,400 unpublished papers on the Duma and Bolshevist party, 1907-1917, and Lenin, Trotzky and Gorky letters; the Peristein Collection of Polish materials, 4,000 items; a Japanese collection of 10,534 books and periodicals, 1946-48; the Nicholas Murray Butler papers; the Seth Low papers; the Oswald Garrison Villars collection of John Brown papers; and in the field of architecture, 28 original drawings by Wilfrid Edwards Anthony; two issues of Vitruvius of 1496, 1497, and John Shute's book on architecture, 1563, the first printed architectural book in English, of which no other copy exists in America. Also manuscript letters of John Jay and 63 items by or about Walt Whitman.

Cornell University

Cornell University, in Ithaca, N. Y., with units in New York City, Buffalo and Geneva was founded in 1865. It is served by libraries having more than 1,400,000 volumes, plus extensive pamphlet, manuscript and document holdings. About 50,000 books are being added each year.

On the Ithaca campus are: The University (934,000 vols.), Agriculture Library (156,000), Architecture Library (13,000), Business Library (2,000), Engineering Library (25,000), Home Economics Library (18,000), Industrial and Labor Relations Library (15,000), Law Library (110,000), Veterinary Medicine Library (20,000) and 30 departmental libraries and laboratory collections. In addition there are: the Cornell Medical Library (38,000) in New York City, Cornell Aeronautical Laboratory Library (4,000) in Buffalo, and Experiment Station Library (23,000) in Geneva. More than 10,000 periodicals and newspapers are received currently.

The libraries include material on nearly every field of knowledge. Some especially notable fields of strength are: Agriculture and related sciences, American Civil War, American history in general, architecture, Assyriology, botany, chemistry, Christ, Cornelliana, Dante, dramatic literature, Egyptology, engineering, English and French Revolutions, entomology, Freemasonry, history of science, history of superstition, Icelandic culture and literature, languages and literatures in general, mathematics, ornithology, Petrarch, philosophy, physics, the Reformation, Rhaeto-Romanic language and literature, slavery, Spinoza, Wordsworth and zoology.

The Dante collection (10,000 vols.) contains many items not found elsewhere on this continent. Outstanding are the Foligno edition of the Divine Comedy, 1472, and nine other 15th century editions of this work. The Petrarch collection (5,000 vols.) has 475 editions of the Rime, 15th century manuscripts of the Sonnets, many incunabula and translations into Bohemian, Dutch, Latin and Spanish. The Icelandic collection (23,000 vols.) covers Icelandic literature from the earliest literature to the present. The Wordsworth collection (2,000 vols.) includes all first editions of Wordsworth, manuscripts, over 100 original letters of Wordsworth and his correspondence with his American editor, Henry Reed, and with George Hunt Gordon. The President White Historical library (30,000 vols., 10,000 pamphlets) has as its nucleus the personal library of Andrew D. White, first president of the university.

University of Denver

The University of Denver Libraries, Denver, Colo., contain 225,000 vols., in six separate units. The Penrose Read Library, on the University campus five miles south of downtown Denver, has 150,000 vols., with special collections on international relations, social sciences and motion picture arts and sciences; the first two groups have had special support from the Social Science Foundation. A Renaissance room is a distinctive feature. The libraries of the schools of Business Administration, Art, Architecture, Librarianship and Music are located on the Civic Center Campus in downtown Denver.

University of Detroit

The Library of the University of Detroit, Detroit, Mich., contains 150,000 vols., with important collections in the field of early church and medieval history. Waddingus' Annales Minorum, Baroni's Annales Ecclesiastici, Muratori's Rerum Italicum Scriptores, Monumenta Germaniae Historica and Migne's Patrologica are among its important books.

Duke University

The five main libraries at Duke University, Durham, N. C., contained 927,701 vols., as of April 1, 1949. The General Library had 599,760; Law, 20,093; Divinity, 43,986; Woman's College, 75,986; Hospital, 46,576; with smaller numbers of books in the engineering, physics, mathematics, biology, forestry and chemistry departments. There are more than 1,000,000 items in the George Washington Flowers Memorial Collection of manuscripts and printed materials on Southern history, supplemented by the Peacock and Chaffin collections. The University is the repository for the papers of Paul Hamilton Hayne, Thomas Nelson Page, John Esten Cooke, Thomas Holley Chivers, William Gilmore Simms and other Southern authors; it has the excellent collection of Walt Whitman material; the Benson collection of French literature; collections of Shakespeare, and English and American literature, and the Mazzini Collection of about 90,000 pieces of Italian literature. There is also a large collection of books relating to South American countries; the Louis Strisower collection on international law, and the archives of the Socialist party of America.

Harvard University

The Harvard University Library, Cambridge, Mass., founded (1638) when John Harvard bequeathed 400 books to the institution that was to take his name, is the oldest library in the United States and, with more than 5,250,000 volumes and pamphlets, is now the largest university library in the world. About 2,000,000 volumes, forming the main collection, are housed in the Harry Elkins Widener Memorial Building (completed in 1915), and more than 130,000 rare books and manuscripts have the benefit of clean air with regulated humidity and temperature in the new Houghton Library, completed 1942. The Lamont Undergraduate library (300,000 vols.), made possible by a gift of $1,500,000 from Thomas W. Lamont, was dedicated and opened in January, 1949.

The largest of more than 75 special and departmental collections that make up the rest of the University Library are those of the graduate schools of Law 700,000 vols., Medicine 300,000 vols., Business Administration Baker Library; 270,000 vols., Divinity Andover-Harvard library; 200,000 vols., Public Administration Littauer Library 140,000 vols., and Education 66,000 vols., and of the Museum of Comparative Zoology 210,000 vols., the Chinese-Japanese Library of the Harvard-Yenching Institute 220,000 vols., Biological Laboratories 70,000 vols., Arnold Arbortum 60,000 vols., Departments of Landscape Architecture and Regional Planning 62,000 vols., Peabody Museum of Archaeology and Ethnology 53,000 vols., Industrial Relations Seminar 45,000, Gray Herbarium 45,000 vols., Astronomical observatory 38,000 vols., Farlow Library of Cryptogamic Botany 39,000 vols., and Chemical Laboratory 36,000 vols.

The library contains 2,600 vols. printed before 1501; a valuable collection of manuscripts and editions of John Keats; a large Renaissance collection and many editions of Montaigne, Dante and Petrarch; a Theatre collection, especially rich in the period between those covered by the Folger Library of Washington and the New York Public Library; a Poetry collection that includes recordings by poets and a large section devoted to American literature, as well as manuscripts by contemporaries such as Masefield, Joyce, Eliot, Robinson, Wolfe and Steinbeck. The library contains the Theodore Roosevelt library formerly situated in the Roosevelt birthplace, New York.

Annual accessions to the library average over 100,000 vols., and the invested principal of many endowment funds exceeds $18,000,000.

University of Houston

The Library of the University of Houston, Houston, Tex., one of the youngest of American universities (1934) contains 40,000 vols., and reports for 1949 the acquisition of sets of the Zentralblatt fuer Mathematik und ihre Grenzgebiete, and Berichte der Deutschen Chemischen Gesellschaft.

University of Illinois

The libraries of the University of Illinois, of which the general library is in Urbana, Ill., and the library of the Colleges of Medicine, Dentistry and Pharmacy is in Chicago, contained more than 2,225,000 vols. in 1949. Branches are also maintained at the undergraduate divisions in Galesburg, Ill., and the Navy pier, Chicago. Among the valuable collections of books are the Engineering Library, 57,000 vols., the Ricker Library of Architecture, 22,000 vols., the Law Library, 85,000 vols., the Cavagna Library of Italian history, over 40,000 vols. There are 32,000 vols. in the agricultural department, 35,000 vols. in classical literature and 33,000 vols. dealing with literary and political life of the 16th and 17th centuries. A large library of musical scores and books includes the John Philip Sousa collection of band music. There are 30,000 bound volumes in the newspaper division.

Indiana University

Indiana University Library, Bloomington, Ind., acquired in 1942 the Abraham Lincoln collection of Jos. B. Oakleaf, Moline, Ill., 4,200 items; the Paul R. Coster collection and the Frederick H. Meserve collection of 8,000 photographs of Lincoln and contemporaries. In 1943 it bought the Forest H. Sweet collection of the War of 1812, including Robert Fulton's manuscripts about torpedo experiments, the papers of Commodore Oliver Hazard Perry and of Gen. Wm. Hull. In 1944 it bought the 5,000 letters and papers of Jonathan Williams, one-time secretary to Benjamin Franklin, supt. of West Point and associated with fortification of New York harbor and the Atlantic coast in the War of 1812. The American Revolution collection numbers 1,351 vols. In 1942 the library bought the Daniel Defoe collection of the fifth Earl Temple, 600 books and tracts. The papers of Hugh McCulloch, secretary of the treasury under Lincoln, Johnson and Arthur, 5,000 items, were acquired in 1944.

State University of Iowa

At the State University of Iowa, Iowa City, Ia., the main library contains the Leigh Hunt collection of 3,500 items—manuscripts, books, association copies, periodicals, acquired in 1934 by purchase from the estate of Luther A. Brewer, Cedar Rapids, Ia. Among the 1,700 manuscripts are letters from Shelley, Keats, Browning and Dickens. The whole is the most important Leigh Hunt memorabilia in existence. The library also contains the John Springer collection of 1850 books on printing and allied subjects, and the Mark Ranney Memorial collection of 3,650 vols. honoring a former member of the faculty of the University College of Medicine. Of value is the budding collection of books and manuscripts by Iowa authors. The nucleus of the book collection was made of gifts from Herbert Hoover and John R. Mott, co-winner of the 1946 Nobel peace prize. The manuscript collection, begun in 1945, contains writings by MacKinlay Kantor, Wallace Stegner, James Norman Hall, Carl van Vechten, Marquis Childs, Hartzell Spence and Frank Luther Mott.

Johns Hopkins University

The Johns Hopkins University Library, Baltimore, Md., (Founded 1876) contains some 780,000 volumes carefully selected for their scholarly or research value. Of this total about 154,000 volumes are included in the William H. Welch Medical Library and the Library of the Institute of Medi-

cine, which specialize in the book needs of the medical profession. Among special collections of importance to the scholar are the Tudor and Stuart Club Collection of 17th Century English literature, the Hutzler Collection of Economic Classics, the Barnett Collection of Trade Union Publications, the Birney Slavery Collection, the Mackall Bibliographical Collection, the Strouse Rabbinical Library, the Loewenberg Collection of Modern German Drama, the Coüet Collection of French Drama, the McCoy Art Collection, the Hoffman Collection of Bibles, the Fowler Collection of Architectural Classics, the Ottensen Icelandic Collection, the Hauer Chinese Collection, the Havens Southey Collection, the Vincent Collection of Swiss history, and the manuscripts of Sidney Lanier, Francis Lieber and D. C. Gilman.

University of Kansas

The Library of the University of Kansas consists of 400,000 catalogued volumes and much material yet unbound. It is housed in the Watson library built in 1924 and in seven departmental libraries, including Engineering, 14,000 vols., Law, 30,000 vols., and Mineral Industries, 14,000 vols. The Main library collection is strong in biology, chemistry, mathematics, history of Europe 1758-1850, economic theory and books relating to Kansas. These are located in Lawrence, Kan.

The Medical School library of over 20,000 vols., and the Klendening collection on the history of medicine, 5,000 vols., are located in Kansas City, Kan.

Louisiana State University

There are 343,151 vols. in the libraries of the Louisiana State University, Baton Rouge, La. In addition there are 120,191 vols. in the Law, Medical School and junior college libraries. The Louisiana room of Hill Memorial Library contains material related to Louisiana and lower Mississippi valley history. Equally important to students of history is the collection of manuscripts and publications in the Department of Archives (Law building), which includes original material turned over by state and parish governments, numbering 1,213,713 items. Personal and business papers, diaries, account books of planters, merchants, bankers and professional men and Civil War and Reconstruction data enhance its value. The library also has acquired the David S. Blondheim collection of 4,000 books and pamphlets, rich in books about dialects in France, and has a valuable Romance language collection of 11,628 vols.

Mass. Institute of Technology

The libraries of the Massachusetts Institute of Technology contain more than 400,000 books and have a potential capacity of 1,000,000. Central in the system is the new Charles Hayden Memorial Library, constructed 1948-49 in memory of the late Charles Hayden, class of 1890, and made possible by a grant of $2,200,000 from the Hayden Foundation. The libraries in this system include the Eastman library of physics, chemistry and mathematics; Lindgren library of geology and metallurgy; Dewey library of economics, social science, business and engineering administration; the Engineering-Naval Architecture library; the Rotch library of architecture and city planning; the Walker library of English and history, and a music and recreational library. The Vail library of electrical engineering and the biology collections are being retained in the original Central library.

University of Michigan

The University of Michigan, Ann Arbor, Mich., is served by the General Library with its 21 collegiate and departmental divisions, the William L. Clements Library of American History, the Legal Research Library and the Michigan Historical collections. These comprise approximately 1,400,000 vols., as well as several thousand valuable manuscripts, the General Library specializing in Greek and Coptic papyri, the Clements library in the history of the Americas and the Michigan collection in the history of the state and the university. The Law library of nearly 200,000 vols., contains statutes and decisions not only of English-speaking countries, but of Europe and South America.

Among special collections are those in English and American drama before 1850, 5,500 volumes. Shakespeare, 8,000 volumes; history of mathematics, 3,500 volumes dating from the 15th century to 1850; history of science, about 1,500 volumes emphasizing astronomy, physics and mechanics; history of medicine, about 1,700 early works in anatomy, surgery and internal medicine; imaginary voyages, including many editions of De Foe's Robinson Crusoe and Swift's Gulliver's Travels; French historical and scientific societies; Krieger Mycological Collection of 12,000 items; Walker Mollusk Collection of 2,000 books and 4,000 pamphlets; Ornithology, about 6,000 volumes, many of great rarity; Worcester Philippine Collection, 1,200 volumes; Netherlands history and linguistics, about 3,600 items; Parsons Collection of 6,067 volumes on social sciences previous to 1850; Stephen Spaulding Collection of 400 volumes on art and science of war prior to 1800.

The William L. Clements Historical Library at the University of Michigan, Ann Arbor, Mich., was founded by William L. Clements (1861-1934), Bay City, Mich., industrialist and regent of the university. The library has been expanded by the university, acting through the Board of Regents and the director of the library, Dr. Randolph G. Adams. It contains approximately 60,000 volumes in the Division of Printed Books, 150,000 pieces in the Manuscript Division, and more than 25,000 printed and manuscript maps in the Map Division.

Rare and famous volumes fill the heavily protected cases of the Division of Printed Books. Among the noteworthy items are the 1493 edition of the **Epistola** in which Christopher Columbus reports the discovery of the New World, and the Waldseemüller geography of 1507 which gave the name "America" to the two continents. Peter Martyr's contemporary accounts of the activities of the Spanish Conquistadores are supplemented by such works as the first printings of letters sent by Hernando Cortes. The reports of voyagers of many nations are present, expanded by the stories of the first settlers. Thus the voyages of the French, Cartier and the others, are flanked by the reports of the Jesuit missionaries in a great collection of the Jesuit Relations.

The entrance of the English upon the colonial scene is marked by a long list of scarce and much sought after books led by perhaps the rarest of all, Thomas Hariot's Virginia, London, 1588. Not far behind is the redoubtable Captain John Smith's True Relation, 1608.

The collection covers many phases of the development of the Americas, North and South. Among major collections on particular subjects are those of books by and about George Washington, Christopher Columbus, Amerigo Vespucius, Thomas Jefferson, the Mathers and the Adamses, John Wilkes, Tom Paine, Abraham Lincoln and Theodore Roosevelt. The Library's holdings of DeBry's superb series of voyages, published from 1590 to 1625, are probably without a superior.

In the Manuscript Division, the Clements Library is perhaps strongest in the Revolutionary period, although it begins long before and continues up to the present time. Here are housed the headquarters papers of many of the British commanders and leaders during the American Revolution, supplemented by papers of the patriots. Included are such names as Admiral George Clinton, the Earl of Shelburne, Sir Peter Warren, John Wilkes, Lord George Germain, Lieutenant General Thomas Gage, Lieutenant General Sir Henry Clinton, General Nathanael Greene and Brigadier General Josiah Harmar, commander of the first United States Army. The Hessians employed by the British are represented by the papers of Baron von Jungkenn, war minister of Hesse-Cassel.

More modern groups within the division are the important papers of James G. Birney and Rev. Theodore D. Weld, leaders in the anti-slavery movement. Here too are the papers of Michigan's first senator, Lucius Lyon; of Russell A. Alger, secretary of war under McKinley; and a collection of the correspondence of Theodore Roosevelt.

The Map Division parallels the book and the manuscript collections, supplementing and strengthening them. Maps from the fifteenth to the twentieth century illustrate vividly the course of American history. The division is particularly strong in its holding of maps printed within the present boundaries of the United States before 1800 and in its series of manuscript maps, many of which came with the papers of Clinton, Gage, Germain, Harmar, Shelburne and Loammi Baldwin.

University of Minnesota

The University of Minnesota Library, Minneapolis, Minn., early in 1949 reported 1,471,889 vols., 1000 pamphlets, on its shelves, and 27,416 serial publications being received regularly. In addition reels of microfilm increased to 3,101, chiefly reproductions of 10,000 early published books, and 1 incunabula were listed. The library has especially large collections of newspaper files, including rarities as the London Gazette from 1665 on, complete Times of London, the Wiener Zeitung Vienna from 1703 to 1915, and runs of many European newspapers, including those controlled Hitler, Mussolini and the Japanese before World II. Many public documents, European and American, are on file, with special emphasis on the cial records of the Scandinavian countries.

University of Missouri

The libraries of the University of Missouri, Columbia, Mo., contain 560,000 vols., 30,000 foreign theses, 10,000 maps and more than 12,000 reels of microfilm. The General Library has 415,000 vols. and cooperates with the State Historical Society of Missouri, which has 120,000 vols. and is housed in the same building. Western Americana includes collections of Mark Twain and Eugene Field, and J. Christian Bay collection acquired in 1942. The Western Historical manuscript collection, est. 1943, contains diaries and records. There are also American speeches and sermons, the Lawson collection of crime and criminology, the Flach collection of French law, 6,000 vols., the Lejay collection of classical philology. The Frank Lee Martin Memorial library of the School of Journalism has over 7,000 books. The microfilm holds a open files of 18th century newspapers, 80 files of American literary periodicals published before 1850, 190 files of American periodicals published between 1800 and 1825 and complete files of important newspapers, American and foreign.

New York University

The New York University Libraries, New York, N. Y., contain over 800,000 vols. in seven separate libraries. Washington Square Library is the largest with 350,000 vols. Branch libraries in departmental buildings include the Jewish Culture Foundation and the Institute of Fine Arts at 17 East 80th St. The general collection includes the labor publications amassed by the Labor Bureau, Inc., the Tariff collection in economics, and, in education, the collection of Will Monroe and the Henry Barnard papers. The Law Library, 95,000 vols., has a complete collection of Anglo-American reports and recently acquired the 12,000-volume library of Dean Frank H. Sommer. The Frederick Brown Collection of ancient legal documents contains 200 documents dated before 1600. The Commerce Library contains 75,000 vols. and maintains current business and financial services. The library of the Graduate School of Business Administration has 20,000 vols.; the Medical Library 40,000 vols., profiting by the amalgamation with the New York Post-Graduate Medical School; the Dental Library, 10,000 vols. The University Heights Library, with its departmental branches, has 200,000 books.

University of North Carolina

The University of North Carolina Library was organized in Chapel Hill, N. C., in 1795, when the first state university in America opened. The main library and 15 departmental libraries have 1,000 vols. and over 2,000,000 manuscripts and pamphlets. The collection of North Caroliniana contains 123,000 items. The Southern Historical collection of manuscripts, dealing with the plantation system, slavery, the Civil War, the Confederacy, etc., has over 2,000,000 items of extraordinary richness. Also: the Wilmer collection of 3 Civil War novels; the Archibald Henderson collection of American drama and Bernard Shaw's works; Spanish plays, 13,000 titles; a large Spanish-American collection; the Josephus Daniels collection of Mexican items, 604 vols.; the Bowman Gray collection of World War I propaganda; the Walter Raleigh collection, relating to his career and Roanoke colonies, 215 items; the Judge Parker collection of Nuremberg trial documents, 1,030 items. In 1949 the library received the Shakespeare collection of Dr. Samuel A. Tannenbaum of New York, 4,000 items. The library also has developed, since 1929, materials for studying the history of printing, from clay tablets and incunabula to the present.

Northwestern University

Northwestern University is served by two groups of libraries, one on the campus in Evanston (est. 1856) and the other on the Chicago campus, Lake Shore Dr. and Chicago Ave., Chicago. They contain about 950,000 vols., and many documents and pamphlets.

The Evanston group has about 600,000 vols., and includes the Charles Deering library, the Library of the Technological Institute and the Library of the School of Music. Special collections include the Greenleaf collection in classical philology and literature, 11,000 vols., 5,000 pamphlets; the Schneider and Schwitkis collections of German literature, 12,000 vols.; the Kaye collection on 17th and 18th century deism, 1,000 pamphlets; the Boas collection of anthropology, 4,500 vols., 9,000 pamphlets; the Biblioteca Femina, 3,000 vols. by women; the Spanish drama collection, 8,500 plays, and the Japanese collection, 4,000 vols.

The libraries on the Chicago Campus totaling approximately 350,000 volumes, comprise the Archibald Church Medical Library, contains 110,000 volumes, a large number of pamphlets, and a collection of over 4,000 medical portraits; the Dental School Library, containing more than 30,000 volumes; the Elbert H. Gary Law Library, containing some 137,000 volumes on Anglo-American law, comparative law, Roman law, international law, and criminal law; and the Joseph Schaffner Library of 73,000 volumes, chiefly in the fields of commerce and journalism.

Notre Dame University

Over 400,000 letters, documents and diaries relating to the early history of the Catholic church in the United States are among the valued collections of the library of Notre Dame University, Notre Dame, Ind. Also important are the Edward Lee Greene botanical library, 2,900 vols., and herbarium of 100,000 specimens; the Julius A. Nieuwland botanical library, 8,500 vols., and herbarium of 150,000 specimens, and the Dante collection, 3,000 vols., chiefly editions of the Divine Comedy, of which eight are incunabula.

University of Oklahoma

In the Treasure Room of the Phillips collection of the University of Oklahoma Library, Norman, Okla., are 6,000 rare volumes devoted to Indian and Western history. Thousands of letters, documents, photographs, etc., dealing with Indian life are in the Manuscript division. The Geology library has 40,000 geological works and studies of the oil industry.

University of Oregon

The University of Oregon library, Eugene, Ore., houses the Burgess collection of medieval manuscripts, incunabula and early printed books. In the field of Northwest history the library maintains an Oregon collection of books and pamphlets, a manuscript collection for personal papers, diaries and account books and a photograph and negative collection, which includes the Clarence L. Andrews Alaskan, the Lee Moorhouse eastern Oregon and the Peter Britt southern Oregon collections.

University of Pennsylvania

The Library of the University of Pennsylvania, Philadelphia, Pa., was founded in 1750 and contains the original books presented by Lewis Evans, as well as books given by Benjamin Franklin, Joseph Priestley, Louis XVI of France and others. It has the Henry C. Lea library of medieval church history, with an unequalled section on the Inquisition; the Furness Memorial Library, formed by the editors of the Variorum Shakespeare, including rare folios and quartos; the Macauley collection of 15th and 16th century Italian literature; the Rennert collection of Spanish drama; the Edgar Fahs Smith library of the history of chemistry; the Curtis collection of Franklin imprints and the Colwell and Carey collection on early economic history. The Biddle Law library contains 120,000 vols., and the Lippincott library of 100,000 vols., serves the Wharton School of Finance and Commerce.

Princeton University

Princeton University's main book collection is housed in the six-story Harvey S. Firestone Library, completed 1948. Preminently placed is the College of New Jersey room in which is exhibited, amid colonial furnishings, the original book collection, including surviving volumes from an early fire of the 474 books presented in 1755 by Jonathan Belcher, colonial governor.

Among important collections are the Grenville Kane library of early Americana, the Garrett collection of Arabic and western European manuscripts, the Gest collection of Far Eastern manuscripts, the Parrish collection of 19th century English authors, the Morgan Vergil collection, the Patterson Horace collection, the Rollins collection of western Americana, the Pierson Civil War collection, the Woodrow Wilson collection and books devoted to Cruikshank and Thomas Rowland. Large collections are devoted to foreign public finance, international law and diplomacy, railroad and corporation finance and industrial relations.

Subsidiary libraries, in art, archaeology, mathematics, graphic arts, health and athletics are located in other buildings. Prominent among these are the Marquand Library of Art and Archaeology, rich in the literature of Christian and Medieval art, the Raycroft collection on physical fitness and sports, and the Elmer Adler Graphic Arts collection of 4,000 prints and 8,000 books. In all, Princeton possesses 1,100,000 volumes and 500,000 other items.

Rutgers University

The Rutgers University Libraries, containing over 500,000 vols., include the libraries for the Colleges for Men, the New Jersey College for Women, and the College of Agriculture at New Brunswick, N. J., and libraries for the College of Arts and Sciences, Rutgers Law School, the College of Pharmacy, at Newark, N. J. In addition the libraries contain over 100,000 pamphlets and maps, and several hundred manuscript collections.

The largest special collection is the library of New Jerseyana which includes books, letters, and manuscripts of New Jersey historical and political figures; files of New Jersey newspapers, pamphlets, maps, and prints. Another collection is the Symington Library of first editions, manuscripts, correspondence, and memorabilia pertaining to English literature of the late 19th and early 20th centuries. It is especially rich in material relating to Swinburne, Borrow, the Brontes, Gosse, and Wise.

Other collections of merit are: agriculture, which is strong in printed material of the 16th, 17th, and 18th centuries; American almanacs and newspapers, gift annuals; Defoe, Cobbett, Freneau, Noah Webster, Walt Whitman, and Joyce Kilmer.

Stanford University

The Stanford University Libraries at Stanford, Calif., contain more than 1,119,000 vols., with an annual accession of 40,000 vols., and receive 12,000 periodicals. Among outstanding collections recently acquired are the Lee Simonson collection of working plans, sketches, for dramatic productions; 150 play scripts from the collection of Emilie Melville; the C. A. Browne Memorial Collection of 1,000 vols. covering the history of science; the James Wright Brown Journalistic Collection of 975 historic newspapers; 45,000 colonial and early American newspapers purchased from the American Antiquarian Society; the Webster Collection of Social Anthropology (1,500 vols.)

In the field of music Stanford recently acquired the original autograph manuscript of Pietro Mascagni's opera, Cavalleria Rusticana; the original score of Flotow's Martha; the manuscript of the symphony La Nuit Revecue by Bainbridge Crist and the John Barbirolli orchestration of the Bach chorale Sheep May Safely Graze.

Prominent among the special libraries is the Hoover Library on War, Revolution and Peace, begun by Herbert Hoover during World War I. The library building consists of a tower 285 ft. high containing a carillon of 35 bells cast in Belgium and a two-story lower structure, surrounding it, 122 ft. square, 30 ft. high. The Library has more than 50,000 official publications of all nations, maps, films, newspapers and the Hoover archives. The Hoover Research Institute makes studies of political changes with the help of funds from the Rockefeller Foundation, Carnegie Corporation, David Starr Jordan Fund and others.

Syracuse University

Syracuse University, Syracuse, N. Y., has 406,622 books in its Library, including the holdings of the New York State College of Forestry. Unbound documents and monographs number 39,924, and 2,411 periodicals were received. Special collections include the Stephen Crane Collection of books, letters and unpublished short stories; the Frederic W. Goudy Collection of manuscripts, type faces and publications of the Village Press; the Van Ranke library of history, 20,000 vols. collected by the German historian, Leopold von Ranke, and the Gerrit Smith collection of 45,000 documents, deeds, land books relating to central New York and 19th century America.

University of Texas

The library of the University of Texas, at Austin, Tex., has 890,000 vols. The resources for the study of American history include special collections in the fields of Texas, the South, and Latin America. The Texas Collection comprises 32,000 volumes exclusive of 9,300 volumes of Texas newspapers; it is the largest in existence. The Southern History collection, endowed by the Littlefield Fund for Southern History, numbers approximately 26,000 volumes, exclusive of 2,100 volumes of newspapers. The Archives Collection contains approximately 3,000,000 pages of manuscript, source materials for the study of each of the areas mentioned. For Texas there are the Spanish Archives (1731-1836), the Austin Papers (1820-1836), and the papers of many of her public men. For the South the papers of William Massie, Samuel H. Stout, Ashbel Smith, and O. M. Roberts are important.

The Latin-America Collection (45,000) is strongest in its resources for the history and culture of Mexico. Texas was a Spanish province (later Mexican state) for 250 years. The collection has for its cornerstone the Genaro Garcia library (25,000) acquired in 1921. It contained also important files of newspapers, and the personal papers of leading public men. To it were added the rare books and manuscripts of Joaquin Garcia Icazbalceta; the Luis Garcia Pimentel collection of newspapers, and the library of the late W. E. Stephens.

University of Virginia

Starting with a collection of 8,598 volumes assembled by the founder, Thomas Jefferson, the libraries of the University of Virginia, Charlottesville, Va., contain over 500,000 volumes, more than 3,000,000 manuscripts, and extensive map and print collections. The burning of the Rotunda (1895) destroyed many books, but some of the original collection survived, as did a portion of James Madison's library.

Special collections include the Tracy W. McGregor Library of rare books in American history and English literature, especially strong in Americana of the southeastern States; the Elizabeth Cocke Coles and the Bryd collections of Virginia history; the Lomb optical collection; the Edward C. Stone books on the history of printing; the Sadlier-Black collection of Gothic novels; the Ingram collection of Poe materials; the Hertz collection of the Greek and Latin classics; the Darwin evolution collection; the Mackay-Smith collection of 18th century chamber music; the Catesby Jones collection of modern French prints; and the John Bassett Moore collection on international law.

The University Library is one of the principal repositories of the papers of Jefferson; its manuscript collections, which began (1825) with the gift of the Revolutionary papers of Richard Henry Lee and his brothers, are strongest in the personal papers of Virginia's public men from William Strachey through Carter Glass. Its earliest official archives contain papers of Madison and Monroe as co-members with Jefferson of the original governing body.

University of Washington

The libraries of the University of Washington, Seattle, Wash., contain over 655,000 vols., with annual accessions of 30,000 vols. The industrial development of the Pacific Northwest has influenced their growth. The Chemistry branch has over 7,000 vols. specializes in wood pulp and paper chemistry. The Forestry branch has 400 vols. of publications dealing with lumber and paper industries. The Fisheries library is rich in serial publications, especially files of the U. S. Fisheries

ou and Canadian and British reports. The fine ry of the International Halibut Commission is housed on the campus.
e Pacific Northwest Collection contains 15,000 s and pamphlets relating to Oregon, Idaho, ington, Montana, Alaska and British Columt Unpublished letters, diaries, original maps, ative records of governors and congressmen business records of early Puget Sound lumber are included. The Far Eastern library has enriched by two grants by the Rockefeller dation; it has 2,700 vols. in Japanese, Chinese ngs approximating 80,000 pen, a collection of ng shu" and journals. Chinese, Japanese Soviet law books are a part of the Law ry of 106,652 vols. The Botany collection has notostat copy of the Gray Herbarium; the macy collection has over 200 pharmacopeias a strong collection in the health sciences is developed in the new University Health er. A large drama library has been organized r the direction of Prof. Glenn Hughes.

Western Reserve University

e Libraries of Western Reserve University, eland, O., owning in 1949 about 635,000 vols., prise a main university library of over 400,000 , two college libraries and one separate genreading room for undergraduates, the libraries ght professional schools and a dozen depart- al libraries. The main University Library, ed in Thwing and Hitchcock Halls, was started 26, when Western Reserve College was founded udson, O. The college and library were moved leveland in 1882 and renamed Adelbert College Western Reserve University. The present Uni- ty Library, organized 1929, contains the Adel- collection and the 100,000 vols. of Case Library, h, since 1846, has been operated as a general cription library and was transferred a few s ago by its trustees to Western Reserve.
the two college libraries, that of the Flora e Mather college for undergraduate women ains over 65,000 vols., and the library of eland College, the University's down-town ge, contains about 30,000. The library of the ol of Law has 75,000; the library of the ol of Medicine, with a new central reading n and stack, over 35,000 vols. Smaller libraries located in the schools of Dentistry, Pharmacy, ing, Applied Social Sciences, Library Science Architecture.
nong the larger collections acquired through or purchase are: one of the seven famous Cole ections of statutes and session laws of the ies and of the United States; the Edward W. ley Collection of periodicals in chemistry, 2,500 .; the Library of the Geological Society of erica; the Jared P. Kirtland Library of natural ory, 2,100 vols.; the Wilhelm Scherer Library 2,000 vols. in German literature and philology; Allen Dudley Severance Library of medieval ory; the Fritz Sage Darrow Collection of Helniana; the Henry E. Bourne Library of the ch Revolution and Napoleonic period; about vols. given by Henry Adams to the Adelbert College Library, some of which bear his marginal notes; the private papers of President Charles F. Thwing, Prof. Francis H. Herrick, Justice John H. Clarke, and Gen. Benedict Crowell; a collection of fine books of the Victorian period, many of them illustrated by the leading artists, given by the Haskell, Hanna, Harvey, and Cushing families of Cleveland; a collection of about 600 early American children's books, gathered by the School of Library Science, and the Paul Lemperly and Clara P. Sherwin Bookplate Collections.

University of Wisconsin

The library of the University of Wisconsin, Madison, Wis., contains an extensive collection of material on socialism and labor movements, originally formed by John R. Commons, augmented by radical writings published in Europe in the 19th and 20th centuries. It recently acquired a large collection of Russian literature and history. It has an excellent collection of German literature. The library is especially strong in scientific books, notably in bacteriology and biochemistry, including the library of the history of science of the late Chester H. Thorardson.

Yale University

The total number of volumes in the several libraries of Yale University, New Haven, Conn., exceeds 3,770,000. The annual accessions exceed 100,000, including 15,000 serial publications. The Sterling Memorial Library contains approximately 2,729,000 volumes.

The Library has emphasized American and English literature of the 17th, 18th, and 19th centuries, history (including Latin American), and economics, fields in which it possesses much newspaper, periodical and pamphlet material. Particular mention should be made of the collection of first and important editions of American belles-lettres presented by Owen F. Aldis, '74; the Elizabethan Club library of Shakespeare quartos and folios and of early editions of other Elizabethan writers; the Benjamin Franklin collection; the Henry R. Wagner collections of British and Irish economic and political tracts and works in the Latin American field; the Henry M. Dexter library of Congregational history; the Ezra Stiles manuscript diaries and itineraries; the Jonathan Edwards manuscripts; the Webb family manuscripts; and the Baldwin papers; the Edward M. House collection of papers dealing with American policy during the World War (1914-1918) and the Peace Conference; the von Faber du Faur collection of German literature; the William A. Speck collection of Geotheana; and the William Robertson Coe collection of Western Americana.

In Oriental history and literature there are the Edward E. Salisbury collection of Oriental books and manuscripts; the Count Landberg collection of Arabic manuscripts; the Alexander Kohut memorial collection of Judaica; the Rabinowitz-Asch collection of Hebrew and Yiddish books and manuscripts; the Japanese and Chinese collections; and the library of the American Oriental Society on deposit in the Sterling Memorial Library.

Frequency of Letters in English

ource: Dr. Charles Earle Funk and Reference Editorial Department of the New Standard Dictionary. n the work of computing the frequency of letters in use in English words done for the Funk & gnalls New Standard Dictionary, the following results were obtained. Capital initial letters were nd to have been used in the following ratio:

4	V	144	H	258	T	478
15	O	173	E	285	A	481
19	U	191	I	316	P	673
39	G	223	F	325	C	785
49	W	228	M	368	S	1000
57	R	244	B	388		
128	L	250	D	423		

f the lower case letters, the figures are:

22	g	168	u	296	s	680
26	p	168	l	360	i	704
50	y	184	d	392	a	728
55	w	190	r	528	t	770
88	f	236	h	540	e	1000
120	m	272	n	670		
152	c	280	o	672		

Order and frequency of single English letters, per 1,000 letters (Elementary Crytanalysis, by Helen Fouché Gaines):

E	123.1	L	40.3	B	16.2
T	95.9	D	36.5	G	16.1
A	80.5	C	32.0	V	9.3
O	79.4	U	31.0	K	5.2
N	71.9	P	22.9	Q	2.0
I	71.6	F	22.8	X	2.0
S	65.9	M	22.5	J	1.0
R	60.3	W	20.3	Z	0.9
H	51.4	Y	18.8		

The twenty commonest English words, compiled by Frank R. Fraprie from a count of 242,432 words of English text taken from fifteen English authors and many newspapers:

THE	IN	FOR	HE
OF	THAT	AS	BE
AND	IS	WITH	NOT
TO	I	WAS	BY
A	IT	HIS	BUT

The average length of English words is 4.5 letters per word. Source: *Secret and Urgent*, the *Story of Codes and Ciphers*, by Fletcher Pratt.

[1]Excludes $5,059 paid by Bureau of Engineering. [2]Includes 257,013 volumes undistributed. [3]Includes 1,336 blind registrants, undistributed. [4]Includes 16,934 volumes for the blind, undistributed.

American Colleges and Universities

:rce: This list of Senior Colleges and Universi- based on the 1948-49 Educational Directory e United States Office of Education. The er of students is of those studying for degrees and does not include those taking extension courses or casual courses in the summer schools. The number of teachers is for the regular courses leading to degrees. The data are from questionnaires returned by the institutions in 1949.
